Soldiers to Scholars a ‘win win’ for all

By ELLEN DAYSPRING
Staff Writer

Some of the greatest elements about UCF are some of its greatest kept secrets. Soldiers to Scholars, a two-year pilot program designed to pair men and women out of the military with at-risk inner-city children, is one of the best examples. The program, supported by the university and founded by UCF’s Director of Defense Transition, Alzo Reddick, began in the summer of 1995 and will end its pilot period in July this year.

“It is one of the most unique programs in the country and the university is involved with it,” Reddick said.

There are 22 soldiers in the program with an anticipated 30 more joining in the fall. STS is designed to help displaced military personnel seeking degrees primarily in education. Although the program is open to any military person, it is targeted to recruit African-American men, who have a low number of K-12 teachers compared with other groups. These men and women must spend a minimum of 30 hours a month working with inner-city children in tuition reimbursement, partial payment of rent and travel and book allowances.

But Cyrus Sharp, Director of Soldiers to Scholars, said most of the soldiers go above and beyond the minimum. “They fall in love with them (the children),” he said.

Sharp and his wife, Patti, came to the Rio Grande apartments almost two years ago to find two burned-out, flooded apartments. Today those once-devastated apartments, which were renovated with help from the Central Florida Building and Construction Trade Council, are now the Academic Support Center for the STS program. The center contains almost $60,000 worth of computer equipment and a satellite downlink system which can provide educational programming from anywhere in the country for the soldiers to use.

Governor Chiles was on hand last week to see UCF’s Soldiers to Scholars program. Governor Lawton Chiles gave his full attention to all at Clear Lake on March 14. In support of UCF’s ‘Soldiers to Scholars’ program, Chiles flew in from Tallahassee to endorse what he called a ‘win-win’ program. The state of education has been and will continue to be a forefront issue on the minds of everyone involved. Whether it is teachers, students, parents, board member or politicians, everyone has an opinion on the position of education. The country’s education system needs improvement, as Chiles will agree, but he also admits the Florida system is in need of repair.

“Td say it’s (Florida education system) pretty good, but we could do a lot better,” Chiles said.

First, Chiles would like to see more parents and community leaders.

Soldiers, cats, fish, kids and outlookers with cameras — Governor Lawton Chiles gave his full attention to all at Clear Lake on March 14.

The building blocks to the future of UCF

By DANNIE HELM
Staff Writer

What will UCF look like in the future? The University Master Planning Committee has the answer right now.

The committee, headed by Marty Wanielista, Dean of the College of Engineering, makes recommendations for all new building projects and submits them to President Hitt.

Hitt prioritizes the recommendations and submits them to the Board of Regents. The Board then allocates the budget and makes a final decision on what will be built.

Hitt said he hopes that as a result of the new construction UCF “will have much better facilities for students and parking will be somewhat better.”

UCF’s construction future includes buildings that exceed four stories, more parking garages and road widening.

“There are four considerations the committee takes into account when deciding on future building projects: need, the environment, safety and beauty,” Wanielista said.

“We need to balance classrooms versus offices versus student activity areas versus research space. We are very careful to examine the impact of construction on campus. Endangered species and runoff are taken into account and sewage treatment must meet state rules and regulations.”

Most of the construction planned at UCF is on the Public Education Capital Outlay list, but some projects are privately funded. These include additions to Greek Park and an Honors Center. The Board still must give its approval on these.

“I would say the average cost per year for PECHO would be about $16 million for the next three years,” Wanielista said.

Hitt said UCF receives the least amount of funding among Florida schools and provides the fewest number of square feet per student.

PECHO is funded by the state from taxes on utilities. Hitt said there is a proposal to expand this tax base to include solid waste disposal and cable. PECHO monies go toward academic structures only. Projects such as the new Student Union are funded by the Capital Improvement Trust Fund. This statewide fund comes from student fees which are bonded and dispersed every couple of years.

“Is the campus getting for its $48 million?”

Pete Newman, Director of Facilities Planning, has the answer.

For starters, a second parking garage. Garage E-2 will be identical to the one.

Peter Newman of Facilities Planning has the future of UCF before him.
Recycling at UCF in the dumps

By GINA HAWKINS
Staff Writer

Larry Ray unwinds from a long day of fighting fires by rummaging through University of Central Florida’s dumpsters. Ray, who works for the Orange County Fire Department, also works for Knight Cycle, UCF’s recycling program. Ray said he enjoys working for UCF because he can be outside and get away from the stress and pressure of the fire department.

While Ray collects the aluminum cans and cardboard on campus, he will not hesitate to “dumpster dive” and retrieve items that can be recycled, such as boxes of computer paper, envelopes and cardboard.

During graduation months when students are moving, Ray said 50 percent of the cardboard for recycling is pulled out of the dumpsters. He said he also finds bags of clothing and canned goods which he donates to local charities.

While cardboard and bags of clothing may be easy to spot and pull out of the dumpsters, aluminum cans are not. Ray said students are slacking on recycling, and it takes him too much time to pick them out of the garbage.

Ray said Knight Cycle only collects about 40 percent of the aluminum cans on campus. Ray said he gets almost none from the fraternities or residence halls.

“I would like to see the fraternities have competitions between themselves for aluminum can recycling,” Ray said.

Greg Mason, coordinator for Greek affairs, said the fraternity houses do not have a unified recycling policy. He said each house decides if it will recycle, and some may be more aware of Knight Cycle than others.

Tricia Panarello, resident assistant for Lake Hall, said recycling on campus may not be as accessible to people as it should be.

“I think there’s a lack of communication about it,” Panarello said. “If I wasn’t employed here as a resident assistant, I probably wouldn’t have found out about it.”

Panarello said she used to take aluminum cans from Lake Hall to her sister’s house in Oviedo to recycle because she did not know about Knight Cycle. Now she said there is a recycling bin in the lounge of Lake Hall that is well used.

Ashley Williamson, resident assistant for Volusia Hall, said when she tried a recycling program, it did not work.

“Either they dumped all of their stuff in the recycling bins or nothing at all,” Williamson said.

Ray said he has the same problem while collecting aluminum cans from the recycling bins in the buildings. He said he finds trash in them, even when the bins are next to garbage cans.

“We have to pick out all of the trash out of the bags,” Ray said. “That takes manpower and time.”

But manpower and time, along with funding, are things Knight Cycle does not have in abundance. Richard Metzger, coordinator for Knight Cycle, said Ray is the person in charge of collecting and transporting the aluminum cans and cardboard for UCF, though he said they are in the process of hiring another person.

Metzger said UCF is not funded to recycle, but the state mandates it. Money for Knight Cycle is limited to whatever profit it is earned from the recyclable materials making it a slow process to put recycling bins in the buildings that do not have them yet.

Metzger said the recycling bins are placed inside the buildings, near snack areas and next to garbage cans. He said bins will not be placed outside because the cost would be too high. They would have to be mounted to the ground so they could not be overturned.

Even though recycling bins are not outside, aluminum cans and cardboard can be placed next to the dumpsters for Ray to pick up.

“If people would take their cans and put them in the bag by the dumpsters, it would make my job easier and faster,” Ray said.

Larry Ray says UCF students are slacking when it comes to recycling.

I love money. Who doesn’t? Money is the essential need to get by. It is the gateway to happiness. We use money to get what we desire. Be it things of materialistic value such as lottery tickets (55 million, can you believe that?) or clothing, or things of necessity, such as food and housing. But when we think of money and how we spend it, do we think about our education? No, I didn’t think so.

Once again, there was a column in the Future ("Presidential Elections - We need to care more,") Feb. 19) to the general effect that the author doesn’t understand the "apathy" of the student body regarding student government elections. I don’t vote and I am not apathetic. I am never offered the option I WOULD vote for which is to abolish student government. I believe that the majority of students don’t want, don’t need and don’t vote for the services offered by student government. I cite as evidence the fact that less than 10 percent of the student body votes for student government.

Let’s look at what student government is about: First, all students are forced to pay a fee along with their tuition to support student government. These monies are appropriated by student government for a variety of campus services like CAB, intramural sports, student clubs, and special perquisites like fancy cars and laptop computers for those on the student senate. Except for the perquisites for student government people, the unifying principle behind student government is recreation. We are forced to pay extra for recreation on campus.

Recreational activities are an individual thing. Some people are socialites who party all the time and like group activities. These people benefit heavily from the forced paying of recreation money. Others are adult students, campus community.
College of Education hosts Showcase March 26

A CFF Staff Report

The University of Central Florida's College of Education will host its fifth annual Education Showcase in the Education Gymnasium on March 26 from 3-5 p.m. The showcase is open to everyone interested in exploring new methods of teaching. It will feature programs and strategies designed to enhance education in Central Florida. UCF students and faculty, as well as various community agencies such as Orange County Public Schools, Lockheed Martin/UCF Academy for Mathematics and Learning, Central Florida Zoological Park, Orlando Science Center and Sea World of Florida, will have exhibits.

For information, call 823-2489.

Scholarship house has resident openings

The BPW Scholarship House will have resident openings available for summer and fall term 1997. The Scholarship House provides a cooperative living program in which residents share responsibilities and costs necessary to operate and maintain the Scholarship House. Only those undergraduate female students who have demonstrated strong academic ability and who cannot attend college without substantial financial assistance are eligible to apply. Application packets are available in the Student Affairs Office, ADM 282. Application deadline is March 28 by 5 p.m.

For information, call 823-2851.

UCF-Brevard Campus hosts 1st career day

The UCF-Brevard Campus will host its first Career Day, co-sponsored by all of the Brevard Campus clubs and organizations on March 21. Career Day activities will be located on the third floor of the Clark Maxwell Jr. Lifelong Learning Center, 1519 Clearlake Road in Cocoa and runs from 2-5 p.m.

Highlights include workshops covering interview techniques and resume preparation, plus job interviews with several area businesses. For information, call Karen Bray, Director of Student Affairs-Brevard Campus at 632-1111, extension 65566.

Chiles hopes to improve education

From PAGE 1

encouraging the importance of higher education. Although it is equally valuable to prompt high school-aged students to attend college, the impact is more substantial if you start with pre-kindergarten kids, he said.

Chiles says this will assuage one of the biggest problems he sees with colleges now: the remediation of students who are unprepared and the money this detracts from other areas.

"We're spending too much money on remediating our kids that get to college and are unprepared," Chiles said. By influencing children to pursue higher means of education, you mentally prepare them for the commitment and responsibility that school requires, Chiles said. The benefit of this, as Chiles sees it, would be more money spent on enriched, smaller classes and on the resources needed to make institutions fully functional, like well maintained libraries.

"I'd like to see our libraries being kept up more and less students needing remediation," Chiles said.

The concern Chiles has about unprepared students and the loss of money as a result is becoming an even bigger issue as we approach another "bubble of baby boomers." However, in this term Chiles has already taken new money from the budget allowed from the government and used it to keep up the environment and the high quality of life on campuses.

The combination of this new money for a well-maintained institution and community support in the encouragement of children pursuing college will help improve some of the flaws with the system, Chiles says.

So where does UCF fit in terms of the state of education?

"I am impressed with UCF's facilities. I just heard today that NASA has signed a memorandum agreement with UCF and will be the lead school in that. That's important," Chiles said.

The growth of UCF in the past few years along with the proposed developments are becoming more apparent. Chiles also said the advanced position of UCF's laser technology adds to its reputation.

As UCF grows, other state universities do, too. There has been talk that states are going to start encouraging private schools above public institutions due to overcrowding and lack of funding. Although private colleges are considerably more expensive, talk has surfaced about more grants will be considered for those applying to such schools.

Chiles said this is not completely true.

"We're trying to make sure that our universities don't compete, but are in a partnership," said Chiles, pointing out UCF is an important part of that. "This is not a number's game, keep that in mind as well. If a school has space and nothing will be billed right away then that's important."

Chiles was not opposed to tuition grants going toward the private schools, saying education is the only key.

In the brief time Chiles had after the festivities at Clear Lake, he wanted to impress upon people the nourishment of dynamic programs and institutions. He used the "Soldiers to Scholars" program to illustrate this thought.

Thornton’s sharp storytelling pierces deep

By DEAN G. LEWIS
Entertainment Editor

A mentally challenged man who as a boy lost his mother and her lover with a sling blade and served 25 years in a sanitarium, only to return to his Arkansas hometown to start a new life, is at the heart of Billy Bob Thornton’s quiet character study, “Sling Blade.”

Thornton, who wrote “One False Move” and “A Family Thing” with Tom Epperson, takes sole duty as screenwriter, along with director and star, in a provocative and powerful adaptation of Karl Childers, a stage character Thornton created more than a decade ago.

Karl’s knack for fixing lawn mowers and other garden tools lands him a job at a local service shop. The money starts to come in, and he spends some of his first paycheck on toothpaste, canned meat and candy. Childers meets a neglected boy named Frank (Lucas Black) outside a laundromat. The lad, whose father blew his head to bits with a shotgun, finds a father figure in Karl, and they become best friends.

At home, family life is hell. Ruled by his mother’s obnoxious, alcoholic boyfriend Doyle (country singer Dwight Yoakam, in a commanding performance), Karl also finds protection in Karl and urges him to camp out in the garage. John Ritter (on a long road from TV’s “Three’s Company”) costars as Vaughan, the gay stockkeeper who works with Frank’s mother. Barely reconciled to date, Robert Duval, a close friend of Thornton’s, pops up in an effective cameo as Karl’s long-suffering father.

Thornton recently picked up two deserving Oscar nominations (Actor and Adapted Screenplay). His dialogue-heavy script is amazingly focused, yet it’s the transformation into Karl that’s often overwhelming. The man is sparingly dressed, probably meant as a sign of his slow-witted ways. Clad in nothing but baggy black shoes, Karl Childers makes an unforgettable and original character. It’s a portrayal so briliantly rendered that we forget it’s really Thornton who’s beneath the skin of this tough-minded simpleton.

**** (out of four) A+ 2 hrs 15 min. Rated R.

No 'crash' here

By DEAN G. LEWIS
Entertainment Editor

J.G. Ballard's underground cult novel finds a home in David Cronenberg; the weird, apocalyptic analogy between sex and metal still flourishes somewhat in the screen adaptation of "Crash". Car mishaps, scarred flesh, blood and broken glass have never been quite beautiful and disturbing at the same time. Cronenberg, whose best work remains his definitive '80s trio: "The Dead Zone", "The Fly", and "Dead Ringers", has risked it all by releasing "Crash" as a NC-17 sex huddle. But sex isn't really what Cronenberg's concerned about. With his film's awkward blend of hetero and gay love making as an undertow to the story's central theme, the audacious filmmaker creates a hypnotic, often slow translation of Ballard's 1973 tale: "Recovering the human body by modern technology", says Elia Kazan's Vaughan, a leader of a group of fellow car crashers. In one roiling scene, they recreate the James Dean accident as a creat ury road kill. When the cops come by to bust Vaughan's joint, the cult icon disperses his gang in the nearby woods.

 Vaughan lures a new test subject into the circle. He finds him in James Ballard (James Spader), a recent crash victim who collided head-on with Dr. Helen Remington (Holly Hunter), killing her husband. Ballard's wife Katherine (played by Deborah Kara Unger) consumes most of her man's sexual energy. She's a student pilot learning to fly. He's an accident survivor, who at first, struggles to get behind the wheel again. Rosanna Arquette turns in a small performance as Gabrielle whose body is almost bionic under leg braces and a torso vest. Are these other testaments to Cronenberg's metaphoric manifestations? Ride through "Crash" with a fastened seat belt, or otherwise a phobia may form. You may never want to get in an automobile again, and not wreck.

* * * 1/2 (out of four) B- 1 hr. 40 min. Rated NC-17.

Ormond and scenery skate beautifully on ice

Julia Ormond ("Legends of the Fall", "Sabrina") is excellent as Smilla Jaspersen, born crusader of solving mysteries, in Bille August's "Smilla's Sense of Snow", a stylish and intriguing take on Danish novelist Peter Hoeg's "Miss Smilla's Feeling for Snow". The bestseller, which changed its name when "Time" magazine named it Book of the Year (in 1992), gets the big screen translation by screenwriter Ann Biderman ("Primal Fear"). The new body of work is certainly Biderman's most ambitious and significant effort.

At the heart of the story lies its heroine of the title. Smilla is sixteen at once by the presence of Isaiah, a 6-year-old Inuit boy from Greenland. His sudden death from a fall off the rooftop of his apartment building leads Smilla on a quest to find out what really happened. Accompanied by a doctor named the Mechanic (Gabriel Byrne), she begins to uncover a plot deeper than the Grand Canyon. His sudden death from a fall off the rooftop of his apartment building.

Ballard's wife Katherine (played by Deborah Kara Unger) consumes most of her man's sexual energy. She's a student pilot learning to fly. He's an accident survivor, who at first, struggles to get behind the wheel again. Rosanna Arquette turns in a small performance as Gabrielle whose body is almost bionic under leg braces and a torso vest. Are these other testaments to Cronenberg's metaphoric manifestations? Ride through "Crash" with a fastened seat belt, or otherwise a phobia may form. You may never want to get in an automobile again, and not wreck.

Ruthless and effective, Smilla is a girl with a steel core. She's a student pilot learning to fly. He's an accident survivor, who at first, struggles to get behind the wheel again. Rosanna Arquette turns in a small performance as Gabrielle whose body is almost bionic under leg braces and a torso vest. Are these other testaments to Cronenberg's metaphoric manifestations? Ride through "Crash" with a fastened seat belt, or otherwise a phobia may form. You may never want to get in an automobile again, and not wreck.

In one rousing scene, they recreate the James Dean accident as a dreary road kill. When the cops come by to bust Vaughan's joint, the cult icon disperses his gang in the nearby woods.

Campus tram presentation highlights meeting

By DANIELLE MARABLE
Staff Writer

On March 6, the 11th session of the 29th UCF Student Senate met with the chief of police presenting a new campus tram to move students from parking lots closer to campus. This tram, and others like it, were used at the 1996 Summer Olympics to move people around Atlanta.

This week, the senate decided not to put off the forums and committee reports. Kudos went to Senator Elliott for helping to keep a full week of Spring Break next year. A proposal would have shortened Spring Break from Wednesday through Friday.

The senate then decided to first pass the Addendum Budget. This budget would give more money to different departments, including $70,000 to the Senate staff watch.

Sen. John Turner then announced the Campus Activities Board’s Popular Entertainment’s SIngled Out, Speakers, Concerts, Homecoming and Promotions.

Senator Day brought up the Campus Crusade for Christ bill that would fund the organization to show a movie about the life of Jesus at the reflection pond. The bill was cut short when senate was adjourned for not making quorum the week before.

There were also many arguments about hominums. For example, Senator “A” made an inappropriate comment to Senator “B” about Senator “B”’s sexual orientation. Senator “B” then returned an inappropriate hand gesture. Vice President George, yelling at both senators, reminded the senate there is a model of decorum and they need to follow it. A roll call vote was taken: 19 yes, 10 no, and 3 abstain.

Senator approved funding for Campus Crusade for Christ.

The UCF O-Club received funding to attend a conference in Georgia that will help further its orientation knowledge. The Student Association of Bangladesh’s bill to fund a Bangladesh Night passed through senate. The senate also passed a bill funding the Asian Student Union for an Asian Cultural Picnic.

The meeting was then adjourned. Senate meets every Thursday at 7 p.m. in the University Dining Room in the Student Center. All students are welcome.

Controlled substance stolen on campus

By LINDSAY MALANGA
Staff Writer

The Biology Department reported on Feb. 20 theft of a controlled substance.

Dr. David Washington reported to the UCP Police Department a 50-millilitre bottle of Pentobarbital that was used in his 8:30 a.m. Human Physics lab was stolen after a portion of it had been used to put rats to sleep.

Police officials took names of all students in his 8:30 a.m. and 11:30 a.m. classes in order to continue the investigation.

There have been no developments.

In other crimes reported by the UCF Police Department:

- A floor buffer valued at $1,000 and a back-pack vacuum valued at $386 were stolen from a locked closet in the Student Union on Feb. 21.
- Tajumul Rashin reported on Feb. 20 vandalism done to her vehicle. Rashin noticed a 4-foot long scratch on the left front panel of her car.
- Cornelia Stuart reported her wallet containing her driver’s license, credit cards, social security card and $40 was stolen from her book bag in building 21, room 125 on Feb. 21.
- A computer valued at $3,532 was stolen from room 326 of the Education Building on Feb. 20. No fingerprints were recovered.

STS program gives benefits to children in need

From PAGE 1

March 19, 1997 Central Florida Future

Central Florida Future • 13

blocks from Catalina Elementary, the school the children who they mentor attend.

"It's really good that we're there all the time. They [children] actually see us come and go, it's not like we have some wonderful house somewhere else. We don't leave them," said Sabrina Bishop, a STS participant.

Bishop came to the program in January after hearing about it through William Godlock who was already involved in the program.

"We try to have fun with them too so it's not that we're just in school all of the time," Bishop said.

On March 14, the program received huge recognition when Governor Lawton Chiles came to tour STS. He also released fish with the "troopers." From a boat recently donated to STS by the Florida Game and Fresh Water Fish Commission. This boat will be used by the soldiers and the "troopers" to maintain several area ponds as part of the 30-hour course at UCF.

"This program is a dynamite program. It's one of those wins situations," Chiles said. "The young men and women are winning, the kids are winning, and it's supplying an [abundance of] teachers, especially the very needed black male role models."

Running parallel to STS is a course at UCF whose curriculum is based on the effects this program is having on the surrounding community and all those involved. Sharp said at the end of the course there will be enough film footage of the program to produce a documentary which will possibly air on PBS.

"If we succeed at what we're supposed to do, be good role models and make an impact on these kids, then we'll receive more money to expand the program," Sharp said.

At the end of the two-year run, STS will be evaluated and the decision to continue and to expand to other cities such as Tallahassee, Jacksonville, Tampa and Miami will be made. The program is performance-based. STS has to demonstrate progress and effectiveness in order to receive more money and continue.

"It'll succeed if it gets nourished. We put some money in our budget this time supporting it. I'd like to see it expand and go into other places," Chiles said.

These men and women who once protected our nation are now protecting our nation's children. A program like this not only benefits the soldiers seeking an education and the surrounding community, and all those involved, it most importantly benefits the children who without such a support system may be lost forever.

"If someone doesn't change their [children] thinking that they're as smart as anybody else and they can do what anybody else does, that's [referring to prison] where they will end up," Chiles said.

Bi-Science and Engineering will be built behind the need over 7
Building spaces in the next five years," Hitt
expected in 14 months. Biology buildings.

Additionally student housing will
be built in the south­
: Projects

Tender strips of chicken, cheddar and Jack cheeses, authentic spices, onions,

students.

We are also looking at private
money for an Honors Center. We
would also like to have a Welcome Center staffed with people from admissions and financial aid with
visitor parking available. This
would have to be privately financed.

"We are looking at a lot of con­
struction, a lot of growth in the number of students. There is a
strong growth in the quality of students. UCF is currently third
among Florida schools in SAT scores [behind Florida, Florida
State]. As we hire faculty, lots of outstanding people want to come to
UCF. If we continue to get funding from the Florida legislature our fine faculty will become stronger."

Hitt's university's popu­
lation will reach 34,000 by 2000. Newman said the university popu­
lation is headed for 48,000 by 2010, 2015.

"The goals of the university's master plan is to maintain a buffer around campus, locate all facilities
with an inner node, athletics in the northern node and housing in the southern node. Every year we get a new
annual plan."

"It is very interactive. You can become fixated on the 2-D view, this allows us to see the shape of the campus
and how it is very hard to see - students are really surprised
(by the actual shape of campus)."

Can existing roads handle the increased student population and construction?
"Alafia [Trail] needs attention going north, but University [Bowlevard] can handle it," Wanielista said.
"I think the infra­structure is playing catch-up with growth, but the academic projects are right on. Right now 45,000 - 50,000 might be capacity, it will go up."

Wanielista said some campus preservation areas involve student input. The areas include the Arbor- etum, Cypress Dome and other cypress areas or areas identi­
ied as wetland, protected by water management regulations.

Some biology or engineering stu­
dents are hydrologically moni­
toring the wetlands. Others are involved with the storm water management plan and waste water treatment.

Students also conduct traffic
counts and surveys. The Physical Plant hires students to design read­
ways, parking lots and buildings.

"I welcome student input, they are welcome to e-mail me [wanieli@uicentre.ucf.edu] or come and talk to us about concerns they might have," Wanielista said.

"I want to make sure the campus develops in a way that benefits both students and faculty rather than just responding to special interests - we need everyone's input."

Women's art exhibit moves viewers to think

By MARK DEMAIO
Staff Writer

"Women's art exhibit moves viewers to think," March 19, 1997 Central Florida Future

"We can use this exhibit to bring together a study of history and politics with artistic work," said Dr. Carol Elizabeth Adams, Director of Women's Studies and editor of the exhibit's booklet. "The arts don't just give us pleasure, but they can also speak to us about very serious events in human history."

Adams also said it in important to see history from other views besides the male perspective.

"We can gain an awareness that women suffered ... and that women were involved in the resistance work," Adams said.

One person who gained an awareness and shared it with others was graduate teaching assistant Jennifer Borrelli.

"I think events that occur in history are very interesting," she said. "Especially hearing from voices that normally haven't been heard. We've heard a lot said. "Especially hearing from voices that normally haven't been heard. We've heard a lot said."

Borrelli took her oral communications class to the exhibit.

"I think if my students are going to speak, they need to have something to share with people," Borrelli said. "It is very important for people to look at things like this and think about them. It's peoples' duty in life to think about it and to figure out what it means to us. My main job as a teacher is to make people think."

Some students shared Bennett's feeling on the exhibit.

"Trying to put into words how powerful this exhibit is would cheapen it," freshman Kory Bennett said. "The only way to fully experience the emotions it evokes is to see it."

Unfortunately, the exhibit is no longer open, but there are two events remaining in the series: the "Women, Courage, and Resistance" panel on March 20 in the President's Dining Room at 7 p.m., and a showing of the movie "The Nasty Girl" on March 31 in the Business Administration Building (room 209) at 4:30 p.m.

For information, contact UCF Women's Studies at 823-6502.

Season ends too soon for women's basketball

By DEREK GONSOLIN
Staff Writer

For one reason or another, UCF felt its season deserved more validation than a semifinal exit from the Trans America Athletic Conference. It could have been the two, two-point losses during the regular season to No. 1 tournament seed Florida International. It could have been the three-game winning streak entering the game, which included the victory against No. 2 Jacksonville State.

But for the Knights, the season did end the right way: FIU 88, UCF 78.

As UCF's three seniors walked off the court for the final time, the feeling of a lost opportunity filled the air. "It doesn't feel like the season should be over," said senior guard Lakesha Anderson. Even without repeating as conference champions, UCF had a good season. After the tragic death of Coach Jerry Richardson, the Knights could have given up before the season even started. But interim coach Lynn Bria's straightforward and calm nature steadied the team early. Bria implemented an organized, half-court system that hid UCF's lack of depth and by the end of the season the team started working together.

Led by first-team all-conference selection and senior forward Shaniellite Saxon, the Knights' strong post game forced double teams, freeing other players to score. The senior finished the season as UCF's leading scorer (15.9 ppg) and rebounder (8.2 a game) and twice was named conference player of the week.

Sophomore guard Charyl Davis, a third-team selection, was regarded as the Knights' most consistent player by more than a few league coaches. Davis led the Knights in steals (71) and assists (112) and was second in depth at forward, a repeat of this season's 13-15 record may be all one can ask.

Davis will be UCF's go-to player next season. The returning leading scorer will have to make up for the graduating 31 points a game.

The loss of senior guards Gylaunda Henderson and Lakesha Anderson will hurt.

Seniors-to-be Kelli Murray and Jennifer Hill are competent guards, but at 5-foot-3 and 5-foot-5, UCF will either need to recruit well or hope the 5-foot-9 Kemira Anthony, who red-shirted this year, can step in immediately. Kate Petrek, who will be a junior, played little and looks to be a back-up next year as well.

The loss of Shaniellite Saxon's post game will be hard to replace. 6-foot-1 forward Charity McClendon is a wiry, long-armed defender without the offensive moves of Saxon. Six-foot-4 center Stacey DeVeaux had improved statistics from last year (7.2 ppg, 5 ppg from 1.2 and 0.6), but she will have to be more consistent next season.

Senior guard Gylaunda Henderson feels DeVeaux will be a go-to player next season. "Stacey's really gotten better since I've known her," Henderson said. "I wish I could see her what she does next year. She should do very well."

Sophomore-to-be LaDonna Larry will have to improve on her injury-plagued freshman season. UCF is to have any depth in the post. Larry did show some promise in the TAAC tournament, with 15 points and nine rebounds in two games off the bench.

Women's golf team struggles in Invitational

By MERIDYTH STANLEY
Staff Writer

After a top-notch performance at the Lady Gator Invitational, where the Knights finished sixth overall and had two top-15 individual finishes, the women struggled to finish seventh at the Peggy Kirk Bell Invitational hosted by Rollins College, March 10-11.

An exhausting 36 holes was played on day one in nine and a half hours in the heat.

Leading the pack was junior Hegre Fring, who started with a 77 but fell to an 88 the second 18 holes. Senior Jerry Hagan began with a 79 but also fell behind in her second round with an 83.

Freshman Linh Ngai shot 90-83.

Coach Jill Fjelstul said there are no excuses.

"All the teams played under the same conditions," she said. "It was an extremely long day and team-wise we just did not have it together."

The third round was led by Fring with a 75 which helped her tie for 16th overall. Berg finished with an 82. Hagan and sophomore Emma Soderlindh each ended with an 83.

Fjelstul said the course was playing moderately difficult.

"It was a tight course which doesn't allow for a lot of mistakes," she said. "It was all placement."

The women have a three-week break before the Kirk Bell Invitational hosted by Rollins College, March 19, 1997.
Women's crew team never rests in quest for success

By JEFF CASE
Staff Writer

UCF's women's crew team never get a rest, it seems. While most students were spending their spring break relaxing or sleeping until noon, the team did not enjoy such luxuries. Spending two hours a day, twice a day, the team needed the weeks to practice and prepare for the President's Cup Regatta on March 15. The team's sacrifice was well rewarded, as it recorded several strong performances.

The regatta, which featured 17 universities, had several state rivals and out-of-state programs, including Florida State, Stetson, Florida, Miami, Yale, Georgetown, Clemson, North Carolina and Purdue. Although Yale won, UCF made its presence known in several races.

In the varsity open eight qualifying round, the team finished second, placing ahead of FSU, Clemson and Purdue. In the final, the team came in fifth (13 seconds short of winning a medal), while placing ahead of Purdue and Miami.

The team also qualified for several other races. In the lightweight four qualifier, the team qualified while finishing ahead of Clemson and UNC. The team also qualified for the open four final, placing ahead of Stetson and FSU. In the lightweight four final, the team finished fifth, while at the open four final, the team finished sixth.

Senior Katie Arth simply explained the reason for the team's strong performances. "Our boat [the open four] was awesome today. We focused together and we have continuity." Arth said. "We may not have won the race, but we've won in our eyes by improving so much."

In the medal races, the team was equally competitive, finishing in the top four several times.

The freshmen/novice lightweight four placed fourth and finished ahead of UNC. The freshmen/novice four also performed well, finishing third, beating Clemson and Miami.

The team also fared well in the freshmen/novice eight, finishing fourth, ahead of FSU and Stetson.

The only women currently listed among the national rankings is UCF's Maria Tedik 30. While most of the team's competitors are unranked, Tedik is seeded at 94 in the nation. Also, Pelle Brunskog, ranked 77 in the fall, closes the season with a 14-2 record.

Tennis teams keep winning

By ABBY FEBLES
Staff Writer

While most of UCF prepared for a week of relaxation and fun, the tennis team gathered for six days of intense competition.

The Knights' rather hectic schedule included Miami of Ohio, Valparaiso, Marshall, and Davidson for the women and Southern Illinois-Carbondale, East Carolina and Illinois State for the men. There also were two double-headers (men and women) against Tennessee-Martin and Akron.

Regardless of almost daily meets where players competed in singles and doubles, UCF showed no signs of fatigue and its results proved it.

The men (12-2) completed sweeps against Duquesne on March 6, Southern Illinois on March 10, Tennessee-Martin on March 12 and Akron on the 16th. They also defeated East Carolina (7-2) while the Illinois State match was canceled after doubles because of rain.

The women's team (13-1) didn't give opponents many opportunities to get on the scoreboard either. Of the six matches played, four ended on sweeps for UCF while Davidson and Miami (Ohio) went home with only one out of nine possible points.

In addition to sweeping scores and an all-winning week, UCF tennis has yet another reason to celebrate. As of March 4, three singles players and one doubles team are nationally ranked.

The new rankings determined by the ITA's National Ranking Committee place Matias Akesson, UCF's No. 1 seed, at No. 109 in the nation. Also, Pelle Brunskog, UCF's No. 2, appears at No. 75 and the doubles team of Akesson and Teddy Tandjung is No. 30 in the U.S.

The only women currently seeded in UCF's No. 1 Maria Widyadharma at 63. Widyadharma, who was ranked 77 in the fall, closes this week with a 14-2 record.

Miller leads track team's charge into outdoor season

By JEFF CASE
Staff Writer

The UCF women's track and field team finished its indoor season on Feb. 27 at the Nike Fast Times meet in Gainesville, and once again, sophomore Christy Miller led the way.

Miller broke her school record for the 3,000-meter race, finishing with a time of 10:25.73 seconds. She was one of three runners to finish in the top 10 in any race. With her time, Miller qualified for the NCAA championships.

The team also received strong performances from Megan Rodell and April Vitori, who both finished in the top 10 in the 5,000 meters. Rodell's time of 18:35.2 and Vitori's time of 18:47.0 were personal bests.

Sophomore Kim Halverson made a strong appearance at her final indoor meet, finishing 10th in the 55-meter hurdles and 15th in the 200-meter hurdles.

The team is looking toward the start of the outdoor season. On March 21, Vitori, Miller, Rodell, and Susan Hartley will make up the UCF 5,000-meter team which will compete at the Florida State Relays. The women's team will begin its outdoor season on March 23 at the UCF Spring Break Invitational. The team will compete against the men's and women's teams from Ohio State and Tulane, and against the University of Tennessee's women's team.

Coach Marcia Mansur-Wentworth thinks she will field several quality squads.

"We have a deep distance crew and are deep in the throw [discus, shot put, javelin] group," Mansur-Wentworth said. "Our hurdlers are looking strong and we are fast improving in the middle distance."

The team also should be strong in the 3,000- and 5,000-meter races, fielding a relay team consisting of record holder Miller, Vitori, Hartley and Rodell.
Marco Ramirez has 34 strikeouts through 23 innings and a 1.57 ERA.

March 19, 1997

EDGE

Baseball team feasts at home

By KEN JACKSON

Staff Writer

Spring Break was no vacation for the UCF baseball team. In the span of 10 days, the Golden Knights played nine home games, winning eight.

The baseball-fest began last weekend. On March 7, UCF defeated Siena (N.Y.) College 19-0 and 6-1. The first game of the doubleheader included a 14-run eighth inning, keyed by three Saints' errors.

The Knights won both ends of another doubleheader on Saturday, winning 4-1 and 3-2. Marco Ramirez closed both wins, combining for 11 strikeouts in 4.1 innings.

Golden Knights' pitchers gave up no earned runs in those games, prompting mixed emotions from pitching coach Greg Frady.

"The pitching performances were impressive, but runs are runs," Frady said. "They don't look any different on the scoreboard if they're unearned. We'd rather just not give up the runs because they're going to come back to haunt us in close games."

The Knights were beaten Thursday night — by an all-day deluge that washed out their game with the University of Maine. The Bears beat UCF Friday night 7-6 in 11 innings, despite two home runs by third baseman Dustin Brisson, snapping the Knights' six-game winning streak.

Coach Jay Bergman was so upset at the loss and the four errors he left his golden retriever, Slugger, at the field.

"I just got so mad about all the errors Friday night that I just got in the truck and left," Bergman said. "Thankfully one of the players was holding him when I got back to the park."

The Knights started a new streak Saturday in an unusual triple-header. In the morning, UCF sent Lehigh University back to Philadelphia on the losing end of a 15-2 romp. Pat Williamson, Bryan Bruce and John Opden each drove in three runs, and Brian Gomes and Richard Healey pitched impressively in their first outings of the year.

The rain on Thursday prompted an impromptu double-header with Maine following the Lehigh game, and junior Todd Bellhom shined. He pitched a one-hitter in the first game, facing the minimum 21 batters in seven innings, as UCF won 5-0.

Showing his versatility, he homered and doubled and had four RBIs as the designated hitter in a 5-4 victory. Pitcher Matt Luboszyński hurled a complete game, striking out five.

"Todd wasn't feeling well before the game he pitched," Todd's father, Ted, said. "He only took two bites of his sandwich. It's funny how things happen like this in sports."

On Sunday, UCF downed Illinois-Chicago 5-1. Adrian Cardenas doubled in the winning runs in the sixth inning, and George Schmidt continued the impressive streak of starts by allowing a lone run in seven innings.

Errors (42 in 27 games) remain a problem for the Knights. Of the 124 runs they've given up on the year, 38 were unearned.

"When you're on, you're on, and I've had it lately," Riggs said. "The teams aren't giving us much credit any more."

The Knights host Stetson on Friday at 7 p.m. and a Saturday doubleheader included a 14-run eighth inning, keyed by three Saints' errors. The Knights won both ends of another doubleheader on Saturday, winning 4-1 and 3-2. Marco Ramirez closed both wins, combining for 11 strikeouts in 4.1 innings.

Golden Knights' pitchers gave up no earned runs in those games, prompting mixed emotions from pitching coach Greg Frady.

"When you're on, you're on, and I've had it lately," Riggs said.

The team won't get much of a breather. The Knights host Rutgers for three games this week and have five next week. Next week also marks the start of TAAC conference play.

The Knights host Stetson on Friday at 7 p.m. and a Saturday doubleheader at 1 p.m. in the UCF Baseball Complex.

The baseball-fest began last weekend. On March 7, UCF defeated Siena (N.Y.) College 19-0 and 6-1. The first game of the doubleheader included a 14-run eighth inning, keyed by three Saints' errors.

The Knights won both ends of another doubleheader on Saturday, winning 4-1 and 3-2. Marco Ramirez closed both wins, combining for 11 strikeouts in 4.1 innings.

Golden Knights' pitchers gave up no earned runs in those games, prompting mixed emotions from pitching coach Greg Frady.

"The pitching performances were impressive, but runs are runs," Frady said. "They don't look any different on the scoreboard if they're unearned. We'd rather just not give up the runs because they're going to come back to haunt us in close games."

The Knights were beaten Thursday night — by an all-day deluge that washed out their game with the University of Maine. The Bears beat UCF Friday night 7-6 in 11 innings, despite two home runs by third baseman Dustin Brisson, snapping the Knights' six-game winning streak.

Coach Jay Bergman was so upset at the loss and the four errors he left his golden retriever, Slugger, at the field.

"I just got so mad about all the errors Friday night that I just got in the truck and left," Bergman said. "Thankfully one of the players was holding him when I got back to the park."

The Knights started a new streak Saturday in an unusual triple-header. In the morning, UCF sent Lehigh University back to Philadelphia on the losing end of a 15-2 romp. Pat Williamson, Bryan Bruce and John Opden each drove in three runs, and Brian Gomes and Richard Healey pitched impressively in their first outings of the year.

The rain on Thursday prompted an impromptu double-header with Maine following the Lehigh game, and junior Todd Bellhom shined. He pitched a one-hitter in the first game, facing the minimum 21 batters in seven innings, as UCF won 5-0.

Showing his versatility, he homered and doubled and had four RBIs as the designated hitter in a 5-4 victory. Pitcher Matt Luboszyński hurled a complete game, striking out five.

"Todd wasn't feeling well before the game he pitched," Todd's father, Ted, said. "He only took two bites of his sandwich. It's funny how things happen like this in sports."

On Sunday, UCF downed Illinois-Chicago 5-1. Adrian Cardenas doubled in the winning runs in the sixth inning, and George Schmidt continued the impressive streak of starts by allowing a lone run in seven innings.

Errors (42 in 27 games) remain a problem for the Knights. Of the 124 runs they've given up on the year, 38 were unearned.

"When you're on, you're on, and I've had it lately," Riggs said.

The team won't get much of a breather. The Knights host Rutgers for three games this week and have five next week. Next week also marks the start of TAAC conference play.

The Knights host Stetson on Friday at 7 p.m. and a Saturday doubleheader at 1 p.m. in the UCF Baseball Complex.
Bria's future to be determined soon

By DEREK GONSOLIN
Staff Writer

As the final horn sounded on Central Florida's season-ending loss in the semifinals of the TAAC tournament, the women's basketball team no longer had a coach.

Hired on an interim basis on Sept. 10, 1996, Lynn Bria's contract ended with the March 7, 88-78 loss to Florida International.

"It's been a great experience," Bria said as she slung an equipment bag over her shoulder. "But it really doesn't matter who gets the job, I'm still going to recruit in the meantime."

Bria took over the defending TAAC tournament champions from Jerry Richardson, who was killed in a car accident Aug. 30, and made them a better team in 1997. The Golden Knights had a better conference record (9-7 compared to 1996's 7-6) and finished higher in the TAAC (fourth compared to sixth).

The main difference: UCF did not win the tournament.

One reason for not repeating was the Knights had to play No. 1 seed FIU. In the 1995-96 tournament, UCF never had to play the Panthers, who lost in the semifinals.

But that could prove very little comfort to Bria if she is not hired.

On March 18, a committee selected three out of 60 applications for the vacant position to give to Athletic Director Steve Sloan. Sloan, who is expected to name a coach within a week, said Bria should be one of the applicants.

"When the coach (Jerry Richardson) died, it's difficult on the next coach," Sloan said after the loss to FIU. "But I think Bria's done an excellent job."

Bria said her experience at UCF, whether or not it will extended, has been a good one.

"I would love to stay at UCF," Bria said. "I think it's a great place and the administration here is super. It's been a great experience for me regardless of what they do."

Senior guard Lakesha Anderson, who considered Richardson a father figure, said Bria was an interesting but necessary change.

"When she first came here, we were like sisters," Anderson said.

"But she put her foot down when it came down to basketball. And with the way things happened, she being as straight forward as she was, it was probably the best thing for us."

One reason Bria would come back is to have a chance to start a solid basketball program at UCF.

"I think the men's and women's teams need to get together and market themselves," Bria said. "UCF could really build something here."

"For Bria's sake, one can hope she is here to see it through.

"I am going to coach somewhere, because I love to coach and I enjoy the game," Bria said. "I hope I do get the opportunity to stay, because it's a great place and a great situation."

Men's golf team wins Ashworth Invitational

By KEN JACKSON

Junior Jason Opal fired a final-round 70 and won medalist honors as the UCF men's golf team marched to victory in the 89th Sanderson Spring Break at the University of San Diego Ashworth Invitational at Shadowridge Country Club in Vista, Calif.

UCF finished 15-over-par 879, eight strokes ahead of runner-up Hawaii in the field of 18 schools. The win was UCF's first since the Trans America Athletic Conference championship last spring.

Opal posted a three-round total of 211, five under par. It was his second career tournament victory. Sophomore Jeff McPheron also played well for the Golden Knights, finishing sixth, 10 shots behind Opal.

"I had practiced all week after the previous tournament, and had been hitting the ball real well," Opal said. "Then I played real steady and consistent in this tournament. I'm really, really happy."

Other UCF finishers included Simon Sainte (tied for 16th), Jeff Brantele (T27) and Brian Bombardi (T8).

The victory followed a lackluster 15th-place showing in their first spring tournament three weeks ago.

"Everyone played terrible the first two rounds in Mississippi," Coach Kip Minter said. "Then something clicked in the final round and they shot 287 [1 under par]. We did a lot better in San Diego. The kids played more toward their potential."

The Knights opened an eight-shot lead after the first two rounds and coasted to victory despite giving a little ground in the final round.

"The guys were a little nervous leading the tournament that final day," Minter said, "but they played with just about anybody — when they're on their game. The sign of a really good team is how you compete when you're not on."

"We used that final round in Mississippi as momentum for us," Opal said. "We carried that through this last tournament. Hopefully we can keep riding it into our next tournament."

That chance will come Friday. The Golden Knights travel to Birmingham, Ala., for the Blue/Grey Intercollegiate, hosted by the University of Alabama.

Transition game suits Riggs well

By JEFF CASE
Staff Writer

He still feels it.

Second baseman Eric Riggs, who played baseball and basketball for UCF last year, said there have been times he's thought about a return to the hardwood.

"When I'm at [UCF basketball] games, I'm kind of anxious to jump back out there," Riggs said.

"I wonder, 'What could I do to help the basketball team?' Riggs said, his improve ment.

"I concentrate on baseball ... I've had a lot more time to improve on fielding than I did on baseball,' Riggs said.

But that could prove very little comfort to Riggs, one of five Knights among team leaders in several categories including batting average (.330), slugging percentage (.550) and home runs (five).

Riggs, one of five Knights to start every game, is leading the team in hits (36), at-bats (109) and total bases (60).

Riggs said not playing basketball has been the main reason in his improvement.

"Having the full off [from bas­
ketball] gave me the opportunity to get in the weight room and concentrate on baseball ... I've had a lot more time to improve on fielding and hitting," Riggs said.

Riggs said, Riggs, a business major, said he left basketball to prove he could play baseball at the college level.

Eric Riggs has been an offensive spark for UCF, ranking among the team leaders in several categories.

Much like his idol (former New York Yankee Don Mattingly), Riggs said he approaches each game trying to do whatever it takes to win.

"As long as you go out every game thinking you're going to beat the other team, nothing else really matters," Riggs said.

Riggs joined the baseball team last year on March 16 after the basketball team was eliminated in the NCAA tournament. It didn't take long for Riggs to find his stride, as he started in 27 of his 36 games. He recorded a base hit in 22 of his 23 final games and is striving for consistency again.

"I still have to prove I can keep this up all year," Riggs said.

"Coach Jay Bergman said that shouldn't be a problem."

"I was the other team, nothing else really matters," Riggs said.
