Students spend their summer whale-watching

By NICOLE KING
News Editor

Two mornings a week, from 6 a.m. to 8 a.m., UCF biology major Dottie Byron watches whales. Two to be exact: Taima, a mother killer whale and her baby. Byron enjoys her job but not the hours. "Sometimes I dread having to go," she said, "but I'm really glad I'm doing this.

For many, the idea of becoming a marine scientist conjures up images of dolphins, sharks and beautiful beaches. For students at UCF, the reality does include beautiful scenery, but also a lot of hard work and lesser known marine life.

In January, renovations were completed on Feller's House Field Station enabling UCF to have full access to a functioning field laboratory. Feller's House was given to the Central Florida Consortium of Higher Education by the National Park Service in 1990.

Feller's House Field Station. "The people that lived there when the space center was built were allowed to continue to live there until their death, then it became government property. The National Park Service decided that the house was too nice to just tear it down, so they gave it to the consortium.

The consortium consists of UCF, Brevard Community College, Seminole Community College, Lake Sumter Community College, Valencia Community College and Daytona Community College.

UCF has had a role in keeping the facility active since 1990.

Study guides help to organize information

By LINDA RAMOS
Staff Writer

Study guides are an essential part of the study process. Some professors provide study guides to students; however, because it is not so in most cases, you can create your own study guides.

By definition, a study guide is a tool a student uses to organize information efficiently so as to fine-tune the study process. Richard Hooker of the Web University Learning Skills program points out that the study guides’ purpose is threefold: (1) to present significant information in hierarchical groups; (2) to outline topics; and (3) to demonstrate the underlying purpose of the information.

As discussed in York University's pamphlet General Strategies for Studying and Self-Testing, creating a study guide should follow basic rules. First, pay attention to the key ideas being presented in readings and lectures. Second, understand these ideas by reorganizing them in your own words. In your notes, you may want to add side comments next to the material that you have questions on or find to be the most relevant. Third, organize the information so that all material regarding one topic is placed together.

The third step—organizing the material—is the step most students feel lost doing. How do you organize information? There are three basic formats: the time-line, comparison charts, and concept mapping.

The time-line as explained by Carol Kanar in The Confident Student is used to organize information on a chronological continuum. Time-lines can be used to study not only dates of historical importance but also the development of theories, the etymology of words, the creation of policies, etc. A similar relative of the time-line is
UCF research unit wins spot in computer convention

UCF’s Institute for Simulation and Training (IST) will have a major exhibit at this year’s SIGGRAPH ’98 conference.

The exhibit, titled “Media & Mythology,” beat out several competitors who also submitted proposals for their plans for the space. The exhibit will combine the ancient tradition of storytelling with new technology and media resulting in three interactive experiences.

The “Man and Minotaur” event will be a fully immersive, virtual reality version of Dedalus’s Labyrinth in ancient Crete. Visitors will be outfitted with a helmet and sensors. They will then portray two ancient combattants [sic] through each other to amaze. Three participants will also portray the gods that either help or taunt the players.

The second event is the “Video Totem.” The modern totem pole is made of monitors and the keyboard attached to the exhibit has keys bearing pictures instead of letters. Each picture represents an action or gesture. The visitors can create their own mythologies to be displayed on the totem pole throughout the convention hall.

The third exhibit is called the “Dear Oracle” and is a modern take on the ancient art of tarot card reading. Modern interpretations of the tarot cards will be used to tell the fate of participants.

The SIGGRAPH ’98 convention will be July 19-24 at the Orange County Convention Center.

The SIGGRAPH ’98 platform. “That could be a big money saver as a training tool for bus drivers and train operators too.”

In an effort to verify that the system does work, UCF engineers have loaded a mile of Gemini Blvd. into the computer and are driving the stretch of road in their own cars and then again in the virtual car to compare the two. If the simulator will work recreating an existing road then it will work creating a realistic virtual road.

• Art from the former Soviet Union will be on display for the first time ever in Central Florida from Aug. 20-Sept. 25 at UCF’s Art Gallery. The exhibit called “Darker Shades of Red: Official Art and Imagery of the Soviet Union, 1917-1991” will include posters, paintings, sculptures, banners, military and civilian medals and other memorabilia.

• Propaganda posters are included in the collection as are paintings in the Social Realist style depicting events from Soviet history and important leaders like Lenin and Stalin.

• It is a unique opportunity for us to show a culture most Americans do not know much about,” said gallery director Kevin Haran. “These artists were tools for propaganda. Everything in their imagery, even the colors they used, had to be approved by officials.”

An opening reception for the show will be held Thursday, Aug. 20 from 5 p.m. to 7 p.m. The gallery is open Monday-Friday, 9 a.m. to 4 p.m. and starting with this show, Saturdays from noon to 5 p.m. Admission is free.

The political science, philosophy and history departments at UCF will also present a symposium on Soviet Realist Art in the gallery on Wednesday, Sept. 23 at 1 p.m. A lecture by Russian Area Studies expert Galina Dineiko will be followed by a discussion by history and philosophy professors.

The following items will be on display in the library during July 1998:

3. “Networking with the Community to Enhance Business Leadership,” by Don Hoke, director for the Center for Executive Development.
4. “Patents: Why Did I Not Think of That!” by Peter Spyers-Duran, Reference Department, Library.

Students who develop own study guides fare better in classes

From PAGE 1

the process diagram. Simply, the process diagram describes the steps of a method (e.g., Step one, two, three...). Katar also describes the comparison chart. The chart is comprised of columns and rows comparing and contrasting anything from processes, theories, definitions to formulas. This chart is a quick way to dispel confusing ideas between similar concepts. The concept map is advocated by The Learning Skills Program at the University of Victoria in British Columbia, Canada. Concept mapping is ideal for identifying relationships between ideas. To construct a concept map, use unlined paper and print. Print the main ideas and topics in all caps. Around these topics, write your notes that deal with the topic. Connect your notes to the topic with branches (straight-lines) or arrows. Circle similar groups of ideas. For ease, you can even color code the concept map each topic in a separate color.

The advantages of study guides are numerous: all relevant information can be found in one place; it's a quick and easy way to get a study overview; ideas of grave importance are emphasized; and relationships among concepts can be shown. Just as you would use a map for directions to find an address, use the study guide to direct your education.

FINALLY... A Fantasy Game For You... The College Football Fan!

College Sports Publishers Association and your school magazine bring you the ultimate way to squeeze more enjoyment into your College Football Weekends! They have handed you the ball and they want you to turn your College Football knowledge into cash!

How Do I Play?

+ Select 8 teams (no more or less) from the list below without exceeding your $10 million play budget.
+ Your 8 teams will score points each week based on how they perform on the field. See point scoring system below.

Fantasy Cup College Football Scoring System

Every Point Scored = 1 point

Bonus Points (Offense)
Passing Yards over 300 = 5 points
Rushing Yards over 100 = 5 points
Every Touchdown = 1 point
Every Interception = 1 point

Bonus Points (Defense)
Passing Yards under 100 = 5 points
Rushing Yards under 100 = 5 points
Every Sack = 1 point
Every Interception = 1 point

Bonus Points (Team)
Win = 5 points
Loss = 0 points
Tie = 0 points
Shutout = 5 points
Getting Shutout = 5 points

+ Receive team results by mail, on-line or toll free.

What Do I Win?

2nd Place $2,500
3rd Place $1,000
4th Place $750
5th Place $500
6th-10th Place $250
11th-20th Place $100

Weekly Prizes
$800 awarded after each week to top 20.

Greek Budget Affairs
To Whom It May Concern:

First let me identify myself as the writer of this letter. My name is Bart Marek and I am currently the President of the Interfraternity Council and an officer of the Greek Council here at UCF. My main duty as an officer of both organizations is to look out for the interests and well being of the entire Greek system. I am writing this letter as the necessary response to a recent article describing the SGA relationship to the Greek Council.

The impression that I get from Mr. Turner’s articles is that the SGA apparently does not approve of the Greek System, further more oppose any support for the Greek system and will continue to do so. In Mr. Turner’s most recent article (Senate finishes up budget, June 24 1998 Issue) he describes the approval of a few Senators in response to the zero budgeting of Greek Council through the OAF budget. What the article did not mention is that the rationale given by these few Senators for zero budgeting Greek Council is based on false assumptions made by select persons in SGA. What I mean is simply that when the OAF committee recommended zero budgeting Greek Council to the Senate, it was done with misinformation.

The main rationale which I read in the June 24th article is that Greek Council was zero budgeted because its account still had $10,000 left from the previous years allocation of $17,000 from the OAF budget. The article went so far as to quote Matt Henderson regarding the zero budgeting as saying, “This should be a sobering message to the Greek Council coming from a Senate that is over fifty percent Greek.” In my opinion, this is really a sobering message to the student body of Senate’s inability to make educated decisions.

First of all, Greek Council currently has around $100 in its account. Second, the $10,000 left over according to the Senate account that was referred to in the article, was given to Greek Council in July of last year. That money was meant to be spent in June of this year to prepare for mailing information to all incoming students. What this means is simply that there was an overlap in the budgeting. When the Greek Council met with the OAF committee, about a month ago, it did have money in its account specifically set aside to be spent late in the month of June for Orientation sessions. What I find even more disturbing is that the OAF committee never asked the officers of Greek Council about the money in question at the budget request meetings or at any time after. Instead of anybody involved with student government coming to Greek Council to ask about this misconception the Student Senate waived the regular rules and procedures during its budget meeting so that the budget could go through in one night without any input from any club or organization regarding possible problems with the budget.

Senate Appropriations Chair David Siegel said, “I am proud in the way the Senators worked on a budget with so little money to work with.” From what I understand the OAF Committee ended up with $4.8 Million dollars to allocate (I wish I had so little money to work with). There are about 200 different clubs and organizations at UCF which are eligible for funding through OAF. If you equally divide that money it comes out to about $24,000 per club, and I would be willing to bet that not every club and organization applied for money this year. So with a rough estimate of $24,000 per club and organization the Student Senate found it appropriate to zero budget the largest club and organization at UCF, the Greek Council with roughly 2,000 members. While other organizations with membership only in the double digits were allocated thousands of dollars.

One of the most disturbing aspects of this problem is thatSen. Halscott, just elected to Senate Pro Tempore and a member of the OAF committee, found it in his values to approve the zero budgeting. The reason why I find this so disturbing is that Sen. Halscott is also an officer of the Greek Council. Sen. Halscott stated in a recent article that he looks to make more clubs, and organizations aware of what the Senate can do for them in respect to funding. If Sen. Halscott cannot support funding for an organization which he belongs to, I would love to see what he can do for other clubs and organizations he is not involved in.

I wish I knew what these individuals in SGA really wanted and what they are trying to do. But I guess that that is the game of politics even if it is on only on a college level. As the President of the U.F.C., I have a duty to do my job to the best of my ability. And I hope that I do not discredit the names of those good persons in SGA while doing my job.

So while the Student Senate finds it in its power to zero budget the largest club and organization on campus, Greek Council will continue. It will continue to do its job by providing students the opportunity to develop as leaders, make lifelong friendships and receive a complete college experience through the Greek community.

Sincerely,

Bart Marek
LPC President

Police search for rape suspects

On June 17, 1998, a rape was reported at UCF. There are two suspects in this crime: a white male, early to mid 20s, 5'7"-5'8", 200 lbs., shoulder length pony tail with blond roots and a darker color on the ends. The suspect was also described as having a tattoo on his right wrist of a tribal symbol, 1/2" braided, intertwined design. He was wearing a blue football-type mesh jersey, gray sweat shorts or jogging shorts and a silver watch on his left wrist.

The second suspect is a white male, early to mid 20s, 6', 250 lbs., with short, shaved hair.

Information concerning this investigation can be directed to Sgt. Jay Padgett at 823-5425 or Sgt. Randy Mingo at 823-6433.

IN OTHER REPORTS FROM THE UCFPD:

• A computer work station was stolen from Room 223 in CCI. The theft was reported on June 24. There are no suspects at this time. Officials are willing to prosecute.

• The letters on the Zeta Tau Alpha fraternity house were reported stolen on June 29. The gold plated letters were last seen on the house June 27. Witnesses have been unable to provide descriptions of the suspects for police. Representatives of Zeta Tau Alpha are willing to prosecute the person(s) responsible.

• Twenty-four CDs, a stereo along with the amplifier, speakers and a crossover were stolen from a car parked in the parking garage on June 26. Also missing were the car's front light covers.

The car was parked in the garage on June 25. The next day, a friend of the victim noticed the hood of the victim's car was popped slightly. After notification, the victim took inventory of his possessions and noticed that his battery cable had also been cut. There was no sign of forced entry or other physical evidence. The victim is willing to prosecute.

• Three bill changers and two vending machines on campus were reported broken into on June 29. The bill changers, located in the Administration, Visual Arts and Education Buildings, and the vending machines, both located in CCI, had their locks changed to a higher grade security lock. The total taken from the machines was $1,429. Police have no suspects at this time. Officials at the Canteen Company, owner of the five machines, are willing to prosecute.
On behalf of the Student Government Association of UCF, Knightro would like to honor...

the newest members of the Murphy/Maxwell SGA cabinet

Mike Slatton Chief of Staff
Kurt Pennypacker Dir. of Promotions
Joseph Smith Attorney General
Mike Shutley Chief Justice
Fred Piccolo Dir. of Governmental Affairs
Kareem Adams External Public Relations
Sandy Baker Internal Public Relations
Courtney Martin Campus Involvement
Kelli Belfatto SGA Productions
Lauren Aquino Community/Environmental Affairs
Edwanna Timmons Multicultural/Women's Affairs

and to the newly appointed members:

Sean Calhoun Judicial Advisor
Jennifer Eibeschitz Comptroller
Travis Bell Internal Auditor
Seth Daub University Services
Adam Zawislak Academic/Administrative Affairs
Brian Ahearn Alumni/Graduate Affairs
Edna Spencer Provide-A-Ride

positions still available:

Housing/Campus Safety/Parking & Transportation Technology Specialist
See Jason Murphy in the SGA office for more info.

Do not be left out, there are still other ways to get involved...

Some Justice positions need to be filled. Seats 7 through 12 and 2 alternates are available. Please see Mike Shutley in the SGA office to find out more.

Did someone say Senate...

Here is a breakdown of what seats need to filled:

Arts and Sciences:
Seats 4 and 14 through 17
Business:
Seats 1, 2, 4, 7, 8
Education:
Seat 1, 2, 3, 5, 6
Health and Public Affairs:
Seat 1 through 5 and 7

How do you feel about having a football stadium on campus?

Meet Martin—

He's got the best line on campus...

This headline says it all. Hot, delicious pizza when and where you want it. So pick up the phone and give us a call. We'll be right over.

Serving UCF
12213 University Blvd.
384-8888
Open until 1 am Sunday – Thursday
Open until 2 am Friday & Saturday

"We Deliver!"

For a limited
Any pizza, any size, any toppings
for $8.99

If someone would give me a land survey, I would be able to make a better judgement. If one could tell that a new stadium was not going to take out a whole natural ecosystem, I would say yes. Growth is good, and I bet there would be a lot of very good uses for it.
- Brian Williams, 26, Orlando, Film

I feel that having a stadium on campus would inspire more school spirit and allow our school to compete with the bigger Florida schools!
- Lindsey Weaver, Orlando, Math Education

I think having a stadium on campus would definitely instill a great deal of pride and school spirit for UCF!
- Nicole Augeri, Orlando, Comm. Disorders

We think having a stadium would be a good chance for students to meet students from other schools.
- Hillary Girard, 18, Tampa, Arts & Sciences
- Tyler Smith, 22, Tampa, Undecided
**Lead Stories**

- In a Liverpool, England, court in June, Loves Steven Bain, 27, and Steven Gawthrop, 31, were sentenced to 18 months in prison for gross indecency for various “perverted acts.” Among the men’s exploit revealed at trial: They are foot fetishists and had tricked thousands of people into giving up socks, claiming they were collecting for a charity. Police found the men’s apartment to have an 18-inch-high “carpet” of socks and about 4,000 more wrapped in sandwich bags, each tagged with the donor’s name.

- In April, the CIA debuted its home page for children, featuring creative games and pintmericks such as allowing kids to put disguises on models’ bodies and to maneuver virtual guard dogs to sniff for explosives. (On the other hand, a month later, the agency failed to detect that India was about to test a nuclear weapon.)

- Auckland (New Zealand) biologist Larry Jensen and computer animator Andrew Chung announced in March that they had produced a video depicting the sex lives of moss plants. Said Jensen, “Plants may not walk around and hold hands the way humans do, but they have ways of bringing eggs and sperm together that are very clever.” For his next video, Jensen is talking to “two experts on fern sperm.”

**Salespeople: The Next Postal Workers**

- William Walker was charged in March in Albuquerque, N.M., with trying to huck through a mail-apartment door with an ax after the resident said he wasn’t interested in buying speakers from him. And in April, two women were preparing for trial after being charged with murder in Frankfurt, Germany, for allegedly hiring someone to kill death row inmate, a man they claimed was an undescending male colleague in a door-to-door magazine sales group they were a part of.

**The Garden State**

- According to a May report in The New York Times, biologists and New Jersey authorities still do not know the reason why the plastic grass at Giants Stadium died last year. The AstroTurf first turned green to blue and then began falling out in large clumps, and the best guess so far is that a fungus of some kind infected it.

**Latest Highway Truck Spills**

- Hundreds of bottles of champagne (Milford, Conn., December); 22 tons of cold cuts (Hardin, Mont., December); hundreds of jars of mayonnaise (near London, England, February); 21 tons of potatoes (Monterello, Minn., March); 50 boxes of beef (Middleton, Colo., February); 22 tons of shredded paper (naturally, near Washington, D.C., March); 6,700 gallons of animal fat (Cincinnati, May).

**The Litigious Society**

- A new trend in public education in California, revealed in March that they had produced a video depicting the sex lives of moss plants. Said Jensen, “Plants may not walk around and hold hands the way humans do, but they have ways of bringing eggs and sperm together that are very clever.” For his next video, Jensen is talking to “two experts on fern sperm.”

**Recurring Theme**

- According to a May report in The New York Times, biologists and New Jersey authorities still do not know the reason why the plastic grass at Giants Stadium died last year. The AstroTurf first turned green to blue and then began falling out in large clumps, and the best guess so far is that a fungus of some kind infected it.

**Bottom of the Gene Pool**

- The following people were hit by trains in May: Mr. Heath Hess, Hominy, N.Y. (didn’t hear the whistle); Brian McAdoo, 27, Burlington, Calif. (dug in the engine with a shovel and then accidentally kicked the door open while standing on it).

Central Florida Future • 9
Field station has many uses

The facility had limited usage until Walters was named director last year. In the fall of 1997, National Park Service volunteers painted the porch and inside trim of the main building. Then in January, the garage was converted into a laboratory by adding sinks, laboratory benches, electricity, air conditioning and a handicap accessible bathroom.

During the 1997-98 school year, students from UCF, Jacksonville University and the University of Tennessee used the facility for laboratory and field experiments.

"It is wonderful in that all of our lab work on live animals can be done right there," Walters said. "It is in a very beautiful part of the national seashore which no one else is allowed to go to."

"It is a place we can take our classes and complete experiments in the lab or in the field," she continued. "It is a place for our microscopes and video equipment."

Walters' classes study the diversity and ecology of invertebrates and macroalgae in the area.

"We study terrestrial and marine organisms known as 'fouling' animals," she said. "These are the animals you find on boat hulls. Basically, all the barnacles and sponges and sea squirts that cover your boat and that you don't want there."

"We study their biology and ecology and are looking for non-toxic ways to keep them off the boats; like boat paints that are made of natural products instead of copper and tin," she said. "We are looking for ways for people to keep their boats clean without killing everything—not just the animals that attach themselves to the boat hulls, but also everything around them like the clams and oysters. The toxic boat paint kills everything nearby."

Walters is the only faculty member who uses the facility extensively at this time. She lives there with several graduate students and independent study students who are working on various projects at the field station.

"We live there in the house and walk 10 feet to our laboratory, which means that we work all day and all night," she said. "You can't escape it and there is really not much else to do."

Knights show little interest in Sun Belt

From PAGE 12

ence play and had a brilliant season. However, when the NCAA selected the top schools to compete in the national tournament, UCF was left out, primarily because of their conference affiliation. The volleyball team hasn't lost a TAAC game in over three years, yet they advanced past the first round of the NCAA's only this season largely because of a tremendous non-conference sched­ule which made for the lack of com­petition the TAAC provided. Marcia Mansur-Wentworth's track and field and cross country teams find themselves in that boat as well. However, the meal ticket would be football, and UCF's main problem is that it has nearly completed schedules through 2002.

"If we all sit around and talk about this and decide it's something that makes sense, you're talking four to five years down the road realistically before it's even implemented anyway," Sun Belt commissioner Craig Thompson said. "Schedules are done so far in advance, whenever we do it, you're looking at a couple of years after that realistically before it really even has a chance to start."

Sloan indicated that UCF does have some flexibility in rearranging schedules in order to accept a conference bid.

"Teams are pretty understanding about that sort of thing," Sloan said. "If we were to join a conference, we could work out a way to make scheduling work. However, it wouldn't be immediate any way, because the first couple of years would be part of the phasing in process."

At the news conference announcing FIU's move to the Sun Belt, Thompson was asked about the football situation and he said that since he was named 12 years ago, they have been talking about a football conference. The talk continues.

"I believe UCF is playing Southwestern Louisiana and Louisiana Tech this season. What we are trying to do is put together a I-A football league.

While it sounds enticing, there are drawbacks. UCF would love to wait out a bid from Conference USA or the Big East, or Conference USA, don't include all sports, a plus in every way. What we are trying to do is put together a I-A football league.

"If we're playing each other now, why not play under an umbrella? Play for 'player of the week' honors, play for 'all-confer­ence' honors. We'd possibly look at a bowl tie-in and potentially a television package.

"There are a lot of scenarios floating around concerning which institutions would make the best members for the Sun Belt. The goal is to have 12 teams in two divisions with at least six of them Division I-A football institutions," Henry said. "We would definitely welcome a rival from within the state. The history between the two schools is there and would re-establish an attractive rivalry."

Sloan has also had discussions with the WAC, which recently split into two sepa­rate factions. The eight-team WAC Sloan spoke with consists of TCU, SMU, UTEP, Fresno State, San Jose State, Hawaii, and Fresno State. However, Sloan indicated that although he talked to the WAC commissioner, it looks like that conference will be in a legal bind for years to come.

"According to my sources, there is no current expansion currently pending in the WAC," said Bill Cousins, assistant AD at Rice. "If and when it does come, I'm sure we would add a school to com­pete in all sports, not just football. Affiliate members are possible in base­ball, softball or soccer, but not football or basketball."

"There's no movement to the WAC would include all sports, a plus in every way except for the toll travelling would take. Regardless, whether it's Sun Belt, WAC, Big East, or Conference USA, don't expect the Knights to remain in the TAAC for long.

Internship offers unique experience for students

From PAGE 1

"The students are being really good sports about it," Fad said. "They have long shifts and for the most part, they are baking out there." Two students and a Sea World staff member are on every six hour shift. With one student at the window of the tank and another on the other side, they are at a higher vantage point, the students communicate the whales' actions through walkie-talkies, following them from pool to pool.

"They each have their own personality," said biology major Julia Brashear. "It is fascinating to watch the interaction between them and the amount of care that goes into maintaining them."

"It's really an enrichment opportunity," said Candy Prann, 22. "I've learned so much about killer whales that I never knew before."

"He's just starting to go into other pools and explore," said Suzie Hillbauer, 23. "The most interesting part is the animal psy­chology part. You can never tell who's going to do what." Most of the students realize the importance of what they are doing as well as the unique exposure that it offers.

"It's good experience and it gets my foot in the door," said Candy Prann. "I'd like to work in the field," said Dottie Byron. "This is a dif­ferent atmosphere than just going to Sea World and watching the shows."

"It's a dynamic situation," agreed Otto Fad. "Hopefully some of the students will make a career choice to go into animal train­ing."

While although whales are rare, Fad is hopeful that Sea World can offer the opportunity again to students. "We are considering doing this again in the future," he said. "We get a fresh perspective on the animals' behavior and it is great exposure for the students. It's beneficial for the animal training personnel and for the students."
Knights to play on ESPN

By TONY MEJIA
Sports Editor

UCF Athletic Director Steve Sloan announced that the Sept. 19 football game at Purdue will be televised by ESPN to a national audience. The event will mark the first time UCF football is seen on such a spectrum.

“We’re very excited to get the news about Purdue,” Sloan said. “We had talked to them and didn’t know if we would get ESPN or ESPN2 or either one. To get ESPN as a national game is a big boost for us as far as our visibility and our perception and the things we want to accomplish long term.”

The television appearance may also go a long way in shedding some exposure on some short-term issues. With a growing university in search of a historical bowl bid, an interim coach, and a darkhorse Heisman trophy candidate, UCF has a lot to gain from a good performance. After all, the national perception of UCF is that it’s the school that led Nebraska at halftime. This opportunity gives the Knights a chance to add to their resume.

“It’s a tremendous boost to our program to play on national television,” said UCF Sports Information Director John Marini. “It’s wonderful exposure for the school. We can build on our national reputation in front of an ESPN crowd.”

Marini added that Sunshine Network is putting together a package as well. In fact, according Marini believes that everyone of UCF’s road games will be televised regionally in one form or another this season. That will make his job of promoting Daunte Culpepper for Heisman a lot easier.

“Football is great. We’re in a gunning against a quality team and one that’s being playing football for 100 years will be very fortunate for his case,” Sloan said.

Looking down the road, this also aids recruiting and helps in the process of receiving a conference affiliation. Exposure of this magnitude is priceless to a growing program who three years ago was still in FAA.

“There’s no way to put a price tag on something like this. To be on national television in prime time for three hours would normally cost a lot of money,” Sloan said. “I think the whole gamut of visibility will certainly be beneficial to us. More importantly, it’s going to be a good game. You always want to be competitive in your first national appearance. This contest gives us the opportunity to do that.”

UCF conference shopping continues

By TONY MEJIA
Sports Editor

July 1, 1998 was a landmark day in the history of Florida International University, as its athletic program joined the Sun Belt conference, ending an eight-year association with the TAAC. It’s no secret that the Sun Belt would love to embrace a football-playing Sunshine state counterpart to the Golden Knights. Hmmm... who could that be?

UCF Athletic Director Steve Sloan has not expressed an interest in joining the Sun Belt, which reportedly would love to add UCF, Northeast Louisiana, and Middle Tennessee State to form a 12-school conference.

“We generally listen to anyone who would want to talk to us about their conference and have also lobbed ourselves to other conferences,” Sloan said. “We would prefer something like the Sun Belt’s plans for a 12-game series on Fox Sports Network in addition to the conference’s appearances on ESPN. In addition, we have created one of the nation’s top women’s basketball leagues with FIU, Louisiana Tech, Western Kentucky and Arkansas State. Sun Belt baseball ranked No. 3 in the RPI last year,” Henry said. “Most importantly, the Sun Belt offers men’s basketball an opportunity for a decent seed in the NCAA tournament. With College of Charleston and FIU departing, the TAAC will likely have a 15 or 16 seed in the NCAA which gives you little chance to advance.”

Indeed, the problem many coaches around UCF site is the fact that the TAAC gets no respect, not that it rightfully should. Gaul Valkenberg’s women’s tennis team went undefeated in conference.

Knights add one, but lose another

UCF expects to receive a signed scholarship on from Super Senior quarterback Brad Banks from Belle Glades Glades Central.

Banks, who also was named to the Florida-Georgia All-Star game, passed for 2,000 yards his senior year for a team that advanced to the Class 4A state playoffs.

Banks, a full academic qualifier, was believed to be overlooked by Banks, a full academic qualifier, was believed to be overlooked by any big-time program. However, the Knights added one, but lost another to the powerhouse conference shopping continues.

Directions to the UCF South Orlando Center

**From the North**
1. Take John Young Parkway south 4 lights to Oak Ridge Road - turn left (heading east).
2. Rio Grande Avenue is a 4 lane road that becomes a 2 lane road called Lake Ellenor Drive.
3. Stay on Lake Ellenor Drive all the way. Pass the 7200 building (on your right) and turn right into the UCF South Orlando/Professional Development Center just past the Dead End sign.

**From the South**
1. Go to Sand Lake Road (exit 29 off I-4).
2. Take Sand Lake Road to Orange Blossom Trail (441) and turn left, heading north.
3. Go two lights to Orlando Central Parkway (there will be a Wendy’s on the right) and turn left.
4. Go to Lake Ellenor Drive and turn left.
5. Pass the 7200 building (on your right) and turn right into the UCF South Orlando/Professional Development Center just past the Dead End sign.

**From the Airport**
1. Take the North exit from the airport to 528 (Bee Line Expressway) West.
2. Get on 482 (Sand Lake Road) West.
3. Go to 441 (Orange Blossom Trail) and turn right, heading north.
4. Go two lights to Orlando Central Parkway (there will be a Wendy’s on the right) and turn left.
5. Go to Lake Ellenor Drive and turn left.
6. Pass the 7200 building (on your right) and turn right into the UCF South Orlando/Professional Development Center just past the Dead End sign.
## Important Dates

**Early Registration**
Through July 31

**Early Fee Payment**
July 31
(Continuing Undergrad students only)

**Regular Registration**
August 17-19

**State Employee & Transient Student Registration**
August 19, 4:00pm

**Classes Begin**
August 20

**Late Registration & Add/Drop**
August 24-28

**Payment Deadline**
August 28

**Labor Day Holiday**
September 7

**Withdrawal Deadline**
October 16

**Veteran’s Day Holiday**
November 11

**Thanksgiving Holidays**
November 26-28

**Classes End**
December 5

**Final Exams**
December 7-12

**Commencement**
December 19

Admissions

Students seeking admission to the University are encouraged to apply by posted application deadline dates. To apply, students must submit admission applications to the Office of Undergraduate Admissions or Office of Graduate Studies. Non-degree seeking students may register for selected open enrollment courses at the first class session. Course audits and credit by examination are also available. For more information about admissions call 823-6110.

Registration

There are three registration sessions for each semester: Early, Regular, and Late. Registration as well as Add/Drop. Each session has specific registration guidelines. Students can register by telephone or on-line (computer web). For more information on the registration process, contact the Registration Hotline at 823-5555 or access the UCF web site at http://www.ucf.edu

Parking

Parking is free and convenient.

Financial Aid

The University of Central Florida Office of Student Financial Assistance provides financial aid to eligible students. Students who wish to apply for aid should contact the Office at 823-2720.
Located in Orlando Central Park, the area’s premier corporate park, the UCF South Orlando Center is conveniently situated near the Florida Mall and the growing communities at South Orlando. Easy access from I-4 and South Orange Blossom Trail (17-92/441), make the center a wise choice for students.

Through UCF, students may enroll in both day and evening courses. Small classes, individual attention, affordable tuition and fees, and ample parking near the two buildings on this 20-acre center on the shores of Lake Ellenor are just a few reasons why you should spend this fall at the UCF South Orlando Center.

Enrich your mind and get closer to achieving your personal and professional goals.
