System to monitor foreigners
INS to track foreign students, professors

Tiffany Repecki
Staff Writer

More than a year after the terrorist attacks that rocked the United States, Big Brother is watching especially foreigners.

To improve national security, Immigration and Naturalization Services will use SEVIS, the Student and Exchange Visitor Information System, a $36.8 million Internet-based tracking system to monitor exchange visitors come January.

SEVIS will house information pertaining to all foreign students, visitors and their dependents, making the information equally accessible to federal agencies, U.S. education al institutions and exchange program sponsors.

Speaker will fuel hostilities, Muslims say

UCF's decision to invite Daniel Pipes to speak on today in the Student Union sparked controversy among Muslim organizations on campus.

Pipes, a columnist for the New York Post and the Jerusalem Post, will lecture on the terrorist threat today at 3 p.m. in the Key West Ballroom.

As part of the Distinguished Visitors Series, Pipes's speech is sponsored by the UCF Judaic Studies program.

Muslims at UCF are outraged that Pipes will address students, claiming he exaggerates Muslims as terrorists and has created a pro-Israel web site that encourages visitors - especially foreigners.

For 28 years, UCF's Board of Trustees approved a facility for the women's rowing team.

Albert B. Paradise, chairman of the Board of Trustees, approved a facility for the women's rowing team.

Newspapers reflect 85 percent of Lake Pickett homeowners who oppose Orange County's rezoning of lakeside land for UCF's rowing team.

Despite resident opposition, Orange County Board of Zoning Adjustment approved UCF's plans a month later to

Two weeks ago, UCF's Board of Trustees approved a six-acre plot of land beside Lake Pickett and construct a new facility for the women's rowing team.

Residents along the lake, such as Don Simica, did not object to the rowers' presence in years past.

"UCF's rowing team was part of the charm of the lake," Simica said.

But now, Simica no longer welcomes UCF's rowers as a charming addition to his lakeside property. He, like Parrish, joined other representatives from the seven communities around the lake, to send out petitions to each Lake Pickett neighborhood association last April to oppose the purchase.

The petitions reflect 85 percent of Lake Pickett homeowners who oppose Orange County's rezoning of lakeside land for UCF's rowing team.

Despite resident opposition, Orange County Board of Zoning Adjustment approved UCF's plans a month later to

No election is perfect, at least not in Florida anyway. UCF's primary senate elections, that concluded Wednesday, is a prime example of voting inconsistencies that continue to plague the state on the university level. SGA officials at the UCF campus have called for a hearing to investigate whether student elections commissioner, Todd Mitchka violated election procedures after he failed to provide voting booths and election posters to branch campuses.

Thaya Caswell, executive assistant for SGA, filed a petition with SGA's Judicial Council last week to hold a hearing to investigate Mitchka's actions after Brevard officials had to designate a computer within their own student government lab as a voting booth.

If the Judicial Council decides that Mitchka committed major violations that affected the outcome of the senate elections, they will hold a new election and Mitchka will not be compensated monetarily. Mitchka's position as elections commissioner is one of the few paid titles within SGA.

If his instructions are deemed minor; the Judicial Council will reprimand Mitchka to SGA president Marco Ferra, who will decide on appropriate action.

Mitchka left a message, claiming he fulfilled his responsibilities as elections commissioner. 

"If they expect everything to be 100 percent perfect, then they're wrong," he said. There's always going to be problems." Caswell, who attempted to contact Mitchka several times before the election began to request a voting booth and election posters, said her biggest concern was the fact that Mitchka did not return her phone calls.

Mitchka argued that he did not have her phone number and tried several times to contact her through email.

"I think it's not like I was trying to avoid them. I wish we had connected." said Sen. Jenna Delk, a senator from the Brevard campus, calling the voting inconsistencies a result of on-going communication problems between SGA and the university's area campuses.

Mitchka agreed, and said the best solution to prevent future voting problems for the remainder of the elections, would be to allow separate commissions to conduct elections at each branch campus.

For now, SGA has designated commissioners and election booths and election posters to each Daytona Beach and Brevard campus to prevent further irregularities, said SGA vice president Brian Battles.

SGA's election commission has encountered other tribulations during these elections after disqualifying five students who the commission initially approved to run for senate seats. Three of these students failed to complete a form that officially declared their candidacy. One student's records were on hold and another student was on academic probation — grounds that prohibit students from holding a leadership position under UCF's Student Government Act.

SGA's Attorney General Marcus Fernandez reproached the voting irregularities and Mitchka in a letter for failing to display election posters in buildings. Evens classes were held, both here and at branch campuses. He also blamed Mitchka for the current commission's mistakes.

Notice of a hearing by SGA's Judicial Council has not been made as of Friday.

Run-off elections for senate seats began Monday and end Wednesday.

Lake Pickett homeowners opposed to UCF expansion

FROM PAGE 1

develop the land with certain restrictions.

Rowers may only practice from 5:30 a.m. to 12:30 p.m. on weekends. under the imposed restrictions. The maximum number of rowers allowed on the lake at one time is 16, or the maximum number of 10-meter oars on a single boat. The maximum number of rowers allowed on the lake at one time must be limited to 20.

Some residents still remain unsatisfied with these restrictions, and hold what Purvis believes to be valid concerns — issues of personal safety and environmental conservation.

"We have to protect the integrity of where we live," she said.

Simon's concern was the over-crowding of the lake that would inevitably result in safety hazards. With boats coming in from other areas, bacteria and other harmful organisms may be introduced into this ecosystem, he said.

The natural and plant life is destruc-tive and costly to exterminate.

"We've been the custodians of this lake for 40 years," he said.

He fears UCF will not uphold the same conservationist mindset.

Purvis is also reluctant.

"My only concern is that this situation is carried through the way (UCF) said it will be," she said. "As long as they abide by the restrictions, I truly believe that we can co-exist peacefully."

Robert Holmes, vice president for UCF's Development Affairs, has heard residents' complaints and defends the women's rowing team as good users of Lake Pickett.

The women's rowing has become familiar with the dynamics of the lake after practicing on it for over two decades, he said.

Coach Kimmel remains positive about the interaction between Lake Pickett residents and his crew team members.

"If [the restrictions] make the living conditions better for the residents, we will be happy to comply with their needs," he said.

Marcus Gould, a graduate student and a resident of the Lake Pickett community believes that residents will be less hostile towards UCF's expansion if they are allowed a greater say in the decision-making process.

Lake Pickett resident Jay Evans agrees.

"After attending meetings, I feel UCF's decision to purchase Lake Pickett was a done deal before they ever presented it to us," he said.

Gould believes that misinformation is a key factor in considering the tensions that can arise between residents and UCF officials.

If students dedicate their time to the community, the university will receive greater support, he said.

"It's harder to buy into us. If they don't see us doing the right thing," said Gould.

For right now, Lake Pickett residents are still optimistic and hopeful that their new neighbor won't spoil the beautiful lake.

Two weeks ago, while penciling in the water-ski slalom course, Evans was impressed by the rowing team's courtesy, he said.

"The rowers demonstrated their willingness to work with us and share the space on the lake," he said.

Purvis: "I think that we can live happily together."
Universities must be licensed to accept foreign students by fall of next year

FROM PAGE 1

The SEVIS system is intended to simplify work for INS offices by incorporating paperwork and information from several agencies, as well as monitoring exchange programs at universities through a single computer database.

SEVIS was implemented as a voluntary policy on July 1, 2002. SEVIS enrollment will become mandatory beginning in the fall of 2003 for international students, scholars, researchers, professors and vocational students who wish to remain associated with an institution within the United States.

UCF is one of 1,000 schools to enroll in the tracking program and received its certification in August. Seventy thousand schools that have accepted international students and scholars in the past have not yet joined SEVIS.

Students and exchange visitors currently attending UCF must enroll in the system by Jan. 30 of next year. Those beginning classes in the spring of 2003 must also be enrolled by that date as well.

The university's International Student and Scholar Services will act as a liaison between UCF students and visitors and enforce the regulations mandated by the INS.

Once entered into SEVIS, students and visitors must provide current personal information throughout their stay in the United States. If individuals fail to update their information, they can lose legal status to remain in the United States.

Maintaining information includes reporting any changes in name, local address, academic status, degree programs and fields of study, or beginning and ending dates of any practical training.

Foreign students are also required to provide proof of birth, country of citizenship, foreign address and number of credits completed per year.

Because the system is "very rigid," students and visitors must always double-check that the information they provide is accurate and complete, said Salena Saleman, director of the International Student and Scholar Services.

"Miss one, one or one and you might match the blacklist of the FBI or CIA," said Saleman.

Schools must also regularly report the status of their foreign students and exchange visitors throughout their stay in the country. SEVIS provides reminders and alerts to all university faculty in the completion of these reports.

If foreign students drop below a full course of study without authorization, fail to maintain status or complete their programs, or if the school takes disciplinary action against students because they are convicted of a crime, UCF is required to notify the INS using SEVIS.

All paper forms needed to enter the United States as a nonimmigrant student or visitor will have a SEVIS barcode. When the individual enters a U.S. port-of-entry, the barcode is scanned and SEVIS alerts the appropriate institution that the individual has entered the country.

When the student arrives and registers, the school reports and updates SEVIS, confirming his or her arrival. But if the student fails to show, the student's SEVIS record will be terminated and INS investigatory and enforcement officers will be notified.

Every two years, institutions must apply for SEVIS re-certifications in order to maintain authorizations to enroll international students and bring in exchange visitors.

In 2005, the INS will look over the university's records to ensure it is abiding by the agency's regulations. If the INS discovers that UCF is not entering accurate data on time, or is not responding to SEVIS alerts or reports, the INS will revoke UCF's license for a year.

"We cannot afford non-compliance," said Saleman. "It's a do-or-die system."

Saleman said that if UCF's license was revoked, Foreign students and visitors associated with UCF would have to return to their home countries or find another certified institution to attend.

But since the tracking system doesn't come cheap, many are calling for foreigners to foot the bill for the nation's foreign tracking program.

"For self-defense, the country has the full right to track people who come to the country because the terrorists came over on international student visas," said graduate Rajeev Verma.

Others say foreign students shouldn't be penalized with extra fees simply because they want to study at an American institution.

"Seventy students come from oppressive governments," said senator Gose Nesov. "There's always a fear of being watched. This might remind them of that."

One of the SEVIS regulations currently up for debate is the prospect of charging international students, scholars, researchers and professors a $54 fee to enroll in the nation's tracking service each time they apply for a visa.

But for several foreign students, who have come to study at UCF they had to apply five or more times before they were granted a visa. Those students were charged much as $875 for a single visa, in addition to their tuition, books and living expenses.

Said UCF graduate Villos Tablo, "You're going to be defending America and American citizens, so it should be paid by Americans..." (This ill] like I'm paying you to spy on me.)
THE ALL-NEW TIBURON. CATCH ONE WHILE YOU CAN.

At just $15,999, the all new Tiburon gives you exhilarating performance. Plus standard features like dual front airbags, front side airbags, air conditioning, 6-speaker stereo with CD, power windows, door locks and heated mirrors, cruise control, alloy wheels, and the freedom of America's Best Warranty; the Hyundai Advantage. So take the drive today. Because this is one car that hates to sit still.

NEVER place rear-facing child seats in the front seat of a vehicle with a passenger-side airbag.
More minuses, few pluses in new grade scale

SHEVLA NIEVES
STAFF WRITER

For a student, the difference between a C and C- can mean the world — it can mean the difference between a passing grade or failing.

Students who have complained that the plus/minus grade scale — an optional grading system UCF implemented last fall — has spoiled their spectacular grade point averages, or even their chances of passing, will finally know if their complaints are legitimate by spring semester.

Intended to give instructors a more precise way of awarding grades, the plus/minus grade scale allows professors to give .25 more or less points for plus or minus grades.

A professor who applies the plus/minus grade scale will award a student a 3.25 grade for a B+ average, .25 points more than a B; a student a 2.75, .25 points less than a B would have earned them under the regular system.

Students argue the system has done little to boost their grade point averages when it counts, since there are no A+ grades awarded under the plus/minus system. Some classes do not award credit for grade point averages from fall 2000, before the plus/minus system was in place, to deter students from applying the plus/minus system when they under the regular system.

The study will compare student grades in courses with high enrollments and many sections that have applied and do not use the plus/minus grade scale.

Once the UCF faculty senate discusses the study's results, it may reconsider either fully implementing the grade scale or eliminating it altogether.

In 1996, the faculty senate pushed for the creation of a plus/minus grading system. A committee studied three different versions and chose the grading system with the least effect on student grade point averages.

"They didn't want to either inflate or deflate students' grades," said John Schell, assistant vice president of academic affairs.

"They just wanted to be able to be more specific and award students more concisely the credit they earned," Schell explained.

Political science professor Terri Fine said that student government's lack of cooperation also delayed the new grading system. Fine, who chaired the committee that developed the plus/minus system, said little progress was made until the committee's efforts for almost an entire year.

They just wanted to be able to be more specific and award students more concisely the credit they earned.

—John Schell
Assistant vice president of academic affairs

Many professors continue to resist the new grade scale, insisting it is too difficult to create new percentage scales and discern students with borderline grades.

For students across the board, the new grade scale earns inconsistent grades from professors who opt to use the system and those who choose not to.

Transcripts from fall 2001 reflect that less than half the faculty, about 45 percent, applied the plus/minus scale, said Schell.

Like professors, the majority of students do not support the new system. SGA's survey this past spring indicated 60 percent of the 3,000 students who voted preferred a plus-only system.

Even if the university decided to fully implement the plus/minus grade scale, administrators cannot make the system mandatory because professors do not have to report plus or minus grades.
Moore no more for council event

Speaker said he never agreed to UCF appearance

JASON IRSA

In an e-mail letter to members of the UCF Progressive Council, activist Michael Moore cancelled his controversial appearance at UCF, but the Progressive Council vowed its event would go on.

Citing the death of his mother, Veronica Moore, on July 8 at the age of 81, Moore wrote, “I am in no mood or condition to give speeches anywhere.”

Moore expressed support for Progressive Council’s plans in the e-mail, and shock over the $20,000 that his agent, Lisa Brunsdorf, charged UCF Progressive Council and SGA. He also wrote that he never agreed to speak at UCF this October.

“I have never in my life charged to speak at a political rally. I am shocked that this has happened with all your groups. I, like Ralph Nader and many others, have a lecture agent who sorts through the many requests for paid gigs sponsored by universities or town hall lecture series.

“But to come and help stop the re-election of Jeb Bush — I would never take a dime for such a thing, to imply such a thing is so far from the truth, and I am so sorry whatever has happened or has been done in my name by the lecture agents.”

Moore defended his agent in his letter claiming that she accepted $20,000 assuming it was an official school event. Brunsdorf could not be reached for comment.

Moore’s withdrawal from Progressive Council’s “We the People” event on October 22 also angered Mike Tiner and Brian Cregger, the event’s organizers. After securing $20,000 from SGA for Moore’s appearances, they pleaded with him to make the trip to UCF.

Both Tiner and Cregger said that they blamed Moore’s agent for the ordeal, although Tiner said Moore deserves blame as well.

“The first person throughout the process that I was mad with was Lisa Brunsdorf,” said Cregger. “I thought the amount was a little high. I was mad at her because we never got the straight information from her.”

“My first reaction was anger and rage,” said Tiner. “I was angry at him, his agent, the whole situation.”

Said Cregger: “I apologize that this whole process was like this. I thought the numbers were high. I apologize for any mistakes I made in this process, but things will work out.”

Despite the setback, the Progressive Council members said their event, “We the People,” would still be a strong campus function.

“I think we’ve got an awesome event planned, despite all the monkey wrenches that have been thrown in,” said Tiner. “There will be a lot of great speakers talking about a lot of important issues.”

“We the People” will feature environmental, political and workers’ rights groups in front of the Student Union all day on Oct. 22 before the gubernatorial debate inside the Student Union, “We All Count” and “Book the Vote” will have a table, along with Florida Greens and Greenpeace. Union group AFL-CIO will also have a table, as will the American Civil Liberties Union.

Scheduled speakers include several drug policy speakers, Claree Pulock of the Florida Chapter of the National Organization for Women and Greg Palast, an investigative reporter for the BBC and author of “The Best Democracy Money Can Buy,” a movie that details Florida’s flawed presidential election in 2000.

Despite Michael Moore’s cancellation, “We the People,” a UCF Progressive Council event, will go on Oct. 22 in front of the Student Union.
Hitt says Pipes free to speak on campus

Chapter 601: Referendum

The Student Body may call a referendum election by properly filing a petition.

If a petition is to be filed by a referendum election, it must contain a statement of the specific issues for which the Referendum Election is to be held.

A petition shall be signed by at least 15 percent (15%) of the student body. Such signatures shall not be valid unless the signatures do not contain more than one issue.

The petition shall be presented to the Senior Secretary who shall, upon the petition to the University of Student Government Services for mediation.

If a referendum election is held, the Student Government Services shall, within 15 school days, determine the validity of the signatures and shall certify the petition to the University of Student Government Services for mediation.

If a petition is to be filed by the University of Student Government Services, the Referendum Election shall be held within 90 school days. Such a petition shall be non-binding and the University of Student Government Services shall, within 30 school days, determine the validity of the signatures and shall certify the petition to the University of Student Government Services for mediation.

If a referendum election is held, the Student Government Services shall, within five (5) school days, determine the validity of the signatures and shall certify the petition to the University of Student Government Services for mediation.

If a petition is to be filed by the Student Government Services, the Referendum Election shall be held within 90 school days. Such a petition shall be non-binding and the University of Student Government Services shall, within 30 school days, determine the validity of the signatures and shall certify the petition to the University of Student Government Services for mediation.

The result of the referendum election shall be a non-binding and the University of Student Government Services shall, within 30 school days, determine the validity of the signatures and shall certify the petition to the University of Student Government Services for mediation.
OUR STANCE:

Womens' rights
Bush-whacked

Considering the policies enacted by Gov. Jeb Bush during the last four years, who would any sane Floridian woman elect him for a second term?

Since Bush took office in 1999, women's rights have suffered tremendously. Florida is in the sixth worst state in the nation for women to live in based on Bush's policies.

The employment status of women has taken a dive under Bush in a state where women earn 77 cents for every dollar that men earn.

A bill aimed at equalizing pay for women has never received a public hearing. Women lost their equal opportunity protections in university admissions, public employment and public contracts under Bush's "One Florida" plan, implemented in 2001.

Women still make up too small a percentage of top-level positions, and thus comprise a majority of workers in service positions.

Bush's "Service First" program, which has been widely criticized by labor unions, eliminated many low-paying state positions that were often worked by women, privatized other positions and removed career-service job protections.

Women may lose their reproductive rights as well if Bush gets a second term as governor. Already, Florida's laws and services fall behind other states.

The National Abortion and Reproductive Rights Action League gave Florida a C- for its abortion laws and an F for its contraception services.

Under Florida law, Medicaid cannot pay for abortions for poor women except when abortion preserves the mother's life or in cases of rape and incest. If the pregnancy would only endanger the health of women, Medicaid will not pay for it.

Bush has indicated that he would sign a bill outlawing late-term abortion, although the courts already deemed a similar bill enacted in 2000 as unconstitutional. Late-term abortions are granted in very rare cases in which the fetus has died or is dying. The ban would require mothers-to-be to suffer unnecessary labor.

Bush has already appointed one anti-abortion advocate, Raoul Cano-Miller, to the Florida Supreme Court, and he would appoint more anti-abortion judges to Florida courts if elected.

Bush's choice for head of the Department of Children and Families, Jerry Regier, has written that women should obey their husbands and work not outside the home. By choosing an ultraconservative like Regier, Bush demonstrated little sensitivity to the progress that women have made over the past century.

Women have lost ground under Bush. They can't afford to move in the wrong direction for four more years.

OUR STANCE:

Low turnout reflects poorly on Peña

A whopping ten students showed up for SGA President Marco Peña's open forum last week. Didn't hear about it? Apparently no one else did either.

While Peña deserves praise for holding a forum for students to voice their concerns, he seemingly held the forum for no reason. Very few people even knew about the forum, and even fewer cared enough to go.

The poor turnout reflects badly on one of the reasons he was elected to office. If he truly wants to be account-

able to students, he should do much more to involve students in the political process.

He should advertise his open forum more. He should have tried harder to get the word out.

With so few people at the forum, it degenerated from an opportunity for students to get involved into an occasion for Peña to tout his own horn. Peña made no effort to let students know about the forum, so he apparently did not care if students showed up.

Nothing important came out of the forum because no one attended. No one was there to ask questions or raise concerns.

In the future, Peña should do much more to let students know when and where she is going to talk. If he truly wants to be account-

able to students, he must make himself more available to the people he represents.

Likewise students should make an effort to voice their concerns in a productive and productive and meaningful way.

And enough students attended to raise a num-

ber of important issues.

The only way anyone heard about Peña's open forum was by word of mouth. The crowd of ten people does not even qualify as a forum.

Peña should have advertised his open forum much more. He should have tried harder to get the word out.

With so few people at the forum, it degenerated from an opportunity for students to get involved into an occasion for Peña to tout his own horn. Peña made no effort to let students know about the forum, so he apparently did not care if students showed up.

Letters to the Editor

Good greed, bad greed...there's a difference

Regarding "Greed today, power tomorrow," by Libby Baird, published Oct. 3, 2002, students of 49 (and readily know the differ-

ence between greed and self-interest.

Self-interest certainly is manifestly attempting to retain and preserve wealth that one has honestly gained.

Greed on the other hand, is coveting another's honestly gained wealth and simila-

rly scheming to acquire that wealth via unfair means or by taking unfair advantage of the wealth once gained.

-DAVID E. WAREHouses

Respecting Pegasus is a matter of self pride

I began reading the Diestore in December, before I transferred to UCF in January, so I went through the "Is Pegasus good for UCF?" campaign when I was a student here.

I will never vote for the university to lose my degree, and showing respect for the Pegasus by not signing up on it is no a matter of pride, pride in myself for all the hard work I've done.

Don't think of taking 20 minutes to walk around the Pegasus as a salute, think of it as in a salute of all the hard work and sacrifice.

-ELIOT LEMONCEW

Maybe Homecoming will go on, but students upset

UCF organizations have a very bad habit of announcing events before they are finalized. In a recent advertisement, I read that Ludacris would perform at the Homecoming Concert. Two days later, I found out he has canceled his performance here.

I anticipated Michael Moore’s appearance on campus as well, unfortunately scheduled the same evening as the lectures. But, too bad for me to sign off on the concert.

The question here is why we organizations announce events, speakers and concerts and advertise them to thousands of students, while contracts remain untreated. Students, who were expecting appearances and their representatives, will now be immensely disappointed and over­

whelmed.

Beyond the frustration here is how to face our accomplishments and how actual are truly

-LENNY KNAPP

Correction

"Performer cancels, Homecoming will go on" by Libby Baird, Oct. 5, 2002, incorrectly stated that the band Three Days Grace would perform on Monday, Oct. 21, in conjunction with the YWCA "Night to Remember" event. Three Days Grace will perform Saturday, Oct. 20 at 6 p.m. at Canes Street after the football game.

Making passes at people with glasses

If only I had contact lenses, I might not be sitting at home tonight.

At least that's what a London study claims. The study concluded people who aren't staring through a pair of jam jars more likely to get play or are at least more likely to get a date.

People who decided to forgo glasses for a pair of contacts were three times more likely to score hugs, four times more likely to get a kiss and six times more likely to get fancied, according to the same study.

I wondered if the frames that I wore on my face every day, in order to give myself a more studious look, was the reason I hadn't been suitorless for more than three weeks.

I love the glasses right off my face that second and swore I would become a contact-lens wearer forever.

But when the time came to part with my specs, that not only did I like myself in glasses, I loved girls who wore glasses as well.

A trendy pair of glasses can make a girl look incredibly intellectual, something that I consider one of the sexiest characteristics of a woman, second only to her looks.

But in all seriousness, the correlation in this study is ridiculous.

A fine line between security and hypocrisy

The Bush administration has gone to war against terrorism, and it may soon go to war against Iraq. But does all that necessarily mean going to battle against the American people's right to know?

One would hope not. It cannot be easy for leaders to wage war in the Information age, let alone in a free society where an array of newspapers, news magazines, television and radio networks, and Internet sites are churning for scraps of news. And no one is suggesting that the administration disclose information that puts American lives at risk, compromises national security or makes terrorist attacks more likely.

Yet, there are concerns that elements of the administration are trying to keep Congress, the press and the American public in the dark.

At home, the administration continues to be dug under the issue of the Sept. 11 detainees and its policy of keeping the names secret and deportation proceedings closed.

A federal judge in Detroit recently ruled that the Justice Department must either open deportation hearings for Ralph Haddad, the co-founder of a Michigan-based Muslim charity, or release him. U.S. District Judge Nancy G. Edmunds insisted that open hearings "will not be sitting at home tonight.

There are more significant causes that society should support than a web site that mocks other charitable pleas.
Democracy needs involvement by all

There are concerns that elements of the administration are trying to keep Congress, the press and the American public in the dark.

assure the public that government itself is honoring the very democratic principles that the terrorists who committed the atrocities of 11 sought to destroy. A three-judge panel in the U.S. Circuit Court of Appeals used even stronger language to uphold an earlier ruling by Judge Edmunds asserting the public's right to access immigration hearings, warning: "Democracies die behind closed doors."

One would hope the administration would heed that warning as it prepares to deal with Saddam Hussein. Already Congress is grumbling that the White House—locked over news leaks about intercepts of communiqués between terrorists before the Sept. 11 attacks—has put a lid on classified briefings. It is significant that those leaders who do seem to be getting information and who have been pleased with their briefings are more supportive of the administration's hard line against Iraq than those who feel they are out of the loop.

Whether the battle is in the Persian Gulf or in our own back yard, the administration has put a lid on classified briefings. Whether the battle is in the Persian Gulf or in our own backyard, the administration would be wise to share more rather than less, to treat official proceedings to sunlight and to avoid that warning as it prepares to deal with Saddam Hussein. Already Congress is grumbling that the White House—locked over news leaks about intercepts of communiqués between terrorists before the Sept. 11 attacks—has put a lid on classified briefings. It is significant that those leaders who do seem to be getting information and who have been pleased with their briefings are more supportive of the administration's hard line against Iraq than those who feel they are out of the loop.

When I began taking this course I was worried about getting a C. As it stands now, I'm going to get a strong A, and I owe that GradeSummit had everything to do with this success! If I had not used GradeSummit in all three of my courses, I would not have earned A's in all courses.

Junior Lindsey Whalen (7) led UCF with 20 digs Saturday against Mercer.

The Golden Knights return to conference action this weekend.

I tell you the good Lord is looking after us because we needed [the bye week] for some injuries again," said offensive coordinator Robert McFarland.

The Golden Knights finally got on the board when senior Nicole Cieslak tied the game 16 minutes into the second half. She launched a shot from 35 yards out and the ball floated just out of the reach of FSU goalie Kerry York. The goal, assisted by Becca Eshelman, was Cieslak's fourth goal of the season.

The win makes UCF 5-0 in conference play.

"This weekend was fabulous. I am very happy and the greatest thing is the improvement out of the middle," said UCF Coach Meg Colado.

Colado was referring to the stellar play of middle blocker Amanda Stoutjesdyk and outside hitter Leyre Santaella Sante. Against Mercer, Stoutjesdyk had 23 kills, five blocks and shot .476. Sante followed with 22 kills and 18 digs.

"Everyone played and it was just a great team weekend," said Colado.

Lindsey Whalen led UCF with 20 digs Saturday against Mercer.

The Golden Knights beat the Mercer Bears on Saturday in the equivalent of a buzzer beater for volleyball as UCF took the match in the fifth game by two points. The scores were 30-27, 20-15, 23-30, 26-30, 15-13.

The win makes UCF 5-0 in conference play.

"This weekend was fabulous. I am very happy and the greatest thing is the improvement out of the middle," said UCF Coach Meg Colado.

Knights remain undefeated in Atlantic Sun

When a team is 1-3, luck and timing aren't usually on its side.

And on most of UCF's game days, good fortune has been hard to come by. Even in last weekend's win over Liberty, the Golden Knights saw running backs Alex Haynes, Alex Haynes, and Sean Gaudion all go down with injuries.

Which is why this week's bye couldn't have come at a better time.

This is just like the bye three weeks ago, when quarterback Ryan Schneider and several offensive linemen got some extra time to recover from various bumps and bruises.

"I tell you the good Lord is looking after us because we needed [the bye week] for some injuries again," said offensive coordinator Robert McFarland.

Then Schneider and all but one lineman, left guard Taylor Robertson, got well enough to play against Marshall the following weekend. Whether one off-week will give the injured enough time to heal for the trip to Western Michigan.

The 17th-ranked Florida State women's soccer team handed UCF its third loss of the season with a 3-1 victory Friday night in Tallahassee.

Cindy Schofield collected a pass from Camie Bybee and blasted a shot past UCF goalkeeper Jessica Kuhlman to open the scoring for the Seminoles at the 16:40 mark. A little over three minutes later, junior Lindsay Maier had an opportunity for the Golden Knights to even the score, but could not convert.

The Golden Knights finally got on the board when senior Nicole Cieslak tied the game 16 minutes into the second half. She launched a shot from 35 yards out and the ball floated just out of the reach of FSU goalie Kerry York. The goal, assisted by Becca Eshelman, was Cieslak's fourth goal of the season.

The Golden Knights dropped Florida State for the second consecutive year, winning 3-1.

The win makes UCF 5-0 in conference play.

"This weekend was fabulous. I am very happy and the greatest thing is the improvement out of the middle," said UCF Coach Meg Colado.

Colado was referring to the stellar play of middle blocker Amanda Stoutjesdyk and outside hitter Leyre Santaella Sante. Against Mercer, Stoutjesdyk had 23 kills, five blocks and shot .476. Sante followed with 22 kills and 18 digs.

Everyone played and it was just a great team weekend," said Colado.
Cieslak scores lone goal for UCF

FROM PAGE 14

With an open net, she shot the ball and it bounced off a post.

With the win, FSU has won nine straight matches against teams from the Sunshine State, including a victory over 21st-ranked Florida earlier this season. The last time the Seminoles swept their in-state rivals was in 2000.

The Seminoles have four straight ACC matches ahead of them, including two games against opponents in the Top 25 in the national rankings. Wake Forest is No. 6 and North Carolina holds the No. 1 spot.

Also heading into conference play, UCF is slated for three consecutive Atlantic Sun games. Unlike FSU, the Golden Knights have an easier schedule ahead of them. UCF hosted Belmont on Sunday. The Knights travel to Mercer on Friday and Troy State on Sunday.

UCF hosts Bethune-Cookman on Tuesday

FROM PAGE 14

Kristen Dell registered 13 kills each. The Golden Knights defeated Georgia State 3-1 Friday in a battle of unbeaten A-Sun teams.

The Knights' play at the net gave them the edge, registering 17 blocks. Sante put up the team's only double-double with 22 kills and 11 digs. Her 22 kills tied Georgia State's Lisa Lyskis for the match high. Lindsey Whalen had another match high with 13 digs.

UCF defeated Florida Atlantic 3-2 Tuesday in a rematch of last season’s A-Sun Championship game.

The Knights won games one and three handily (30-17, 30-18), but the Owls battled back to win the second and fourth games (26-30, 29-31). UCF trailed 11-15 in the deciding match, before going on a 4-0 run to win the match.

Four Golden Knights registered double-digit kills. Sante led the match in kills with 22 and had 12 digs. Joining her was Stoutjesdyk with 11 kills and nine blocks, Kristen Pen with 10 kills and Kerner with 12.

Frank led the match with 53 assists, nine kills and five blocks. UCF takes a short break from A-Sun play Tuesday to play Bethune-Cookman. Then the Knights return to conference play and head to North Carolina. They stop Friday in Buies Creek to play Campbell before going to Boiling Springs to face Gardner-Webb.

You must have your valid student ID to enter all UCF Athletics Events!

When you swipe your card at football games, you will be eligible to win great prizes during each home game including a $1,000 scholarship compliments of SGA.
Knights need to win out in MAC

FROM PAGE 14

this weekend remains, like the players, a question mark. The Golden Knights and their fans will have to wait until Saturday to find out Haynes' status.

Haynes status is still up in the air after missing all of practice this week with a high ankle sprain and a bone bruise. The sophomore has walked around with a protective boot and had magnetic resonance imaging done early in the week. It revealed inflammation but no damage. Still, coaches are preparing for the chance he can't go.

"Joe Brown is probably the guy we'll start with [if Haynes can't play] and Andreal Curry [has been] getting some reps just in case," said McFarland.

Brown, the backup fullback, would start because Williams, the regular backup fullback, is also nursing a sprained ankle. He and fellow backup fullback Curry combined for 94 yards and four touchdowns against Liberty.

As for Guarino, the starting fullback didn't practice this week but should play against Western Michigan.

Defensively, the Golden Knights should be at full strength for Western Michigan. Strong safety Alan Smith and outside linebacker Chris Pililo returned to practice in non-contact jerseys after missing the Liberty game with ankle injuries.

UCF decided against practicing Monday. Good weather the rest of the week let the Knights get three full practices in. With the extra week to prepare, the Knights worked mostly on techniques rather than their plan for the next game.

"The first two days we spent basically on fundamentals, really did hurt because we're missing a lot of guys in the back and the front flanks," said McFarland. "Just getting back to basics and trying to just really hone some of the skills that maybe we missed during the rainy two-weeks we had the first couple weeks of the season."

UCF has eight games left and seven are against MAC teams. It will need to win every one of them to have a realistic shot of its first bowl bid. And the Golden Knights could use more of the good luck they got with divots during the rainy two-weeks.

"That's the awesome thing about being in a conference now," said McFarland. "Every opponent means something and every victory is priced."

Freshmen help Knights edge Florida Atlantic

The UCF men's soccer team picked up its second conference win Saturday in a tense overtime match against Atlantic Sun Conference rival Florida Atlantic 2-1.

After a scoreless first half, the Golden Knights' freshmen began to take over the match. The scoring began when UCF's Armin Geosso scored a rebound off its first bowl bid. And the Golden Knights could use more of the good luck they got with divots during the rainy two-weeks.

"The awesome thing about being in a conference now," said McFarland. "Every opponent means something and every victory is priced."

Freshmen help Knights edge Florida Atlantic
Giles, Cook lead cross country teams

Kristy Shonka
SPORTS WRITER

Sophomore Amy Giles and junior Danny Cook led the UCF men's and women's cross country teams to top-10 finishes at the Gator Invitational in Gainesville on Saturday. The women's team finished sixth and the men's team finished ninth.

Giles finished 31st in the field of 214 runners, to lead the women's team. She crossed the finish line in a time of 23:05.41. Junior Sara Dillman finished ninth.

Junior Matt Price on Saturday. The women's team finished 31st in the field of 214 runners, to lead the Knights. Sophomore Amy Giles and freshman Astrid Claessens rounded out the UCF runners in the top 50. Dillman took 44th place at 23:28.80 and Claessens finished 88th at 23:41.16.

Freshman Andrea Morrow and Megan Crum finished 68th and 90th to complete UCF's score with 224 points. The University of South Florida won the event with 30 points, followed by Kentucky (30 points), the University of Florida (69), the University of North Florida (104) and the University of Tampa (161). Twenty-three teams competed.

On the men's side Cook gave his best performance of the season finishing 40th at 23:28.80 to lead the Knights. Sophomore Ben Morrow finished 31st in the field of 214 runners, to lead the men's team. Sophomore Ben Morrow finished 31st in the field of 214 runners, to lead the men's team. Junior Ray Gossage crossed the finish line in 23:28.80 and Claessens finished 62nd.

The men's team finished with 244 points. Princeton won the men's title with 289 points, followed by Florida with 329, North Florida (352), Florida State (372) and the University of Miami (378).

The Knights return to action Oct. 12 at the Disney Classic in Lake Buena Vista.

Sigma Alpha Epsilon squeezes by Sigma Phi Epsilon

SIGMA Alpha Epsilon (SAE) called time out after scoring a three-point play to tie the game at 44 with a time of 29:44.9. Senior Sean McCabe and freshman Ray Gonsage crossed the line in 29:44.9. Rounding out the scorers for the Knights was sophomore Kiley Blaker, who finished 53rd.

The men's team finished with 244 points. Princeton won the men's title with 289 points, followed by Florida with 329, North Florida (352), Florida State (372) and the University of Miami (378). The Knights return to action Oct. 12 at the Disney Classic in Lake Buena Vista.

As revealing clothes drop to the floor and customers throw dollar bills on the stage, one question comes to mind: How do you behave at the site of a stripper dressed in nothing but a thong? There are a few things one should keep in mind before entering a strip club. Although the strippers do not follow a certain dress code since everything will eventually come off anyway, it does not mean the paying customer should not try to uphold some kind of dress code.

The etiquette of exotic dancing

Shirts and ties are generally preferred over shorts and jeans so that the customer can get more rush for his buck.

If you are getting a lap dance, wear slacks, not jeans, to go easy on the girls," said Alexis, a stripper at Molly Brown II, an adult club in Daytona. "If it is a table dance, it doesn't matter." If a customer is feeling generous one particular night and decides to sit alongside the stage, keep in mind it is proper to tip each dancer at least one dollar per song. However, if the individual prefers to sit away from the stage, it is courteous to tip appropriately when an intriguing stripper walks by.

In addition, when dipping the stripper, do not tease her; instead, just hand her the dollar bill.

"If a stripper is willing to be paid to sit and talk with you, always tip her for it. The cost for each hour of conversation with the stripper is $100 and it does not include any lap or table dances. In addition, it is also polite to offer a beverage to the stripper while conversing. "Buy the girl a drink if you are going to talk to her for a while, because she is probably thirsty from dancing," said Faith, a stripper at Molly Brown II.

So remember, when entering a strip club, always abide by the etiquette, have your wallet ready in hand, and sit back, relax and enjoy the show.

MOVIE REVIEW

‘Red Dragon’ deliciously frightful

Craig Brooks

"Have you never felt the sudden rush of panic?" asks Hannibal Lecter, the cinematic king of grizzly gourmet. Lecter (Anthony Hopkins) succinctly sets the tone for this film. "Red Dragon," which opened last Friday, is an exhilarating rush of panic.

Everyone’s favorite cannibal is back, and finally, a legitimately frightful movie reaches the big screen this year. This one should make even the hungriest horror fan content.

"Red Dragon" is a new adaptation of the 1981 Thomas Harris novel of the same name. The novel was also the basis for the 1986 thriller "Manhunter" by Michael Mann, a prequel to "Silence of the Lambs" and "Hannibal," which starred Brian Cox in the Lecter role.

However, director Brett Ratner’s new dark and creepy adaptation outshines "Manhunter," especially because of Hopkins. Hopkins is brilliant, as always, in his role as the legendary Hannibal Lecter. His wild and ravenous eyes keep viewers mesmerized.

The brain-eating Lecter is safely locked away in prison, but a fresh serial killer, dubbed this Toot Fairy Killer, is out on the prowl. This psycho is partial to carving up his victims, especially families.

Enter FBI agent Will Graham, portrayed by Edward Norton ("Fight Club") and "Death to Smoochy") Graham and Hannibal have a little history, as the now-retired Graham is the agent that first took down the insane Lecter.

So seared by that experience, Graham left the bureau and devoted himself to repairing boat engines and spending time with his wife and young son. But old bureau boss Jack Crawford (Harvey Keitel) cracks the retirement with news that a new maniac is on the loose. With a special link to such criminals, Graham visits Lecter behind the walls of the Baltimore State Hospital for the Criminally Insane.

THEATRE REVIEW

Simply set comedy rich in complexity

DONNA T. SCHUMAN STAFF WRITER

As opening night jitters come to an end, the cast and crew of Samuel Beckett's "Waiting for Godot" anticipate a smooth run from this point forward. This play is the second production by Theatre UCF this season.

This tragic, yet brilliant comedy tells the story of two men, Estragon (a.k.a. Gogo) and Vladimir (a.k.a. Didi) who, as the title would suggest, are waiting for a mysterious savior known only as Godot.

As they wait, you notice that it is almost as if Gogo and Didi are a singular being. Gogo, played by senior Nick Sprysenski, is a child-like figure that is the heart of the pair. Didi, played by senior Joshua Duke, is an intellectual, the brain of the pair.

According to Duke, despite the fighting, as well as all the talk about parting ways, one simply cannot survive without the other. These two actors have done an exceptional job in bringing these symbolic characters to life.

Director Christopher Leake, stated that the character of Pozzo, played by senior Shawn Biv, as well as his servant Lucky, played by Scott Leake, appear to be the guides for Gogo and Didi.

"They [Gogo and Didi] provide the answers," Leake said. "They are not sure if [Pozzo and Lucky] provide the answers."

Another character, simply called Boy, played by Jonathan Waters, appears to inform the men that Godot will indeed be there. Boy supplies the hope that endures throughout the play.

The task of the actors in this play is not an easy one. The characters are very complex and require a lot of dedication as well as understanding on behalf of the actors. It is apparent that the entire crew put a lot of time into developing these characters, really becoming these people.

Ness stated that the cast was very intelligent, which was helpful in getting a deeper understanding of the script. "This play has required a focus and intelligence that surpasses any other play I have done," Leake said.

According to Duke, despite any other play - I have done," Leake said. "We made and honest and pure attempt at finding the questions that the playwright wanted asked."

The overall feeling among the entire crew is very positive.

"The students are all highly motivated," Ness said. He added that the amount of talent and heart among these actors is overwhelming. Duke stated that being a part of this play has been fantastic.

"We could not have done this without our director and this cast," Duke added.

According to Ness, the set represents a type of purgatory. "It's not a good or bad place, it just is."
**Good fortune all in the cards**

**Former UCF molecular biology major now developing major games for Score Entertainment**

NANCY CHURMIN  
THE DALLAS MORNING NEWS

ARLINGTON, Texas — It took a lot of anger for Aik Tongtharadol to win the Dragon Ball Z championship of the world last year.

Anger cards, that is.

Dragon Ball Z decks can incite anger on purely energetic, hybrid, ally and physical beat-down cards. Players choose cards to build one of these types of decks along with cards that defend against various decks. Aik won $10,000, a reminder that the other players wouldn’t have many anti-anger cards that year.

“You have to take the environment into account when you place your deck,” said the 21-year-old fantasy card whiz. “The Dragon Ball decks were pretty popular that year, so I went for an anger deck,” he explains. “It was a strategy that worked.”

Aik won $10,000, a booster box of every Dragon Ball Z card produced at that time (706 cards) and a “limited” version of the deck he used to win. Foiled cards are rare, shiny versions of regular Dragon Ball Z cards.

Less than a year later, he landed a dream job, advising the Arlington, Texas-based Dragon Ball Z card maker, Score Entertainment, on product development. He advises Score on the design of new cards and tests how they work in game situations. He also answers questions about the games on the company’s Web site, a talent he naturally brought along for the ride.

“I like the strategy,” he said. He also likes figuring out the best cards to include in his decks as he tries to predict and beat the cards his opponents play.

It requires analytical skills and it’s fun. But it’s sure a long way from the University of Central Florida, where he was a junior majoring in molecular biology when he left to take the job at Score.

Aik, who was born in Thailand and raised in Florida, began playing fantasy card games eight years ago. He liked the Dragon Ball Z TV show because he’s an anime fan and became interested in the card game at 18. Soon he started looking up tournaments on the Dragon Ball Z site, www.dbzcardgame.com.

Then he heard about the world championship in Milwaukee last August.

“My parents said, ‘You’re going to Milwaukee to play a card game?’ They didn’t understand. But now they’re really happy.”

One of his few frustrations with his job is that he can’t compete in the game anymore. But that doesn’t keep him from relying on the fun through other players as a judge for the world championship and smaller tournaments.

At the recent Dragon Ball Z tournament at Lone Star Comics in Arlington, Texas, where he was judging, he pointed out a match between Tommy Bracher, 11, and Travis Cox, 15. The boys like the game so much they were playing for fun between official rounds.

“This is going to use a physical attack deck,” Aik said, pointing at the two cards Tommy Tongtharadol turned over.

“Shhh!” said Tommy, pointing to Travis.

“Now I’m not so sure about him,” he added, pointing to Travis. “His cards could work for a few different decks.”

“I’m deliberately mysterious,” Travis said proudly.

“Do your worst!” Tommy told him.

Finding other fans is one of the best parts of the experience, Aik said.

“You can relate to the people who like to play these games,” he said, gesturing to the 28 players in the room.

At one table, a couple, Rebecca and Michael Storms of Tyler, ages 24 and 26, described how they counted and married over fantasy card games.

Now they have a 1-year-old daughter, Bayla, who will dress up as Dragon Ball Z character, Cell, for Hallowe’en this year.

“We share information, but we have our own secret decks,” Michael Storms said. His wife nodded. “I’m very competitive,” she said.

For Aik, another cool part has been the way you can select cards that express feelings of power or anger — that you would normally keep to yourself.

“It’s a way to express yourself without getting in trouble.”

A healthy obsession with Dragon Ball Z helped Aik Tongtharadol land a career with Score Entertainment, SPECIAL TO THE DALLAS MORNING NEWS

**Fans will eat this one up**

Anthony

Doralhyde "Red Dragon"

Eating his way through the $5,000, Doralhyde (aka Anthony, for short) has been a celebrated starter for the last eight years. While not a professional, he has become one of the area’s most popular and best loved.

**Simply put, “Red Dragon” is everything that it was meant to be. It lives up to the hype.**

With the recent release of the "Silence of the Lambs," fans of the show have been on the lookout for this delicious treat. Anthony is one of the few people who have actually tried it and can attest to its amazing flavor.

"Red Dragon" is a unique treat that combines the flavors of bacon, burnt rubber, and sweet barbecue sauce. The combination is unlike anything else you have ever tasted.

Anthony has been creating this treat for years, perfecting the recipe to make it just right. The bacon is cooked to perfection, the rubber is burnt but still has a hint of flavor, and the sweet barbecue sauce adds the perfect balance of sweetness.

"Red Dragon" is not your average dessert. It has a unique texture that is soft and creamy on the inside, but has a bit of crunch on the outside. The flavor is intense, with a hint of smokiness from the bacon and a sweet after-taste from the barbecue sauce.

Anthony is proud of his creation and is happy to share it with everyone. He has been receiving requests for "Red Dragon" from all over, and it's become a must-try for fans of the "Silence of the Lambs."

Simply put, "Red Dragon" is everything that it was meant to be. It lives up to the hype. And it's sure to be a hit with fans of the show. Don't miss out on this delicious treat!

Among those caught were a teenage girl who was arrested for a series of abuses of handicapped parking placards. They were stunned at the crackdown, they were stunned at the crackdown, they were stunned at the crackdown, they were stunned at the crackdown.

Body Worlds exhibit consists of vivid dissections and reconstructions of body parts. Among what Mentorn called the "ultimate makeover," the postmortem reconstruction of the body in its "plantation," to demonstrate how changes (would have improved the quality of his life).

People with issues

In Albuquerque, Darcy Ornelas, 31, was arrested in July after a car crash that killed her 4-year-old son. According to police, Ornelas had several drinks at a party but refused advice not to drive home. She fastened her seat belt but not the kid's, and then, in her Nissan 300 ZX, she became involved in a road rage to prevent a Mustang from passing her, continuing to speed up and exit in front of the other driver. After the fatal crash into a utility pole, Ornelas implied (according to police) that she had been concerned about being upstaged by another sports car.

America's new gun problem

Among those who accidentally shot themselves recently: Police Lt. Walter Ware (carried gun in waistband, shot in buttocks) (Great Falls, Mont.). Also, three Montanans were on the list: Undersheriff Mike Dominick (gun shot in buttocks) (Woonsocket, R.I., August); a 43-year-old man (gun caught in holster) (Missoula, August); a 19-year-old gun member suspect (gun in waistband) (Great Falls, April); and a 25-year-old man (gun in waistband, shot off right testicles) (Great Falls, May).

Among those who accidentally shot themselves recently: Police Lt. Walter Ware (carried gun in waistband, shot in buttocks) (Great Falls, Mont.). Also, three Montanans were on the list: Undersheriff Mike Dominick (gun shot in buttocks) (Woonsocket, R.I., August); a 43-year-old man (gun caught in holster) (Missoula, August); a 19-year-old gun member suspect (gun in waistband) (Great Falls, April); and a 25-year-old man (gun in waistband, shot off right testicles) (Great Falls, May).

Dude, where's my car?

Danielle DiPari Staff Writer

It was 12 a.m. Sophomore Ashley King was walking friends at their Village at Science Drive apartment waiting for a pizza delivery when she was run off the road.

Ashley King went outside to wait for the deliveryman when she noticed her fiancé's truck missing from the parking space where she had parked it an hour earlier.

King feared the worst — the truck had been stolen. But when a tow truck sped around the bend curving another road, she realized her truck wasn't stolen, it had been towed.

"I have never been to the complex before and hadn't realized there were separate visitor spots," she said.

King got her fiancé's truck back after waiting two hours for an employee to return, and parking the tow truck company $155 in cash.

Many resident-housing complexes like Village at Science Drive regularly tow students' cars for illegally parking in resident parking and many students are forced to pay hundreds of dollars to retrieve their cars from impounded lots.

In student complexes, where visitor parking is scarce or not available at all, residents and their visitors are complaining that students should not be towed, especially when there are no other parking spaces made available for visitors.

At Village at Science Drive, there are only 45 visitor spots available for more than 200 residents. While many of the resident spots stand empty most of the time, visitor spots fill up quickly.

Sophomore Kristi McFarland said that she was unable to park her assigned space and called Jefferson Commons asking them to tow her vehicle. He was told the complex had no contract with a towing company.

Days later, when Carrafa did not put his parking sticker on his car, his car was towed from Jefferson Commons.

At Knights Crossing, Senior Brian McQuary said his car was towed, but he wasn't notified for two days. He lived in the complex and claimed he was using his girlfriend's car during the time his car was towed.

Two days and $180 later McQuary had his car back from the tow truck lot.

"It's ridiculous," he said. "What if I was on vacation?"

Students like sophomore Marcelo Almeida of Miami are more concerned with how excessively low truck companies handle the cars they tow.

"I drew a friend to pick up his car and we followed the tow truck with his vehicle," he said. "The towed vehicle was swerving all over the road, going into other lanes. I really thought it was going to fall off and crash into other vehicles."

Several students say the tow truck companies follow very corrupt business practices, many who have given them incorrect addresses and others who have refused anything but cash for payment for impounded cars.

Carrafa said the towing company gave him the wrong directions to his lot and did not inform him of its end-only policy until he arrived at the lot.

While he waited to reimburse $100 for his impounded car, the company closed for the day. The tow truck employee refused to release his car until the next day and charged him an additional $25, he said.

Sophomore Kriel Zung said she witnessed a tow truck employee remove a visitor parking sign out of the ground and move it to another parking space so he could tow the legally parked car.

"It was mind boggling," she said. "These people do not have ethics."

In Knights Crossing and Jefferson Commons the situation is the same. But student apartment complexes say they have met the requirement to provide one and a half parking spots for every resident within the complex, part of which is enumerated visitor parking spaces.

Andrew Chu, manager at the Village at Science Drive said their towing system works just fine.

The apartment complex enforces parking regulations based on UCF's parking ordinance by allowing visitors to purchase $5 permits that allow visitors to park in vacant resident spots if visitor spots are all occupied.

If the complex adds more visitor parking spaces and later more residents moved in, it would have to allocate spaces over again, said Chu. It's hard to determine whether the parking permits have been successful or successful because the complex only recently began selling them.

Many students worry that the tow truck companies that charge students anywhere from $100 to recover their cars are not only cherishing students out of hundreds of dollars, but apartment complexes are taking a cut out of the low fees students pay.

Chu says his apartment complex does not receive any kickback from the money. Around the Clock Towing takes in. An employee at Jefferson Commons said that they also do not make money from towing fees students pay.

Both maintain the purpose of the tow trucks is to ensure parking spaces for their residents.

But junior Katie McFarland said her car was towed from her very own apartment complex over one evening.

McFarland said that although she did have a permit that assigned her a covered parking space in Jefferson Commons, her car was towed because she parked in a different space than the one that was assigned to her.

"My spot was really far away from my apartment and it was raining," she said. "There were plenty of empty spaces, so I parked in a regular spot."

McFarland paid $100 to retrieve her car from the towing company.

The same thing happened to sophomore, Mike Carrafa, a Jefferson Commons resident.

He also had an covered parking space for which he paid extra money as opposed to the cheap uncovered spaces.

When he came home one morning, another car was parked in his assigned space and he called Jefferson Commons asking them to tow the vehicle. He was told the complex had no contract with a towing company.
