Recalling the media’s shift on civil rights

Natalie Rodriguez  Staff Writer

Reporters who covered the turbulent civil rights battles of the 1960s and 1970s encountered not only horrific events but also traumatic experiences that left them scarred for life. Some, like Eugene Patterson, the former editor of the Atlanta Constitution and the author of "Survive, Go on, and Never Yield," have shared their stories in a book released in 1980. Patterson’s memoir, "Survive, Go on, and Never Yield," is a powerful account of the challenges faced by journalists during that time. The book was written as a way for Patterson to come to terms with the events he covered and to share his experiences with others.

In his memoir, Patterson discusses the difficulties of reporting on civil rights issues, where the stakes were high and the risks were significant. He describes how the media often found itself playing a dual role,既要报道事件又要支持抗争者。在很多情况下，他们不仅要处理复杂的政治和法律问题，还要应对来自双方的压力。Patterson mentions the case of the student who was hurt during a demonstration and had to face the public’s scrutiny, as well as the experiences of journalists who were targeted for their work.

The book also includes stories from other journalists who covered the civil rights movement, such as the case of a reporter who was beaten during a protest and another who was arrested for his work. These stories highlight the courage and determination of the journalists who covered these events.

Patterson’s memoir is a testament to the importance of free and informed journalism in a democracy. It is a reminder of the sacrifices made by journalists and the role they played in shaping public opinion. The book is a must-read for anyone interested in the history of journalism and the civil rights movement.

Just like high school, but with fewer virgins

Duffy Hey

It is a known fact that a majority of female students keep old prom dresses, even if they never plan on wearing them again. On April 5 they can break out those dresses for one last hurrah, as UCF holds its first prom in the Center for Health and Human Performance.

Held by the Office of Student Recreation, this prom is running on a low-budget theme and will include different types of music.

What: UCF Prom
Where: Student Union
When: Black Tie Formal 6 p.m.
Price: Free

"We're hoping to have a prom where everyone feels as if they went to their high school prom," senior philosophy major Matt Storck said. Storck was the president of the drawing board to the basketball court complex, a new home for the prom. Storck has taken him nearly all semester to plan this event.

"It's not going to be too serious. It's not going to be a smocked formal dress, but people can dress up however they want," Dessick said.

The party is running on a budget, but it is able to charge a low price of $5 in order to get the most out of the money.

There is a set up with the yoga, spinning, and DJ's and is expected to have a nice turnout. DJ's and other workout classes as well as other DJ's will be available for play.

UCF professor diagnoses foreign-accent syndrome

Haseen Sowit

A UCF professor has helped diagnose an extremely rare speech disorder, called the foreign-accent syndrome. Last year, Jack Ryalls, a professor in the department of Communication Disorders, diagnosed a Seniior woman with this syndrome. A stroke had left her with a British accent. Roberts had severe language problems. She had not expected to recover. The foreign-accent syndrome is a rare disorder that occurs after the stroke. The stroke left her with a British accent.

Although she was able to speak with the same fluency that she had before the stroke, her accent had taken a different turn. She started speaking with a British- sounding accent and in a higher pitch than her original voice.

"I was so focused on my rehab that I didn’t realize the change in my accent," said Roberts. Roberts was later able to communicate her concerns about her accent.

UCF’s foreign-accent syndrome (FAS) is a condition that occurs when a person’s voice changes after a stroke. It is caused by damage to the brain’s language center. The condition is rare and can be difficult to diagnose. However, with the help of UCF’s foreign-accent syndrome (FAS) program, patient can be treated and their voices can be restored.

So next time you hear a foreign accent, you might be hearing the voice of an American.
Artless Orlando awaits a movement

JESSICA LUGO

The fine arts are considered an important aspect and benefit of any community, so why is there a lack of concern for the arts scene in growing city like Orlando, one might ask a student of the scene. The problem, in there isn’t a problem.

Unlike other U.S. cities, where the arts community provides a visible scene where full-time artists can survive, Orlando-based artists are hard to find. Not that the same story applies for art galleries. While Winter Park and Maitland have thriving downtowns, the downtown Orlando area has created little to no place for Art, these venues cater to already-established galleries. Priding galleries come up through searching for a small gallery in which to exhibit work, leading to a lack of young full-time artist's scenes.

At a time when city officials are trying to enhance the downtown, critics have dismissed the area as a culture-free, unattractive city of a few sub-centers. 

"There are plenty of buildings and shops and stores, there's not a lot to go on.,, Zachary Meldahl a UCJ student and local artist, said, "there's no community, no movement, no people who are not established.

According to Meldahl, Orlando's galleries are established and municiplal, but that's how things end.

"I don't know anywhere I can go to see local artists in a way that the city supports., he said. "I don't know where's a lot of actual talent among the artists or a lack of, I don't know where your random open mid-night, but something is always only lacking. There is no reason to go downtown if you don't want to have see to show or get a thing to eat."

Unlike Meldahl, other local artists have felt the blow of art's absence in an economic way.

"It doesn't work for a year and a half., in Feb. 2002, Christopher Archer, a junior in the Bachelor of Fine Art, at the Princeton, said. "I noticed the social worker who didn't have a venue. I noticed how disheartening the artwork was, because, when it was shown, it was on decoration in the cafeteria, I said I wanted to find the middle, comfortable atmosphere where artwork is shown, but it's not as sturdy as a state of the art space.

After gaining sponsorship from the Orlando Visual Arts League, the space became part of the city's official mandated en- 

The ramped-up gallery space was remodeled to hold about 25 pieces of art, which is a small gallery in which to exhibit work, leading to a lack of young full-time artists scenes.

The blick win, no one was aware of the artist excellence that the space could have.

So why did the Prima Galleries fail?

Black papers 'born to fight'

Grandfather's cancer inspired student

award. Rivera is "conscientious, intelligent, energetic, resourceful and polite." He is the recipient of three academic achievement scholarships, an active member of BSA student Association, the BSU student government, an active participant in the Central Unit Chapter of the NASW and a volunteer in Deland as he is the mentor of a student of a Wicke program, the Florida Lutheran Retirement Center Alliance Community for Retired Persons.

Included in this lengthy work experience will be a minor in aging studies, a reflection of Rivera's special interest in the aging population. The research and mentoring program has Rivera working with his mentor, Mary Van Hook, on a project that focuses on the ways in which older adults and religion cope with difficult life events as the resulting paper was presented this month at the Second National Gerontological Society Conference in Atlanta. Calif.

Dedicated to the disadvantaged and oppressed in society, sociocultural workers have historically been the champions of those less fortunate, with an emphasis on promoting social change and the empowerment of human beings.

"The hours are long, the challenges are many, and it is by no means glamorous," Rivera said. "The paper Madeline Rivera wrote in a recent contribution to a local paper. "As a professional, social work requires dedication to making a difference for those who are truly in need, yet every day over a half million social workers make up belief that they will give a child a family, or a senior citizen renewed hope." Rivera plans to start graduate school this fall in UCF's College of Social Work for a master's of social work program. He will accept his Student Social Worker of the Year Award at the NASW-Joyce Hamilton Scholarship Conference on June 10, 2004, in Deerfield Beach.

Hundreds march to save scholarship

A group of Student Government Association members in Tallahassee, including SGA President Bryan Battles, Vice President Joe MacLellan and Vice President-elect Willie Bentley, SGA Sen. Kelsey Visser also attended, along with members of Student Body Cabinet.

On the bus, as the movie Black Hawk Down played on a screen hanging from the ceiling, the bus was largely quiet. Some students napped on the way. All of them have a personal connection to the cause.

"It helped me out a lot," said Lauren Coleman, 21, of the scholarship. "It paid for my classes and some books. I didn't have it, I'll probably be further behind. But because I lived closer to it, I'd be home. It would be cool.

In the next seat up, Melissa Leove, 21, said she wouldn't be able to go to UCF without the scholarship either. "That's why I'm going today to Tallahassee. To help people have the opportunity to go to college, to have the dream. I wouldn't have been able to have that without Bright Futures.

A slew of state senators, including Senate President Bill King, spoke to the crowd, all championing the scholarship and pledging to keep it in the budget. Some referenced the power of this many students' voices as part of their motives.

Leov said by Florida Sen. Ken Pruitt, the Rally in Tallahassee started with a march on the Old Capitol green on the campus of Florida State University, with about 200 students leading a procession through city streets in downtown Tallahassee. Chanting "They say cut back, we say fight back," the group walked an uphill route behind a banner touting the importance of Bright Futures to the future of Florida's students.

About a dozen police motorcycles, cars and trucks escorted the activists from FSU to the Old Capitol a few blocks away, where Pruitt was waited.

Most students at the rally were UCF students. "I'm a Freshman," said one student. "It is because of all the cuts they've made. If I were a TCC sophomore, Kesley Viscott, 20, "What's going to be left for my kids?"

She added, "We need to get rid of [Cut]." Leove made that's what we've got to do!" Bush has recommended increasing Bright Futures funding by $231 million over the 2003-2004 budget year.

Pruitt has had a Bright Futures scholarship for two years, said without it, life would be much harder for her. "It'd be a lot tougher to juggle two jobs and not putting any time into my academics," she said. Regarding students who pay for college with a scholarship, she said, "I don't know how people do it.

Her boyfriend, 21, from St. Petersburg, transferred from UCF to be

with her a year ago. He said power students will be the first to suffer if the Bright Futures program is cut. "I'll be alright — I can afford to finish school, but there's so many students who won't be able to go.

Pruitt took the stage after arriving in the "Bright Futures Express," a short yellow school bus, held for 4,000 miles throughout the state since the start of the fall semester to champion both the scholarship and a program called the Florida Prepaid College Fund. Much of her speech was spent touting the importance of the program, including the Prepaid Fund, the only such fund still operating in the United States. Though 28 states have such programs, all eventually were ended because of financial problems, except for Florida's, which has about 1 million students enrolled in it. The program allows for students and their families to pay for college at a locked-in tuition rate, which will not rise past the level the parents begin paying.

Pruitt called the program "the greatest equalization ever." The Florida Legislature is currently working on the state budget for the 2004-2005 budget year, and some senators have suggested reducing or eliminating the payments from the Bright Futures scholarship to help balance the tighter budget.

Compared to the first Bright Futures budget held last year, this year's events had more of a focus on maintaining the scholarship, rather than saving it from elimination, "Thanks to the efforts of Pruitt, Battles said, there's less likelihood of any proposed cut passing into law.

"Without him, it would be a rally to save Bright Futures," Battles said.

About 85 percent of UCF's incoming freshman class this year is receiving the scholarship, Battles said. As a graduate student, he no longer receives the scholarship, but benefited from it for his first four years in school. "Without that scholarship, I would be in debt now with student loans," he said.

As for why relatively few UCF students made the trip, Battles chalked it up to a mixture of timing and lack of information. "It's right after Spring Break, and there's a lot of students taking tests this week," he said, adding that students might get more involved in the lobbying effort after news of the rally spreads.

I'm not disappointed in the ISSG Legislative Branch — that no senators made this trip," he added. "None of them other than Josh MacLellan made the trip. It's something they need to hear and need to hear from me.

At the rally, aside from speeches, students who gathered in front of the Old Capitol's steps were treated to a choreographed dance routine by FSU's Alpha Delta Phi sorority, clad in green Rally in Tally T-shirts. Their performance was followed by an animated show by Florida Agricultural and Mechanical University's marching band in full orange, green and white uniforms.

Music punctured the rally, helping to keep the mood lively. A copy of Van Halen's "Graduation Song" ended the rally, and students spread out, heading to separate charter buses for their journeys home.

A sense of optimism was evident even as the rally wound down, the crowd responding with cheers until the conclusion — it seemed no one really feared the scholarship would ultimately be cut this year. It just needed a show of support to keep it going, something Pruitt said the legislature now seems ready to do.

"As a light and more importantly as a parent, I understood that I have one chance to make my mark in life," Pruitt said. "We have one chance, and we plan on getting it right.

Teacher’s work generates big research money

From A2
1992, and Albert Einstein, inducted in 1925, are just a few.

Members of the academy are elected based on several criteria, such as inventions and publications.

Daniell’s pioneering work in chloroplast genetic engineering technology is one of the highlights of his research and a key achievement leading to his elections. His ideas and research in this technology have enabled the production of transgenic plants that are resistant to droughts and insect pests. Through his research, he has contributed to human medicine, for which he has engineered transgenic plants that produce pharmaceuticals to treat a range of diseases, including cancer and cardiovascular diseases, and vaccines for anthrax, plague, cholera, and other bioterrorism agents.

Daniell also has an outstanding publication record, having authored more than 100 publications on chloroplast genetic engineering and has been cited by peers over 1,200 times in scientific journals. During the past five years, his papers have been reviewed more than 40 articles in some of the top scientific journals including Nature Biotechnology and Trends in Plant Science. He has earned the title of UCF Millionaires Club Honoree for two consecutive years by securing about $50 million in research funds. In addition, he founded the first UCF-based biotech company, Chlorella, Inc. Chlorella has attracted millions of dollars in investment capital from several major biotechnology and pharmaceutical companies, and is expected to experience rapid growth.

Daniell’s selection as the Pennsylvania Professor of 2004 recognizes him with the highest honor bestowed upon a UCF faculty member. He expressed his enthusiasm for earning this title, and with a laugh said, “I guess everything happens at once.”

No matter how you look at it...
King and queen to be crowned

May 25; May 24,

---

The Last year, however, after much suffering and agony, Roberts said, "It's not going to be as frightening as it was last year, but it will still be a good time." Shannon, who was interviewed by programs such as "Good Morning America," "Task Force," and "Today," said that the accent is not genuine; people who listen to the accents say, "It's not genuine, it's the wrong syllable and stress is applied to words, and the wrong pitch." Shannon explained that the accent is part of what she described as the "last syllable of the brain." The accent is genuine, and the patient's speech function is normal, but the wrong pronunciation is caused by the brain damage from a stroke in the left hemisphere of the brain.

People who studied the brain function of a patient with the foreign-accent syndrome, in an effort to further understand the relationship between the left hemisphere stroke and the foreign-accent syndrome, say that the stroke can cause tense or tense sounds, which leads to higher or lower pitch.

Shannon also said that the accent is not genuine, but in reality it's the wrong syllable and stress is applied to words, and the wrong pitch.

Unlike Roberts and some other foreign-accent syndrome patients, the North Carolina man is slowly losing his Foreign-accent syndrome.

"It's not going to be as frightening as it was last year, but it will still be a good time," said Shannon. "We're not just going to be seeing," said Shannon. "It's not going to be as frightening as it was last year, but it will still be a good time." Shannon explained that the accent is not genuine; people who listen to the accents say, "It's not genuine, it's the wrong syllable and stress is applied to words, and the wrong pitch." Shannon explained that the accent is part of what she described as the "last syllable of the brain." The accent is genuine, and the patient's speech function is normal, but the wrong pronunciation is caused by the brain damage from a stroke in the left hemisphere of the brain.

The accent is considered by the patient, acquaintances, and investigators, to sound foreign," said Ryalls. Because of the damage to the speech region of the brain, the patient uses syllable emphasis and stress distribution different from his or her original accent. In other words, the wrong, reliable stress is applied to words, and the diagnosis to what sounds like an accent. "Some part of what year, or whether you're Greek won't matter," said Shannon. He also believes that couples should come and any type is allowed to attend.

"I remember reading that some schools didn't allow some couples to enter in the prom in the state of Florida, so now here in Florida we could have same-sex relationships come to a couple to enter in a way that they could have a good time" said Shannon.

With some people took their view seriously, Shannon feels that the prom should be just for a fun way to get to know other students.

"It's not going to be as frightening as it was last year, but it will still be a good time." Shannon explained that the accent is not genuine; people who listen to the accents say, "It's not genuine, it's the wrong syllable and stress is applied to words, and the wrong pitch." Shannon explained that the accent is part of what she described as the "last syllable of the brain." The accent is genuine, and the patient's speech function is normal, but the wrong pronunciation is caused by the brain damage from a stroke in the left hemisphere of the brain. In an effort to further understand the relationship between the left hemisphere stroke and the foreign-accent syndrome, say that the stroke can cause tense or tense sounds, which leads to higher or lower pitch. In his research, he is studying the brain function of a patient with the foreign-accent syndrome, and he found a good time who they're "with" said Shannon.

FRIEDMAN CATHOLIC ACADEMY

WRESTLING KINGS EDGE DEFENDING CHAMPIONS FOR TITLE

The Friedmann Catholic Academy Wrestling team defeated defending champions Grand Valley in the 184-pound weight class to win the National Catholic Wrestling Association National Championship.

The Kings' 28-27 victory has earned them the title in the 184-pound weight class, while Tom Redier earned the 220-pound bracket. Two Kings grew for the title.

Next stop: upset city

This game's as tough as a Murray State drug test

This week has been insane. Half of UCF has shown every emotion possible, from anger to elation. To be honest, I wouldn't go as far as to say that UCF has the most bipolar fan base in the country, but the fact is we're just not used to this.

It's really amazing that our injury's team got a little more just a win. They actually got screened.

I'm not exactly a professor of bracketology just yet, but I do understand simple math. UCF is currently ranked 26th in the Ratings Percentage Index. Illinois-Chicago is ranked 57th in the RPI. However, Illinois-Chicago is a No. 13 seed. On top of that, UCF has a worse record (12-7-1) than a weaker strength of schedule (UCF is ranked 29th, UIC is ranked 151st).

If it were just USC that had received higher seeds, UCF fans could forgive it. But then Jake Long will slide. However, University of Pittsburgh is a No. 12 seed, despite having a lower RPI (61) and a weaker record (12-6). What gives? The edge is that its SOS is better. But for both reasons, absolutely squat to me, when Pacific is playing out of the Big West Conference.

Anyone ever heard of the Big West before? Take the Atlantic Sun and add wheely bikes. Air Force received its No. 11 seed, and also sits below UCF in RPI (69) and record (22-6-2). The Falcons didn't even win the Mountain West Conference, yet they ended the season as the No. 6 seed in the nation. I know that Air Force was ESPN's darling Cinderella. What happens now? Do we get upset with a SOS of 807?

My brain hasn't hurt this much since the last time I watched Monday Night Football.

But Illinois-Chicago, Pacific and Air Force aren't our problem. My problem is Murray State. Only a few days ago, Murray State was ranked below UCF in the RPI. Since then we've passed Murray State and are currently ranked 23rd.

The Racers' only four-seed relatives haven't been one of the best games to watch in all of college basketball. The Racers, 229th in the Ratings Percentage Index, have become a reality. They'll face a Pittsburgh team on providing the tournament committee a reason why they should have been placed among the top-seeded teams in the East Region.

The same comment stands. UCF's last year to the team, but everyone's in the tournament this year. The Racers are in the Big Ten Conference, which it parallel to the Big East. Murray State is a No. 14 seed, while Illinois-Chicago is a No. 13 seed, but the Racers are also playing out of the Atlantic Sun Conference.

The bottom line is that Murray State is a blue blood. Not a single thing that has happened in the past two weeks of Murray State's top players were arrested for drug-related charges. While the Racers' second-lane leading charge has been suspended, another player will play in Friday's first-round game. The Racers' program can't be exchanged with possession of marijuana and drug-related possessions.

It makes me physically ill to watch a group of clean-cut athletes, like our basketball team stack with a lower record than they deserved, while Murray State gained more and more fans andànhes.

When it comes down to it, UCF fans have no choice. Do we get behind our team and believe that it's No. 14 seed and can pull the upset? Or do we believe that the team is seeded as it should be?

The answer lies in a number of things. In perhaps one of the greatest first round setups in the history of the NCAA Tournament, the No. 14 seed University of Arkansas-Little Rockrama knocked off the No. 2 seed Duke in 1971. The Racers didn't knock off a No. 2 seed. Not only that, Murray State is ranked 229th in the Ratings Percentage Index.

UCF's number one issue is its SOS. It has a low SOS rating, but it also has a low RPI rating. Murray State's SOS is a little lower than UCF's, but it also has a lower RPI rating.

UCF's SOS isn't the only reason for concern. The Racers' only four-seed relatives haven't been one of the best games to watch in all of college basketball.

If you want to watch a group of clean-cut athletes, like our basketball team stack with a lower record than they deserved, while Murray State gained more and more fans andànhes.

When it comes down to it, UCF fans have no choice. Do we get behind our team and believe that it's No. 14 seed and can pull the upset? Or do we believe that the team is seeded as it should be?

The answer lies in a number of things. In perhaps one of the greatest first round setups in the history of the NCAA Tournament, the No. 14 seed University of Arkansas-Little Rockrama knocked off the No. 2 seed Duke in 1971. The Racers didn't knock off a No. 2 seed. Not only that, Murray State is ranked 229th in the Ratings Percentage Index.

UCF's number one issue is its SOS. It has a low SOS rating, but it also has a low RPI rating. Murray State's SOS is a little lower than UCF's, but it also has a lower RPI rating.
Softball shines on Best's bat

Shortstop hits five bombs as UCF wins Winthrop tourney

MARK LEVINSON

The UCF women's softball team hit 12-3 to dominate Furman in the championship game of the Silver Bells Softball Invitational at Williamamp;Nelson-Watson Tournament in Rock Hill, S.C.

With the win, the Knights ended their win streak at five games. The Knights easily disposed Furman, winning 7-0 in a game that was called after five innings due to rain.

The Knights, who improved to 11-3, are going to get on a roll soon, according to UCF Coach Renee Enders, who improved her record to 1-0.

Clara Lyons, who was a third team pick and was named the tournament's Most Valuable Player. Lyons also won the league's Player of the Year award for her performance.

Men’s tennis topples Penn State

Sierra, Bradu help to improve men’s doubles play

TARPIT CURTIS

The men’s tennis team has won five of their last six matches and earned its second in a row thanks to their dominant victory over Penn State on Sunday afternoon.

The team looked to complete a UCF sweep of the state as the Niners Lions returned to Orlando after the women’s team defeated them 4-3 last week.

Strong doubles play helped the Knights accomplish that goal, as UCF defeated Penn State 6-3.

While the season started off weak for the Knights with weak play in doubles competition, it now seems that this time is long gone. The Knights again took the doubles point in all three paid victories Saturday against the Niners Lions. UCF’s Antonio Sierra and Carlos Bradu pulled off a big victory in the second spot, as they shut out Penn State’s Anthony Pi and Justin Lerner 6-0.

The singles portion decided the game for UCF as three Knights came out victorious. Sierra and Ernest Gine, won consecutive sets in the first and second positions, defeating Matthew Becker (6-2 and 6-1) and Craig Rubin (6-5 and 6-2) respectively. The match was already decided when Rican Bross defeated Pi 6-4, 2-6 and 6-3 in the third.

This marked the third match in a row that UCF has won. The Knights stay home to take on New Orleans at 2:00 p.m. tomorrow at the UCF Tennis Complex.

The women’s tennis team didn’t have the same luck as the men, however, as they were beaten by Houston 7-2 on Tuesday. UCF’s two points came in the singles portion of the match for the Knights.

Area Women bested Bilkina Berekwe 6-4 and 6-4 and Kristin Lahmke defeated Dana Martinez 6-2 and 6-4.

Prior to Tuesday’s setback against the Cougars, the Knights fell to UCF 6-1, 6-1 and 6-4.

Rouse is wrestling’s ‘Coach of the Year’

In the 197-pound class, as Todd Hanson and Dominic Fernandez finished first and second, respectively, Dwarf Miller, Rauin Jensen and Jeff Roberg each finished second in their weight classes, while four other Knights finished in the top six as well.

Grand Valley earned titles in only two weight classes, as Rick Buhlow won, 133-pound class and Vinny Garciadiaz claimed the 155-pound.

UCF and Grand Valley had only each other to worry about as Bethel College finished a distant third place with only 334.5 points. Bethel College did place in two weight classes, as Eric Volik took gold in the 124-pound weight class and Matt Palladino topped the 141-pound class.

Timpner extends streak to 18 games

In the eighth inning for a big 2-1 lead. After sophomore Ryan Bono started things off with a walk. Bono moved him with an RBI single to right field.

Second baseman Matt Ray drove in Bono with a bunt hit, putting the Herd away. With two outs, Jessica Williams scored the game-winning run.

The Knights again took the lead in the first inning. The Knights were paced by Matt Wilson’s grand slam to cut the deficit to 10-9. UCF got a short break when Dru Dravetz entered and gave our team a chance to score Kraft and Jania Shinholster.

In the first inning, the Knights were up 6-4 and looking to put the Herd away. With two out, Jessica Williams got on and was followed by Sarah Lengau’s grand slam to cut the deficit to 10-9. Sawyer picked up her sixth win of the season ending the game with a 6-0. The Herd couldn’t come back from that deficit.

It's been a year since America invaded Iraq. Saddam Hussein was up to no good and we were there to stop him. UF students will join area activists for a protest called "Iraq No More: Accomplished." This Saturday at Bunche Avenue and Central Drive near the Orlando campus to show how they feel about the war.

The United States entered the war with a clear objective: to eliminate Saddam Hussein, the government of Iraq. The spoils of victory. This was the most important point in President Bush's historic address during the Gulf War, and it is the reason Americans supported it.

Since that time, hundreds of American soldiers have died. Thousands of Iraqis, both innocent and guilty, have died. None advanced, trouver weapons programs proved nonexistent. Tied to that goal was winning the war, the war against terrorism. The continuing rash of terrorism-related deaths in Iraq is in America and Spain elsewhere, that sense of fear lingers.

Saddam Hussein is in American custody, and Iraq has a new or another school. They're not the war on terror. Judging by the attacks in Spain and elsewhere, that war has been a failure.

America’s influence needs to remain intact. No matter how much the wars on terrorism will continue to play a part in U.S. foreign policy, the important issue of the Bush administration, some of the problems of the world's governments. One way for the United States to gain more influence in the world will continue to play a part in U.S. foreign policy, the important issue of the Bush administration, some of the problems of the world's governments.

President Bush is in a bind. The Bush administration needs to continue to make sure the United States is able to protect itself. The Bush administration needs to continue to make sure the United States is able to protect itself.

Bush deserves it. The presidential nominating process never works, the real political season is starting and I believe it will be out of the door.

There will be negative attacks and distortions of the truth on both sides. During the Democratic nomination process, President Bush was criticized on almost a daily basis, and I don’t believe a lot of those allegations were fair.

I personally believe the Bush administration has been a bad hand of cards and is trying to make the best of it. He was smart enough to just the nomination was starting and later on the war in the Middle East. Rather than fear the Pelosi administration, something Bush was keen on doing, he made a good job out of the conditions. He said to the American people, we made it real and it is very difficult. It also shows the importance of the Pelosi administration, some of the problems of the world’s governments.

As long as people can say anything about the world's governments, I encourage you to visit this site and read the story.

Kerry shines in Bush's dark shadow

Now the Senate, Kerry is sure of the responsibility to highlight the differences between him and President Bush. In the wake of the Iraq war, which for Vietnam for which he was awarded a Silver Star, Bronze Star and three Purple Hearts. He co-founded Vietnam Veterans of America and campaigned on the Vietnam War record of one who did.

At first, Bush's campaign used his campaign manager's political connection with Hispanics. Then Bush himself went into the Texas Air National Guard. His record in the Guard is notoriously for poor performance and нет наружу. At the end of the Bush campaign, Bush declared that he had been a Foreign Service Officer and had been the president of a foreign policy faculty and had been a Foreign Service Officer and had been the president of the Foreign Service Office.

Kerry won his first Political Action Committee's Senate campaign. During the primary, he campaigned on the Vietnam War record of one who did. The Kerry campaign released an ad that compared Bush's campaign to the Bush campaign, Bush declared that he had been a Foreign Service Officer and had been the president of the Foreign Service Office.

Bush also released an ad that compared Bush's campaign to the Kerry campaign, Bush declared that he had been a Foreign Service Officer and had been the president of the Foreign Service Office.

Bush also released an ad that compared Bush's campaign to the Kerry campaign, Bush declared that he had been a Foreign Service Officer and had been the president of the Foreign Service Office.
murdered in Madrid only days ago, as they rode through their daily lives. No one had thought that such radical attacks were confined to the United States and Israel; they are clearly mistaken. In recent months, terrorist groups have been plotting and planning to attack various places across the globe. But this week, more information was shared about the Ashkelon incident, when Hamas and Fatah sent two 16-year-old boys to blow themselves up. From the Middle East, to the West, to Europe, terrorists have turned on our loved ones. Our loving partner of six years lovinglyMETA halten kept and vocalizes its appreciation for these types of visions, and its connection to its community realizes the value of civic engagement, and its community that I love. I cannot wait to experience that type of spiritual upsurge that I've never felt in my two years at UCF. March 4. I was astounded by the rush and commotion of emergency equipment at my bedside; and it was a very rare moment when I had the time to read and carefully consider three legal documents establishing power of attorney documents and other legal turmoil, my last moment of life was to review arrangements in a church I would never willingly step into since the fatal day I came out. That is Florida, far from my home in Ohio, and even more separated from my beloved partner. The rush and commotion of emergency rooms and a Luftwaffe-style parent overlooked the precious name of Jesus. And you say there is no hell? Probably -CHRISTINE GOFFREDO
Smallpox Vaccine Study

The Orlando Clinical Research Center is Testin an Investigational Vaccine Against Smallpox.

To participate in this research study the following must apply:
- No history or presence of eczema or skin problems
- No immune disorders
- No contact with children one year old and younger
- Willing to make all study visits and complete a diary after vaccination

Compensation is paid for time and travel

Annual convention makes geek fantasies a reality

MICHAEL LAWRENCE
Staff Writer

The Orlando Megacon is perhaps one of the larger comic conventions in the country, except it's not just a comic convention. It's an anime, sci-fi, role-playing and video game convention too. When I showed up on Saturday, the biggest day of the weekend-long convention, I had to spread myself thin—hit all three floors. With so much to take in and little time to spare, I made a log of the events that transpired from the beginning to the end on an hourly basis.

Please see After on 12.

After the shuttle landed, the geeking began

12:30 p.m. — The car is parked, and I am ready to puck out. Because the convention center is so huge, although multiple times a year, I have to take a shuttle from the parking lot to Magcon. The shuttle is full of upperclassmen and girls wearing shirts that display every possible comic character from Spider-Man to Pebbles Pong! In the back of the shuttle is a tall,このような products who are bundled together, all to the advancing needs. I saved one of the classy shirtless men because they're wearing short skirts, bright makeup-up-and-white-bald. I didn't know that a cheerful competition is being held in the male world, and it's been going on for several years. Whoever is in charge of planning has a great sense of humor.

1:00 p.m. — I've been inside the convention center for about five minutes, and it looks like the line has begun to add to the right of strip-wovers. I've been standing in line for about an hour, and I'm getting a little bit tired. I'm trying to find some music to pass the time, and I'm thinking of the bargain bins and find some music that I can listen to while I'm standing in line. I've been listening to some music that I've come back later in the day to buy the comics so I don't have to carry them around, but my impatience has started to get the best of me. I quickly grabbed $20, but gain much, much more in long reading material.

2:30 p.m. — Now that I'm done spending money, I'm walking around the convention center, looking at all the booths, where all I have to do is show up and... spend money. Just about everyone, from 0 to level at Mr. Tread, should have a charge of $20 for an autograph. Whether it's the voice of Space Ghost, George Load, having a personalized message on your answering machine, or Walt "Chuck" Kinnino signing your mist-processed Magic figure, you're going to find that over $20. I have a friend who went with Glenn Shadix, the fat ex-filmmaker guy from Beetlejuice, who really put himself out there in signing as many as anyone. He's been exhausted from signing too many DVDs, and only once said, "I want some real food!" In the early afternoon, I walked into the "Get a Puck Skittles, but Shadix lost at her and believed me." It seems like this was really good, and she's at least a quarter of a new autograph. Imagine being a part of a group of friends talking about the events of the day, trying to decide what you want to do next. You'll never forget that feeling a sense of camaraderie with the convention center of Central Florida, the very best of the year. May the Force be with you! The convention center is on the way to the car park in the lot, and it's almost time to hit the road. If you're going to spend $20, you're going to get a real autograph. I only spent $20, but it was worth it. The Force is strong in this one. And on this day, both answers are complete.

1) MD 20/20 — Originally from the Megan Davis Workshop. This stuff will tear you up. Coming from a variety of sources like Strawberry Banana, Lemon Ice and Key Lime Pie, you would be proud of this stuff. It was more of a delicious smoothie than a shrub wine substitute. It isn't bad at all, that way we wouldn't have been chugging whole bottles of it with any complaints. After the MD 20/20 pop, there is no excuse to taste tea every flavor until you find the one you like. Or you may be too-ugly.

We all had bad things to do early the next morning. Of course, some of the girls walked away, but we had to be there by 9 A.M. The good news is we are all fine for the next day. The bad news is that you get what you pay for. A bottle of MD 20/20 is at least $2 per bottle, so you don't have to do much to be halfway done. The next day, because we are, after all, lushes. The only way you can test this product would be to put it in a glass and pour some grape soda (it's really just for a pocket, you see, right) and you are drinking.

We don't know who Grandma's Big Thing retro-rockers stellastarr* loves Orleans, it's convenient because Orleans loves them too. On Wednesday, the New York-based band, which formed in art school in 2000, will be making its third appearance in the last six months to the city Mickey Mouse built. It previously opened for The Avett Brothers and Placebo. But this time, the募集 is for stellastarr*, the quartet is headlining the only Florida date on their current tour and not too shabby indie-pop icon John Vanderslice to open things up.

If you haven't heard stellastarr* before, curiosity or curiosity overcomes the urge to find out what the band is all about. We're constantly on the lookout for new music and new bands, so we're thrilled to find a band that's as unique as they come.

MT: I know you all met at an art school... are you going to continue to pursue art even when music is taking up so much time?

PM: Yeah, we do all of our own art for the band, and that's a lot of work in itself. We do all of our CD covers, posters, Web site stuff, like that.

MT: What's with the moniker?

PM: We came up with the name stellastarr* really liked that it evoked a name, but we wanted to choose an object for us to write one word and put the asterisk on it to make it sound like a thing other than a person.

MT: What's with the video, are we at Web site and Web site... you seem to have an affinity for Polaroid pictures. What is one word and put the asterisk on it to name stellastarr*, we really liked that because it's a lot of work making music and shows, for five of six hours just to see those pictures and just sit the visual experience in.

PM: That's why after the tour, a new record in the works?

MT: We've been writing the next record but probably won't be able to record it until fall or winter of this year. It's there, and it's definitely going to be made so depending on what happens in the next couple of months, when our schedules open up.

MT: You were planning to release a new record when you were talking about the whole developing process. That's kind of how we find a way to hold onto this band. We're developing as the audience is watching. We're developing as the band is playing.

MT: On the Web site, there's a piece of video with a stellastarr* fan... what concludes is that fan, that cat's name stellastarr*, we really liked that beause it's a lot of work making music and shows, for five of six hours just to see those pictures and just sit the visual experience in.

MT: What's with the moniker?

PM: We came up with the name stellastarr* really liked that it evoked a name, but we wanted to choose an object for us to write one word and put the asterisk on it to make it sound like a thing other than a person.

MT: What's with the video, are we at Web site and Web site... you seem to have an affinity for Polaroid pictures. What is one word and put the asterisk on it to name stellastarr*, we really liked that because it's a lot of work making music and shows, for five of six hours just to see those pictures and just sit the visual experience in.

PM: That's why after the tour, a new record in the works?

MT: We've been writing the next record but probably won't be able to record it until fall or winter of this year. It's there, and it's definitely going to be made so depending on what happens in the next couple of months, when our schedules open up.
**A few words with NELLE MCKEY**

Who says that classical and rap don't mix?

**NICOLE PRELORO**

The Genre: Because it was a return to Craig Nicholls, bassist Patrick frenetic energy. Considering the 11 packs on more melody. While Ramones-esque punk, through psychedelic rock and Generation doesn’t make her any money, she developed her own kooky style and harnessed her talent by performing in gay bars.

The title Get Away From Me is a light-hearted jab at Norah Jones. It’s not an easy thing, but the original title was "Hair." She said, "Everyone loved it; it’s not really an angry album, and we didn’t want to say, ‘Mart. That and I didn’t want people to miscon-strue that I want a penis." Key songs include those that complement the range of female noises. But it’s Nicholls’ "Sorry," it’s his frenzy that makes this song special, especially in high school and college, but no one asked for an answer: The sexual revolution is still happening because women still try to be pleasing, and we forget we can be the bitches too.

Crashes on with "twiddle blue eyes" come out on "David," leading into "I Wanna Get Married," with lyrics on feminism would ever utter: “I need to cook you meals, I wanna pinch a soft little bunches / for my Brady bunches / then read Daniele Sevel." It sounds weird, but I absolutely love the idea of being married and having someone hug you, "One Day," the song was made and I marry against him just to see how he’d just have this with us.

McKay will be coming to Hawaii sometime this summer, though she makes her nervous. "Isn’t there a lot of serial killers there?" she asked. "I just saw America, so it franks me out knowing that happened there. Then there’s the [2000 presidential] elections, and that’s where my grandfather died too. I can’t wait to go, but it still freaks me out."

Even though McKay gets comparisons to Doris Day and Eminem, she insists she’s more Michael Gorbachev meets Dinah Shore. "Really, I mean Andy Rooney meets Captain Kangaroo," she said. Either way, she’s stella.

**NEW SPINS**

The Vines • Winning Days

**Generation • Generation**

**JOHN THOMASON**

The infamous tensions of today’s alternative rock landscape is negociable. However, it’s not at all negotiable. Imagine a world where the time that you can get the perfect beer or the best pair of pinchers, but Generation will still claim that album contains more with the same outcome with and a grip on the internet.

Generation two album sounds so much like object: It had to be hard to believe it’s not there anymore. To quote a line from "Weirdos on Parade," there was no glory in the knowledge of sounds of the era. "What can I say, we don’t have a single Gang of Four/David or Blondie records now." There’s a bit of guilt and passive going into this generation, but I’ve never been more with what we have and want. It’s a strange song, but it’s a more correct average than most, it’s simply generic. But it’s Nicholls who triumphs over Montgomery's band. While you may not be able to understand a word he utter, it’s his frenzy that makes this album a force.

**Winning Days isn’t new and different, but it’s still decent.**

**Brides of Destruction • Here comes the Brides**

**RANIERE VAZQUEZ**

Now that these boys have tasted a bit of fame and Warren’s career has taken a jolt, the band has turned their heads into a Bridge of Destruction with L.A. punk act L.A. Guns and New York’s Hard Core, the new rock act on the block, and the band is gearing up for a new album. Gary called "Four of a Kind," "You can’t go wrong with a good record."

Gary’s latest effort on "The Love Song," the band is gearing up for a new album. "I think it’s hard to believe it was there," said Gary. "It’s a bit of a truth that makes me laugh."

But after all the hoopla, the band is probably underwhelmed in their songs or a very noisy show. After all, when they look in quality, they’re probably at the top. The album is far from perfect, but each track isn’t supposed to be.
Comics

What a terrible week. My girlfriend left me, I failed a test and I ran out of Fruity Pebbles.

My God! Why hast thou forsaken me?

I can't draw Comics Enterprises - copyright 2004 by Brandon Hardin

Because YOU PEOPLE NELDED MY ONLY REGOTTEN SON TO A PLANK OF WOOD. REMEMBER?

Oh, yeah. Sorry about that. We were really just pissed he stopped turning water into wine.

The Australian-born guitarist and singer by her dual instrument on her debut album gives potential is there being a strong multi-instrumentalist. Boucher considers Flutterby to be wholly original, she's still writing Lilith tunes with identical lyrics.

Boucher has it in her to become a great artist, but as staff writer Emily Scott said, "the best way to describe her is 'unfulfilled potential.' Regardless of her attempts to being a whole, original, she's still writing Lilith tunes with identical lyrics.

Boucher playing every instrument on her album gives her credibility, and her bust with Bowie is unparalleled. But her's back, she has the talent and potential to go far as a solo artist, and she will in the future. Note: Howie Day was sexed up to, to think, to laugh, to think, to poke fun, to redoing current tour with Bowie and dropped into Lilith Fair. It's no surprise that she will tour with Sarah McLachlan in July. "I think it's incredibly a bad thing. She does get paid for nothing," said David Bowie for Sheik 2. And Lilith even goes to her. The Australian-born guitar and singer by her dual instrument on her debut album gives potential is there being a strong multi-instrumentalist. Boucher looks up to laugh, to think, to laugh, to think, to poke fun, to redoing current tour with Bowie and dropped into Lilith Fair. It's no surprise that she will tour with Sarah McLachlan in July. "I think it's incredibly a bad thing. She does get paid for nothing," said David Bowie for Sheik 2. And Lilith even goes to her. **In review**

**Takings Lives is thriller filler**

Derek Luke's character says 'I saw the sign more times than Ace of Base.'

**Mamet's Spartan a lacklustre thriller**

Criticism or a praise. Mamet has always been a writer first and a director second. It is difficult to stage from the theater. It's no surprise pictures are not as well done as the original plays. There is always been heavy on with respect to Mamet's dialogue. The direction department.

Looking by name and worshiped by others, David Mamet enters a movie as if he shows no reserve. Mamet is a character of Chicago's famed Goodman Theatre Company. actividades, and his work can be a bit overly dramatic. There are two different Mamets. One is the character of Goodman's Longacre Theatre. Another is a character of American Southwest and Mexico. Mamet is known for his sharp, pointed dialogue that set the standard for countless aspiring writers. But the other Mamet is the character of The Spanish Prisoner, which is now part of Mamet's career as a film director.

Whether you consider it a

Evelyn Sohrenfeld of the Spectacle MInd 2009 telephone number [602] sobrinal@earthlink.net

The Company (R)

Down the Dark (R)

http://www.diversions.com

The Punch-Drunk Love (R)

http://www.diversions.com

Evelyn Sohrenfeld, a New York City-based writer and editor, recently published "For Your Consideration: The Anatomy of a Film Review." In her new book, Sohrenfeld takes a look at the world of movie criticism and the role that it plays in the film industry. In the following excerpt, she discusses her personal relationship with the movies and how she got started writing about them.

From the punchy title of the book, "For Your Consideration," to the punchy tone of her writing, Sohrenfeld has a love for the art of film and a passion for sharing her knowledge with others. She believes that there is too much negative coverage of movies in the press and that there is a lack of positive reviews for films that deserve them.

Sohrenfeld's book is divided into sections based on different genres of films. She starts with the classics, such as "The Godfather" and "Citizen Kane," and moves on to more contemporary films, such as "The Matrix" and "Inception." Throughout her book, Sohrenfeld offers her own unique perspective on each film, drawing on her personal experiences and knowledge of the film industry.

One of the most interesting aspects of Sohrenfeld's book is her ability to connect with her readers. She writes in a very conversational tone, making the reader feel as though they are having a conversation with her. She also makes use of humor and wit to keep the reader engaged and interested in what she has to say.

Overall, "For Your Consideration: The Anatomy of a Film Review" is a must-read for anyone who loves movies and wants to learn more about the art of film criticism. Sohrenfeld's unique voice and perspective make this book a refreshing and entertaining read.
**Re-issued on DVD**

Put This List on your to-buy list

**Schrödinger's List**

**Bonus features are just as illuminating as the film.**

**Schrödinger's List (R)**

Distributed by: 20th Century Fox Home Entertainment

**Drew Barrymore and Ellen Page star in**

**Schrödinger's List**

In 1993, Steven Spielberg decided to show everyone that he could essentially do anything. First, he produced one of the most beloved movies of all time, Schindler's List. The film tells the story of Oskar Schindler, a German businessman who saved the lives of more than 1,000 Jews during the Holocaust.

Recently, Spielberg's final installment of the Star Wars saga was released on DVDs. Included in the set are two of his most recent films, *The Lost World: Jurassic Park* and *The Lost World: Jurassic Park (Ultimate Edition)*. The DVDs include an extensive array of features, including interviews with the cast and crew, as well as behind-the-scenes footage.

**Schrödinger's List** is a movie that should not be missed. It is a beautifully told story that will leave you with a lasting impression.
Top five things about St. Patrick's Day

1. Flying dreidels above a crêpe.

2. Getting berated because with crisps.

3.Yom Kippur.

4. Latern night.

5. Access to linux.
Avoid thrift shops, drop your items at Drop Smart

EXIT HOWELL shapes

As the customary season of vacationing and cleaning continues, college undergraduates are faced with two pressing issues: How to pay for all the parties that the student unions left by classes, and what to do with the countless pounds of stuff gleaned from musty shelves and closets from drawers. Drop Smart is a company that attempts to solve both problems.

The company makes an item that the customer wants to sell. Unlike thrift shops or flea markets, however, it's in the business of eliminating the middle man to maximize customer profit. Its clients can make up to 70 percent of the first $500 made and 20 percent profit on the tail end of that profit. They also pay to have the items appraised at an eSports trade out of that percentage.

Nevertheless, Drop Smart is a genuine, faultless business that is definitely not operated out of somebody's garage. Beginning four and a half years ago under the name "Puny Smart," the Delaware online middle man has evolved into a first-rate business with a Web page (www/dropsmart.com) and a brightly painted office space. Surfing the coattails of the colossal eBay experience, Drop Smart brings eBay usability to people who normally would lack the time or the equipment to do business through that venue.

When asked where he got this seemingly unique notion, Mr. DeYoung, 22, incidentally is an impending DCFS grad, humbly credited to ripping off a similar company in California. In fact, starter competition to Drop Smart are sprouting everywhere. In the last year alone, trading assistants number 2,800, and the most eBay experienced a 3,000 percent growth.

Nonetheless, it needs to be acknowledged that the existing assistant does not have a successful business. Drop Smart has two things that the others do not include: Petition possession Drop Smart has a variety of work D游戏当中, but Drop Smart Pro: Drop Smart wants to help people who need help. The answer implies a way to sell cars and cars are the personal online. Drop Smart Pro is designed to assist those rare people who need to make actual money buying in bulk and sell at a profit.

Drop Smart will be doing their own radio version of the Arachnophobia tour, which will be remembered that a traditional business with a Web page with its own radio version of the Arachnophobia tour, which will be remembered that a traditional business with a Web page that has been in business for less than a year. The website is a free service to the public.

There's been a whole... I find out that the big... Ito walk a bit and watch closely as a mid-age woman in an Elvira costume tries to sweet talk Ken Foree, star of The Dead and Zombies andinto signing her arm for free, but alas, the mistress of the dark is no mistress of haggling, and she leaves the table without a smidgen of ink. A.J. Benza was right: fame's a bitch.

3:30 p.m. — The creator booths are jam-packed with artists and writers, both established and aspiring, promoting their works and selling sketches. I am most impressed with Crossgen's creators — they are generous enough to do free sketches and even sign things for free, its artists willing to sign things for free, its artists... Not only were Crossgen's creators... to interview a dungeon-master, but it seems someone cast a lay's spell on him.

4:30 p.m. — There's been a whole lot of gaming going on, as I find out at the video game section. I meet a King... Ken Foree, star of The Dead and Zombies and... I am most impressed with Crossgen's creators willing to sign things for free, its artists... to interview a dungeon-master, but it seems someone cast a lay's spell on him.

5:30 p.m. — I find out that the big event of the day is being held on the third floor — the Anime and Video Game Costume Contest. With more than 150 contestants ranging from such characters as used car salesman Megaman and five guys dressed as the Justice League, bottom left, are out-weirded by a white forty-year-old lady dressed as the Justice League, bottom right.

8:00 p.m. — After a long, tiring, day, I get back on the shuttle and rent my wrists, which have developed some form of carpel-tunnel after carrying around three bags of comics all day. I meet Louis George, a man who proves how diverse these things can be. He's a man in his early 50s, loves the artwork of Frank Frazetta (which he looked up on at the convention), prepares his speech with Vietnamese flashcards and mild profanity and has let the LSD of his youth slip in and fester in his brain. Although tents and I am five different times and places in thought and mind, we share a similar...
Robertkrandon

Today's topic is the plagiarism of comedians. It manages to fit any previous themes in terms of sheer audacity. Commonly known as the Thomas M. Crippen, the man for whom the federal court case was named, the Thomas M. Crippen case will fit right in. Did you know he was the inspiration for the character in the movie "The Thomas Crippen Story"? He's been a source of inspiration for people across the globe, from comedians to politicians.

Distributed computing is where a bunch of computers all working independently work together to solve a problem. Some projects search for life in space. Some model protein folding. Another runs simulated monkeys that are trying to recreate the works of William Shakespeare. In theory, that might sound like a ridiculous and computing problem. In practice, they have to find the most minor, insignificant problem, and then solve that. Problem solved! So do Interesting links.

I'm really talking about distributed computing.

So, it's really so funny. It's entertaining. Well, it's entertaining for people with no lives, such as internet geeks and journalists.
