Unplugged life common in Europe

BRENDAN DREYER

LEON, Spain — The UCF campus-wide movement to unplug prompted the campus newspaper to cancel all press trips and events that week. Students took part in the movement to disconnect from electronic devices and reconnect with nature. The move was part of a larger global trend towards reducing technology use and promoting a more sustainable lifestyle.

"The great danger to the country in the end is not terrorism or problems in the economy; the problem will be secret government."

— ROBERT WOODROW

Robert Woodward is a legend in American journalism. The former Washington Post reporter, author and political advisor, who worked closely with President Richard Nixon, will serve as the keynote speaker for the Student Union Center's upcoming on-campus event. The event is aimed at students and faculty interested in exploring the role of journalism in modern society.

JOURNALISM 'legend' explores Watergate and politics

HEIDI A. DE VRIES

Senior Staff Writer

"Bob Woodward is a legend in American journalism. He's been a reporter, an author and a political advisor, and his work has had a profound impact on our understanding of politics and government," said Mr. Woodward.

The keynote speech will take place on October 8th at the Student Union Center. Tickets are available for purchase online through the Student Union Center's website.

HOOTENAN To YEELE and Tham with plant life

MORGAN WINTER

Senior Staff Writer

The new addition to the Student Union will have a green roof. Not a roof painted green, but a roof planted with vegetation. Sound a little crazy? Not to Europeans who have been using the roofs for the past 50 years, and not even in countries like the United Kingdom, Germany and Pennsylvania. Green roofs have been used to help control energy, manage storm water, reduce noise levels and even prolong the life of the roof itself.

"It's happening," said Management Assistant at UCF the Department of Environmental Protection and several other organizations have teamed up to develop a roof for the new addition to the Student Union that will help bring down energy costs in the U.S. as well as provide valuable resources on how green roofs can be used in Florida.

The academy was developed in November 2020 as a result of a proposal by Morten Wisthede, a director of the Academy for federal funding. It's name says it all. They manage storm water and hope to accomplish just that with the new project at the Student Union.

Student Union roof to team with plant life

Spring break is over and it's back to the daily monotony of schoolwork, jobs, and, yes, working out. Many students around UCF have been working hard throughout the spring break to lose extra pounds. They go on fat diets and double up on gym time to catch a couple of stones on the beach, then once the break is over they go back gaining it all back in, and working out with those again until summer rolls around. Professor Cornwell and Wellness Center director Lori Shrofran sees this as the wrong way to go about getting in shape.

"You can't just start and stop, it has to be a lifestyle," Shrofran said.

In a workshop Thursday right, Shrofran outlined some basic rules for getting fit and staying that way.

"Where does the beer factor come in?"

If you're looking to lose fat, Shrofran says, "you want to make sure it fits into your lifestyle."

Shrofran says that diet is extremely important. Shrofran explained that people have to balance their meals. The South Beach diet, which is low in carbohydrates, is a huge street right now, but Shrofran says that there is no need to eliminate lot leafy green foods from your menu, such as broccoli, spinach and cabbage.

"Wherever they're coming from, as long as they're not fried, then you can have them."

Shrofran added that if you're hungry from time to time, you don't have to worry about it; you can grab a protein bar orauthority snack, but you can't substitute calories in a meal with a lot of protein. Shrofran also recommends that you make sure you're drinking plenty of water before and after a workout.

"If you're drinking water, you're not drinking calories, so that doesn't hurt your cause at all."

After a long night of partying, wake-up breath straight to the sink, brush your teeth, and get a healthy start to the day. Shrofran encourages not eating in the morning.

"Watch what you eat." Shrofran says, "It's what you eat at late night that really affects your morning."

Healthy snack options:

- High fiber crackers
- Whole-grain pretzels
- Peanut butter sandwich
- Granola filled with nuts

Just can't keep up any time

At 2:12 p.m. on March 29, Robert Cunningham, 43, was arrested for trespassing on UCF property for the fourth time this month. The free agent was found sleeping outside the main entrance to the Student Union.

Shrofran was responding to a call for a report that was written in the Visual Arts Building parking lot. The incident had occurred just before 4 p.m. The student, who was not identified, reported that Cunningham had been stored outside the building.

"He was very, very incoherent, not being able to speak or make any sense of himself, just screaming," Shrofran said.

Cunningham, who is a resident of Orlando, was arrested and transported to the UCF jail.

Cunningham was released on bond at approximately 3:30 p.m. on March 29.

Police Officer Mark Jenkins was responding to a call about a fight in the Visual Arts Building parking lot. The incident had occurred just before 4 p.m. The student, who was not identified, reported that Cunningham had been stored outside the building.

"He was very, very incoherent, not being able to speak or make any sense of himself, just screaming," Shrofran said.

Cunningham, who is a resident of Orlando, was arrested and transported to the UCF jail.

Cunningham was released on bond at approximately 3:30 p.m. on March 29.

Woodward: Nixon implicated himself

Michael Deichen, MD
27th Street, 9th Floor

I’ve noticed a trend—when people ask me if I’m on the Internet, they’re usually referring to whether I have an email address.

Well, not studying isn’t the only problem with not being on the Internet. It may appear to be describing a computer addiction, but there are some who claim to be addicted to the Internet just as much as they are addicted to coffee.

This is a problem, as it can affect one’s health, social relationships, and even their work performance.

If you try these strategies and see that they work, you can find out more information about addiction to the Internet and other substances.

Good luck with your studies and always remember to take breaks.

Woodward discovered that he had just understood the reason for the “squeeze.” It was an act of restraintlessness—an act of restraintlessness that the public barely noticed. He was a little touched on the head by the way he handled the head, and the press gave him the benefit of the doubt for the sake of the country.

Nixon’s reputation could have been saved if he had had just one more person with a reasonable head on the table, and told the press that he had been tricked into doing what he was doing. This is one of the reasons that the presidency then and now, according to the press, has an absence of process. In the past, the press had “scared him into” telling the truth, but now it is telling him “who he is and what he has been doing. This is then, after he has decided that he wants a consensus among those in his cabinet before he does anything important things in foreign policy.

Woodward also gave a striking example of how the president had to his story in one of his White House speeches. He wrote in a previous book that he had the speech transcribed in a two-week period. He was given the speech and told him to go out and see if he could find the same people he had been talking to. He was able to do this, and Woodward added, “I believe it’s the best.”

During the question-and-answer session, there was a lot of talk about the president’s role in the Watergate scandal. However, the most important thing about the Watergate scandal is the fact that it happened to the president. This is not a “sub-acute” diagnosis.

The public’s attention then shifted to the most pressing issue: the future of the Central Florida Step-off. The step-off is an annual step event held in the Central Florida Step-off at 7:30 p.m. The event involves a roller coaster, then a kick-off to the ride, and finally, a “sub-acute” diagnosis.

New roof should conserve energy

Martin Wanielista, head of UCF's Stormwater Management Academy, says the new Student Union addition’s ‘green roof’ will lower costs.

FROM A1

Wanielista said that the project was originally proposed when the Academy first opened as a possible project, but it did not actually come about until after a series of conversations with Eric Livingston, the Department of Environmental Protection’s bureau chief for watershed management.

UCF was the perfect location for the green roof project because both the Stormwater Management Academy and the Florida Solar Energy Center, which will monitor the energy conserved, are here. That they want the green roof to be visible also played a role in the decision, says Livingston. The Academy was given a grant to cover the costs of installing the green roof itself, and the costs of the building addition will be covered by UCF’s capital improvement trust fund.

“Water is Florida,” Livingston said, which is why this is such an important study. “The major reason for a green roof, from my perspective, is to control storm water,” Wanielista said. The group must prove that the system is effective for this purpose, which they are fairly sure of, but they have to find out exactly how useful it will be before they can build it.

To accomplish this the roof will be divided into halves — one side will be a green roof, while the other will be made out of standard roofing materials. Each half will be drained independently through pipes, which are routed so that they end up side by side on the exterior of the building. There will be valves on each of the pipes that can be opened, and this is the point at which the water will be monitored. Both samples will be compared in quality and quantity. Ideally, the side with the green roof will have less runoff and better-quality water.

From there, the pipe that contains the storm water from the green roof will be routed to a storage tank where an irrigation pump is located. The pump will push water back to the roof through a small pipe so that the water may be used for irrigation.

“One of the people at the forefront of the design is Jennifer McDaniel, a UCF graduate with a master’s degree in electrical engineering,” Wanielista said. “She’s the director of special projects at the Academy, and will also be involved in the monitoring of the stormwater quality.”

Best rips three to push streak

Shortstop helps softball grab 11 straight

MATT CHAMBERLIN Staff Writer

Over the weekend the UCF softball team extended its winning streak to 11 games with a pair of victories over Lipscomb and Belmont.

"Right now we’re facing a point where we are building our confidence," Coach Renee Luers-Gillispie said. "Our defense is getting better, our bats are unbelievable right now and our team is working well together.

The Knights opened their Music City Classic Friday night with a thrilling 15-14 win over Lipscomb. The comeback started early as UCF scored three runs in the first inning.

UCF added another run to pull ahead 4-0 in the second inning as the catcher Betsy White singled to left field. The Knights went on to win 5-2.

In the top inning the UCF bats came alive. After two walks, designated player Amy Lamb ripped a single to left field to cut the lead to 1-0. Pitcher Dana Gilmore came to the dish next, and plated the middle-

The Knights clinched their second straight victory with a 13-4 win over Belmont Saturday afternoon.

On the mound Saturday, senior Taylor Webb was dominant, allowing just two hits and striking out 12 batters in seven innings.

"We were getting better. The more you face a batter, the better you get," Luers-Gillispie said. "We started strong a little slow, but the more you face a batter, you get more comfortable.

UCF evened its record at 17-13 and improve to 4-0 in the Sun Belt Conference.

Over the weekend, the UCF softball team extended its winning streak to 11 games with a pair of victories over Lipscomb and Belmont.

Student engineers receive generous Nascar donation

SAE hopes to add more competitions with ‘grand’ gift

ASHLEY BURNS Staff Writer

One of the nation’s oldest organizations is whether or not racing cars are a sport. "It’s that simple," said Coaches of the National College of Agriculture Engineering. "As long as you’re paying for it and you’re charged for it, it’s a sport.

According to the members of the Society of Automotive Engineers, it’s not only a sport, but it’s a business.

Thanks to a $1,000 donation from NASCAR last week, SAE'slittle league program is off and running.

"We went after them," said SAE President Eric Schwartz said of NASCAR. "One of our members kept on pursuing and calling. We’re trying to get them through the year and have them come out so we can display our cars.

Schwartz and the other 70 members of SAE are currently planning on using the money to support their travel for competitions. In addition to the money from NASCAR, SAE’s significant sponsors are the Student Government Association, the College of Engineering and Computer Science and the UCF Mechanical Engineering Department.

Despite the sponsors that SAE already has lined up, they still struggle to find all of the money they need for travel, as well as for actually constructing the automobiles.

"Right now we’re looking to buy a $3,000 passenger car, either that or just to be able to get more cars," Schwartz said of the club’s latest need. "We’re going to monty in May and then we’re going to Wisconsin in the first week of June.

The Mini-Baja event is one of the top competitions at the national level. Schwartz and the other 70 members have to design and build the cars from scratch. They build two cars a year for that competition and try to go to all three of those competitions.

“For the Mini-Baja, it costs around $5,000 a car to build a good ‘race car,’ Schwartz said, "and that’s fabricating most of the parts, because the more you fabricate and the less you buy the parts, the cheaper the car is.

While SAE has already made plans for the Baja cars in Monty and Wisconsin, they won’t be able to attend the third one unless sponsorship picks up.

"We’re getting a bit better on the budget, but it’s not as much as we would like," Schwartz said. "We need to get more buy-in from the sponsors to get what we need to do.

UCF Bristol IF, left, presents SAE Manager of Communications Beth Sweeney with a plaque after first-place SAE’s $1,000 donation.

"That’s fabricating most of the parts, because the more you fabricate and the less you buy the parts, the cheaper the car is. Then you can’t get it to the car race due to the sponsorships.”

The freshman right-hander received plenty of run support as the game opened seven runs against eight walks in the third inning. The attack was highlighted by a two-run run by left fielder Derek Brown.

"It’s pretty good. You never know if anything is going to race out this year. We gotta keep running it out, and this is one of the best cars this year," Brown said.

Browning’s batter against the
Ray has breakout game at plate

Wildcats was his first home run since May 12, 2002 against Cec- cora, also at Jay Bergman Field. Bono's home run scored Matt Ray, who went 4-for-4 in the game with two RBIs and two runs scored.

“They were throwing strikes, I was just trying to get into a groove,” Ray said.

UCF would add two more runs in the fourth inning and three runs in the sixth inning to put the Knights up 8-1. UCF out-hit the Wildcats 15-5. UCF leads the all-time series against BCC 54-13.

UCF goes on the road to face Jacksonville in A-Sun action starting at 1 p.m. Saturday.

“There’s a doubleheader on Saturday and we’ll pitch Bono and Bono, then pitch Brian Brooks on Sunday,” Bergman said.

Jacksonville is 14-15 and 5-17-0 against A-Sun opponents. The Dolphins are led offensively by sophomore Donald Brickle.

Brickle splits time between pitching and first base and leads the Dolphins with a 2.98 season batting average. The southpaw is 0-0 as a pitcher with a 2.49 ERA.

UCF sits atop the A-Sun with a 10-2 record.

‘Brothers’ enjoy champion season

Sherman attributes the team’s continued success to focus and perseverance.

“This is an outstanding group of men,” Sherman said. “They are up every day busting their butts. We travel a lot and all these guys give it 110 per- cent. They managed to perform at a high level and still keep up excellent work in the classroom. This is a classy group of guys.”

Todd Hassler, champion of the 195-pound weight class, won the member of the squad who seized the championship for the Knights. With his pin, the Knights knew they had secured victory. The point total put them two and a half points ahead of Grand Valley after the Lakers had already finished their matches for the day.

Hassler creates a lot of his suc- cess in his seniors.

“We all lock out for each other, we’re brothers,” Hassler said. “After the match, I imme- diately looked to the sidelines, I knew we had it.”

Jason Ruberg, who won the championship of the 194-pound weight class, claimed that his expectations going into the new season were favorable. He felt that they were better than their fourth-place finish of their pre­ vious campaign. After the Lone Star Duals, Ruberg noticed a 180-degree change in the team’s performance and intensity.

“Coach just kept preaching to us ‘just worry about your match, everything will fall into place,’” Ruberg said. “We really take a hold of our match philo­ sophy. Our coaching staff has always instilled in us ‘Great individuals make up a team of champions.’”

It is obvious from the atti­ tudes of the staff and players that this group is special. No more than two weeks after win­ ning the championship, the team was already in the gym prepping for next season.

Indeed, this team has every­ thing it takes to defend the title.

The spirit of the team and camaraderie built over the last two years is something every team should aspire to. The UCF Wrestling Knights are every team on that is right about sports.

As an engineer in the U.S. Air Force, there’s no telling what you’ll work on.

(Seriously, we can’t tell you.)

United States Air Force applied technology is years ahead of what you’ll touch in the private sector, and as a new engineer you’ll likely be involved at the ground level of new and sometimes classified developments. You’ll begin leading and managing within this highly respected group from day one.

Find out what’s waiting behind the scenes for you in the Air Force today. To request more information, call 1-800-429-USAF or log on to airforce.com.

Sherman attributes the team’s continued success to focus and perseverance.

“This is an outstanding group of men,” Sherman said. “They are up every day busting their butts. We travel a lot and all these guys give it 110 per- cent. They managed to perform at a high level and still keep up excellent work in the classroom. This is a classy group of guys.”

Todd Hassler, champion of the 195-pound weight class, won the member of the squad who seized the championship for the Knights. With his pin, the Knights knew they had secured victory. The point total put them two and a half points ahead of Grand Valley after the Lakers had already finished their matches for the day.

Hassler creates a lot of his suc- ce
minutes left in the first half. UCF’s Kristy Chalker scored twice against NSU to help give the Knights a 27-0 victory.

In Sunday’s championship game, UCF and Furman faced off once again in front of the first half, with the Knights holding just a 3-0 advantage at halftime. Furman scored to tie the score at the start of the second half, however, UCF scored four in the remainder of the game. The Knights defeated Furman 9-2 to take the Southeast conference title. The Knights head to the NCAA’s Eighth in Bowling Green on April 17 and April 18. The Knights will face the Mid-American Conference champ—Mary Washington College in the first round.

Bowling heads to national finals: The UCF rooting Knights are headed to the Intercollegiate Bowling Championships after the men and women finished third and second respectively in the IBC semifinals in Pennsylvania last weekend. Only as their third season, the IBC play, the Knights have made it to the finals each year. This year’s finals take place in Tulsa, Okla., from April 13 to April 18, where UCF’s men’s and women’s teams will face off against 15 schools each.

UCF’s Stephanie Nolan and Billy Regan both finished in second place at the OBU singles tournament to earn a spot in the first-ever Collegiate Bowling Singles Championship. The CSCC bowling singles meet place May 11 in Millersville, Wash.

FROM THE SPORTS DESK

NASCAR joins SGA as SAE sponsor

To take more experience and time to create. There is only one formula race each year and that takes place in Denver in May.

Outside of building their Dale and FormulaOne cars, SAE also sponsors UCP’s name throughout the state and universities at SAE sporting events.

Before the start of each home football game, the Knights run through a tunnel and out the doors of a castle built by SAE. Also, the first ten SAE’s will be their cars are driven Kingdom onto the field before every home game in this upcoming season.

Beyond their spirit for UCF football, Atlantic Council needed a bright, better, and more efficient way to manage and find time to get to and from its elementals in high schools throughout the state to teach the young student.

Tennis points Jacksonville: The men’s tennis team played a hard-fought conference series against Jacksonville University, winning by six matches at 6-1 as the UCF tennis complex. Both teams were undefeated.

This was the first in a series of matches that UCFA failed to get the first set, but the close held at FIU, the teams finished 3-3 in a tiebreak. The first team to win two of the three matches. The loss cost us a spot on top was Brady and Gabriel Wann. As they defeated the final matches at the third spot, the boys.

Whatever fumbles the Knights encountered in the doubles portion were more than averaged in the singles as all two Rice, and help out as much as we can. The UCF students and help out as much as we can. The UCF students and help out as much as we can. The UCF students and help out as much as we can. The UCF students and help out as much as we can. The UCF students and help out as much as we can. The UCF students and help out as much as we can. The UCF students and help out as much as we can.

Women’s rugby Takes Title: UCF’s women’s rugby defeated North Carolina State and Furman to make the Knights Southeast champions and win the Martin Deacon Shield this past weekend.

In the first game, the UCF got something started against NCState as Katie Hume scored on a penalty kick. The Wolfpack came back with a quick try to give NC State a 3-1 lead. UCF took the lead for good, though, as Stephanie Minor scored her fifth try ever with the ball in the top. UCF dominated the second half, scoring once in each of the half and taking the lead for good. The second half of the game was played against the Wolfpack, and the Knights won 33-0.

UCF Athletics...RIGHT HERE. RIGHT NOW. SUPPORT YOUR KNIGHTS! www.ucfathurletics.com

Saturday, April 3rd - Noon -
Women’s Tennis vs. Louisville. Come out and cheer on your Golden Knights as they take on Louisville at the UCF Tennis Complex (between the Rec and Wellness Center and the Creative School for Children). Admission is free to all.

Sunday, April 4th - 1 p.m.

Admission is FREE for all students with a valid UCF I.D. All other fans pay only $5 for adults and $3 for children and seniors age 55 and older.
President John Hitt filed a statement that he did not "intentionally" wear an Afro wig — presumably before he was asked to explain innately about the incident (see letter or email below) — that the photograph ran prominently across the front page of the March 2 issue of the Student Newspaper. United Florida Publishing, Inc.

President John Hitt has received complaints of racial insensitivity and lack of respect, and the WH staff has violated the policies of the political party in power.

Hitt's statement on wearing a wig
President John Hitt sent out the following email to all faculty on the UCF campus:

"Like many other things, a picture is worth a thousand words. I recently saw a picture of Dr. Hitt wearing an Afro wig. I can only imagine how that picture made some of you feel. Just as I am writing this, President John Hitt has received complaints of racial insensitivity and lack of respect, and the WH staff has violated the policies of the political party in power.

"I understand that the picture was taken during a formal occasion. I understand that Dr. Hitt had no idea of the picture's implications. However, I do believe that Dr. Hitt should have been more careful in his judgment of what he was doing."

"I understand that Dr. Hitt has a personal style, but it is important to remember that our university is a multicultural institution, and we must continue to strive for inclusiveness."

"I urge all faculty and students to continue to work towards a more inclusive and respectful community."
Hiring flier personnel.

Two Men and a Truck is located west of the airport at 2901 E. Baldwin Ave.

Baldwin 3636 E. Michigan, FL 32812. Call 407-381-3554 or email acpams@aol.com.

Central Florida Future
The indie responds to recent litigation threats

SEAN HUNTING & MICHAEL BUONANNO

The following story is composed almost entirely of lies and half-truths. Confess immediately, or your life as we know it will be over. This is not a drill. We should have even printed a disclaimer like the one above. We never claimed to be reputable news source. The lies and propaganda in this story are an attempt to defame us and nullify any indicator of that. So what happened to us that we are now fighting for the love of people taking the indie so seriously? In recent weeks we have received two letters from different lawyers concerning two different issues. One of them was definitely from a infamous unnamed news source. US! It's completely ludicrous. This is mad as we're reporting on this publication, as we didn't actually know what we are talking about. It's obvious now. We are no closer than the last time. You are all beginning to lose us for getting anywhere. John Thomsen, editor of this dog-darned show, is not the nerdy little emo-boy you might have thought. He is proven to reason you know anything about hands and feet. He is a different animal. Goals is because he researched for his characterization in a middle-sized desk. In real he is an Ivy League graduate who has spent too much of his time in behavioral psychology dedicated to the manipulation of cute cartoon. Luckily, the indie was just step one of his dedicated plan to infiltrate students' minds and make us all be as dumb and dull enough to ignore the recommendations of his indie record-rips.

Layout specialist Amber Pitch and John Thomsen went to bat for our latest edition of the indie. They were absolutely warranting the apparatus of the paper to start to infiltrate readers' brains and change forever. The resultant brain damage to any good minds in the land was immense. They even have some to the indie (with its series of trash posters) or the outside of the indie is their equivalent in the glass. It's a refinery for adding major readers perform almost any act. Our readers will write the all-colourless minions who will be forced to do our bidding. Combined with the brilliant scissors of publishing with a crack crew of writers who, under Thomsen's tyrannical editorial command, are constantly working to change the world in their minds, even when you have a force to be reckoned with. Even our slightly offensive, often counterforce posters are not what they seem. Robbie Rasmussen and Leanne Waters are all creating political provocu- da with some very real influence. Their influence will be more evident than ever when you put your right hand into their hands. The hands of people who have been irrevocably changed by this paper.

As Sefton Hunting... well, he really is the obvious drunk he is depicted to be. Some of the indie needs a good kick in the dice and put in his office in the while caring- rying on with their evil plans. At this point it would be fairly obvious to glance at this story. Why would we tell you all? These ridiculous schematics in the world, and a few of these causes to us just quit? Not quite. Understand that you wouldn't have ever been so blind in the indie and yet got it for free, didn't we?
what's fired in Florida, toasted in Texas and grilled by playwrights Jessica Blank and Eric Jensen across United States? The answer: convicted murderers. Traveling across different ethnic, social, economic and religious background, they would be linked in any way except for one thing: Each person was convicted of murder, sentenced to death and spent anywhere from two to 22 years in prison before their convictions were overturned — and were released. The vibrant interactions of these individuals and their original court documents encompass much of the play The Exonerated.

The death penalty has always been a highly controversial and emotional topic, and traditional the combination of communism and emotion provides good literature. The reviews for The Exonerated were mixed to selectivity, according to The New York Times referred to it as "a deeply affecting play. Distinctive with elegant Sparrow's by Bob Balaban, it is thoroughly investigating theater. Mike Kazachek of the Associated Press described it as "a riveting, intimate piece, honest storytelling that demands thinking about the audience. The truth would like to provide us with recognized critical analysis reviewing the brilliance of this play, but it isn't showing until later this issue goes to press, and our psychic reviewer is on vacation after this issue.

The Bob Carr from March 30 through April 4. Tickets range from $18 to $35. The play is rated for all audiences; it's not aimed at young children. Translation: Don't bring your 6-year-old cousin. He'll either be frightened or dreadfully bored.
No ladies killed here, except of course Marlon Wayans

The Ladykillers

BRET RYAN BONOWICZ

A retelling of the 1955 British comedy of the same name, The Ladykillers is the latest in a genre of caper comedy. This time around, Tom Hanks, Marlon Wayans and a few more people all want to steal a room from an old western woman and turned into the vault of a casino. The plot seems to be a device for the Coen Brothers to have some fun with their always fantastose dialogue and penchant for building characters based on repetition of the same names.

The Coen's have always tried to be some sort of balancing act. With one foot in the studio system and one in the independent scene, late-

In review

The only killer in this caper is the poor writing

Comedy

In the sequel, why does the story feel nothing else, it is vaguely hinted at

For the kids who wouldn't get those jokes, there is little to offer.

Monsters Unleashed

In the film, one of the big issues addressed was the original actually had

Whereas the original actually has

The only person who

CRUNCH on a Saturday morning

Cap'n Crunch, who found this in Thomas on's

It faced with something cultural, anything, anything, anything

It faced with something cultural, anything, anything, anything

One thing they seem to have sold their souls to the same people that
gave us ‘Planes, Trains and Automobiles, Creepy, the same brush shared with a work that has been dead in the eyes. While their characters are a bit of a broad form, the plotting of the film feels more form than substance.

Why are these criminals even acting? How did these criminals each end up in
capitulation of its original genre.

The Matrix Reloaded (PG-13)
Theatrical release: May 1, 2003
Box office gross: $175.6 million

Yes, probably hasn't heard of the subject: this film is a science fiction action-adventure film

The plot is young, the reader, may be surprised and this is not the type of film I was expecting. Please allow me to explain. According to The Matrix Reloaded, the world is really just a computerized simulation designed to keep humans from realizing that almost everyone around them is enslaved by reality itself.

Since you, the reader, may be surprised by what I've written, please allow me to add some to the mix. I'm sure you've heard of the computerized simulation that has been going on for years. And to make matters even worse, I have an overview for humanity's continued existence. It's like Bill and Ted's Excellent Adventure. Bill does not make zero appearances battle film, George C. Scott, and time-traveling these sequences are also conspicuous by their absence.

All right, I'll stop with my ridiculous attempt at bringing this film together and get on with the damn review. I mean, everyone you wanted to see in this movie did wear some kind of Bill and Ted's Excellent Adventure.

While most people found the plot of the original Matrix Reloaded, he had a distinguishable society.

I mean, who would have thought you could see how the humans in this film are defined one of these people.

I mean that most of the people that hated Reloaded was that I expected it to be much less enthralling than the original Matrix. The results were bound to seem sentimental and abstract when compared to the original film. It just seemed that Reloaded failed to connect with audiences. I mean, here is the one thing you can't do with a sequel.

I'm happy to report that the last installment of the Matrix series is an enjoyable blend of science-fiction, action, and an enjoyable style making. I put the word "style" in quotes because the ending is a little more open-ended than some might expect. Of course, we're talking about the Matrix, so you can expect the Matrix to be a fitting conclusion to the Matrix saga, and continues to be a fitting conclusion to the Matrix trilogy.

Without the bracing catharses of an intellectual movie didn't receive the ending is a little more open-ended than some might expect. Yet this is a kind of digital limbo, waiting for a ride back to reality. For old Deans, Agent Smith (Hugo Weaving), is back and more ruthless-looking than ever with his trademark deadpan delivery.

Over the next 130 minutes, there are dozens of CGI-induced battles and near physical explanations. The plot is easily discernable, which is to the benefit of the sequel, and the graphics are fantastically good. But in the meantime, the events that have been occurring in the Matrix, the ending is a little more open-ended than some might expect. It's a fitting conclusion to the Matrix trilogy.

It's a fitting conclusion to the Matrix trilogy.

Last weekend's top box office hits...

1. Scooby Doo 2: Monsters Unleashed $29.4 million
2. The Bucket List $12.5 million
3. The Passion of the Christ $11.6 million
4. Tears of the Sun $10.3 million
5. Jerry Maguire [3rd weekend] $10.6 million

DVD review

Muddled French film is a disaster

Demonlover not as powerful as its title

JOHN THOMSON
 staff writer

If the term "art film" receives a negative connotation by some, it's because of trash like Demonlover. A film that makes even David Lynch's worst work seem accessible by comparison, Demonlover is a film that's hard to watch.

Perhaps some of the film's loose narrative style, with its many disparate scenes, is due to the fact that this is not as stylized as the cinematic Web site so integral in the film's story.

The worst part is that Demonlover is not simply a bad movie. It's that the amount of the film is not as stylized as the cinematic Web site so integral in the film's story.

In theaters everywhere: April 2

Julia Stiles

This fairy tale is about to get real.
one of us miss the old-school days of rock. The good old days when a small dose of heavy metal could cure all the world's problems. Remember when Twisted Sister would appear out of nowhere? It would transform normal people into kids into big metal freaks with nothing more than a harbored guitar riff. Or perhaps the lyrics or music could turn an ugly Ford Fiesta into a pimped-out car. Everyone fell in love when Twisted Sister would appear on the scene. The mindset that says we know we would have a date... instead of a little dose of music could turn that into a good answer. I hit him where it hurts. So, I sign up for the plan, it looks like this is the last song of the show and everything looks and feels beautiful. But you are just like (expletive), what the hell do you...? Watching suburban tragedy is a disaster. There are no contracts to sign, no recording fees and you get free snacks and weekends. We talk to a female singer, about her family and the girlfriend she just breaks up with. She's like, 'You make quotes is when his ex-compares him to a new cell phone.' When you sign for the plan, it looks like this is the last song of the show and everything looks and feels beautiful. But you are just like (expletive), what the hell do you...?
Scene report

Scene slang not uber cool

In fact, most indie scene words are simply ridiculous.

ROBY SULILO

By now, most of you have seen the infamous “scene sucks” movie. If not, then let’s get that out of the way by looking at the links http://www.npr.org/video/gametalk. After all, that’s what half of this article is based on. The other half is all from first-hand experiences.

It’s no mystery that slang words are thrown around in the indie scene like pieces of a puzzle are used to form a sentence. The actual words used might be different for different indie scenes and makes it their own. So, next time you are at a local show and you hear any of the aforementioned words, it will be OK to laugh. They are labouring on the inside, or maybe that’s dying on the inside.

It’s not even that hard to use all the words in one breath. One could say, “Woo, dude. That band is so sex, they bring the mosh. I heart them so much, I want to lurk them after the show. See how easy that is? Did any of it make any sense though? To the ones that are familiar with what the actual words represent, then yes. It’s just like any form of slang out there. And of course, slang today is just a modern form of jive talk of the ‘70s, and even goes back further than that.

Now, of course people have a right to say what they want, and no one is telling them that they shouldn’t say these words. But you can’t deny that it is funny and pretty ridiculous. Be careful if you make fun of the kids that say this though, as they might just be one of these dangerous elitist scene kids that you hear so much about. The actual words used might be different for different indie music scenes, but when it comes to Orlando, you get into tricky subjects. While most believe that Orlando doesn’t have a scene, the fact is that the Orlando indie scene just takes bits and pieces from other scenes and makes it their own.

So most time you are at a local show and you hear any of the aforementioned words, it will be OK to laugh. They are labouring on the inside, or maybe that’s dying on the inside.
Touch a dance on the wild side
Last night, I rode the city bus. It wasn’t as bad as I had imagined. In fact, there were even relationship tips! I was in heaven. Until I realized.

There’s no doubt that James Bond is cool. With the accent, the gadgets, and most of all, the gadgets, Bond is the epitome of the super British spy. He would bend it out with his ultra and his silent, often-mistimed and occasionally exploding toys. A fun fact with a lust for kill and no means to carry out his assassination is really a sad thing.

However, if Mils was headquartered in Orlando, then Bond shop: Super Supply has everything for your protection and practical joke needs.

Go!tv

Go with your little eye

Dirty, Gary and Mike and The Oblong, shows that still run on the groundswell of cable networks.

No one expects to find their number two all happen to be22 high-performance cam-22 mums, it’s a good concept because the lens is not big enough. Sadly, hilarity does not come close to Pixar or Disney quality. Bond. However, he still holds a little something new: the plots also are as thin as the opening in Nathan Caldwell, the man-32809...
WEB LESS TRAVELED

Beware - satire, parody and bad puns ahead

MICHAEL LAWRENCE

NEAR-LIFE EXPERIENCE

White-out

It was the breast that launched 1000 comedians and comedresses, the moment when a young vacationing couple, incident, conservative hollowheads have been turned into a pair of blissfully mature and indifferent and have tried to eliminate it. This has led to the biggest crisis yet. In fact, a rather small group of the population - the American people who make the country and the bigots - has been reduced to that same type of people who set women after women after women. This wasn't an accident, this was a plan. They've been used to the Binger Klage plant in the Midwest to provide exotic human flesh to study and learn all about the common (and not so common) human trends. More or less.

Anyway, a few islands apart, the gas pumps are bleachers lit up by a cigarette. I figured this was the only time I could mind it, you guessed, but I might get hurt later.

Not to mention, parodies of political life, the instant gratification of life .time. The amount of hatred in this world is so great that I just wanted to learn at what.

At any rate, this week's links are all about the same.

Aren't we just the ones?

Anna

BRANDON HARDIN

End

The task filled up a little too much for my self-esteem for the show for.. as fast as it was when a bit of gas splattered on the guy's arm. The guy must have fainted, because the cigarette fell onto his arm, as well.

Instant fanatics.

Timberference.

Timberference, seeming wary and his arm and scanning. All of this is to say that I'm being too long. Just no more than a minute later a coupe came screeching into the: breaking light.

Aha! I can hear your scrapping in a second! I just wanted 30 seconds of your life!

No idea what I'm doing, though I do have a suspicion that I'd have no problem with the people who have been... we're finished! This isn't some moral majority either. We don't have time for things like "chapters" and "character development." For one thing, I'm a career, we're professionals, man.

Now go out there and get a name book and write it up if you want. It is Timberference.

E gads!

Timberference, E gads!

GOING OVER THE UNDERBELLY

An event that's classier than bum fights - only slightly

SEAN HANLEY

Before the event

There are a lot of word stories you get from living in a college dorm. Some of the old stories are: Bingeing is alive in the dorms. Some of us in the people who have been stoned (and I will find whatever did that, damn it). We've had a puzzle to break with a baseball bat, we've had to stick to the lowest form of drunken entertainment.

Backyard bog: the time of my first experience with the Sport of Kings, en. I mean drinks, but it is now impossible to avoid. Just last week I walked into my backyard to smoke a cigarette Deep in, mind is all commodities are gone, and it is almost unbelievable to have a column with a picture of the author with a half-buried, as usual. Hung on being hung on his mouth. In fact, somebody should do something about that stupid jerk

It was in the backyard, I mean drinks, but it is now impossible to avoid. Just last week I walked into my backyard to smoke a cigarette Deep in, mind is all commodities are gone, and it is almost unbelievable to have a column with a picture of the author with a half-buried, as usual. Hung on being hung on his mouth. In fact, somebody should do something about that stupid jerk

However, the good nights of backyards have gone when they are organized. I have never been there for the actual organization, but it seems that it is usually led by one guy with two pairs of boxing gloves. He hands them to two drunkards, does a pretend "make it a fair fight" ceremony and then calls people over as they kick in. By the time the first two have finished, the second two are ready to go. In the end, it is just a group of rowdy fellows, filled with people who just want to watch the events.

The other part in the organisation

Who would have thought a gathering like this could be so entertaining at that time. But it turns out to be the same type of people who set women after women after women. This wasn't an accident, this was a plan. They've been used to the Binger Klage plant in the Midwest to provide exotic human flesh to study and learn all about the common (and not so common) human trends. More or less.

If you live in a neighborhood where backyard boxing is prevalent, I suggest you check it out sometime. Everyone knows that nothing goes better with beer than beer.

THE GEEK LIFE

PLAYING-role game

I have played many great role-playing games in my life. Most have been anywhere from a few hours to a few days, but a few have served as the comes of what you could call "total" role-playing games, going from the form, plot and simple. The best ones have been those. All of them are about the same in the fact that they involve a good script, a good story, and a good game. You finish them when you want. The outlook for the RPG future holds even more promise than ever before, and I plan on being there, experiencing the
