Students gain contacts with professionals
SHEODA DANIELL (continued)
A crowd of more than 200 minority students streamed through Hubbard Hall in Engineering Building 1 Wednesday for the third annual Networking Day.

Recognizing the need to provide a forum for these students to meet and interact with industry professionals, UCF's Minority Engineering Program, which hosted the event, worked with the local groups to host an informal event. The event, which started about 2 p.m., was attended by many students, employees and representatives from companies that would employ them without the pressure of a career day.

The companies attending the event ranged from Boeing to Orange County Government Utilities Division. Along with their words of advice, the reps handed out pens, Silly Bandz and pens and paper planes.

"We will be advising the students about what courses they should take and what internships experience could be useful," Allen Jones from Lockheed Martin said.

"They are bright and talented individuals," she said. Jones, a UCF alumna, said many were interested in obtaining internships and co-op learning to enhance their classroom education.

Amaka Amalu, a senior in mechanical engineering, was looking to talk to some companies that focus on automotive industry. "To find what does it take to get my foot in the door and land a job," she said.

In an effort to shed light on the plight of global hunger and poverty, Student Organization for Volunteerism UCF is hosting the 12th annual Hunger Banquet Tuesday, Nov. 14, from 6 to 9 p.m. in the Student Union Pegasus Ballroom.

The Hunger Banquet is designed to simulate global hunger by assigning each attendee an income group.

According to the hunger ranks, 85 percent of those who attend will be assigned to the high-income group. These people will sit at a table and enjoy a three-course meal.

Twenty-five percent will be assigned to the middle-income group. They will sit in classes and eat the rice and beans.

Bitty percent of the attendees will sit on the floor and receive only rice and water. They represent the low-income group, and for one meal, "they suffer the fate of the millions of people throughout the world who live in poverty," according to banquet rules.

Amy Zueft, director of Hunger/ Homelessness for Volunteer UCF, sees the banquet as a stepping-stone to community enlightenment.

"This event is designed to bring UCF students out of a fantasy world into reality," she said. "Our conversations usually revolve around TV shows, music and movies, and we ignore the realities of starvation, famine and hunger that are happening in our own backyard. We hope to bring these situations to light.

Circle K hosting date auction to aid rebuilding efforts
MONEY raised will benefit Habitat for Humanity
RENEE FOLEY (Staff Writer)

The UCF Circle K Club will be auctioning off women or men as dates for the 12th annual Hunger Banquet at 7 p.m. Monday in the Student Union Pegasus Ballroom.

The date auction will be one of the highlights of this year's UCF Circle K International Date Auction to raise money for the Habitat for Humanity's Gulf Coast hurricane rebuilding efforts.

The auction is just one of many ways the organization is open to anyone, attendees may bid on a potential date. All proceeds will go to the Habitat for Humanit­ity project. Barnett said the goal was to raise $900 through the date auction.

"We want everyone to learn what our organization is all about," she said. "We hope people come out because it's for a good cause."

Circle K treasurer Amanda Guelzow says the auction also serves as a way to get people interested in many of the other projects in which the organization participates in many of the communities.

They represent the low-income group, and for one meal, "they suffer the fate of the millions of people throughout the world who live in poverty," according to banquet rules.

"Our conversations usually revolve around TV shows, music and movies, and we ignore the realities of starvation, famine and hunger that are happening in our own backyard. We hope to bring these situations to light.

Hepatitis A is an acute viral infection that can affect anyone. Some individuals (5-15%) may have prolonged symptoms or a relapse of symptoms after a six- to nine-month period. The incidence among Americans is estimated at one out of every 50,000 people. Hepatitis A is now isolated.

Hepatitis B is a serious viral disease that affects the liver. It is transmitted either by an oral or oral route. This means that a person to person contact or ingestion of contaminated food or water is required to transmit this virus. This virus may include a household member or sexual contact with an infected person. Hepatitis B is often contracted during medical procedures, such as injections or eating food contaminated by infected blood. Hepatitis C is transmitted either by a fecal-oral route or by blood contact through injectable drug use or blood transfusions. There is a significant number of individuals who have been exposed unknowingly and will over time develop hepatitis C. The most common complication of chronic hepatitis C is cirrhosis of the liver.

Many persons who develop hepatitis C may need a liver transplant to survive. There is no vaccine available as of yet to prevent the transmission of this virus. The treatment is to reduce the amount of virus in the blood to prevent liver disease. This can be accomplished by the use of anti-viral medications which can be painful, long term and expensive.

Hepatitis D is a serious liver disease caused by the hepatitis D virus (HDV), a defective virus that needs the hepatitis B virus to exist. HDV or HDV is a chronic disease caused by the hepatitis D virus HDV is transmitted in the blood of persons who are infected.

Hepatitis E is an acute viral infection of the liver that is caused by the hepatitis E virus (HEV), a virus that is found in the United States. Hepatitis E is transmitted by the ingestion of food or water contaminated by infected stool. As a result, it is transmitted through food or water contaminated by infected stool or from person to person contact. There is no vaccine available as of yet to prevent the transmission of this virus. The treatment is to reduce the amount of virus in the blood to prevent liver disease. This can be accomplished by the use of anti-viral medications which can be painful, long term and expensive.

I have a friend who has been diagnosed with hepatitis. Is there anything I can do to reduce my risk of getting this disease?

There are a variety of things you can do to reduce your risk of getting hepatitis. One of the most important is to wash your hands frequently, especially before eating or handling food. You should also avoid consuming raw or undercooked meats, poultry or seafood. If you have hepatitis, you should rest and eat nutritious foods to help your body recover. It is important to avoid alcohol and other substances that can damage your liver. You should also avoid close contact with others who have hepatitis, especially if they have symptoms. If you are pregnant, you should avoid exposure to others who have hepatitis.

Hepatitis is a viral infection that can affect anyone. There are several types of hepatitis, including hepatitis A, B, C, D and E. Each type is caused by a different virus and can have different symptoms. Hepatitis A is an acute viral infection that can affect anyone. Some individuals (5-15%) may have prolonged symptoms or a relapse of symptoms after a six- to nine-month period. The incidence among Americans is estimated at one out of every 50,000 people. One example of a quiet virus is the one that causes the flu. This virus can be extremely dangerous, especially to people who are elderly or have other health problems. It is estimated that one out of every ten people who get the flu will develop serious complications, such as pneumonia or septic shock. In some cases, the flu can even be fatal. There are several ways to prevent the flu, including getting vaccinated each year and practicing good hygiene, such as washing your hands frequently.

Another example of a quiet virus is the one that causes chickenpox. This virus can be extremely dangerous, especially to children who have not yet been vaccinated. It can cause a rash, fever and other symptoms. In some cases, the virus can lead to more serious complications, such as pneumonia or seizures. There are several ways to prevent chickenpox, including getting vaccinated.

Finally, there are several other examples of quiet viruses, such as the one that causes measles and the one that causes rubella. These viruses can be extremely dangerous, especially to children who have not yet been vaccinated. They can cause a rash, fever and other symptoms. In some cases, the virus can lead to more serious complications, such as pneumonia or seizures. There are several ways to prevent these viruses, including getting vaccinated.
Due inappropriate material designed to identify future crimes and to produce inappropriate material where student exhibits an underdeveloped appetite for learning or presents more than normal social anxiety, the administration tried to warn a gun away from a student. Several hundred people attended a funeral Mass for Ken Bruce, 48, who was remembered as a peacemaker and a model respected by students.

Following the service at Our Lady of Perpetual Help Catholic Church, more than 1,000 teachers lined the route to a nearby cemetery. Authorities and Thursday's shooting at the Los Angeles Integrated High School began when Ken Bartley Jr., a 15-year-old freshman, was called to the office because other students had seen him with a gun on campus.

Here's the column that got the professor kicked out of the College of Education to order Individual Rights in Education, a Philadelphia-based organization that represents more than 1,000 teachers lined the route to a nearby cemetery. Authorities and Thursday's shooting at the Los Angeles Integrated High School began when Ken Bartley Jr., a 15-year-old freshman, was called to the office because other students had seen him with a gun on campus.

Teenagers danced for kids

Mini-dance marathon brought in $4,400 for the Children’s Miracle Network

Written by & Cape Daily

Students from several Central Florida high schools came together in the Ferrell Auditorium on Saturday to raise money for the Greater Orlando Children’s Miracle Network by doing a little dance. “Dance to Give Kids a Chance” benefited the Children’s Miracle Network, a non-profit organization that helps children with cancer, chronic illnesses, transplants, birth defects and other health problems.

The philanthropic event was hosted by Dance Marathon and was slated to be a “24-hour Dance Marathon,” lasting from 10 a.m. on Saturday to 10 a.m. on Sunday, which allowed them to raise money for the children from dawn to dusk.

Before the big Dance Marathon in February, O’Keeffe joined the fundraiser. “We recruited five people in my senior year with UCF K Club and put on a mini-dance marathon,” O’Keeffe said. “That was fun, but this year it was a little more difficult.”

The seventh high school raised $6,400 for the Network. Students from the dental program at Orlando Tech were the top fundraisers, with $3,500 raised. They won the grand prize of four tickets to Walt Disney World.

As the organizer of the event, O’Keeffe was required to raise a minimum of $3,500 in donations. O’Keeffe said, “Our秘书长 students held bake sales and car washes to help raise the $500 of money to purchase items that included two cruise tickets. Tickets for raffle prizes such as Orlando Magic tickets, certificates, Orlando Science Center tickets, and UCF sweatshirts and hats donated by the UCF Bookstore. The Student Government Association also donated UCF gear, such as backpacks and binders.

O’Keeffe, a Winter Park High School senior, said he has been attending the “mini-dance marathons” for two years. In addition to allowing him to help others, he said the event was an incredibly fun experience.

“I loved being able to dance all night with the kids and raise money for their cause,” O’Keeffe said. “I think it was a very rewarding experience.”

Many students put their new friendships “to the test,” O’Keeffe said. “Some high schools did not have as many students participate in the mini-dance marathon, but they still sent a few students to come and help a few of the kids. Most of the kids were really fun and easy to work with. The kids were also happy to have fun while raising money.”

“Trends were beneficial to the event,” O’Keeffe said. “If someone wanted to spend $30 on a t-shirt and $20 on a bracelet, they could do that.”

As the organizer, O’Keeffe said, “I could see how easy it was for other students to dance all night without getting too tired.”

The event was free to attend, but students were encouraged to purchase tickets to the Dance Marathon. The fundraiser raised $1,000 in one hour.

“I love raising money for a good cause,” O’Keeffe said. “It’s great to see how much fun people can have while raising money.”

O’Keeffe said the event was a success, and he plans to continue attending the event in the future.

“Dance to Give Kids a Chance” is a non-profit organization that helps children with cancer, chronic illnesses, transplants, birth defects and other health problems.

The network is also a distributor of the Arnold Palmer Hospital for Children and Women and the Shriners Children’s Hospital at the University of Florida.

Canned food will serve as tickets, but no one will be turned away

By Myriam Irizarry, a former attorney.

Hundreds of families in Seminole counties will benefit Anthony House, which serves homeless youth in Orange and Osceola counties. It also feeds hundreds of families in Central Florida at Thanksgiving.

A slide show on Central Florida homelessness will illustrate the keynote address Saturday by Zufari and Natasha Irizarry, a former homeless mother and her daughter, who now run an employment agency.

Other activities Volunteer UCF has planned this week include collecting donations for Oxfam America's Global Emergencies Fund, collecting blankets for Orlando's homeless and sorting food for the Second Harvest Food Bank.

Oxfam America, the founder of the Hunger Banquet initiative, states that it believes “the root causes of hunger are not about a lack of food.” According to Oxfam, “Our planet produces enough food to feed every woman, man and child. The problem is in the distribution of food — and education, resources and power.”

Using its message of “all people have the right to live with dignity, to have equal opportunity to earn a living and support their families and to be treated fairly,” since 1970, Oxfam seeks to motivate communities to bring real-world struggle to the forefront through creative expressions such as the banquet.

In addition to its relationship to Oxfam, Volunteer UCF focuses on community service projects and social education, working with more than 200 agencies.

Students sit on the floor during last year’s Hunger Banquet. They represent the million who live in poverty. Out of the banquet attendees, 60 percent will receive rice and beans, 25 percent rice and water, and 1 percent a dairy product instead.

Nobody craves for tests anymore, or at least people who have taken UCF Test Prep Courses don’t. We prepare you for a higher score on the GRE, GMAT, LSAT, MCAT or SAT... at a lower price. In fact our price is less than one-third of what you’ll pay with most national test prep chains. So while preparing for the big exam in smart, preparing with UCF Test Prep is smarter. Peppers shines in preseason UCF victory
Knights struggle, but go on to easily beat Barry

BY ANDY VASQUEZ

The UCF men's basketball team started off its season with a 70-61 win over Barry in an exhibition game at the UCF Arena Wednesday night.

The Golden Knights were less than impressive, turning ice cold after they had the ball. If Wednesday night was any indication, Peppers is the key to reaching his goal.

But one of the things that Coach (Kerry Stowers) told me was to go back out into this game. Peppers said, "Last year I didn't handle the ball as well, and I had I can handle the ball this year. It's something that's a big advantage for me to go out and work on to improve those skills."

Brandon's sophomore Adam Gill had a solid game for the Knights, scoring eight points on 4-of-6 shooting and pulling down four rebounds.

UCF's defense looked good throughout the game, as the Knights held Barry with 29 percent shooting, but they allowed 10 offensive rebounds and 12-second chance points.

Knights defend but can't cool off the Suns

BY BRIAN MURPHY

The UCF women's basketball team earned a second-half deficit but left the UCF Arena with a 87-62 victory over the Golden Knights in an exhibition against the Miami Suns on Wednesday night.

The Golden Knights came out flat in the first half. After scoring the first basket, the Bulldogs shot just 36 percent from the floor.

The Suns, a pro team featuring former college players who play the Golden Knights and take on some of the region's top college basketball teams, exposed the Knights' poor transition defense and led the game 48-29 at halftime.

The Knights shot 71 percent from the field, including 12 of 15 from the three-point line. The Knights didn't make only a 3-point shot or a free throw in the first half. "There's no excuse with the way we shot first frame and the way we shoot the floor," junior forward Rikka Reilly said. "Everybody made those shots in the first half."

The Knights continued their dominance in the second half, building a lead of 28 points with about 15 minutes left. Then, as they were on the court, the Suns turned it cold.

The Knights continued their dominance in the second half, building a lead of 28 points with about 15 minutes left. Then, as they were on the court, the Suns turned it cold.

The Sun's lead was 36 points, and the Knights were still playing with the Sun's lead.

The Knights returned home to the UCF Arena in a game that was postponed by Hurricane Katrina in September.

Sophomore Loca Lohn returned to the lineup for the first time since injuring her ankle on Nov. 4 against ECU but it was not enough for the Knights to win. "Not enough for the Knights to win," Lohn said. "We had 29 points and nine assists in the loss, which was a huge number for us."

ZACH MCDUFFEE

This past weekend was disappo Manning's favorite team, the Carolina Panthers, with a 34-31 victory over the Denver Broncos in the Super Bowl. The Panthers, led by quarterback Cam Newton, showcased their offensive prowess with Newton rushing for 141 yards and passing for 271 yards, setting a new record for most passing yardage in a Super Bowl.

With their fifth straight win, the Panthers secured their place in the NFL playoffs and made a statement to their critics. Their success is a testament to the hard work and dedication of the entire team, including head coach Ron Rivera and quarterback Cam Newton. The Panthers' impressive performance against the Denver Broncos solidifies their position as one of the top teams in the league.

A week after a surprisingly easy win over Kentucky, the UAB Blazers faced off against Southern Miss in the AAC South Division. The game was held at Legion Field in Birmingham, Alabama, and both teams were desperate for victory, with Southern Miss needing a win to secure a share of the division title.

Despite UAB's recent struggles, they were able to pull off a surprising upset, winning the game 17-10. The Blazers' defense played a crucial role in the victory, holding Southern Miss to just 10 points and forcing four turnovers. UAB's quarterback, Jadasseh Dortch, completed 11 of 20 passes for 149 yards and added 24 rushing yards, helping the Blazers secure their first win in four games this season.

On Saturday, the Florida Gators took on the South Carolina Gamecocks in Columbia, South Carolina. The Gators were looking to bounce back after a loss to LSU the previous week, while the Gamecocks were aiming to continue their winning streak.

In a back-and-forth battle, the Gators emerged victorious, winning the game 40-24. Florida's quarterback, Emory Jones, had a strong performance, rushing for 121 yards and throwing for 236 yards and a touchdown. The win solidified the Gators' position in the SEC East standings and kept them in the hunt for a conference championship.

On the same day, the LSU Tigers traveled to Tuscaloosa, Alabama, to face off against the Alabama Crimson Tide. The game had significant implications for both teams, with LSU looking to solidify their SEC West title hopes, while Alabama was hoping to maintain their top spot.

Despite a strong showing from LSU, the Tide came out on top, winning the game 35-19. Alabama's quarterback, Tua Tagovailoa, had a stellar performance, throwing for 319 yards and three touchdowns.

Throughout the season, the Tide and the Tigers have faced each other multiple times, with Alabama holding a slight edge in their rivalry. The upcoming game in Tuscaloosa is highly anticipated, with both teams looking to secure a win and move closer to a national championship.

In other college football games, the Texas Longhorns defeated the Oklahoma Sooners 48-14, the Georgia Bulldogs beat the Auburn Tigers 37-0, and the Ohio State Buckeyes defeated the Penn State Nittany Lions 24-7. These wins solidified the standing of these teams in their respective conferences and set the stage for potential showdowns in the conference championships.

Overall, it was another exciting weekend in college football, with unexpected upsets and strong performances from top teams. The next few weeks will be crucial as teams continue to battle for their respective conference titles and spots in the College Football Playoff.
The UCF Board of Trustees finally voted on the policy of on-campus football stadium construction. The vote took place on October 31, 2007, after months of discussion and public debate.

The vote was controversial, with many people on both sides of the issue expressing strong opinions. Some argued that the construction of a football stadium would be beneficial to the university, while others believed that it would divert resources away from other initiatives.

The decision was made after a thorough review of the financial projections and a careful examination of the potential benefits and drawbacks. The board weighed the evidence and ultimately came to the conclusion that the construction of a football stadium was in the best interests of the university.

The vote was not without its critics, however. Some opponents of the decision have vowed to continue their efforts to stop the construction of the stadium. They argue that the funds could be better spent on other priorities, such as academic programs or student scholarships.

Despite the controversy, the decision was made with the best interests of the university in mind. The board hopes that the new stadium will bring increased revenue and visibility to the university, and will serve as a source of pride for the student body and the local community.

The vote was a significant moment in the history of the university, and it will undoubtedly have a lasting impact on the future of UCF. The university now faces the challenge of building and operating a new stadium, and ensuring that it is used effectively to achieve the goals that were articulated in the vote.
I may not be able to tell the future, but I'm having a great time trying.

Apparently some time during the last week, I developed ESP. I'm not sure how it happened, but it appears that I am the only person on this earth who is capable of predicting which bowl game UCF will go to. Or at least that's what I've garnered from the fact I've stopped out of my house and had social interactions with other humans. Oh yeah, what bowl game is UCF going to?

"Burns, I should order plane tickets?" Burns, my pants are really nice, and also, what bowl game are we going to?" These are the conversations I'm having while driving in my car and passing over. Truth be told, I don't know. I can speculate until my leg falls off, but that doesn't do anyone any good because we may not even go to a bowl game. But I learned a long time ago that with NCAA football, nothing is certain. The Knights could be 0-12 right now, and I still wouldn't be making airline reservations anytime soon.

"There are things I believe in this crazy world, and most often I'm right. Sometimes I'm as wrong as the people who keep making movies such as House of Wax, but normally, I have a pretty good feel for everything. Honestly can't tell the future, because, if I could, I would not get paid to make the team payday work $0.00, and I'd spend the rest of my days setting up Vito's Secret commercials."

The weekend I want to see is Southern Miss going up first place, UCF bouncing UPSTEP in the CUSA championship game, and the Knights moving on to Liberty Bowl for a New Year's Eve rematch with either South Florida or South Carolina. That's the type of weekend I'm after.

Will it happen? Who knows, it's out of our hands, and only time will tell if you need something to pass the time, I offer this reading materials.

I forgot something incredibly spectacular over the weekend's columns.

I arrived at Wall Street on Homecoming Saturday at 2 am, and immediately set about the process, which consists of drinking wine and eating tacos. It was the previous night after I had been there, a lifelong dream of mine was fulfilled. I was finally able to do the master of ceremonies for the Homecoming parade.

I have a list of things to do before I die: take a time machine back to the future, learn to my own shoes, invent a automatic dog/belling machine and be the voice of a UCF Homecoming parade.

I have a list of things to do before I die: take a time machine back to the future, learn to my own shoes, invent a automatic dog/belling machine and be the voice of a UCF Homecoming parade.

Your organization can make a huge difference in the lives of Orange County children when you sponsor a child through the Neighborhood Center for Families. We have families who can't afford Christmas presents for their kids... 

We make it easy for your organization to make a difference. We match you with 1 to 25 kids and their Christmas wish lists. We arrange camps or other events. We provide any documentation you need for your organization.

The Neighborhood Center for Families funded by the Orange County Citizen's Commission for Children.

For more information, do not hesitate to call us at 407-832-8160 or email ray.knott@ucf.edu.

If you want to make more money, have greater flexibility and more opportunities, then Graduate School is for you. In addition to providing more knowledge and understanding of your discipline, it will allow you increased marketability and for some professions it is simply required for what you want to do (for example, psychologists, physical therapists, counselors, and audiologists are all required to have graduate degrees to practice).

The typical person with a graduate degree will earn an average salary of $74,602 per year, compared to $51,206 for an individual with a bachelor’s degree, and only $27,915 for someone with a high school diploma. Not only are annual earnings more, but you are also more likely to have greater savings over your career.

What do you need to pursue graduate education?
- You need to apply.
- Provide official transcripts from previous institutions.
- Submit official GRE or GMAT scores.

Assistantships and fellowships are available from most graduate schools.
