Number of part-time instructors stays stable, tenured positions waiting throughout country

Part-time teachers make up 39 percent of the UCF faculty

THOMAS HOFFER of The Student

At universities throughout the country, part-time instructors account for almost half of all faculty members and have been at that rate for more than a decade, according to a recent article in The Chronicle of Higher Education.

At the same time, the number of full-time faculty members without the prospect of tenure has increased from 38 percent in 1998 to 41 percent in 2005, the article stated, which triggers a trend, a concern for both full-time professors and students, is slowly catching on in Central Florida.

According to a voice mail left by 25 percent of all faculty members worked part time at the University of Miami in 2000, UCF employed 39 percent part-time during the same time period.

Any teacher who works less than 40 hours per week is considered part time. Separating faculty into full time and part time does not necessarily reflect on members' positions.

Technically, a professor could be hired on a part-time basis, while an instructor may work full time. Professors and associate professors do typically hold full-time positions, while adjuncts fill in holes and work significantly fewer hours.

The trend to part-time faculty may affect students and full-time professors alike.

"I've had professors who teach online classes, and they are only part time because they have a full-time job as a lawyer or as a clinical psychologist," said Jacqueline Linn, a UCF psychology major.

The disadvantages is that they are not as easy to got a hold of, but the advantage is that they have more real-world experience than somebody who is "a full time professor, and they can bring that into the classroom," she said. "That's more valuable than just textbook information.

Availability is the key factor for English literature major Vincent Power, who otherwise hasn't noticed a difference in the quality of classes given by part-time faculty.

"With a lot of the full-time professors, the tenured professors, it's easier to latch on to them as a mentor because they know that they are going to be here."

"I have 20 office hours."

"If I'm not there, I'm there."

"When I had classes with full-time professors, I know exactly when I could go see them."

Denis Ford, a graduate assistant in the English department, also noticed a difference in her quality of education.

"I've noticed a lot of the full-time professors have been here for more than a decade," she said. "They have a lot of the students that they tutor, they feed, they know their office hours."

"The trend to part-time faculty may affect students and full-time professors alike."

Beck, who spent 13 years going from high school to becoming a motorcycle racer named "Lil Buddy," said Beck, a long-running dispute regarding the troubled University Place settlement, approved by the NCAA's President and its Trustees, is still going on.

George Mason University to Florida Saturday night.

George Mason had been to the NCAA Tournament three times before, but Patriots fans never seriously dreamed they would reach the Final Four. That's something many of the university's students and alumni will never forget.

The settlement, approved by the NCAA's Board of Directors, has never seriously been in doubt since the school was cleared.

The lobsters can be ordered, including grilled lobster, fried lobster and steamed lobster. The steamed garlic lobster is sold by the tail in weights ranging from 3 ounces to 8 ounces.

Each tail is butterflied, and the prices range from $7 to $12 depending on size.

The menu also features steaks and fish. There are four different types of steaks: sirloin, ribeye, strip and t-bone. There are also several types of fish that can be ordered, including grilled whitefish, fried fish, and steaks.

With each order of either steak, shrimps, lobster or fish, there are several mouth-watering sides, including: corn on the cob, French fries, rice, cole slaw, corn bread and garlic bread that can be ordered as well. There is a combination meals deal that allows for patrons to order both shrimps, crab, and steaks along with sides, pots and potatoes on the cob for a discounted price.

Now that Shrimpy's is located in a permanent building, the New York strip, eye of round and prime rib are available. There are also several seasonings available for patrons to season their shrimps, crab, and steaks along with sides, potatoes and corn on the cob for a discounted price.

The school was cleared of all previous violations last Monday. The looters visited both Ben's and Ted's simple white marble tomb in a grotto beneath St. Peter's Basilica, in order to pray for their families and to remember their lives.

Student body president misses meeting; seven protesters don't

Joe Tal //

"It sounds pretty decisive," said Matt Troy Jones, a senior at UCF. "I assume it's just wanting money in all the wrong places.

According to the Board of Trustees bylaws, individuals or group representatives may appeal the trustees' decision, but they must request to do so no later than 30 days prior to the meeting. I felt suspicious because the agenda was only released 30 days before the meeting, and students didn't have enough time really to talk about it because of midterms and planning for Spring break trips," said Jones.

"I went there to protest because we didn't think it was an example of waste. Sometimes it was weak. Sometimes I wanted to yell (school), but I didn't want to spend the rest of my life waiting tables and pick up poop and not even make enough money to cover rent," he said.

"You become different from other people. It's hard to stay focused when you hardly have any friends. You think, 'I'm the only one here who has a kid.' Not quite.

Kathy Stewart, a UCF psychology major, shares a similar life. Living with her parents in Palm Bay, she commutes to the main campus three times a week, spending two-and-a-half hours on the road each day.

While she works on her 14 credit-hour semester, she 24-year-old seems more inclined to stay in Palm Bay or with Stewart's mother. Late classes force her to return to UCF, so she is usually asleep two nights out of the week.

"If I worked a job, I would never get to see him," Stewart said.

Although scholarships cover her tuition and textbook expenses, she constantly experiences the stress of being a single mother.

"Your focus has to be totally divided because you have to study, but you also have to give all your attention to the child," she said.

The downsides of being a young mother at college hit Stewart more intensely. The hope of going to medical school died as did her hope of getting to move out of her parent's home.

The minutes of the meeting were posted on the Board of Trustees Web site.

Student body president misses meeting; seven protesters don't

John Tal //

exactly where to find them. And in some of the cases, with their teaching assistants or the part-time instructors, they don't have an office or they share an office with five other instructors."

Jennifer St. Moritz, an English who teaches Spanish at UCF, shares her office with three other people. But she is available.

"We have to give office hours," she said. "We do one hour a week per class. This Spring semester, she teaches two classes.

From her perspective, staying after or leaving early is the only way to get a foot in the door, since she was never given the chance to teach full time.

"Most adjunct professors do it as a starting point, as a way of coming in, teaching a couple of classes and then eventually take positions if they open up," she said.

Although her goal is to eventually find a full-time position, St. Moritz acknowledges the benefit of staying off small for both part-time positions within the university.

"It's fair because it gives the university a chance to see what kind of instructor you are," she said.

And if you get feedback on how it goes, they can tell you whether you really fit with the university.

"So I don't know why they would be advised to fill open positions with adjuncts rather than regular faculty.

According to the Office of Institutional Research at UCF, the average income for an instructor on a part-time and full-time basis for 2005 was $43,081. A professor on the 9-month contract averaged $101,628.

"We had to give office hours," she said. "When she finally fell in love, she was doing the sun was starting to come in. Three hours later, the merciless scolding of her room intro­duced her to another stressful and sometimes painful day.

What Vanessa Osmon, a UCF education graduate, had been going through for almost two years isn't applicable at all for young single parents. Balancing school, work and the education of their children, let alone personal free time, often marks a high-stress experience that is socially, emotionally and financially. Slacking is not an option.

"I didn't really have a choice," said Osmon, whose situation slightly improved when she finished college and found a job as a high school teacher. Her time as a UCF student, however, is still pres­ent in her mind.

While grants and scholar­ships paid for her tuition and books, she had to make enough money to cover groceries, gas and the cost for babysitters. So she worked as a waitress five days a week, typ­i­cally from 5:45 p.m. until 2:30 a.m. "Sometimes I would cry because I was so tired," Osmon said. "My immune sys­tem was weak. Sometimes I wanted to quit (school), but I didn't want to spend the rest of my life waiting tables and pick up poop, and not even make enough money to cover rent.

"You become different from other people. It's hard to stay focused when you hardly have any friends. You think, 'I'm the only one here who has a kid.' Not quite.

Do parents balance studies, raising children

THOMAS HOFER //

Her shift was short. Again. While many other students bounded towards their bright and promised classes, she was serving them.

While those students returned home from their joyful and deserved adventures, she was doing the dishes, the cleaning, the washing, the wiping tables.

But why was she doing this? Why was she working in the first place? Why was she driving her baby's house to pick up her 3-year-old son.

When she finally fell in love, she hardly could stand to think about what she was doing, the sun was just starting to come in. Three hours later, the merciless scolding of her room intro­duced her to another stressful and sometimes painful day.

What Vanessa Osmon, a UCF education graduate, had been going through for almost two years isn't applicable at all for young single parents. Balancing school, work and the education of their children, let alone personal free time, often marks a high-stress experience that is socially, emotionally and financially. Slacking is not an option.

The downsides of being a young mother at college hit Stewart even more intensely. The hope of going to medical school died as did her hope of getting to move out of her parent's house.
Dear Ask A Doc:
Syphilis is a sexually transmitted disease caused by a bacterium called Treponema pallidum. Although usually sexually transmitted, it can also be acquired by birth and thus is called congenital syphilis. Syphilis is considered a systemic disease because it has the ability to spread to multiple organs of the body if left untreated. It is characterized by episodes of active (symptomatic) and clinically latent disease.

Syphilis is called the great imitator because it mimics many other diseases. Many persons may fail to recognize the symptoms of syphilis and delay medical evaluation or treatment as a result. The symptoms then disappear, and the disease passes on to the subsequent stage untreated. Syphilis has four distinct stages.

Primary Syphilis
Primary syphilis is transmitted via the hallmark characteristic lesion, the chancre. Usually within three weeks, from the time of sexual exposure to infection, a person will develop a hard, painless lesion at the point where the bacterium enters the body. The lesion will then rise slightly. This nodular area is about five to 10 millimeters in diameter and will enlarge within a few days, producing a non-painful chancre. Persistent yellow-gray scab will cover the chancre. The chancre may disappear in three to six weeks if left untreated.

Secondary Syphilis
Secondary stage is sometimes preceded by flulike symptoms such as fever, malaise, decreased appetite, nausea, vomiting, weight loss, headaches, sore throat and muscle, joint or bone pain. Individuals will notice a flat, pink rash on their trunk and upper extremities. Other signs and symptoms include swollen lymph glands and hair loss on the scalp, eyebrows, eyelashes and face. Watery skin lesions are common. Other lesions tend to develop within mucous membranes of the body such as the mouth, anus and vagina. Some individuals may also develop neurosyphilis symptoms during this stage.

Latent Syphilis
This is a period where the bacteria, if untreated, continue to be active and replicate, attacking vital organs of the body. There are no support or symptoms of the disease at this stage.

Tertiary Syphilis (Late)
During this stage, the bacteria will infiltrate the eyes, cardiovascular, respiratory tract, central nervous system, skin, bone, muscle, genital and neurological systems causing destructive skin lesions and serious irreversible damage to the organs. Lesions within the cardiovascular and neurological systems are common and, if left untreated, compromise the system where they develop and affect its function. If left untreated, one may be seriously debilitated and die. It typically develops five to 15 years after exposure to the syphilitic bacteria.

Treatment of Syphilis
Penicillin is considered the gold standard for the treatment of syphilis. All stages of syphilis are treated with Penicillin. Dypencycline and Tetracycline can also be used to treat syphilis but may be less effective.

Screening Procedures
Syphilis is transmitted only by the exposure to the mucous membrane lesion which contains the syphilitic bacteria. This usually occurs within the first year after exposure. All current or previous partners require blood screening for syphilis.

Partners diagnosed within 90 days of exposure should receive additional diagnostic tests for Primary, Secondary or Early Late syphilis should be treated even if screening lab tests are negative.

Plase, to qualify for admiss­­ion to the Counseling School, a child must be at least two years old and toilet trained. However, those guidelines could be normalized if surveys prove they should, as Marcia Diebler, director of the Cus­­­­­tions and Counseling center explained. "We might find that needs on our campus currently might be from one to three years," Diebler said. "And if that's the case, we might be able to utilize our current space in a different way." By the time a free day-care center could actually be set up at UCF, Steward was most likely to have graduated. Meanwhile, she continues to rely on pro­­fessional babysitters, family and friends.

More about Ask A Doc:
The column appears regularly. Marcia Diebler, director of the Counseling Center and Associate Director of Wellness at UCF, has been a counselor at UCF for more than six years. She said: "We're trying to help students deal with their concerns. It's not just about .the schedule doesn't allow for a lot of quality time. It has to be low. Most of the time, it has been between 8 a.m. and noon, because that's when most kids are in the classroom. But you don't know when that's supposed to come up in a conversation, because most guys don't expect that," she said. "Most guys just want to have a good time."

Dallas coach Jay Bergman couldn't be more pleased.

As a member of the C-USA, this time last year, the Knights are finding the success that supplied the power that is ready for their C-USA Championship game.

After losing its first C-USA game of the season to East Carolina on Sunday, it is still early with no. 1 at the top of the conference.

Softball now 0-12 in C-USA after three-game sweep by Southern Miss

MELISSA HEYBOER

There are big expectations for the UCF softball team this season, and with expectations come pressure.

Undoubtedly a lot of that pressure will be on the shoulders of senior catcher Brooke Yates.

A season after losing the Golden Knights to the fourth best team in NCAA history, Moffett is preparing to help his team build on its recent success.

A year ago, the talk around UCF was about finding a way to stop the first game in the George O'Leary era. This spring, a confident UCF team takes to the practice field aiming to defend its Conference USA East Division title and earn another spot in the CUSA Championship game.

If that is to happen, the Knights will need strong play from Moffett and his receiving corps.

The Knights already have an established ground game, as returning tailbacks Travis Peyton, Kevin Smith and Dontavious Wilson combined for 2,057 yards last season.

Experience, competition define qualifiers in 2006

O'Leary, Godsey hope depth will push Moffett to new level

JODY WILKES

There are big expectations for the UCF football team this season, and with expectations come pressure.

It is a serious task for head coach Jay Cutler to lead his team to the Rose Bowl.

When he dropped back to pass, he had defenders, but he had them covered.

But when he stepped up in the pocket, a few of them were shielded, allowing him to thread the needle repeatedly.

When he started to make the tackle but got his foot up, he had to stay up on his feet, take the hit and grit out every yard.

Because he was the winner. Because he was the team.

Jay Cutler vs. UAB in football.

In the fourth quarter, his career, he just didn't have it. He wasn't given the national stage on a weekly basis (I kept waiting, but Lee Corso never did throw that on OU's freshman headliner).

These were for Vince Young and Matt Leinart, the darlings of the 2006 NFL Draft quarterbacks.

This won't be popular, but I give Young, Leinart and Cutler.

That is relatively speaking, of course. Young and Leinart produced, but not deeper.

Young's shotgun-based offense gives them a chance to play at a high level. Cutler, on the other hand, has to know that he will be compared to others.

Because he was the offense. Because he was the team.

There was no more of the greatest than Young and Leinart.

But what more could one ask for?

Vandy QB is a Cutler above the rest of the draft class

Young, Leinart receive all the hype, but Cutler is the franchise QB

CHRIS HOYLER

The Golden Knights out of many tough situations.

The freshman had a rough weekend against Marshall, going 1-for-11 with five strikeouts.

UCF outfielder Tyson Auer, Ynclan lead offensive outburst as Knights take first two C-USA games

Baseball notebook

Tyson on a tear

"It's pretty surreal," said Tyson after hitting his second career grand slam in the season opener. "I was struggling a bit at the plate, but I think I'm starting to find my groove."

Matt Horvath brought in a pair with a single and led off to score two more runs in the bottom of the ninth inning.

"It was a great game," said Horvath. "The pressure was on, and we were able to win."

Chalking up the wins

Center Steven Nuss and center Matt Ray were both named to the All-Conference team. Their performances are a testament to the hard work and dedication the team has put in.

"We've been working hard all season," said Nuss. "It's nice to see it pay off."
of key targets like receiver Brandon Marshall and Duke's Devin Jackson. In total, UCF's offense had 168 yards in the game, with quarterback Kyle Isreal finishing the game with six completions in 10 attempts. Junior quarterback Kyle Isreal finished the game with 168 yards and two touchdowns. The Knights will travel to USF for their next game, on April 6-8, and will face the Bulls in a conference matchup.

The Knights lost their second game of the season against the University of Southern Mississippi (USM). The game was held in Hattiesburg, Mississippi, and the Knights were leading 3-0 after the first quarter. However, USM scored 15 unanswered points in the second half, winning the game 15-3. The Knights' defense held USM to just 202 total yards, but the offense was unable to capitalize on the opportunities given.

Despite the loss, the Knights showed resilience and fought back from a 12-point deficit in the first quarter. They outscored USM 15-12 in the second half, but ultimately fell short. The Knights are looking forward to their next conference matchup against the University of South Florida (USF) on April 6-8.

The Knights played well in their first game of the season against the University of Kentucky (UK). They led 13-10 at halftime and went on to win 20-10. The Knights' defense was strong, limiting UK to just 238 total yards. The offense scored three touchdowns, with quarterback Kyle Isreal finishing the game with 144 yards and two touchdowns.

The Knights will travel to USF for their next game, on April 6-8, and will face the Bulls in a conference matchup. The team is looking forward to this game as they continue to build momentum and fight for a spot in the conference championship.

Women's Rowing Wins Twice

Dedicated to the late Mary Randolph, the Golden Knights' rowing team won two races at the Florida Diet Pepsi Classic. The team competed in the lightweight women's eight and the women's novice eight events.

The lightweight women's eight team won their heat, with a time of 6 minutes, 50 seconds. The team's members included Allie Squares, Ashley Baker, Anne Huerta, Jennifer Chin, Victoria Brandoe, Katie Kime, Ashley Taggart, and Lauren O'Keefe.

The women's novice eight team also won their heat, with a time of 8 minutes, 20 seconds. The team's members included Allie Squares, Ashley Baker, Anne Huerta, Jennifer Chin, Victoria Brandoe, Katie Kime, Ashley Taggart, and Lauren O'Keefe.

The Knights will travel to USF for their next game, on April 6-8, and will face the Bulls in a conference matchup. The team is looking forward to this game as they continue to build momentum and fight for a spot in the conference championship.
A pocalypse now? No, but worry then we thought. The oceans were once divided on the subject of global warming. Some scientists say the Arctic is melting at a disturbing rate and that the eventual melting of Greenland's ice could make the seacoast of the eastern United States uninhabitable. Others say the idea of a dramatic global climate change once seemed unlikely. But now, uncertainty and some, a completely new topic.

Most scientists concede that cli­

ate change is happening, and that it is a threat to some of the most vulnerable ecosystems on the planet. But the exact nature and timing of the threat are still uncertain. Some experts believe that the effects of climate change will be felt within the next few decades, while others say that the effects will be more gradual and will not be felt for several centuries.

This uncertainty makes it difficult to plan for the future. For example, some governments and organizations are investing in renewable energy sources in order to reduce their reliance on fossil fuels, which are a major contributor to climate change. However, others argue that the benefits of fossil fuels outweigh the risks associated with climate change, and that the transition to renewable energy sources will be too expensive.

One of the most important aspects of climate change is the potential for sea level rise. As the Earth's temperature increases, the oceans expand and ice sheets melt, causing sea levels to rise. This can lead to coastal flooding, erosion, and the loss of land.

Another aspect of climate change is the potential for more extreme weather events, such as hurricanes and heat waves. These events can cause significant damage to infrastructure and disrupt the economy.

The effects of climate change are already being felt around the world. In some parts of the world, higher temperatures and more frequent extreme weather events are leading to increased rates of disease and mortality. In other parts of the world, rising sea levels are leading to the loss of coastal communities.

Overall, there is a growing consensus among scientists that climate change is a serious threat to the planet and that action must be taken to reduce greenhouse gas emissions and limit the worst effects of climate change.
Introducing WebRevalue for your UCF Card

WebRevalue is a simple and convenient way to add money to your UCF Card.

Go to www.ucfcard.ucf.edu. (From anywhere in the world!)

Click on the WebRevalue icon and follow the simple directions.

Visit a WebRevalue Kiosk to load the $$ to your UCF Card.

It’s so easy, even your parents can use it!
(Hint: Send them the ISO number from the front of your UCF Card)

Use your UCF Card for food, gear, supplies, and discounted vending all over campus.

The only thing more fun than the NCAA Tournament is K-Fed

Mr. Spears certainly has a nation praying on his fire.

According to ESPn, there were three people nationwide who correctly predicted the NCAA Tournament’s Final Four.

That means aside from me, two other people were brilliant enough to predict George Mason to wind up at one of the Top 4 teams in this year’s tournament. OK, so I’m obviously embellishing my psychic abilities. I was actually hopeful that Connecticut had to play George Mason last week because I thought it marked the first time in my gambling history that I had not managed to predict any of the Final Four teams.

So close, yet so far. However, I guess I pulled UCLA to make it, and therefore, I’m an even bigger idiot because I managed to get only one team right. Sometimes I even amaze myself with my own “square peg, circle hole”

The one good thing that has come from this year’s incredibly random NCAA Tournament is that Connecticut has a truly classic championship matchup. Florida against UCLA is fantastic, giving UCLA back in the title hunt to the proverbial T-shirt. In fact, when there was a dynasty in college basketball, of course, coaches predicted UCLA would give ever witness it, but people say it’s cool, so let’s just milk it with it.

I’m kind of on the fence with the Florida Gators. After all, I pick the Gators deep in the Big Dance year after year and they keep on getting me, and it’s driving me nuts. By firing that the one year I had it, it drove me nuts on Faith in Florida, the Gators punch their ticket into the championship game and help make me look like a fool. At least, you know, you’ve been to Gainesville, I’ll never turn down all the hope for the best for those Florida Gators.

After all, I pick the Gators deep in the Big Dance year after year and they keep on getting me, and it’s driving me nuts. By firing that the one year I had it, it drove me nuts.

But despite the driving me nuts on Faith in Florida, the Gators punch their ticket into the championship game and help make me look like a fool. At least, you know, you’ve been to Gainesville, I’ll never turn down all the hope for the best for those Florida Gators.

So you might as well just shut up and stay in the news broadcast footage, let me get a ‘real world’ but seriously, I want to know where the gold is.

Quick random questions: Do you want to predict any of the NCAA Tournament’s Final Four?

People have always liked to make fun of Buttafuoco, but I, for one, am putting my foot down.

MOUThING OFF

ADRIAN KAPRIS

After all, I pick the Gators deep in the Big Dance year after year and they keep on getting me, and it’s driving me nuts. By firing that the one year I had it, it drove me nuts.

In knowing there are certainties in life: Mark taylor and Kenny Hill will spend more time on the disabled list than almost every other player, and almost every other player on the disabled list than almost every other player. In fact, there was never a steroid policy in MBL until 2000. Publishing players for possible infirmities that happen last century in my high school principal tracking and now causes me detestation for studying a pile of old newspaper articles and physics every other day —

Walking stereotomy and enhancement to make everywhere; Joey Buttafuoco is back in the courtroom as he faces charges of illegally possessing ammunition. I know, I know, it’s not the same as having his teenage girlfriend pop a cap in his head and then pretending like nothing happened, but a man has to do something to stay in our lives if P00 won’t produce anymore celebrity boxing shows.

People have always liked to make fun of Buttafuoco, but I, for one, am putting my foot down. But with each new season comes the satisfaction of hearing these certainties in life.
