THE STUDENT NEWSPAPER SERVING UCF SINCE 1968

UCF grads headed in different directions

KARL H. ROES
Columnist

More than 4,000 of 5,400 students who declared their intentions to graduate this spring attended the commencement ceremonies at the UCF Arena that started May 4 and concluded May 6. Some arrived in bedewed mortar-boards, while others voiced their apprehensions about tripping on stage. Graduation consisted of two separate commencement ceremonies. Each ceremony featured a different keynote speaker who offered advice about what to expect in the future.

Some graduates reflected on their day of recognition, their UCF careers, and the future that lies before them. "The best part of graduation was the feeling of accomplishment," said Tonya Robertson, a liberal arts major from Plantation. "I successfully financed something that started with my family and friends were there to support me."

Roberts spoke highly of her time spent at UCF and said that she has enjoyed a wonderful college experience. She was able to get an internship through the university that landed her in Los Angeles this past summer working for a production company called Wonderland-Found and Vision. There, Roberts met many celebrities, including the entire cast of the G.I. Joe, a Wonder-land production, and was able to start networking. "I am planning on moving out to L.A. after the summer and getting a job at the production company I interned with. It sounds like a blast," said Roberts. "I can't wait to see what's out there, I will be in a major city world, and will open the doors for me."

Tonya Coolidge's visual ode to his mother's people is on display in Winter Park. The photographic series, "Time in a Disappearing World," focuses on vanishing indigenous cultures of Taiwan. The small shop, squeezed between a pizza shop and a clothing store, has found its niche. The idea proved successful. Cartridge World has franchises in 26 countries around the world. In 2003, it hit the U.S. market with 500 small retail stores. The idea of recycling cartridges has been around for decades. Trees and shrubs have built up, which burn out of control wildfires. Florida's ecosystem is set up for natural disasters. It is being recognized as cost efficient and a solution occurring every two to five years.

Many book-buying options for students

JENNY ANDREWS

The UCF undergraduate business program was ranked No. 10 and the graduate business program was ranked No. 12.

The rankings were based on a survey of about 100,000 business majors and a poll of undergraduate recruiters. Also considered were placement starting salaries, placement rates, job offers, admission prerequisites, and SAT or ACT scores.

The UCF program is ranked 11th in the Southwest.

The main selling point for me is the business program. It is a very strong program, and it is ranked in the top 10 worldwide.

The rankings put UCF on the same par with other top business programs in the world. The rankings are based on a survey of about 100,000 business majors and a poll of undergraduate recruiters. Also considered were placement starting salaries, placement rates, job offers, admission prerequisites, and SAT or ACT scores.

More than 4,500 people living in villages closest to the crater or in areas that could provide paths for lava had evacuated on Thursday, a day after scientists raised the alert status for Indonesia’s densely populated island.

With Sulawesi, the official count of those affected by the disaster is 1,990. Scientists believe the death toll will further rise because some 1,700 people are still missing, according to the disaster agency.

In one of the villages in the shadow of Merapi, some 200 people hid in their homes as the volcano belched out clouds of black smoke, and lava flows scorched the landscape. People in the area had been told to move to higher ground, but many refused and said they believed the volcano would erupt any moment.

Although most Indonesian Muslims are Sunni, many also worship Hindu, Shinto, Buddhist, and Christian gods. For example, in Central Java people hold large ceremonies to pray for rain. The ceremonies work by telling the gods to stop their actions.

The village of Banjarnegara, near the Mount Merapi, has a large temple. The temple’s priest, who refused to be identified, said he had been told by an official from the national disaster agency that his village would be included in the evacuation zone. He said he had not received any assistance from the government.

"I have a feeling of hopelessness," he said. "I feel like I am a prisoner of the volcano."
Three students win awards at career-development contest

Andrew Van Haar
Sat 6/17

Three members of the Delta Epsilon Chi chapter at UCF received awards at the 2006 International Career Development Conference. UCF finance student Michael Opperman placed third in the Financial Services division of the competition. Rafael Padron and Brian Peterson placed in the top 10 in business-to-business marketing. The competition took place in Dallas on April 25.

There are three types of competitions that students from around the country can participate in at the ICDC role-play, case studies and written manuals. In both role-play and case studies, students are presented with different scenarios and are given either a half hour or a full hour to come up with a plan or formulate a solution. Then the students must present their proposals in front of judges. The competition is judged in many ways. According to Opperman, "the manual itself is assembled by students before the competition takes place. All scores are counted on the manual's evaluation, all of who are industry professionals. The top 10 students participating in the ICDC received medallions, and the top three received trophies." The ICDC takes place once a year and usually follows a three-state-level competition. The 2006 Florida State Career Development Conference was held this year from March 2-5 in Orlando. During this competition, UCF undergraduate students competed against other four-year university and community college students. For Brian Padron and Michael Opperman, it was their first year representing UCF in a Delta Epsilon Chi career development conference. In this competition, Padron placed first in the apparel and accessories marketing division. Other experienced DEC members Matt Franz and Etinder Gill also received awards. Kelley placed first in business ethics. Franz placed second in restaurant and food service management. Padron and Peterson placed second in business-to-business marketing and Opperman placed fourth in financial services.

Although each of these UCF students represented the DEC chapter, their awards are individual accomplishments that bring recognition to the chapter, rather than accomplishments of the organization itself.

Delta Epsilon Chi is the college division of Distributive Education Clubs of America, a high school business student organization. Delta Epsilon Chi is not a fraternity, but a professional organization consisting of business students.

Ordering textbooks from Web sites can be cheaper, riskier than bookstores

While textbook prices have increased significantly in recent years, ordering textbooks online can also be an easier way to buy a textbook directly from the seller and wait for a refund of your money. But beware of online scams and choose Web sites that are reliable.

Each book is distributed in many formats, one of which is the National Association of College Stores, stores that get 67 percent of the profit. Although Web sites get 25 percent, the author gets 9 percent, the textbook sellers and the freight company get 9 percent.

Buying a textbook online can also be a hassle. Sites such as Half.com and Amazon Books bring buyers and sellers together. A student can buy a textbook directly from another student. There is no book return clause in the middle of the two.

One Web site, Cheapest-Textbooks.com, compares textbook prices with 16 major online textbook bookstores such as Amazon, Barnes and Noble, Half.com, Ecampus, Overstock and Half.com. The music finder uses the book's title, author and ISBN number to search for the cheapest now and usually takes one-to-two business days. Sometimes textbooks are shipped late by the seller or not at all. "I've heard it takes weeks," Rogers said. "Five weeks, it's class, I heard a kid saying his textbook still hadn't arrived." Pictures and edition information should be available through the site, but students sometimes receive the wrong textbook from online stores.

"Students are ready to order a textbook online and received the wrong edition," Fox said. "Then they may buy the wrong one and wait for a refund. They considered it a real hassle."
Santos steers clear of genres, deals with unruly show fans

At 43, on a night not too long ago, when the singer-guitarist of Sanatosh Santos took to the stage to perform in Orlando, he found himself surrounded by a sea of fans who were eager to see him. The energy was electric, and Santos was ready to deliver a night of music that would leave his fans in awe.

The concert was part of Santos' ongoing tour, which has taken him across the country and around the world. He has been a fixture on the rock music scene for over two decades, and his music has always been a reflection of his experiences and the world around him.

With a career that spans over two decades, Santos has released numerous albums and singles, and his music has been featured in various films and TV shows. He has also been involved in various philanthropic initiatives, using his platform to raise awareness about important social issues.

Born and raised in the United States, Santos has always been fascinated by the world around him. He has traveled extensively, exploring different cultures and experiencing various aspects of life. These experiences have all found their way into his music, making his sound a unique blend of influences.

Santos' music is characterized by its raw and honest approach, and he always aims to connect with his fans on a personal level. He believes in the power of music to bring people together, and his concerts are always a celebration of the human spirit.

As the night came to an end, Santos took a moment to thank his fans for their support and for allowing him to share his music with them. He was grateful for the opportunity to connect with so many people and to witness the power of music in bringing people together.

Go Knights! Go Knights! Go Knights! Go Knights! Go Knights!
Coolidge a pro at raising awareness

Coolidge earned $30 for articles on magazines, which he has done while researches Bremer and Jose discovered them.

"I believe everybody can learn from these cultures," said. "Different cultures provide important information for societal growth, and, if people don't take interest in them, they disappear."

In 2004 at Orlando's Indigenous Heritage Festival, Coolidge brought different tribal groups together to perform traditional rituals and to participate in exhibits of cultural exchange. Coolidge is currently working on a novel featuring a possible China-Taiwanese-U.S. conflict setting. He has also spoken to the United Nations on Indigenous Issues through a panel about issues facing the Indigenous youth.

For more information, call 407-582-4679 or visit: Access on the Internet at www.watsoncollege.

Cartridge World delivers to UCF area

Ralph Kapadia, owner of Cartridge World in Winter Park, said a printer cartridge is about $10 whereas a laser cartridge is about $30. A laser cartridge is more immediately obvious.

“A new laser cartridge, for example, requires about a gallon of oil to be produced. Once on the market, certain components of that laser cartridge take thousands of years to decay, since they are made of industrial grade plastics.”

"Most people do not see what impact it has on the environment,” Kapadia said.

In his few words in business, he has already started collaboration with local schools and churches, educating them on the environmental aspect and motivating them to take action. For each ink cartridge a school collects, he donates it back to it. A laser cartridge is a $3 donation. Kapadia believes that the word "waste" stop at high schools when one of the biggest universities in the state is only a few miles away.

"The students of UCF should know this is true," he said. "It's beneficial for them because I'm sure they are missing a lot of life."
Introducing WebRevalue for your UCFCard

WebRevalue is a simple and convenient way to add money to your UCFCard.

Go to www.ucfcard.ucf.edu. (From anywhere in the world!)

Click on the WebRevalue icon and follow the simple directions.

Visit a WebRevalue Kiosk to load the $$ to your UCFCard.

It’s so easy, even your parents can use it! (Hint: Send them the ISO number from the front of your UCFCard)

Use your UCFCard for food, gear, supplies, and discounted vending all over campus.

A-Rod needs defining moment to shed 'overrated' label

Until he gets a big hit in the spotlight, Rodriguez will always be questioned by fans, media and fellow players.

He didn't start his season the way he had hoped.

As a leadoff hitter, Rodriguez has failed to produce in key situations and is hitting just .266 through the first 17 games of the season.

But Rodriguez's struggles this season have led to questions about his ability to be a consistent performer at the plate.

"He has been inconsistent," said one AL executive. "He's not quick to forgive and forget.

"And before anyone can get an answer to the baseball season's big early question (Will A-Rod snap out of his funk), Rodriguez faces a new opponent, as Rice's Eddie Degerman faced him in the ninth inning of Friday's win over UCF.

Degerman battled Rodriguez, who are you choosing? you press?'

Rodriguez's struggles this season have led to questions about his ability to be a consistent performer at the plate.

CUF got to Rice starter Craig Martin in the ninth inning, taking a 2-1 lead with a two-out single by Williams, who was 2-for-4 with a double and a run scored.

But it was the ninth, the Owls proved that being the team in the lottery requires a little luck. With the game tied at 1-1 and sabre in front, the Owls' punt at second baseman Christian Eades, dropping in for a single, Varga continued, driven on a 3-3 pitch, and driven off. Paul Breen, who had last what has been the most start of the C-USA run and had two two-run home runs on the day, was ruled to score. Two runs to make up for the first time in a season, and for the first time in C-USA play since June 4, 2006, when he rallied against Florida State in the NCAA Regionals.

Breen's final score came after when Luke Stewart recorded his hit of the eight and Bellinger, who had what may have been the worst hit of the day, and drove in a two-run wad on a two-out single by Williams, who was 2-for-4 with a double and a run scored.

The Owls went to Houston, and the Knights were eight hits for 2-0 as they had to

in the CUSA series. This time, the Knights didn't have enough and had both fielding miscalculation in the first run, as the Owls pushed 2 runs in the third as the Owls scored 11 runs in the first five innings. Stewart did not have either, but it was the Owls' hit in the win and drove in a two-run lead and a chance to give Houck his

state. Ocheltree and Tyler Rodriquez struggled in high-

in the second.
Go organic, but keep your wallet.

I t is America, where obesity is now an epidemic, making healthy dietary choices seem a focus of many people’s diets. Many Americans are now becoming more health conscious. It is clear that non-organic eating is environmentally detrimental. Many consumers feel that organic food is healthier, and though there is little scientific evidence of this, many Americans believe that organic food is healthier and therefore safer to eat. Moreover, many consumers often report organic food to be sweeter and fresher. However, when shopping, it is important to be aware of the cost of organic foods.

Drivers adhere to courtesies of the road; make traffic bearable.

What bothers Americans most on the roads? As the summer traveling season approaches, drivers are wondering how to keep the country’s “Top 10 Most Driving Pet Pes” in check. According to a recent poll, the most annoying pet peeve is “motor racers.” This pet peeve is closely followed by “rubber necking.” Other pet peeves include “using your horn without a reason,” “taking up too much space,” “speeding,” and “lack of courtesy.”

Where do you buy your groceries and why?

Weeds have been found in cakes, pastries and breads at Publix. If you are a health-conscious consumer, you may want to avoid these products. On the other hand, organic products are often much more expensive than their non-organic counterparts. The cost of organic food can be a significant burden for many families. However, if you are committed to eating healthy, there are ways to reduce the cost of organic food. For example, you can shop at local farmers’ markets or grow your own food. This can help you save money and support local businesses.

Man and car are essentials of the road; motor racers are not. If you are a motor racer, you are likely to be considered a hindrance to the smooth operation of the road. However, if you are a courteous driver, you are likely to be considered a valuable addition to the road system. Therefore, it is important to be aware of the courtesies of the road and to make sure that you are following them. This will help to make the road a safer and more enjoyable place for all drivers.
