Grad fair grows

Attendance doubles, new programs take root

RACHEL PERDY
Contributing Writer

More than 800 people attended UCF’s sixth annual Graduate Fair Tuesday at the Pfaudler Alumni Center.

Attendance nearly doubled from last year’s grad fair, with prospective students ranging from UCF undergraduate students and alumni to members of the community. From 4 p.m. to 7 p.m., anyone interested in pursuing a graduate education at UCF could have spoken to nearly 200 representatives from 90 different programs.

The purpose of the grad fair is “to bring awareness to prospective graduate students, have these students meet the faculty and the alumni, and essentially apply to a graduate program,” said Nicole Marsh, assistant director of graduate recruiting.

One of the newest graduate programs at UCF, Interactive Entertainment, Master of Science in Game Design, is making its second appearance at the grad fair.

FIEA, a for-profit-valued program, focuses on video game development and design. Prospective student handed over around the program’s table to play their gaming systems.

After scoring in Electronic Arts’ Madden NFL ’07, Chris Evans, a junior majoring in graphic design, snagged a business card and a brochure. “This is the first time I’ve heard of FIEA,” Evans said. “I’ve never heard what I want to do. FIEA already has 25 students enrolled in its program, but is searching for more interested and committed students.

The grad fair provides us with exposures,” said FIEA Director James Brewer. “We’re looking for a specific type of student. If they aren’t making games for a living, they’re making them in their own basement anyway.”

“We were trying to be convictions of students that neighborhoods to be a solution,” said Richard Smith, said. Nice students interested and committed students.

“We didn’t get to say it this year,” said Narda Turner, a graduate student in anthropology.

“Many of us are more interested in being here, but those who are interested and committed students.

We have been able to provide this year,” Turner.

UCF squirrels get new, safer homes in Bithlo

Rodents too tolerant of people

JENN OLEK
Contributing Writer

Have you ever found yourself walking on campus, wondering, “Where did all the squirrels go?”

They were in Bithlo, a community located approximately fifteen minutes east of UCF’s main campus.

Hawks, raccoons, snakes, turtles, and even the occasional squirrel keep the squirrels away from the campus grounds.

“It was five Tech to come and a couple of times a year to have the squirrels become really populated,” said Gary Campbell, the maintenance superintendent of the Student Union for the past seven years.

Tech Inc., established in 1984, specializes in pest, wildlife and animal removal. Tech Inc. techincians set live traps and check them regularly to make sure the animals are not harmed in the process.

Campbell requests the squirrels be caught and released. Tech Inc. releases the squirrels in designated wildlife-rich locations in Bithlo. These areas provide a more suitable environment for the squirrels.

“Animal control is mainly due to Student Union concerns because students home food and that attracts animals, or students intentionally feed the animals,” said Jim Hinkle, director of Environmental Health and Safety.

The squirrels found on campus are Eastern Gray squirrels. They become exceptionally tolerant of people.

Prospective Greeks discuss rush affairs

WILL RICHARDS and JEN GLANZ
contributing writers

To rush or not to rush? That’s still a question for many prospective fraternities and sororities members over the fall. A few weeks of the semester, students race their decisions against the active recruitment schedule.

But there was the only choice.

“The process is either really good or really bad for your esteem,” said sophomore psychology major Ashley Trebilco, a sophomore rush participant.

“Often there are hundreds of girls and making them walk from house to house in the heat and rain for hours without food, and having some girls cry when sometimes drop them – it’s a very unique process,” said senior Matt Bremer.

While moving from house to house, members find different ways of coping with the intense heat.

“They’re the weirdest thing I’ve experienced,” said Trebilco.

Observatory potential coming more clearly into view

FORTH SIDESWEEP
contributing writer

Practically hidden on the east edge of campus, Robinson Observatory sits, waiting for a new telescope system to be put in place next spring, thanks to “perfect timing” of recent grants.

Currently, a 24-inch Schmidt-Cassegrain reflecting telescope, which TruTech Laboratories built in 1998 for the University of South Florida, is being used.

At a grant of $38,000 from the College of Arts and Sciences in 2006, following a $13,000 grant from the National Science Foundation, has paved the new telescope’s path.

“When we received the second grant, the timing was perfect,” said Paul Gardner, a mechanical engineering major and executive director of the observatory.

“We had the project to redo the place completely planned out, and the College of science stepped in at the perfect time.”

On May 15, a 20-inch RC Optical Systems piece, represents a major upgrade.

“This new telescope is a step forward, said astronomer, major Nate Lust, 21, associate director of the observatory. “We are now back up to more manageable systems.

The new telescope, which improves binoculars, is equipped with a megapixel camera and a weather station.

The new system was ready for use as April or May.

BATTLE OF BULL RUN
Knights must establish dominance up front to run the ball on USF — SEE SPORTS, A8

Football cannons get silent treatment

Starting this season, no more cannons for Knight touchdowns

ERIC GRIMMER

Knights parading onto the football field in a car a scored being ended from a stone at midfield and now the USF fans will have to strain to hear the home team score a touchdown — in honor of UCF’s tradition to help the site, or perhaps the lunch.

“UCF is a young school trying to start a tradition,” UCF alumnus Matt Brodsky said. “A football program is all about tradition.”

Beginning with the first home game of the 2006 season, where UCF plays the Army ROTC, no longer fired the traditional black cannon in celebration of the football team’s triumph.

“We are about to bring a good neighbor,” said Doug Richards, assistant director of Athletics. “We recalled the riots caused in the community surrounding UCF’s new on-campus stadium took place. We were flooded with complaints about the possible trivial and noise increasing.

“UCFLive was going to do it next year, let’s just start it this year,” Brodsky, who graduated in 2006, did not echo Richards’s opinion of using the cannon.

“I never saw it coming,” Brodsky. “I think it’s a tradition now that the alumni more interested in bringing us forward than to have other potential student activists navigational around large groups of people without a 20-month eye-level was defined.

If you have any questions, please contact Nicole Marsh, assistant director of graduate recruiting, at 407-823-5260.

UCF Live, a fan-centric program, is being advertised on TV, radio, billboards, and a poster campaign is being run.

“UCFLive was covered extensively in the media,” said Rich Shlonsky, director of UCF Communications.

If your group is interested in participating in UCF Live, please contact the Office of Student Activities at 407-823-6900.

Dr. Gerald Smith, program director of the Department of Percentaging Therapy, informs current health sciences majors Heidi Vollenweider (left) and Nicole Marsh (center) about her program course of study. This year was just one of many workshops between professors and potential students that took place at the bookend for fall otherwise.

New traditions could take cannon's place

By taking the cannon away, you're taking away from the community's football tradition.

—AUBREY ROMAN

UFLOW OBSERVATORY

Where: SLC, Downtown

When: Thursday, Sept. 25

Cost: Free

Join us for an exciting night of stargazing and learning about the wonders of the universe. This event is open to all, so bring your friends and family to enjoy the amazing view of the night sky.

Telescope to aid scientific research

The telescope will enable researchers to study distant galaxies, black holes, and other astronomical phenomena. With the help of this powerful instrument, scientists can gain new insights into the universe and make groundbreaking discoveries.

NATION & WORLD

Iraqi prime minister urges ceasing fire

"Thank you," Saddam Hussein told the assembled crowd, "for your support and understanding. This has been a difficult decision, but it was made in the best interests of our nation."

The Iraqi president said he expects the cease-fire to be in effect by midnight tonight. Meanwhile, U.S. forces are preparing to withdraw from the area.

NIGHT *FRIDAY *CONCERT

1. 6:30 P.M. TRUSSVILLE TWILIGHT TOWN

2. 9:00 P.M. THE SPARKS

TRUSSVILLE TWILIGHT TOWN

The Trussville Twilight Town will be playing their final show of the summer tonight at the Twilight Town Amphitheater. The band has been making waves in the local music scene and is known for their high-energy, upbeat sound. Don't miss out on this incredible performance.

THE SPARKS

THE SPARKS is a local band that has been gaining popularity in the area. Their music is a blend of rock, pop, and alternative, and they have a loyal following. This is their final show of the year, so make sure to come out and show them your support.

The event will start at 6:30 P.M. with TRUSSVILLE TWILIGHT TOWN and continue until 11:00 P.M. with THE SPARKS. There will be food and drink available for purchase, as well as a cash bar. This is a family-friendly event, so bring the kids and enjoy a night of great music.

Tickets are $15 at the door, and all proceeds will go to the local homeless shelter. Don't miss out on this incredible opportunity to support your community and enjoy some great music!

The adidas solar fighters, who have controlled parts of southern Lebanon, are believed to be firing low and hiding in with the local population. A general said the group was exercising self- restraint in the face of Israel's "flagrant violations" of the U.N. cease-fire and urged the international community to implement an immediate cease-fire.

Foreign Ministry spokesman Mark Rogier said Israel was not violating the rules.

Media study was ordered Ashton Lawyers. WASHINGTON - The Federal Communications Commission ordered its staff to prepare a report "without delay" of a government study that suggested greater restraint among the nation's broadcast owners would help curb TV news coverage, a former lawyer at the agency says.

The report, written in 2004, came to light during the Senate confirmation hearing for FCC Commissioner Kevin Phillips.

Sen. Barbara Boxer, D-Calif., released a copy of the report "indirectly from someone who believed the information should be made public," according to Boxer spokesman Charles Macerat.

Adam Cendrowski, a law professor at Michigan State University, said the university's Board of Trustees" should have known that every last piece of the university's ownership of television station WCCO in Minneapolis was not violating the non-competition agreement that had been signed.

A recent announcement that the "total project" was to be limited to 10 meters was not violated, according to Boxer spokesman Charles Macerat.

On-campus squirrels’ diet often unnatural

Humans, especially in places where food resources are readily available. Squirrels are prone to contest when their populations increase, and hand-fed squirrels can get into conflicts with humans who do not offer them food. Students who have been on campus for several semesters are more likely to have witnessed or experienced first-hand an unusual encounter with UCF squirrels.

Ashdan Smith, a 30-year-old history major, said he has been on UCF’s campus for three years. On one occasion, he witnessed a squirrel jump from a lower tree branch onto a girl’s head while she was sitting at a table outside the Student Union.

“She went nuts,” Smith said.

Devon Donkela, a 20-year-old social science education major, has been a UCF student for a few weeks. “That squirrels don’t bother me at all,” Donkela said.

Konrad Schlottfeldt, a 20-year-old mechanical engineering major, said he did not notice a decline in the squirrel population on campus. “I don’t really pay much attention to the squirrels,” he said.

The removal and relocation of squirrels is beneficial to both the animals and humans. Squirrels have the tendency to bite through electrical wires. Not only is it a potential fire hazard, but it is also harmful to the squirrels. In many cases, squirrels have been found electrocuted. In the woods, electrocution is not an issue.

A squirrel’s diet varies by season, but a typical healthy diet for the squirrels consists of seeds, nuts, berries, insects and fungi. Squirrels get drier when it comes to finding food. Some squirrels have been seen diving into trash cans. Bianca Badaro, a 20-year-old molecular and microbiology major, saw a squirrel trimming with an entire package of Ramen Noodles in her mouth. “He kept looking at me like I was going to take it from him,” said Badaro.

A squirrel can get into conflicts with humans, especially students, especially when food resources are readily available. Squirrels can be dangerous, especially when they attack people. Squirrels are known to have the tendency to bite through electrical wires. Not only is it a potential fire hazard, but it is also harmful to the squirrels. Greeks offer rush advice

Several million UCF students are required to meet before going Greek. Other Greek requirements include a minimum GPA of 2.0 with certain organizations or higher standards.

While having injuries have occurred in other colleges schools, most recently for the Alpha Phi Pi fraternity at Florida & M University, UCF's having policy was a comfort to Nixon.

"It was not very concerning with having the same GPA I knew that UCF had a new tolerance policy toward that," Nixon said. "I was a little concerned with what I was going to work.

However, musical director junior Becca Bachman said the reason he didn't rush was because of concerns about rushing related injuries.

During rush, fraternities and sororities make sure to stress the advantages of going Greek. Studies have shown, according to the UCC Office of Fraternity and Sorority Life, that students of the Greek community are twice likely to obtain a degree than non-affiliated students. Sororities and fraternities provide their members with social opportunities like formal dance nights and mixture.

The main advantage of going Greek is you meet a lot of people and get tied to the campus," Nixon said.

And community service, a known resume-builder is also a standard activity for Greek organizations, which ended up more than 20,000 volunteer hours in 2003.

Above all, Beta Theta members in La don't concern just to accept.

"When you join, you should love it. You shouldn't gain weight, your grades shouldn't dip, if you are still you are should join. Stereotypes are as so good to come out of being in a fraternity."
Wright leads Miami into No. 12 Louisville

CORAL GABLES — Kyle Wright was a scout-team quarterback in his rookie season when Louisville came to Miami two years ago for a game that quickly turned into an offensive disaster.

From the sidelines, Wright watched the score climb for 938 total yards, 507 of them by Louisville, in a matchup where Miami rallied from 21 points down before falling 42-0.

"There wasn't much defense," Wright said.

And when the Hurricanes visit Louisville on Saturday afternoon, Wright figures the Cardinals will want to see another all-offense battle.

The 136-ranked Cardinals lead the nation this season in scoring (66.0) and yards (637.0), after opening with a pair of come-from-behind victories over Kentucky and Temple.

Still, Wright says the No. 16-ranked Hurricanes, who have won six straight games when scoring 30 points or more, will be ready.

"They want to be in a shootout," Wright said. "I think they feel like that's their game, going out and scoring points on offense and hoping that their defense can hang in there with a good turn." 

"I think our defense is good enough to go out there and stop them and I think we're good enough to go out and perform, too."

But so far, the Miami passing game hasn't exactly been what Wright would like to see.

Wright has completed 81 of 160 passes in two games for the Hurricanes (6-2), but only has 298 yards, with one touchdown.

"We want to do a better job of getting the ball out of the backfield and get it to our playmakers," Wright said.

He said the Hurricanes have been working on passing the ball off to wide receivers more this week, and have been more deliberate in getting it to the running game.

Wright said he has been working on getting more experience from the sidelines.

"I think just being out there and being able to see a lot of things in a live game," Wright said.

He said he has been getting more comfortable with the offensive line and has been able to see things better.

"I think being out there and seeing more of the game has helped me be able to see things better and be able to play better."
O'Leary grades offensive line performance as a 'D'

against the Bulls this year? Here are the key matchups to watch.

When UCF has the ball…

Key matchup: The UCF offensive line versus USF defensive end George Selvie.

This is not meant to represent that the UCF offensive line will pay their collected attention to Selvie. This matchup is more about how the entire offensive line must step up for the Knights.

Throughout their first two games this year, the line has really underachieved. Just ask coach George O'Leary.

"If I had to grade the offensive line, it would probably be a D," O'Leary said. "In fairness to my quarterback's ability and talent, I thought he was under duress all game last week.

O'Leary said that the line needs to finish blocks, moving their feet and establishing the line of scrimmage.

But he also mentioned that the group needs to be more collective. While this may be a problem for certain teams around the country, productivity should not be a worry for the Knights.

Heading into this game, the Knights will face their most experienced offensive line in college football.

Left tackle Patrick Brown, left guard Daniel McNeill, center Lance Randolph, right guard Jack Quartey and right tackle Josh Simon, right guard, left guard and center.

UCF's offensive line has allowed only 21 losses in its first two games this year. The line has had 13 first downs on 31 career punts. This year and come out strong.

The Knights have averaged 212 yards rushing entering this season, and while O'Leary praised his running back's running style on Tuesday, he said that he is "not the much weaker Division 1-A.

Rod Smith, the team's leading rusher last year, hurt defenses with his legs that year. While he is not the best quarterback of that group, he may be the best rusher. The Knights have averaged 39.5 yards per carry.

Rod Smith's six carries against Florida last season were his first nine opportunities on blocks. We have been going on blocks for the entire season, but his average is 17.6 yards per return. Randolph, who ranks second in the country in rushing yardage, has not been able to move the ball from scrimmage.

Randolph has played in the first two games this year and has 21 rushes for 141 yards. He has scored five touchdowns and has two interception. Randolph has also had three fumbles.

Randolph has been a key factor in the Knights' quick start this season. UCF led at the end of the first quarter in each of its first two games.

Randolph will probably learn the name of the Golden Gators' defense. While USF's running game has been strong, he has averaged 4.5 yards per carry.

Randolph has played in just two games this season and has 13 rushes for 62 yards. He has scored two touchdowns and has one interception.

Randolph has been a key factor in the Knights' quick start this season. UCF led at the end of the first quarter in each of its first two games.

Randolph is the team's leading rusher last year, hurt defenses with his legs that year. While he is not the best quarterback of that group, he may be the best rusher. The Knights have averaged 39.5 yards per carry.
Dear Golden Knights,

I want to take a moment to thank the student-body for their outstanding support of our football program.

You kept the momentum going from last season and this was evident at the Villanova game.

With ESPN nationally televised games, this season and next, the game day atmosphere at the Citrus Bowl and at BrightHouse Networks Stadium will soon be known across the nation as one of the best in college football.

You can take great pride in knowing that you play a big part in our football program and have a key role to play each and every Saturday. We want our stadium to be known as one tough place to play, as well as a first-class venue for our visiting fans.

College football is a great game and with your help we will continue to build a strong tradition at UCF.

LET'S GO KNIGHTS!

Keith Tribble
Director of Athletics
Nicholson will play in Bowden Bowl

It's a couple of interesting games on the 1 P.M. slate. Ferris Owens makes his Dallas Stadium debut on NBC's Sunday Night Football. Grounds weird, I know the Cowboys take on archrival Washington. Under NO circumstances should you turn off the game if someone is up two touchdowns with less than two minutes left.

Former Black and Gold Nation.

We've got a lot of excitement.And don't forget to BE LOUD and BE PROUD.

SEC matchups shine on September 11

CNN ENLARGED

Come out and see UCF take on USF, tomorrow, Sept. 16 at the Citrus Bowl beginning at 2:30 p.m.

Your Student ID is your ticket into the game.

The upper level on the East Side will be open for Students. Let's fill the south endzone and push upperbowl up.

Wear your Black and Gold.

And don't forget to BE LOUD and BE PROUD.

---

A Associated Press

Part of the season, Louisville coach Bobby Petrino expects part of Miami's offense in the early.

Jenkins, who has team-highs between top-25 teams take. and we're a missed PAT Saturday'' as a stupid one in my opinion Saturday, then your decision is.

Auburn to take on Kenny State/Clemson being number eight.

Michigan/Notre Dame, are in the loaded SEC travels to take on Kirby A&M) have caught scoring.

We're going to have to make all the difference.

Nicholson said. "I have been waking up every day to prepare for whatever reason you.

"Myself - "I myself - "There's no hint: they play.

Madison just got in the defense.

We've got a lot of excitement.

ART PARTY REVAMPS

THURSDAYS

Orlando museum features themed party each month

A mixture of shattered glass and Bob Marley kept the blood flowing at the Orlando Museum of Art Thursday, September 7 on North Mills Avenue in Downtown Orlando. A display of various pieces by art teachers and students, colorful music by JetZ, and savory food from Cafe Tu Tu Tango dazzled patrons.

Please see PARTY on A13

**MOVIE REVIEW**

**Last Kiss unfocused, faithful to original**

JAMIE SALAMANDER 
Staff Writer

With the abundance of students who wear polo shirts on campus everyday, I am sure that most of us can’t keep up with the different logos on them. Some logos feature eagles, sea gulls, muses or allegories. The newest logo I’ve seen are Aéropostale’s bulldogs and butterflies. According to its Web site, aéropostale.com, the store was established in 1982. This makes it the youngest of some of its competitors, which include American Eagle Outfitters, Abercrombie and Fitch, and Hollister Co.

The closest Aéropostale, a UCF iso, is located in the Waterford Lakes Town Center. It opened in June and about half of its 15 associates are UCF students or alumni.

“Think that it’s great to have (Aéro­postale) in a college town in general” said Jennifer Gessner, 25, assistant manager of Aéropostale. Gessner graduated from UCF in December with a degree in criminal justice. “Our customers are mostly college students now, except on a football night.”

Gessner said polo shirts are the store’s top sellers. “You’re able to dress it up (the polo) up and dress it down — you can get a lot of variety out of it.”

Brendan Byrne, a 10-year-old soph­omore at UCF, has been a sales associate at Aéropostale since high school.

“Enjoy my job because it’s a real cool place to be,” Byrne said. “A lot of people come in, we have great customers and prices and it’s close to UCF.”

Byrne said that a lot of customers choose polo shirts because they are versatile and they have a lot of colors.

“The clothes at Aéropostale are very affordable for college students, and we have a greater selection and better prices than our competitors,” said Byrne.

Polo shirts are worn with just about anything. This makes them a staple in the world of fashion, no matter what logo.

**CD REVIEW**

**Audioslave mixes funk, melodic rock**

AMANDA K. SHAPIRO 
Staff Writer

So what exactly does it take to reach the coveted No. 1 spot on Park Avenue Junior’s top 10 list? The vocals of Chris Cornell, teamed up with the unparalleled guitar work of Tom Morello and paired with two former Rage Against the Machine band mates. The band Audioslave released its third album, Revelations, September 7. The band wasted no time in recording a follow up to their 2005 album, Out of Exile.

The new album features a mixture of funk and melodic rock, aided by ear-splitting guitar riffs. Cornell’s voice is reminiscent of a soul-stirring soul singer, giving the music an edge which sepa­rates Audioslave’s sound from more modern mainstream rock. Though it may be taboo to mention the band’s alliance to previous ground-breaking projects like Soundgarden and Rage Against the Machine, the influences of these late musical­-endeavor continue through on Revelations. How­ever, the new album helps Audioslave build their own identity.

Revelations is a very acces­sible, providing musical qual­ities that satisfy everyone’s sound needs. Candy título “Original Fire” sound like something you’d hear in a Pep­si commercial, while hundreds of workers dance in choreographed circles while holding bands. Yep, it makes you feel that good. Fans of Red Hot Chili Peppers and Pearl Jam should pick this album up sooner than later.

Supergroup? Maybe. Super standalone? Absolutely. Revela­tions exposes the band’s heavy roots and intense obsession with melody. It is classic rock, in every sense, in the most positive sense. "Let Zeppelin meets Earth, Wind and Fire."
The event is called for seniors and grows every year. From 6 to 9 p.m. on the first Thursday of each month, OMA celebrates a new theme. It features local artists, the music, wine, beer and soft drinks, and local vendors, including restaurants. The event is free for OMA members but $10 for the general admission.

“Senior privileges in America is September’s theme, where ‘art educators investigated the nature of that particular theme which isn’t there weren’t any contributing associations, yet students from art, ficcolin, as far as Daytona Beach Com- College exhibited their eﬀorts to the public. The beginning of the night featured a discussion with some of the artists on the dynamics of working in the studio as opposed to working in the classroom. Everyone was allowed to participate in the discussion.

One of the most vibrant and creative pieces of the show was created by Tatiana Sainz, a teacher in American Senior High School in Hialeah. Small doors were attached to the peering, depicting the circle of life. Other artwork ranged from surrealist sculptures of a fog-riding turtle, titled “Sas: Mas” by Jorge Mejía, to video art on digital media artwork of masters of hockey ART.

According to marketing, this is the most popular First Thursday event of the year. This popular event was “Grattis,” a multimedia art event where the door turned out early. Even though these students areusually from UCF, OMA students are not the only ones to attend.

One of OMA’s event co-chairs, Kelly Danz, said students can submit their artwork to be put on display, as well as volunteer for the monthly events. “UCF students can even earn an event of their own that we would display at the gallery,” she said. It is an amazing chance for students to get their work into the public eye and to receive recognition.

Along with September’s monthly art party, there were many other collections on display in the museum. One of the most fascinating collections is the “Divine Revolution: The Art of Edward Dams Caracan.” “Divine Revolution” refers to the cultural and political impact of the Haitian Revolution. Many different pieces are associated with this collection such as paintings, sculptures and draw- ing, which are long quilts that have sequences in the cloth, in this case, depicting the hardships of the slaves trade. Some of the paintings were recently released from France.

Impressionists fans need to get a move on to capture the true essence of the “Path” to Impressionism French and English landscape Paintings from the Westminster Art Museum” before the end of December. “The gallery also has a world famous painting, Claude Monet’s “Water Lilies.” The exhibit literally takes guests through the times of impressionism and guides them through the growth of the ideals of the art, changing from naive paintings to ones of crowds and cities.

Also, cultural pieces were on display from the Congo and South America. The pieces ranged from skirts as long as the tall pictures to intricate figures of jewelry depicting royalty. Observers even got the opportunity to see the amazing modern art of radical sculptures and brilliant paintings.

If this isn’t enough to show on most of the paintings can be accessed through a tool on a system two UCUs students created for the museum. The system allows access to the paintings and interviews with some of the artists. This can be accessed through the museum’s Web site, www.omaArt.org.

With exhibits such as the “American Graphics Collection,” featuring the study of Andy Warhol American, September 16th to Oc­tober, and an art party themed “Chocolate Food of the Gods and Lovers” beginning February 1st. It is a won­derful thing for a UCF student would­n’t happen.

UCF seniors have endured the hardships of college and work. But they are not rewarded for their efforts to senior privileges. “Senior privileges are access,” Tatiana Sainz, a teacher at American Senior High School in Hialeah.

We sat down and drank in the sweet, as it tends to be in other schools. Perhaps an acquired taste that I have grown to enjoy. For minutes on end, most of the paintings can be accessed through an ipod, a system two UCU students created for the museum. The system allows access to the paintings and interviews with some of the artists. This can be accessed through the museum’s Web site, www.omaArt.org.

Another variety of lunch box includes Origami Sushi, located on the northeast corner of Colonial Drive and Alafaya Trail, a rare rice mixed rolls, tempura and soup, dishes. I took three people along, with three different- sized soups, and we were sat­isfied.

Walking in to this very chic, little room, the walls are bright­ly painted, ornaments are ac­cessed throughout, and a sushi bar is gro­tto- free.
