### Weather

**A LONELY SEASON TO BE A HURRICANE**

Thursday marks the official end to what has been an unexpectedly busy season. While hurricanes predicted for the season have dissipated, the activity, Hurricane Irene was the only storm to threaten the U.S.

### History

**A DEATH NO LONGER IN THE SHADOWS**

A report of a body downtown that was discovered last night has been the cause of death for Egypt's world's oldest woman, 106-year-old Mary Edwards, 106. Though the cause of death was initially reported as an apparent heart attack, toxicology reports will be available by 10:00 a.m.

### Lake Claire death shock for mother

No cause of death found in preliminary autopsy results

ROBYN SIDERSKY & JESSICA SUMMERS

The sudden death of 39-year-old supernumerary Christina Edwards, who was found unresponsive in her Lake Claire apartment on Nov. 22, raises a shock and mystery to those who knew her.

"She was the best friend," her mother, Mary Edwards, said of her only child. "She always called me before to say how much she loved me."

Real life is not as such a Christmas Edwards’ health, according to police, and Mary Edwards said preliminary autopsy results didn’t find anything. She added that her daughter had been "totally healthy."

"She had just had a complete physical in September," Mary Edwards said. "Blood, everything was fine,"

Toxicology reports will not be available for 10:00 a.m.

"It was a very strange, unfortunate event — out of nowhere," and just music performance major Brian Armstrong warned students that they must treat the site has some credibility, but many students still use it. Maguire said: "I did not agree with my professor because I believe the research site has some credibility since many articles have references to the bottom."

"Students use Wikipedia to access sources and get without much work because in computers," said Solomon. Wikipedia has come under close scrutiny because of the "unreliable" accuracy and thoroughness of the information it provides.

As stated in the article "Can Wikipedia Ever Make the Grade?" by Berkshire Read of The

### Pre-med interns get peek at work of doctors

**LAURIN PAULUSKA**

They’re not even in medical school yet, but a group of UCF pre-med students already know the struggles and rewards of challenging medicine and the human aspect of it.

As students of the Clinical Shadowing internship program, these aspiring doctors not only learn the scientific processes of medicine but the human aspect as well.

"We literally are doing the same rounds as medical students," said Courtney Wagner, a 20-year-old junior and biology major. "I feel like I’m going into medical school with a better feel for the positive aspects of it and the negative aspects of it."

Arriving at dawn to follow doctors around is not every college student’s idea of a good time, but if you’re one of those intern, the experience means

### Wikipedia divides students, teachers

**Popular research site doesn’t make the grades, professors say**

Though Wikipedia is one of the most popular online encyclopedias among college students, many UCF professors don’t trust the Web site as a student research tool — and some grade accordingly.

"I have to caution to Wikipedia and will take points off student assignments if they reference or cite it," said Clark Dolan, an assistant professor of political science.

Dolan believes Wikipedia is a perfect example of the problems with modern education in the USA. "It provides highly questionable and dubious information, mostly inserted by individuals and not scholars, that appears legitimate, but clearly is not."

Wikipedia defines itself as "the free encyclopedia that anyone can edit." A "wiki" is a term for a Web site that provides information and allows users to edit on. On Wikipedia, users can browse over a million articles on topics from the habitats of the animal to the "free encyclopedia that anyone can edit," said Clark Dolan, an assistant professor of political science.

The event is open to all students who are interested in attending. The event will be held in Room 116 from 8 to 10 a.m. Call 823-1051 for more information.

The Recreation and Wellness Services have scheduled 60-minute sessions to introduce interested students to the facilities and the necessities of a workout program. For more information, contact the UCF Bookstore at 823-8203.

Portfolios workshop
There will be a workshop on putting together a portfolio from 4 to 6 p.m. in Room 173, Building 79.

Portfolio workshop
There will be a resume workshop from 9 to 10 a.m. in Room 116, Building 79.

Guitar concert
The Campus Activities Board, through a committee, will host a movie showing from 6 to 10 p.m. on the Pegasus Ballroom, acres DE, in Room 151A, Building 79.

The movie shown will be Little Miss Sunshine, a comedy with songs and opened to all students who are interested in attending. For more information, contact Tami Scharfen at 823-8205.

The campus concert guitar program will hold a concert today from 7 to 9 p.m. in the University Union, Hall Room 3.

There will be open auditions for all students who are interested in participating. For more information, contact Kevin Larson at 823-8205.

John Schultz, an assistant professor of forensic anthropology at UCF, holds a clipboard as he walks with the UCF信用卡 office on campus. Schultz studies a body of bones that are digested by forensic anthropologists to determine the time, place and cause of death.

If human bones are discovered, it is sometimes called in to analyze the remains. This can include doing an inventory of the bones to see if any are missing; creating a biological profile which determines sex, age at death, status, diseases, minerals and identifying any distinguishing characteristics of the skeleton.

The event is open for all students who are interested in attending. The event will be held in Room 116 from 8 to 10 a.m. Call 823-1051 for more information.

To sign up for the workshop, contact the UCF Bookstore at 823-8203.

UCF professor uses forenics to unearth clues, teach classes

Matt Morrisson

In the countryside of Westfield, Ind., sat Hollow Pears, the home of Sure-Lock founder Herb Baunister and his family, and as far as anyone knew, for Hollow Pears had no other residents.

But beneath the soil lay the bones of seven men whom Baunister stumbled upon and buried in his backyard. As a master’s level graduate student at the University of Indianapolis, Dr. John Schultz joined the search for Baunister’s victims.

It was exciting as a student because for the first time we’re first doing a search of the entire area and finding bones,” Schultz said. “It was giving many of us our first opportunity to locate and bones.

Now an assistant professor at UCF, Schultz spends his time in both the classrooms and in the field. As a consulting anthropologist for the district, medical examiner of Orange and Osceola counties, Schultz is able to bring his experience into the classroom, proving that those who can sometimes do the best.

The very lucky that I can draw from my own life experiences in the classroom, not just teaching out of a text book,” Schultz said.

Working with the police department, Schultz believes that forensic anthropologists have two jobs. First, they help the medical examiner to identify skeletal remains in identifying skeletal remains. A forensic anthropologist like Schultz will also help the medical examiner and law enforcement search for the body and identify it.

If investigators are tipped off to a possible burial site, or if a human bone is discovered, Schultz may be called to assist.

"It’s very fulfilling,” Schultz said. "We’re able to walk schools for a particular discipline and then come out of school and be a practitioner in that discipline.

But forensic anthropology is not just digging in the dirt. "When a body or skeleton is found, we look at it the same way a medical examiner would need it to be dealt with, pretty quickly,“ Schultz said.

Sometimes, with on only one or two bones, forensic scientists have to adapt their methods to fit the particular needs of the situation. Then they find themselves in identifying the bone or finding the bone in question.

"Sometimes, a body could be buried under the foundation of a house,” Schultz said, "so you would essentially have to remove part of the foundation and do an excavation to collect the body, the skeletal remains.”

Natural elements such as weather and time also force forensic anthropologists to work under conditions most archaeologists would not deal with.

If human bones are discovered, it is sometimes called in to analyze the remains. This can include doing an inventory of the bones to see if any are missing; creating a biological profile which determines sex, age at death, status, diseases, minerals and identifying any distinguishing characteristics of the skeleton.

This can include doing an inventory of the bones to see if any are missing; creating a biological profile which determines sex, age at death, status, diseases, minerals and identifying any distinguishing characteristics of the skeleton.

"When the body was last seen, would it be a normal growth rate," Schultz said. "Can it be done to bodies of 70 years old?"

If the bones are discovered, it is sometimes called in to analyze the remains. This can include doing an inventory of the bones to see if any are missing; creating a biological profile which determines sex, age at death, status, diseases, minerals and identifying any distinguishing characteristics of the skeleton.

"We're always trying to find forensic scientists often need to create a timeline of the events," Schultz said. "We're always trying to find forensic scientists often need to create a timeline of the events."

It is a very open-ended process to put all the pieces together and understand what happened," Schultz said.

The event is open for all students who are interested in attending. The event will be held in Room 116 from 8 to 10 a.m. Call 823-1051 for more information.

Brother of Philadelphia mayor indicted on tax, fraud charges

PHILADELPHIA — A brother of Philadelphia Mayor John F. Street was convicted on Tuesday in tax and fraud cases involving more than $200,000 worth of city contracts.

Starting in 2000, a Mill Street began hiring himself and a handful of other companies to perform city contracts, according to the indictment. Between 2000 and 2004, he received more than $200,000 in contracts and other income that was not reported to the city, the indictment said.

The indictment stemmed from an investigation into street's finances in Philadelphia.

Page candlestone violence over chic southern country

ANKARA, Turkey — Inexplicable acts of violence in the name of Allah that Turks and Islamic cleric complained to the government of ruling "Gulenists" in the world.

The movement has been made in Turkey, a country — a trip of violence and uncertainty but few comedies — because it is a cosmopolitan space and healer as extended friendship between Turkey and Muslims, hoping to end the current conflict, a conflict of March to Islamist movements remarks linking Islam to violence.

He expressed support for the EU's efforts to join the European Union, moving away from opposition that he was with a candidate in the 2000 election.

It's that time of year when the cooler weather brings in the chance of seasonal allergies. These allergies often cause a runny nose, sneezing, itchy eyes, and頭ache. The symptoms can be quite uncomfortable, and it's important to take steps to manage them.

### Prevention Measures
- **Avoid Allergens:** Identify what triggers your allergies and try to avoid them as much as possible.
- **Medications:** Use over-the-counter medications such as antihistamines and decongestants. Prescription medications may also be necessary.
- **Environmental Controls:** Close windows, use air conditioners, and filter air to reduce allergens indoors.
- **Personal Hygiene:** Wash your hands frequently and use alcohol-based hand sanitizers.
- **Household Measures:** Use a vacuum cleaner with a HEPA filter, and avoid using feather dusters.

### Symptoms and Treatment
- **Common Symptoms:** Runny nose, itchy nose, itchy eyes, itchy throat, sneezing, and headache.
- **Treatment Options:** Over-the-counter medications, prescription medications, and in some cases, allergy shots.

### Additional Tips
- **Sun Protection:** Use sunscreen and wear protective clothing to reduce exposure to pollen.
- **Nasal Irrigation:** Using a neti pot or saline nasal spray can help clear your nose.
- **Air Purifiers:** Consider using an air purifier in your home to reduce allergens.

Remember, managing seasonal allergies is a process. It may take time to find the right combination of measures that work best for you. If your symptoms persist or worsen, it's important to consult a healthcare professional for guidance.

Forensics professor uses real case pictures in class

From Al

led him to use a machine that
produced a laser magnetic wave
and scanned a picture of a skull.

"I enjoy teaching and I also enjoy
being a practitioner when I can
get out of the classroom and work
with other professionals."

Adam Rutherford, who also
attended graduate school at the
University of Idaho,
said he "had no idea what I
would seem very familiar to
me when I first started the class." He
said the university did not provide
many opportunities for research.

"I was interested in forensic
anthropology, so I tried to
make some of my research
interests on the history of a crime.

The false statement remained
to date for over four months and
reached other popular
research Websites, such as
Wikipedia and Google Answers. After
discussing the article, Segal
explained that his reputation was
tarnished and that he was "too
ignorant for my own good.

"I try to use multiple modes of
communication depending on the
class," Schultz said. With classes like
Forensic Anthropology, which relies
heavily on concepts and research,
lecture is pretty much impossible.

"What I try to do, when pos-
ing a student, is to give them
a different perspective on
the world, because cultures are
so different around the world.

"Skele-to-Logist" was the title given to
a newsletter that Schulz's students
published for the first time in
1997. The newsletter included
articles on topics such as
forensic anthropology, crime
scene investigation, and
human identification.

Shadowing is 'major step' toward medical school

For Al learning "to be there for someone and know how to fix them," according to Sareh Shoraka, a molecular and microbiology junior and the director of Media Relations for the UCF Pre-Med American Medical Student Association.

Shoraka is one of 16 students currently participating in the internship program, which is already taking applications for next semester. The deadline is Dec. 1.

In addition to gaining valuable experience, the internship is also a major step toward graduation, according to Ulla Isaac, a faculty coordinator of the course.

The undergraduate students' hours aren't as grueling. They intern once a week from 7 a.m. to 1 p.m. During these six hours, they not only shadow different doctors but also get hands-on experience in various types of medicine, such as pediatrics, internal medicine and obstetrics.

Shoraka, who aspires to work in pediatrics, had a heartwarming experience while watching a doctor treat a patient with a heart murmur. The doctor put the stethoscope to the patient's heart, then his own. "He let me listen to her heart, then listen to his heart" to show the difference between the two heartbeats, Shoraka said.

During the internship, students are required to keep reflective journals about their feelings and learning experiences at the hospital. The journals enable coordinators to "see how the students are growing," Isaac said. "I felt 10 feet tall following the team of doctors from patient to patient," wrote one student. Another wrote: "The main thing I learned through this internship is not to judge ... I had stereotypes: 'The doctors treat everyone [patients] the same,'" Isaac said. "The students are learning on so many different levels." The Clinical Shadowing Internship, facilitated by the Experiential Learning Center and the Burnett Honors College, requires its pre-med students to have at least a 3.3 GPA and to be a serious candidate for entry into medical school. About a third of the students in the internship are in the honors college, but they all have advisors from these two offices.

Isaac is one of five such advisors who assist students of every major to get co-op work or internships in their field of study. She was also one of the people to pilot the Clinical Shadowing Internship program last spring.

"I pushed really hard," she said. The Florida Hospital is a teaching hospital. It opened in 1908, and since then, "the Florida Hospital system is the busiest system in the country," according to its Web site.

Once the new medical school at UCF opens in 2009, "We hope we are going to have more doctors in the area," Isaac said. "It will help put UCF on the map in the medical and science world," Wagner said.

**Basketball turnout sorry; it's your fault**

Chip Cartwright stood at the top of the point, facing down a helpless Jacksonville Dolphins. Former Florida Gator Taylor walked in the corner, two fingers from mauling his nails to the bone. You know how this story ends, though.

No, you don't. You haven't been to any men's basketball games this season, so maybe I should tell you what happened.

Taylor, the dynamic sophomore, didn't even bother to take a running head start as he ranged over the two UF defenders and finished a tremendous fast break from Cartwright with a thunderous dunk. The alley-oop sent the crowd of 1,951 into thunderous dunks. The alley-oop sent the crowd of 1,951 into thunderous dunks. The alley-oop sent the crowd of 1,951 into thunderous dunks.

Two fired in coaching staff shakeup

BRIAN MURPHY

UCF Football head coach George O'Leary announced two major coaching changes on Monday.

He demoted defensive coordinator Lance Thompson and fired defensive backs coach Miles Aldridge and defensive line coach Peter McCarty.

"I thought we needed to make some changes to move the program in the direction it needs to move. It is always a tough time when you have to do that, but football is a business."

---

**Trip to Bahamas fruitless for UCF**

KATHY CURTIS

At least they got to go to the Bahamas. But again lost big, but again lost big, but again lost big.

UCF's defense never found a rhythm. After the Knights finished 10th in Conference USA in pass defense and at one point in the season, they were ranked third-worst in the nation. The defense was able to create a lot of pressure on the quarterback and it saw the turnover intake drop from 31 to 12 over the course of one season.

But, the defense did show some improvement late in the year. After allowing 253 combined points to Pittsburgh, Rice and Houston, the Knights gave up just 77 points in their last four games.

---

**Basketball turnover sorry; it's your fault**

Chip Cartwright stood at the top of the point, facing down a helpless Jacksonville Dolphins. Former Florida Gator Taylor walked in the corner, two fingers from mauling his nails to the bone. You know how this story ends, though.

No, you don't. You haven't been to any men's basketball games this season, so maybe I should tell you what happened.

Taylor, the dynamic sophomore, didn't even bother to take a running head start as he ranged over the two UF defenders and finished a tremendous fast break from Cartwright with a thunderous dunk. The alley-oop sent the crowd of 1,951 into thunderous dunks. The alley-oop sent the crowd of 1,951 into thunderous dunks. The alley-oop sent the crowd of 1,951 into thunderous dunks.

Two fired in coaching staff shakeup

BRIAN MURPHY

UCF Football head coach George O'Leary announced two major coaching changes on Monday.

He demoted defensive coordinator Lance Thompson and fired defensive backs coach Miles Aldridge and defensive line coach Peter McCarty.

"I thought we needed to make some changes to move the program in the direction it needs to move," O'Leary said. "It is always a tough time when you have to do that, but football is a business."

---

**Trip to Bahamas fruitless for UCF**

KATHY CURTIS

At least they got to go to the Bahamas. But again lost big, but again lost big, but again lost big.

SALT LAKE CITY — This road trip always brings plenty of pa­perwork for Orlando, not to men­tion a daunting task of making the plane at the end of the road. The Magic had been in 20 cities and played 22 games. They had 21 points and 10 rebounds to help Orlando beat Utah 102-85. The Magic were 3-0 in the second night in a matchup of the two teams this season, the first in Salt Lake City since the 1999-00 season, when they won 94-89.

The Magic recorded their sixth straight double-double and 10th straight victory. They have 9,861 points in those 11 games and Orlando was the opener of its seven-game road trip.

We couldn’t do anything with Howard,” Utah Coach Jerry Sloan said. “He’s too big and long, we couldn’t keep him off the boards. We just got huge rebounds, and he obviously made his free throws.”

Howard shot 13 of 15 from the foul line and was 5-of-6 shooting from the field. He scored 36, and outscored the Jazz in the paint 36-17.

Perhaps the “drinking school with a football program” thing is true, but that makes me wonder this ques­tion: with Orlando sending its 10 players to the NBA, are just as many Alumni who aren’t part of the program now? We just need to figure out how to get more students who are really interested in this school to attend it.

Defensive coordinator Mike MacIntyre was fired Monday night by Colorado, ending the coach’s 11-season tenure.

“Anybody that’s a basketball fan is missing on a team that’s fun to watch and is giving a great effort.”

‘’Anybody that’s a basketball fan is missing on a team that’s fun to watch and is giving a great effort.”

The dynamic play of forward Matt Bonner has been a mainstay as the Knights are 5-of-6 shooting from the field. He has 36, and outscored the Jazz in the paint 36-17.

It was the second year in a row for Sloan to score 36.

The Magic are sitting as the best records in each conference. But these players weren’t too surprised to see the Magic in the postseason again.

The Magic made a big change against Western Conference teams on road trips this season. They are 11-2 against the Western Conference teams on road trips, the best of any NBA team. They are 6-15 against the Eastern Conference teams.

The Magic are 10-1 in the past four years yet the game starts in Houston. Their last game was in the past four years was a 93-86 win over the Utah Jazz on Dec. 30, 2011.

The Magic have a 6-3 record in the past four years, but they have lost two in a row.

Swinging couples break no laws

The "No may be long gone, but the swinging lifestyle seems to be making a comeback—at least in one area of the country. The Never Finding Bliss Club, a swinger's club in Long Beach, will be allowed to continue operating and will be able to receive its newly legal doors. People do nothing illegal behind closed doors. And we think that's just peachy.

It's a thoroughly lifestyle club, its Web site claims, and people will be allowed to continue specifying what goes on inside. You don't do anything illegal behind closed doors, and that's just peachy.

**A Special Invitation to a Disney Performance and Audition Event**

Wednesday, December 6 • 4 PM

Disney's Animal Kingdom® Rehearsal Facility
5271 Sherbeth Road, Kissimmee

- See how Disney performers bring magic to life at the Festival of the Lion King show!
- Audition for a role of a lifetime as a Cast Member performer at the Walt Disney World® Resort!
- Opportunities available for Look-look-likes performers, Disney Character Performers, and Costumed and Parade Dance Performers.
- Performers who start by December 31st will receive a $1000 New Hire Bonus*.

Please wear comfortable attire for a movement exercise.

For more information, visit DisneyAuditions.com or call 407-828-1000.
Dear Students,

As the semester draws to a close, I am extremely pleased and proud of the participation and enthusiasm of our student body in the activities Student Government has sponsored and created. With such a great turn out at our various events like the Hob Nob, Ethel Barak, the Open House, U.S. Senate Debate and SGA Game Day Series, I am excited for another semester of successful and interesting programs. Beginning in December we will have some useful new services on our website as well. Teacher evaluations and the students classified section, Gold Pages, will be in service and available to all students. We will also be introducing the new Knight Rider Taxi vouchers which will allow students to take a free cab to and from some of their favorite Orlando venues including House of Blues, Hard Rock Live, Improv Comedy Club, and more.

As student body president I have had the pleasure of sitting on the Board of Trustees and have had the opportunity to voice student concerns. Throughout the semester I have been involved with such professionalism not only our University President but also our student government officials specifically with student leaders. The Governmental Affairs Committee will devise an outline of the Student Advocacy Committee meetings that makes the decision.

I am excited about what the SGA administration will achieve in the next six months. The hours and hours of work have been challenging, but very rewarding. Keep your eyes open for more exciting opportunities from Student Government. If you want to help put these events into action, stop by the Student Government Office for more information on what scholarships are available.

Sincerely,
Mark White
Student Body President

Where do you want a new job? you never really know what to expect. Will it be interesting? Will you enjoy the people you work with? Although I had been involved in Student Government prior to my current position as Vice President, I was a little unsure of what to expect as I began my new position. I had ideas and events I wanted to implement and I had goals I wanted to achieve. My position as Vice President, along with this administration, has exceeded all of my expectations, and is a job I look forward to doing forever.

This year we have seen an increase in the amount of student interest in SGA. From a voter turnout increase this year by 24.5%, to over 4,000 students signing up during spring semester to be included in the diversity of our student body. The political Hob Nob, spearheaded by Ashley Borowski our Lobbying Coordinator for SGA, was an opportunity to meet and speak with a very accomplished man in the political field. Ehud Barak, former Israeli Prime Minister Ehud Barak. Barak elucidated to the audience the importance of the political series and the diverse, enriched student population.

The UCSF vs. USC Black Party was a great success. Brandon Delonas, the SGA Athletics and Traditions Coordinator, did an outstanding job in the implementation of this event and in its first week, the black party brought over 4,000 students together in a shows of support and unity. The diversity of the student body alone is overwhelming and the diversity of the student body itself.

The Student Advocacy Committee Meetings will be held monthly in the Student Union and the student leaders are encouraged to contact Tina Kimball at sga_sac@mail.ucf.edu for more information about how they can get involved and implement changes that will benefit every student on campus.

Student Advocacy Committee Meetings will be held monthly in the Student Union and the student leaders are encouraged to contact Tina Kimball at sga_sac@mail.ucf.edu for more information about how they can get involved and implement changes that will benefit every student on campus.

Global Perspectives and the SGA Speaker Series

In order to be effective, your Student Government must be in contact with students and aware of issues that concern the student body. While SGA plays an integral part in campus life, it remains difficult to stay in contact with such a diverse, enriched student population, specifically with student leaders. The Governmental Affairs Unit of SGA, implementing a new committee.

The Student Advocacy Committee: It is open to all student leaders who wish to join and play an active role in the development and implementation of policy and reform.

Each meeting of the Student Advocacy Committee will consist of an intensive and thorough discussion of current issues that have been brought to the attention of the student body through their leadership involvement in various university entities. Each month, the committee will devise action plans that address the concerns of students. Action plans will identify a specific issue, provide a concrete solution to the issue, and each plan will have a specific timeline for change with a step-by-step approach to addressing the concern.

Student Advocacy Committee Meetings will be held monthly in the Student Union and the student leaders are encouraged to contact Tina Kimball at sga_sac@mail.ucf.edu for more information about how they can get involved and implement changes that will benefit every student on campus.

Student Government Association, in conjunction with the Global Perspectives department of UCF, has arranged to bring to campus a wide variety of speakers to discuss the international issues of our times. The speaker series began in September with a lecture on the situation in Iran. Sasan Vakil came to the Fairchilds Alumni center and spoke of the intricate and complex situation of the countries around the world, including the Israeli-Palestinian conflict and the impact of nuclear power, and their opposition President Mahamad Almonashid. Following Vakil in September was the Supreme Allied Commander of NATO Europe Forces, General James Jones. General Jones spoke to a packed lecture hall on the role of NATO in Europe and beyond. He detailed his experiences all over the world, including Afghanistan and Northern Africa.

Next year Student Government’s biggest event of the year featuring former Israeli Prime Minister Ehud Barak. Barak stood as a symbol of inspiration, courage and leadership and his visit brought together students from all over the world, including from his neighbors, America and Europe’s role in the region, and praised the continuation of the peace process.

Global Perspectives brings these types of events to campus in order to give the students body a more comprehensive understanding of the world. It brings in speakers from all over the world, including from his neighbors, America and Europe’s role in the region, and praised the continuation of the peace process.

The political Hob Nob event that took place on campus Oct. 26 gave UCF students the opportunity to meet and speak with many candidates before the Nov. 7, 2006 election. Over 20 political leaders attended the Hob Nob, sponsored by the Student Government Association (SGA). Candidates answered questions about their campaign strategies and political goals and each gave a short introduction. Since July, the Governmental Affairs Unit of SGA has been working on the Hob Nob and contacting politicians personally to persuade them to come to the event. The event generated a great deal of media attention and received coverage from Local 1, Channel 11, Telemundo and the Orlando Sentinel. The Hob Nob is part of the political series Global to the Polls, currently in progress in SGA.

The Gallup to the Polls series offers students a chance to learn about politics not only in the United States, but around the world as well. Former Israeli Prime Minister Ehud Barak visited UCF on Oct. 26, 2006 and the Senatorial Debate was held at UCF on Nov. 1, 2006. The series is part of SGA’s mission to help foster student civic engagement.
