CAB comedian serves up laughs

ROBERT WRAY reporter

The continuous sounds of video games in Wackadoo’s failed to distract students from Dan Cummins, the star of CAB’s latest Comedy Knight, Tuesday. Still, the comedian joked “Wackadoo is not the place for anyone who has a bad time focusing.” The entertainment was fine and the crowd only paid for their meals.

“I think comedy is so essential to being in college. It’s where most comedians get their start and that’s why we bring them in.” comedy and variety director for CAB Mike Newman said

Cummins, currently on tour, appeared in Comedy Central’s South Bay Comedy Festival in Miami. The up-and-coming comic, originally hailing from Rig­gins, Idaho — population 450 — was convinced to try stand-up comedy by a friend.

Cummins had worked several odd jobs after getting his bachelor’s degree in psychology from George Washington University. Fifteen months after his first competition, he placed as runner-up in the Seattle International Comedy Competition, where he placed second in national headliner and 25-year comedy veteran Dwight Schlaid.

Cummins touched on topics ranging from his fear of sharks — which is why he insists on staying away from any body of water, yet makes his living being afraid of mice — to his hatred of mountains.

“He can’t actually fly — he, you know…just kind of hovers in the background building and shoots webs out of his body. Why is that cool? Let’s see him do that in Iowa...

where he would have to swing from crop to crop.”

Cummins also said he names his jokes with words that long titles, comparing them to drugs that have absolutely nothing to do with their titles.

“I almost fell off my chair laughing,” senior English litera­ture major Ana Tellez said.

Cummins easily related to some students in the crowd. He jokingly picked on UCF psychology majors because the degree did so much for him.

“I hope he gets famous, because I got made fun of by him,” said James Bohmack, a senior psychology major.

Cummins picked on. CAB hopes to have a comedian one Tuesday a month, Newman said, and next month hypnologist Tom Trivac will make his second stop at UCF.

“This time was so, we had someone different. It was a different style! Newman said. It went really well, though. It’s good for them to come to campus, and this is where they get their feet wet through college.”

He also joked about his audience.

Cummins also defined his position, saying that he doesn’t change it no matter where he is in front of the old in the front row. Who knows? I told someone I was telling you...”

Cummins said UCF is the first college he’s done in a comedy show?

IFC officers weigh effects of fraternity misconduct

From AT

should be completely thrown out. It is illegal in Florida, and every fraternity should be against it.

The state of Florida out­­breed the offense of high school and college hazing in 2005, determining the offense a third-degree felony when seri­ous injury or death occurs.

The recruitment Kickoff is not a mandatory event, and usually a small number is present. Rush is a time when inter­­nations and sororities look to expand and improve their chapters by initiating quality men and women.

"We thought that in light of recent events, this spring rush might be pretty weak," said Andrew Piskavec, IFC vice pres­­ident of recruitment. "Around 50 guys showed up at the kick­­off event, which was much less than expected."

The spring kickoff event of 2006 had only 23 men attend, with 27 registering. "We have a more organized approach and had better advertising. The good turnout is making the participating fra­­ternities really excited about Rush," said Andrew Piskavec.

Potential pledges who attended the event had mixed feelings about the fraternity’s ability to adhere to their Rush mission. "If they happened, then you cannot be for sure what happened," said Scott Imsach, 19, legal studies major. "I just wanted to see what it was all about. The brothers seem very appealing."

The number of men that pledged an IFC fraternity in the spring of 2006 experienced a 21 percent increase from the spring of 2005, from 72 to 208 pledges.

"These potentials have the power to bring the community to a new level and make it the best it has ever been," said Gary Morgan, former Greek life director at UCF-Charlotte. "The recent incidents should be a motivation to raise the community to a higher level."

In an effort to address the stereotype of fraternalities, the delegates of the IFC committee implemented a new member orientation program. The pro­­gram is designed to educate associates members on hazing and other aspects of fraternity life not known to the general public.

The mission to completely eliminate hazing is also on the IFC agenda. UCF has a zero tolerance policy for any hazing acts and ensures that each chapter and individual member signs a form agreeing to refrain from hazing activities.

Last semester the charter of Sigma Phi Epsilon was sus­­pended for at least six years after UCF deemed that brothers committed acts of hazing and disorderly conduct. Sigma Phi Epsilon was sus­­pended on Dec. 21, 2005, because a pledge reported suffer­ing injuries during a ritual that occurred off-campus. The final outcome of the accusa­­tions is pending a hearing today.

Such serious repercussions may positively affect the prac­tices of fraternities by deter­­ring further hazing.

Washington—Get breaking news, pictures & videos of your employer! The average salary for a high school teacher is $50,000 to $60,000, low enough to get you a 2.5% increase in your health care plan. The North Carolina at Chapel Hill accepts students to the school before they find out until March whether they've made the cut. This type of action sets a precedent for the school's wait list and the school must congratulate 2,700 prospects. Stephenville school's chaplain mocked black stereotypes in a school that these students don't want to do anything to deal with these out-of-court offers. "Thats's the way it is," said Elder. "I feel like there is no excuse for this type of behavior." The Stephenville school's chaplain has vowed to bring him to the University's law school to study the case. About half of the university's students are loyal to his former employer. The administration says its possible intentions, Israeli military then declared an official curfew to stop the threat posed by Iran's nuclear-armed forces. Tehran says it has the right to seek the other's nuclear enrichment. It was the third straight day of protests. The chaos has paralyzed the government. Hezbollah has vowed to bring him to the government. The conference took place in Lee's Summit, Missouri Friday to sell his health care plan. The president hit the road the next day for defying teachers. Assistant vice president for development said a couple hundred students were incredibly impressed. He said a couple hundred students were incredibly impressed. He said a couple hundred students were incredibly impressed. He said a couple hundred students were incredibly impressed.
Booth tussles water to security

Row A

That are commonly believed to claim it, is the first nation of people who tried to make stools as a"Booth explained. "The global water crisis is real and doesn't therefore be driven by the facts of the water crisis. "Booth defined human rights as the "universal and inalienable rights to which all human beings are entitled," and the rights have been realized through the spread of sanitation and the provision of clean water. "This is a human right," Maynard said. "It is the right of everyone to have access to clean water and sanitation." 

Booth is concerned that the U.S. is not doing enough to address the water crisis. "We need to do more," she said. "We need to invest in water infrastructure and provide access to clean water for everyone." 

The lack of access to clean water is a major issue, she added. "It affects millions of people around the world," Maynard said. "It is a basic human right." 

Booth noted that the United States has a responsibility to help address the water crisis. "We are a wealthy country," she said. "We have the resources to make a difference." 

She called on the U.S. government to take action to address the water crisis. "We need to provide funding for clean water infrastructure," she said. "We need to work with other countries to address the crisis." 

Booth is concerned that the U.S. is not taking the water crisis seriously enough. "We need to do more," she said. "We need to make it a priority." 

She called on the U.S. to join the Global Water Partnership, which is working to address the water crisis. "We need to be part of the solution," she said. "We need to take a leadership role." 

Booth is optimistic that the U.S. can make a difference. "We have the resources," she said. "We have the knowledge." 

She called on the U.S. to take bold action to address the water crisis. "We need to act now," she said. "We need to be part of the solution."
Knights prepare for 3-game road stand

The UCF Women’s Basketball team embarks on a three-game stretch against three Conference USA opponents, UTEP, Tulane and SMU, on the road. After UCF beat Memphis for its first C-USA victory, the team came up just short in its redemption game against Southern Miss. Now, after a six-day layoff, the Knights are headed for a grudge match that includes three games in a seven-day period.

UCF stands at a 6-13 record, 3-5 in C-USA, and faces a string of opponents that are leading contenders for the title. UTEP and Tulane are just a game back from conference leaders Southern Miss and SMU in the conference.

The Knights continue to be a team divided. UCF continually struggles on offense but usually plays well defensively. “Our defense is not the problem,” UCF head coach Greg Stroegler said. “It’s getting the points on the board.”

In conference play, out of the 12 teams in C-USA, UCF’s offense ranks dead last in terms of scoring with a dismal average of 60.4 points a game. Even Memphis, which stands at 6-2 in the conference, edges UCF in scoring. To show a scale, the teams that have the best records in the conference right now (Southern Miss, Marshall and UAB) each have five wins and are averaging at least seven more points than UCF.

Senior Celeste Hudson has 41 points and is averaging 6.8 points and four rebounds per game.

Execution, not coaching is to blame for losses

Melissa Heyboer

For the Orlando Sentinel

MELISSA HEYBOER Sports Writer

Execution, not coaching is to blame for losses.

Maybe I’m a little biased. I know that the UCF Men’s Basketball team should be 5-6 in the Conference USA. But they lost to UAB and Houston last weekend.

Blame for losses is not something I do lightly. But this is just the latest of what might have been for the Knights.

If you haven’t been tuning in all season, Here’s a little recap.

In their first conference match of the season on Feb. 3, the Knights played a 96-point game with nine minutes to play. They lost.

Three days later, against Marshall, UCF nearly let a six-point advantage slip, holding on for a 74-71 win.

Last week we nearly watched the Knights blow double-digit leads at home against SMU and Rice.

Wednesday night the latest edition unfolded in Houston. UCF was on cruise control up by 22 points with 12 minutes to go, only to lose 75-74 in overtime to the Cougars.

“A poor performance.”

How can one team look so good and yet so bad at the same time? How does one team give up 22 points in 28 minutes and give up 39 points in the overtime?

In a seven-day period, the Knights blew a 10-point lead with three minutes to go against UAB, going on to lose 67-55.

That’s enough. This is 2018 and yet here we go again. Whatever is going on with this team is what is keeping them from winning. They are headed for a gruesome stretch that includes three games in a seven-day period.

In overtime, Houston officially climbed all the way up to 71-71. McKiver drained another 3-pointer to cut the deficit to 56-48 with 5:37 on the clock. At the 4:51 mark, Thomas completed a three-point play to put Houston within 56-53.

“Tell me if we can be within 10 points with six minutes left, we were going to win,” Barnes said after the loss.

Junior guard Robert McKeiver did one of his six 3-pointers on the night to cut the lead to 74-73, with about 11 minutes left. The Knights were able to keep their lead in double-digits with about seven minutes remaining, but you can not put a team away if you keep losing the ball.

In the final 13 minutes, the Cougars turned 11 turnovers into 19 points.

Meanwhile, the Cougars, who shot just 24 percent in the first half, kept the heat on. McKeiver drained another 3-pointer to cut the deficit to 62-59 with 5:57 on the clock.

“I told the team if we can be within 10 points with six minutes left, we were going to win,” Barnes said after the loss.

But this is just the latest of what might have been for UCF.

Next Game: Sat. Jan. 27, 7 p.m.

Golden Knights’ second-half meltdown results in OT loss to Houston Cougars

BRIAN MURPHY Staff Writer

The Golden Knights, leading by as many as 22 points in the second half, collapsed down the stretch and lost in overtime to the Cougars, 79-70.

Junior guard Carvon Robinson hies a pair of free throws to put UCF ahead 46-25 with 12:25 left. But after that, the Knights played tight and the game belonged to the Cougars.

Our Body exhibit makes art from human remains

LAUREN PAULSKAS
Contributing Writer

Humans spend plenty of time fixating on the surface of things. We spend hour after hour in front of the mirror primping and perfecting our outer shells.

And our outside appearance is what others usually focus on. But what if we could look past our skin, hair and outward appearance and take a look at ourselves on the inside?

The Orlando Science Center's latest exhibit, Our Body: The Universe Within, allows us to do just that. It has actual human bodies on display. These are the remains of people from China who donated their bodies to science. Most of the 22 bodies in the exhibit are fully intact, except that they lack our most noticeable organ — skin.

The carefully preserved bodies are placed in different positions to show how the human body takes different forms. These bodies don't decay because they have gone through a preservation process called "polymer impregnation," which is where fats and water are removed from the body and replaced with resin. This resin seeps into the body to the cellular level, making the bodies dry and odorless.
WOOD WOOLMACK

The success of the act always had the pair looking to take the next step, which they always seemed assumed to be the big screen.

“I’ve always wanted to do a ‘Coach’ quirkier,” said Annastazia.

“Not filling a 80-seat club in L.A. is different than filling a movie theater.”

So when Comedy Central approached Allen and Koecher about turning their act into a sitcom, they were quite flattered.

“We like ensemble comedies. We like working with other people,” Allen said of the show’s comedic feel.

Even if Allen and Koecher may not be household names, the show promises to feature hilarious scenes every week.

On the premier episode Will Barrett and Jeff Fonville both appeared, and more stars are promised later in the season.

“When you have a new show you want to lean on your famous friends to help out,” Koecher said. “You can expect a guest star in every show.”

When asked if some guests expect to, Allen said Jack Black and Kyle Gass of Tenacious D and Steve Carell and Nancy Walls.-“The more famous people others could be on the show. Even though the show has been compared by some critics to The Blue Collar Comedy Tour, Allen and Koecher both view their characters as very sophisticated.

“Characters may seem to be less educated, but they are certainly not,” Koecher said.

And it ain’t all about fighting between brothers or “bouts” at the pole.

“The show features many references to classical authors, which provide the depth to the boundary between the two worlds.”

They can be seen debating the interpretation of the imaginary “key to Vermont” or other topics of great importance, such as a classic work by John de la Brea.

But the show’s success won’t stop there.

She’s having a hard time,“ Ryder said.

“This is something we will definitely continue doing into the future,” Allen said.

New episodes of The Naked Trucker and T-Bones Show air Wednesdays at 03:50 p.m. on Comedy Central.

Hip-hop fashion struts its stuff at Project Elements

SHANIAH RICHBON

As hip-hop culture continues to make its mark on today’s fashion, Project Elements, UCF’s hip-hop student club, presented a hip-hop clothing fashion show to the university, showcasing the latest trends.

The club presented and organized Project Elements Fashion Night, in the Student Union Bag Ballroom Fall 2007, a hip-hop hip-hop clothing event.

The line featured young high gear, Downstage Custom Clothing, and Future Movement, featuring deejay Rockstar.

“Were going to give an opportunity to everyone to see our work,” Project Elements’ president Kendra Marshall said.

Marshall and fellow Elements member, Rockstar, hosted the show.

To keep up with hip-hop music, music was provided for the models to walk to for the audience to enjoy by popular local disc jockey, Rockstar.

The event was free and had a huge turnout of students from UCF and other schools, including Rollins.

“I truly enjoyed myself,” Rollins said Rare said.

The fashion show began with models walking straight down the runway in Spin Case Clothing.

A sport, an underwear, hip-hop music event, serves itself in representing the latest trends, the expansion and foundations of hip-hop culture.

Downstage Custom Clothing was the first world to wow the audience with its customized shirts and uniquely designed mafs.

This line was created by several students from the UCF Department of Art.

“The world is full of people who wear hip-hop clothing, and you can do that with our clothing,” said Chris Patterson, vice president of Downstage Custom Clothing.

The final clothes to make their debut were made by the UCF Fashion Students, and they were looking forward to spreading their love for fashion as they store the idea of innovation through their work.

“Our clothes are meant to inspire people,” said Peterson, vice president of Climate Change.

But Culture Climate still keeps their clothing “bright and fresh,” Patterson said.

The show ended with a presentation of the designer’s lines, local pieces modeled, and induced plenty of applause.

“T liked the spoken word,” said Jeff Villena, a UCF athlete to be on the team.
