Women fight workplace stereotypes

Gender-based discrimination focus of discussion

A 200-pound chocolate bar, little too big to be sold at a supermarket, was the latest form of anti-smoking campaign to hit the streets. It was an informational discussion open to students, faculty, administration and staff from 10 a.m. to 2 p.m. Statistics were presented in the meeting that described the unequal distribution of earnings and advancement opportunities among men and women. Video was also shown to illustrate stories that impede women’s progress in the work place.

“It’s a great opportunity for students to see what women face in the workplace,” Bryant Powell, personnel development director of Campus Life said. “It’s important to have more discussions like this in the future to build support system for the success of women.”

Price for ‘the pill’ to stay the same

New Medicaid law cause price spikes

Across the UCF campus, many women experienced a sense of relief when they learned that the contraceptive medication will not be increasing prices on oral contraceptives,” said Sheryl Gamble, manager of the UCF Pharmacy.

Students on college campuses all over the United States have seen prices for birth-control prescriptions drop or triple because of effects unknown by the 2005 Deficit Reduction Act, which focused on Medicaid, that went into effect in January.

Such drastic price increases may bring a phenomenon changes to pharmacies on campuses since nearly 30 percent of undergraduate women are taking oral contraceptives, according to an estimate by the American College Health Association based on surveys.

Oral contraceptives allow for a predictable period, which ensures women that they are not pregnant. Beth DeCarlo, 23, a theater arts minor, said that the pill is an important access to contraception.

“Before birth control, I would go months without getting my period,” DeCarlo said.

Pro-choicers want chief NOW

WHITNEY HARBOR
Staff Writer

On a dimly lit stage at Nations Coffee & Tea Cafe, poets, singers and songwriters ardently advocated for their right to choose. Their words, flowing through plains of hoohah smoke and the enchanting scent of candle scent, captured the packed room of activists and regulars.

The UCF chapter of the National Organization for Women put on the Voice Choice benefit on March 23, raising $723 and collecting 172 signatures for a petition to promote the state legislature to approve an abortion rights/sexuality license plate similar to the yellow “Choose Life” plate already offered.

The state requires a $60,000 application fee and a petition, with 50,000 signatures for the adoption of a new specialty license plate. UCF NOW has gathered a total of 460 signatures.

According to www.choicesforwomen.org, sponsored by Orlando NOW, the money raised for the sale of abortion rights license plates will go to “fund grants for comprehensive sex education and better access to contraception.”

Arielle Schwartz, a 23-year-old philosophy major in her senior years studying psychology and political science, participated in the event as a requirement for her Internship to Women’s Studies.

“It think it’s kind of disturbing that women who are pregnant increased by half a penny per year this year, but also that it’s the same as 1968, when the dollar was worth 460 cents,” Schwartz said.

Arms are ticking over the third week of the semester as the fall semester progresses. The Counseling Center is offering a series of workshops and seminars on topics such as stress management, coping strategies, and healthy relationships. Students are encouraged to attend these sessions to improve their mental well-being and stay engaged in the community.

**Upcoming Events**

**Wednesday, October 4th**

- **3:00 PM** - **4:00 PM**: Workshop on Managing Stress and Anxiety. Location: Student Union Ballroom.
- **5:00 PM** - **6:00 PM**: Seminar on Effective Communication Skills. Location: Library Auditorium.

**Thursday, October 5th**

- **10:00 AM** - **11:00 AM**: Workshop on Building Resilience. Location: Counseling Center.
- **2:00 PM** - **3:00 PM**: Orientation for New Students. Location: Student Center.

**Friday, October 6th**

- **11:00 AM** - **12:00 PM**: Seminar on Mindfulness and Meditation. Location: Campus Recreation Center.

**Saturday, October 7th**

- **10:00 AM** - **12:00 PM**: Workshop on College Success Strategies. Location: Student Success Center.

**Sunday, October 8th**

- **2:00 PM** - **3:00 PM**: Group Therapy Session for Anxiety and Depression. Location: Counseling Center.

**General Information**

- **Location**: Counseling Center, Student Union, 1st Floor, Suite 100.
- **Contact**: 407-823-3789
- **Website**: www.centralfloridafuture.com

For more information, please visit the Counseling Center or check their website for updates.

The fourth annual Showcase of Undergraduate Research Excellence is a poster- or display-based forum for UCF undergraduates to present current and recently completed research and creative projects to the entire university community. Undergraduates from all disciplines—from engineering to the life sciences, from visual arts to theatre—who are or have been engaged in significant research or creative projects will present their findings and field questions on Thursday, April 5, from 2-5 p.m. in the Education Complex Gymnasium.

Scholarships will be awarded to the best Showcase projects. For more information regarding eligibility, the online application process, and selection criteria, please visit showcase.ucf.edu or call the Office of Undergraduate Studies, 407-823-2373.

Showcase projects will be judged according to the following criteria:

Clear focus or central question: The presentation explicitly states what the project accomplished or will accomplish. There is a clear controlling idea or hypothesis or objective.

Sound methodology: Approach to the project knowledgeably conveys how the project is to be executed or what constitutes "evidence" in the discipline and how it is obtained.

Clear presentation of results/product/performance or expected outcome: Details about the project are presented in an organized, fresh, and thoughtful manner. Reality of the subject is evident. The project can be understood by knowledgeable in the field and also by a reasonably informed non-specialist.

Progress on project to date: Project is complete or can be completed in a reasonable amount of time.

Contribution to the field or discussion of potential impact: There is an explanation of the significance or use of the project; of why the project was or is worth doing; or of what new knowledge, understanding, or insight will be or was gained.
Women's Tea offers opportunity to bond

In the hustle and bustle of everyday life, every once in a while women need to stop and enjoy a cup of tea. President-elect Brandie Hollinger hosted UCF's first Women's Tea on Wednesday, as part of SGA's Week of the Woman series.

"It's a social-networking opportunity for the students and faculty. We don't meet everyday life, every once in a while," Hollinger said. "It's fun to talk to other women, to learn about one another and to get to know each other better.

The first event of its kind at UCF was a celebration of women achieved at UCF. Guests included several female leaders at the UCF community, such as Student Development and Enrollment Services Vice President Maribeth Johnstone, the president of several student organizations, leaders of Greek organizations, faculty administration and women of the President's Advisory Council.

Musical entertainment was provided by Mr. UCF 2006 Kenton Blanchett and Miss UCF 2007 Destiny Jordan.

As a tribute to the special event, Jenkins performed the song "Mother," and said, "There's nothing like woman-to-woman encouragement."

The keynote speaker was former U.S. Ambassador to South Korea, who received four honorary degrees, including one from UCF. Currently, she is in the process of starting a non-profit women's group called Project Ukraine.

There are many challenges if you wear a skin," Elam-Thomas said.

She made several points about the importance of women supporting each other. She said women are in charge of their own destinies and should rely entirely on themselves.

Elam-Thomas said in response to the recent SGA presidential election, "For this university to have a woman (student body president), UCF recognizes that it's ready to be part of global society."

Elam-Thomas also noted the differing roles women in other cultures. "In most societies made up of diversity in the world, the mothers are respected," Elam-Thomas said.

"It was a celebration of women achieved at UCF," Hollinger said. "It was very important to recognize women, using Hollinger as a prime example when she made UCF history as the first female student body president.

"UCF recognizes intellect, leadership ability and the humanity in their officers," Elam-Thomas said in response to the recent SGA presidential election. "For this university to have a woman (student body president), UCF recognizes that it's ready to be part of global society.

"It's true to yourself, try your best and let people know you are in charge of who you are," Elam-Thomas said.

Women's Tea offers tips to succeed in male-dominated world

MATT MITHRISON

Aspirations were high when the first Women's Tea on Wednesday, one of the first generation of UCF students, voiced her opinion at the Student Union.

Retired Air Force Col. Kim Olson, an American pilot who served in Afghanistan, spoke at the Student Union.

Aspirations were high when the first Women's Tea on Wednesday, one of the first generation of UCF students, voiced her opinion at the Student Union.

Retired Air Force Col. Kim Olson, an American pilot who served in Afghanistan, spoke at the Student Union.

Olson leaned forward in her chair and scanned the faces in front of her. "I'm not sure if there is an easy answer in this," she said. "It's women is to surround themselves with a woman to feel the love and support of other women who are just like you."

"Women, you know you are not alone in the world," Olson said. "It's very important to surround yourself with other women who are just like you.

Several factors lead to lower grades for men

The achievements they've had in women's rights in the last 10 years compared to the last 300 years has given women a momentum boost of intelligence over men.

— GEORGE FULGINITI

In order to earn a living while studying education with Duke clinical psychology, and get paid in the degree of a professional, you can start your career with an online degree.

Several women have achieved over the past years. Prominent female figure like New York senator and 2008 presidential candidate Hillary Clinton, Gloria Steinem, and the first female president of Harvard University, were praised for their achievements and for providing excellent representation for women.

A new study has found that making the first female UCLA SGA president, has also improved the UPCI community.

There had students tell me, "You've given me hope and I plan to do the same." Hollinger said, "Women are starting to see themselves empowered. There are definitely more women seeking advancement opportunities and fewer women wanting to go home housekeeping.

Hollinger is being influenced by a female role model, and her gender is greatly admired — last month, she was a mother commands when I'm at a boarding meeting even when the majority is men," Hollinger said. "She didn't just grade. She treated everyone equally.

Several videos on the role of women in board meetings was shown to demonstrate the challenges women have to overcome in a male-dominated workplace.

"We've seen some of the social, cultural barriers that keep women from accessing upper-level positions within a company," Hollinger pointed out that even if women work in female-dominated workplaces, they will still face a number of barriers in the workplace. Professionals who have more than 10 years of experience have reported that gender bias and sexual harassment are still prevalent in the workplace.

Women's behavioral and work-related issues were also discussed during the initiative. Powell said that in female-dominated workplaces, women have more job security and they are less likely to be fired.

There are many other factors affecting the academic success of men and women, said Karen Hoffman, a licensed psychologist with the UPCI Counseling Center.

"I think Hollinger is inspired by a female role model, and her gender is greatly admired — last month, she was a mother commands when I'm at a boarding meeting even when the majority is men," Hollinger said. "She didn't just grade. She treated everyone equally.

Several videos on the role of women in board meetings was shown to demonstrate the challenges women have to overcome in a male-dominated workplace.

The top topic was said glass ceiling, which has been a barrier for women to move up the corporate ladder. Hollinger noted that while women are making progress, they still face barriers in the workplace. Women are more likely to be paid less than men for the same job. According to the National Organization for Women, women in mid-level management positions have only 70 cents for every dollar earned by men.

The achievements they've had in women's rights in the last 10 years compared to the last 300 years has given women a momentum boost of intelligence over men.

"Women are actually catching up on it. While it was a bad thing for women to go to therapy, now we see it as a way to get a degree and that there's more to it than being a household name.

Despite the strides in women's rights, Hollinger said that the accommodations made for women can be seen on the higher levels.

"I don't think that females have any advantages or a momentum boost because there aren't 10 years of experience women have seen women's rights in the last 300 years, but there have been many years of experiences. Women have been shown to be more likely to advance. According to the Census Bureau, women only earned 77 cents on every dollar men earned in 2004.

When the gender-based pay gap has decreased from 84 percent in 2000 to 77 percent in 2004, Hollinger said the numbers don't tell the whole story. Pay flips, which he says creates his society, are the result of women's lack of attention.

When the gender-based pay gap has decreased from 84 percent in 2000 to 77 percent in 2004, Hollinger said the numbers don't tell the whole story. Pay flips, which he says creates his society, are the result of women's lack of attention.

"Women are more likely to be paid less than men for the same job. According to the National Organization for Women, women in mid-level management positions have only 70 cents for every dollar earned by men.

The achievements they've had in women's rights in the last 10 years compared to the last 300 years has given women a momentum boost of intelligence over men.
Fear of a 'smear' leads to risk of cancer, HPV

WHITNEY HANDBUCK

It is quite the adventure asking women around UCF about their Pap smear experience. Check after check turned crimson with embar­rassment as many women muttered in meet­meet: “I really don’t want to talk about this.” If only women were col­lected enough and roaming with their feminine woes — trying to make the women see the fear of the “Pap”-age of cervical health care. They understand that it is not to educate women about the cancer causing micro­organisms financed by administration-only in the schools. The schools think the more we talk to each other about the women’s health issue, the easier the process will be. They think with the issue of “discomfort,” Lisa LeBlanc, an education major, talks about the women’s studies program.

“A Pap smear is the most painful exam that women will ever have to undergo. As a result of this, it changes their behavior;” Advanced Registered Nurse Practitioner Menard said, who has worked for Women’s Health at the UCF Health Care for 17 years.

Menard recently changed its policy; no longer offering a Pap smear in their pelvic exam and adopt­ping the nationwide change started by the U.S. Preventive Serv­ices Task Force and the American Cancer Society of avoiding Pap smear in women under the age of 21. “I’m in my 30s, I’ve had one Pap smear exam once a year for three years now.” Another reason for the change is the lack of results. It is recommended that women have a Pap smear every three years at a minimum. Since many of these results occur line to line a men and her doctor to determine how to schedule screening, which can quadr­uple to up to two or three years between appointments.

“Early detection of abnor­mally is essential,” Menard and the health of the cervix becomes increas­ingly important, he said. Menard also schedules a Pap smear this coming year with a patient every three years.

“The Pap smear is a very impor­tant process in preventing cervical cancer development,” LeBlanc said, and is determined the sexually transmitted human papillo­ma virus (HPV).

“HPV is a group of more than 40 different strains of viruses that are sexually transmitted and infect mucous membranes such as the mouth, vagina, penis and anus, as well as the surrounding areas of the skin.” LeBlanc said.

”About 30 strains of HPV are considered high risk for progressing to cervical lesions, interestingly many of the low risk strains are the ones that produce genital warts.

According to the National Cancer Institute, an estimated 100,000 new cervical cancer cases and 167,000 cervical cancer deaths will occur this year. However, if you know what you do to get what you need to be healthy, you may avoid cervical cancer,

Semi-Finals: Friday, April 20th, 7:00 p.m., Central Florida Fair Idol. Semi-Finals will be recorded and will appear on the internet.

Brianna Wilson, a 22-year-old senior language arts edu­cation major Racquel Ewbank, a 23-year-old senior language arts edu­cation major Racquel Ewbank, a 23-year-old senior language arts education major.

“Well, that’s one look that people are embarrassed to have. She would like to do every year for three years now. Since I started work­ing with them, the average woman in that group has been 30, 40, 50 years old.” Menard said. “Before this change, the patients who had both of her appointments at the health center used plas­tic. Women would go along with selling pre­natal vitamins with the contraceptive, the very things that proved to be helpful to their bodies, as evi­dence that many women.”

“Inflammation (irritation) of the cervix can be a sign of a number of conditions, including cervicitis and cervical cancer. Inflammation is caused by a number of factors such as infection, irritation, or an injury to the cervix.”

“One of the greatest threats to health is cancer. It’s a leading cause of death in the United States and it affects people of all ages and ethnicities. The American Cancer Society estimates that there were 564,790 new cases of cancer diagnosed in the United States in 2014, and 521,530 deaths from cancer in 2014.”

“Cervical cancer is a trend in our cul­ture today.” LeBlanc said, “I’ve heard it’s quite the adventure.”

“Many women are reluctant to get a pelvic exam, and if no abnormal test results are found, it is recommended that a Pap smear be repeated every two years.” Menard said.

freedom and being able to make your law. I always have options and to secure those options," Schuett said. "The most fundamental human right is the power of choice and people should be able to choose especially when it is in regard to their own human right.

Overall, Schwartz was pleased with the event. "The positive vibes were spreading like an infectious disease. I couldn't have happened without the unbelievable performers," Schwartz said later via e-mail. "The stage was occupied until 6 a.m.

Spoken-word artist Ashley Miller, a 20-year-old creative writing major who goes by the stage name "V." said later via e-mail. "I am against abortion rights. Why do evil people have the right to murder and giving people a choice whether or not to murder." Mangrich said. "I am against abortion rights. Why do evil people have the right to murder and giving people a choice whether or not to murder."

"In my mind, 'I love my body.' There is absolutely no doubt about it. Roe v. Wade is not supposed to be overturned worries Bernstein. "Millions of women will die because it is absolutely unitive in my mind," she said. "And it will happen again. Abortion will not end."
The UCF Softball team is keeping with one consistent trend this season—leaving runners on base. The Golden Knights stranded 16 runners in their doubleheader against Marshall on Saturday despite their 23 hits as a team.

Fortunately for the Knights, they were able to muster a two-game split, taking game one from the Thundering Herd, 4-3, in nine innings, only to fall in game two, 7-0. Adison Gme earned the win in game one, pitching all nine innings, while striking out nine, in her 15th win of the season.

The Knights would load the bases late in the third inning, when a double, two walks and a triple that cleared the bases gave Marshall an early 3-0 lead. UCF would answer back in the bottom of the inning by giving up two hits, throwing a wild pitch and hitting a batter.

In the fourth inning, Lindsey Dean would lead off the inning with a double to left field. After Dean was picked off at second by Marshall catcher Rachel Polden, Maggie Murphy would rip another double of her own. Two quick runs, however, would end the inning and the UCF threat.

The Knights, however, continued chipping away at the score, scoring another run in the bottom half of the sixth inning. Cole would lead of the inning with a single. Morgan Ballard would pinch run for Cole and advance to second on a sacrifice bunt from Dean. The Knights would cut the lead to one when Murphy singled to score Ballard from second.

As a result, the Knights forced the game into extra innings with one run, tying the score at 3-3.

In the bottom of the seventh, the Knights would score two runs on a home run by Lindsey Dean and a single by Faith Adamson, winning the game, 5-3.

"I think just one error killed us, and we just got down."

NATHAN CURTIS

The UCF Women's Basketball team has found its new coach, UCF Director of Athletics Keith Tribble has named Joi Williams Felton as the head coach of UCF Women's Basketball on Thursday.

Tribble had an initial list of 25 candidates, 15 that he spoke with in person, and eventually decided on Williams Felton as the person most compatible with UCF and the program. There were three things that UCF was looking for, Tribble said:

1. A coach that could build a program and have experience in recruiting.
2. A coach that could be a relentless recruiter, have experience in building a program and have experience in coaching in one of the power (SEC) conferences.
3. A coach that was willing to work with the person most compatible with UCF and the program, in this case, Williams Felton.

Williams Felton was credited with the program's rise over the past three seasons, a program that, before she was most recently hired, had not made the NCAA Tournament or the Women's Basketball Conference tournament.

"Williams Felton is a proven winner who has helped build a program into a conference contender," Tribble said in a release.

Felton will take over a program that has not made the NCAA Tournament since 2008 and has not won a conference tournament since 1986.

"I think just one error killed us, and we just got down."

Men's Tennis drops 2 in Boise

MELISSA NIEGER
Sports Editor

The UCF Men's Tennis team concluded its season at the NCAA Division I Men's Tennis Invitational this weekend. The Knights fell to both Oklahoma State and Stanford on Saturday and Saturday respectively.

In the first match, Oklahoma State defeated the Knights 4-0, ending UCF's season. The Knights started off with a quick 6-3, 6-2 victory in doubles. However, the Knights could not complete the sweep with three straight singles losses.

The second match took place on Saturday with a 4-0 win over Stanford. The Knights' singles performances were again their downfall. The Knights' best chance at victory came in the doubles match, where the team performed exceptionally well with a 7-5 win.

UCF's Postseason Match Schedule

- March 28: NCAA Tournament First Round vs. Stanford
- April 2: NCAA Tournament Second Round vs. Oklahoma State
- April 9: NCAA Tournament Third Round vs. Stanford

UCF's season comes to an end as the Knights fell to 21-5 overall, finishing 3-2 in conference play.
Buckeyes and Gators face off to decide 2007 NCAA Champion

NANCY ARMOUR.

ATLANTA — Now we’ll see who’s really No. 1.

If the Ohio State band is in the NCAA tournament, and Ohio State, which finished the regular season as the top-ranked team, rolled into Monday night’s championship game.

After a tournament filled with nail-biters, Saturday night’s games were downright pedestrian. Ohio State (35-3) beat Georgetown (40-5) 66-64 despite more foul trouble from Greg Oden.

Florida (34-5), which roared to a 76-46 victory over UCLA in a rematch of last year’s title game that was too close for comfort, will be its biggest test yet.

The Gators, meanwhile, are looking to add to its title collection. But they also have the thankless task of trying to keep up with a better team.

If the Buckeyes and Gators met for a title in January — only it was on grass, not hardwood. The defending Gators were gone in an upset by Ohio State and marijuana-free Florida is the first school to hold titles in football and men’s basketball at the same time.

Now Florida is looking to add to its title collection, but the Buckeyes will need a little revenge for their football loss.

“Trent is a very, very good team,” Florida coach Urban Meyer said. “The only thing we do is to do it with the same amount of work. They’re a very, very good team.”

Ohio State coach Thad Matta was impressed that she got there, had a chance, and received a berth in the NCAA tournament. “I’m very proud of her,” he said.

Still, the championship game may well come down to a guard play. Florida’s Lee Humphrey has a knack for hitting big shots, hitting only 2-of-9, but he was on the mark from three.

Mike Conley Jr. is overworked, and Ron Lewis isn’t shooting — the very margin by which Florida outrebounded OSU 43-26.

The teams wrapped up their season in the NCAA title game.

“Maybe it has been a blessing in disguise,” she said. “It gave me a chance to re-open it up.”

Miller is confident of her school teammate and childhood friend, but he is also the most valuable to Gators that’s “That’s Fine” right now.

He carried the team in its first two games, and he was the reason Ohio State didn’t win.

James Butler is a steady scorer, and Ron Lewis has a knack for hitting big shots, but his high school, only having left, 10-2, and so is able to go on any time.

Mike Conley is shadowed by OH’s high school teammate and childhood buddy, but he is arguably the most valuable to Gators that’s “That’s Fine” right now.

While this is Williams Felton’s first time in three years that his skills has been on display. He was on the mark from three in 1990-92.

Williams Felton said that she was impressed that she knew who and what she was doing, so she wasn’t surprised.

“Trent is a very, very good team,” Florida coach Urban Meyer said. “The only thing we do is to do it with the same amount of work. They’re a very, very good team.”
Don't curtail an artist's right to skewer racial views

I read your article "Racially charged painting causes controversy on campus" with much interest.

Having seen Matthew "Moon's " work, it was obvious that it was probably going to upset a good number of people. I think it's important to remember that the point of this piece of art is to make people think about the implications of the word "nigger." The artist is not necessarily making a statement that race is a valid form of classification, but rather that the word is often used in a derogatory manner.

The piece is a commentary on the use of the word "nigger" and how it can be offensive to some people. The artist is not trying to start a race war, but rather to bring attention to the problem of racial prejudice.

The fact that the piece has caused controversy is evidence of the power of art to challenge our assumptions and make us think about complex issues. The artist's right to express her ideas should be protected, even if it means challenging the sensibilities of some people.

Finding time to read about it

Because of an unannounced professor's absence at the beginning of this week, the student body was left with a lot of free time to fill. Instead of doing homework or studying for exams, I decided to spend my time reading about a topic that interests me: the history of the Renaissance.

The Renaissance was a period of great intellectual and artistic creativity that took place in Europe from the 14th to the 17th centuries. It was characterized by a renewed interest in the classical works of ancient Greece and Rome, and a desire to break away from the rigid feudal system of the Middle Ages.

I found an excellent resource online that provides a detailed overview of the Renaissance and its impact on modern society. It covers topics such as the discovery of the Americas, the invention of the printing press, and the rise of the scientific method.

I also discovered a website that offers interactive tutorials on various aspects of the Renaissance, such as art, music, and literature. These tutorials are designed to be engaging and accessible, and they provide a fun way to learn about this fascinating period in history.

Overall, I'm glad that I had the opportunity to explore this topic in depth during my free time. It's always rewarding to learn something new and expand your knowledge of the world around you.

Media, public scrutiny of Bush is politically motivated

President Bush, under a cloud of controversy and growing unease, was forced to defend his policies before a joint session of Congress on Wednesday, where he served as chief defender of the United States.

During the speech, however, Mr. Bush defended his every action, claiming it was necessary to keep the crooner on the show for the worst.com and satellite TV. He also mentioned his recent decision to cut funding for the arts, which has been met with widespread criticism.

Despite the criticism, Mr. Bush is determined to continue his policies, even if it means going against the wishes of the American people. He has stated that his goal is to "Get the job done" and that he will not be deterred by the opposition.

"I won't be stopped by those who want to stand in the way of progress," Mr. Bush said during his speech. "We will move forward, together, in the best interests of our country."

Meanwhile, the Democratic Party has promised to challenge Mr. Bush's policies at every turn. "We will hold the Bush administration accountable for their actions," said Senator Barack Obama.

The debate over Mr. Bush's policies is expected to continue for the foreseeable future, as both sides continue to push for their own agendas.
