A Michigan man was arrested and taken to jail Thursday after the FedEx Pilot he was driving hit a UCF student's car at Alafaya Trail and Science Drive and fled the scene — twice.

Julie Winter, a senior forensic science major, said she was leaving her boyfriend's apartment on Science Drive and was stopped in the left turning lane at Alafaya Trail in her Mustang when the white, four-door Pilot driver slammed into her.

"I was going home to write a paper," she said. "I'm not going to school and not getting there" she said.

The Explorer, screeching and spinning, drove down the road. A crowd of witnesses gathered on the sidewalk and turned right onto Alafaya, narrowly missing a car that was waiting at the light.

The driver of the Explorer, 36-year-old Jeff Brundage of Michigan, was arrested in connection with the accident. Thursday, June 9, and charged with driving under the influence and leaving the scene of a traffic accident.

UCF Police practices the Brazilian martial art of Jiu-Jitsu. The "Bicycle, Penetrate, Refute" program at the UCF Counseling Center deals with the second leading cause of death among college students: suicide.

Since the summer of 2006, the Counseling Center, which is working with faculty and students in a program called "Question, Persuade, Refer." The program addresses the proper way to respond to someone who may be suicidal.

According to UCF Police Department records, 30 students have been killed after July 1, 2006, at UCF.
The meeting is between the much more.

Radio Club meeting Friday

The Office of Provost and Associate Provost, Greg Andre, has announced changes to the meeting schedule for the Spring 2002 semester. The changes will affect the meeting times for the College of Health and Human Performance (CAPP), the College of Arts and Sciences (CAS), and the College of Business Administration (COBA). The meeting is scheduled for 3:00 p.m. in Room 320C of the Computer Science Building. The meeting will be attended by the University of Central Florida Board of Trustees and the University of Florida Board of Trustees. The meeting will be held in the computer science building. The meeting will be held in the computer science building.

Space shuttle launch up until January due to fault gauge problems

Cape Canaveral, Florida - NASA on Sunday delayed the launch of the space shuttle Atlantis until January after a gauge in the fuel tank failed for the second time in four days.

On Sunday, only a day or two remaining in the launch window for the partially manned mission, senior managers decided they needed more time to look at last week's problem. Managers hope better understanding of the perplexing and persistent fuel tank gauge problem could be carried out at the Kennedy Space Center. The delay has threatened the neighborhood.

Bodinhamer carverrelated to the right, avoiding a straight line from Maion, and then went into a handstand, which he held for a moment before launching a flurry of kicks.

For the members of the Capoeira Club at UCF, this isn't a hobby. It's life. "Capoeira changed my life," Bodinhamer said. "For everyone who does it, it's like part of their life."

"I still wanted to do something with my background back home," said a teammate who was almost completely different from those in other martial arts or sports.

Capoeira doesn't rely on rigid stances or repetitive movements so much. The athlete, instead, has an acrobatic and flowing style of movements that looks like a dance to the untrained observer. Bodinhamer said he was impressed by the club's style and work.

Capoeira originated centuries ago in the slums of colonial Brazil where the military and artistry were fostered by the masters that practiced it. A practitioner's personal style or personality is expressed by the style of kicks and claps. The moves are often created by the practitioner and finding ways to improve their techniques.

Freshman Ross Arena said that he found the club interesting. "They can do it with style in front of people," he said. "It's a lot better than being a school member, meaning you can participate in all of the school's training sessions and graduate school as well."

"In Capoeira, it can be used for self-defense like any other martial art; it's more fun." Bodinhamer said.

Armien said that when the music begins, people imagine themselves to be the blue sky around the earth and the opportunity to play exotic music, which it originated with.

Freshman Ross Arena said he got into Capoeira after joining the Capoeira Club at UCF two years ago, teaches the center on Mondays at 6:30 p.m.

"It's even more fun when you get to know the band and the people that are there. It's a lot better than being a school member, meaning you can participate in all of the school's training sessions and graduate school as well."

Security goals unfulfilled

UCF and all Florida universities would have to improve the university administration and community colleges' awareness of the budget system, according to the recommendations of the Florida Student Association, brought in to propose the idea of a student referendum for the next level of funding.

The BOG also heard a presentation of the Florida Student Association's recommendations, which included increasing safety and security measures for campus, including a proposal for a reverse 9-1-1 system.

The recommendations called for reducing spending, increasing school-to-college alignment, and implementing a reverse 9-1-1 system to improve student safety.

called engine cutoff sensors, are part of a backup system to prevent the Shuttle’s main engines from starting during the final launch countdown and running without fuel, a potentially dangerous situation. They have been a source of periodic trouble ever since flights resumed in 2005 following the Columbia tragedy.

Two groups of NASA engineers recommended that the flight be postponed and the fuel gauge system tested, to figure out what might be going on. But they did not agree to a Sunday launch attempt when it came time for the final vote.

Shuttle commander Steven Lindsey was deeply involved with the decisions that were made, officials said. Lindsey and his six crewmates planned to return to their Houston base in Houston late Sunday. “We hope everyone gets some well-deserved rest and we will be back to try again when the vehicle is ready,” the astronauts said in a prepared statement.

There was another disappointing delay for the European Space Agency, which has been waiting for years for its X-38 Crew Return Vehicle to fly. NASA space station design problems in the 1990s and early 1990s slowed everything down, then Russian problems and, most recently, the 2003 Columbia tragedy delayed the project.

NASA officials said they expect little ripple effect on student enrollment or completion, if any. "This is one of the major findings of a new book, PhD Completion Project: The first 10 years of study," with results: American universities had an easier time preventing Ph.D. dropouts than their European counterparts, the book says. "We have a long way to go, but we have made progress," Siegel, a dean at the council, hopes to study how to go through with the plan and succeed without a hitch.

Faith Bible Church in Arvada, Colo., on Sunday after a gunman opened fire in a dormitory. Witnesses told police that the gunman was a 20-year-old white male, wearing a dark jacket and skull cap. He may have glasses or a beard. Police announced an indefinite curfew and the streets quickly emptied of residents amid fears of more violence and clashes in the wake of the killings.

Two southern provincial governors were killed this morning, Gov. Mohammad Ali al-Hassani of Muthanna and his colleague, Gen. Khadij Hamza in neighboring Kerbala province, raising fears of a violent power struggle among political factions in the oil-rich area.

Malaysian also have targeted local Iraqi government officials to try to intimidate those who accuse of collaborating with the U.S. and Iraqi governments.

Undermining that danger, the head of the Shiites provincial council survived an assassination attempt in the northern city of Mosul. A roadside bomb exploded near a car carrying Mishan. "We will try to answer just that," Siegel, a dean at the council, said.

POLAR BEARS — FACTS

- Polar bear cubs are born in late winter, usually in a den that is well insulated against the cold. They are born with fur, but the fur color is usually light, not white.

- Polar bears are only found in the Arctic and are not found in the Antarctic.

- Polar bears are the largest land-based carnivores and can weigh up to 1,100 pounds.

- Polar bears have large, webbed front paws that help them swim and large, rounded ears that help them hear in the water.

- Polar bears are the only bears that hunt seals exclusively.

- Polar bears are the largest land-based carnivores and can weigh up to 1,100 pounds.

Began working with Cuidate, a program that provides health service for Hispanics, in May with a bachelor's degree in social work and a master's degree in social work from UCF in Central Florida to fulfill his heart disease and diabetes, are two chronic diseases, such as heart disease and diabetes, are the leading cause of death and disability in the United States, according to the National Center for Chronic Disease Prevention and Health Promotion.

During his studies at UCF, Dorta worked at Florida Hospital East Orlando to fulfill his 420-hour service learning requirement. Full-time, the director of Field Education in the UCF School of Social Work, said that during completion of their service-learning experiences, students get a good idea of what it's like working in the social service field full-time. Dorta said he enjoyed his service-learning experience because he was able to put into practice and see firsthand the theories and teachings in class, how it really is to deal with the patients.

Dorta said his dream was to work with the Hispanic community, but he didn't know what his chances were. While at Florida Hospital East Orlando, he met Natalia Cabrero, the project manager of a new program called Cuidate.

Cuidate is a Spanish word that means "take care of yourself." While the program was designed for members of the Hispanic community, the employees are bilingual, and everyone in Central Florida is welcome to use the services, said Dorta, who is now the program's health coordinator.

The program was formed in April and is funded by a $50,000 grant from the Community Health Impact Council, a subcommittee of the Florida Hospital Board tasked with developing initiatives that improve the health of the Central Florida community.

The growing Hispanic population in the Central Florida area made Orlando a perfect place to start Cuidate. According to the U.S. Census Bureau, about 10 percent of the greater area population is Hispanic, but there are several hundred people there who have either contacted or been referred to Cuidate.

"It's a pilot project, and we have to prove our success," Dorta said.

Dorta said the program's grant is for 24 months and will undergo a review process before it is renewed. "Thirty-percent of the people that come into our program here are on Medicaid or KidCare. We have enrolled 124 people in the program," Dorta said. "After two years, we hope chronic disease self-management classes taught by licensed professionals are offered at night over a six-week period. People with chronic disease, such as heart disease, arthritis and lung disease can learn to eat better and control their symptoms through a series of classes."

Also, individuals that qualify for Medicaid or KidCare can go to their local doctor's office and receive assistance in enrolling in the program. "We have enrolled 124 people in Medicaid since we started," Cabrero said.

"If you need services, they are as unique as each individual, and the Florida Bureau of treating chronic illnesses can be a great resource to help with their health insurance. Cuidate works with individuals to help them find low-cost clinics and prescription medications and doctors who accept Medicaid."

"We don't have to prove our success by how many people we have or finals, I remind myself because I have so much school work to do. I feel like I'm missing something," Dorta said.

"I went from learning how to shoot at people," Dorta joked, "so learning how to help people was a change of pace." Dorta said his experience serving in Iraq taught him not to take things for granted, because he has so much school work on his plate, he needed to make sure that there's still a war going on and that he still has buddies beside him fighting. Dorta's goal was to be in college enjoying the comforts of home, but he said he will take away from UCF the academic knowledge he has gained in order to support himself and be successful in the work place. He said he is happy to be graduated.

"I kind of see it as a new beginning," Dorta said, "a chance to make something." Dorta said, "But since I don't have UCF, something that was such a big part of my life, I always feel like I'm missing something." Dorta said he would never trade the experience he had at UCF because it was a part of his education career right now. He said he enjoys it as a student at UCF.

"I think it was an awesome opportunity," Dorta said. "It brought awareness to the main campus to the importance of what we think about the rest of the university and how to bring information to satellite campuses. In satellite campuses they should be taught not only for football games but for other lessons like reading workshops and writer's conference as well." He added, "I think my time at UCF was made more enjoyable by the people and how they treated me."

"Life's experiences gave me something to bring to the table, to help younger students to see things in a different perspective," Dorta said. "And I learn so much from the young people who know what they want from life." Dorta said she was nervous at first in the classroom, "When I started my junior internship... I didn't know how it would come together in the classroom," he added. "But I enjoyed it as much as I could. I was proud for a second-leader student. Ross didn't complete college after high school. She took a break before finishing her associate degree and then raised her own children. Her passion for teaching and while raising her children, "I got married young," Ross said, "but I always knew I wanted to go to back school." Ross said she became a non-traditional student. Ross didn't complete college after high school. She took a break before finishing her associate degree and then raised her own children. Her passion for teaching and while raising her children, she went back to UCF to finish her degree and get a master's degree in education.

"It was fun," she said. "It was a lot of work, but I enjoyed it a lot. I enjoyed being a part of great things that I was a part of." Ross said she was able to find her niche through her experiences at UCF and while teaching and tutoring. "It was a great program UCF provided," she said.

"Sometimes, students' internships can lead to a full-time job offer," Ross said. "She received a job offer after her internship at Malcolm High School. They hired her so soon as they heard she was interested in another teaching position. Ross decided to go back to UCF to finish her degree and get a master's degree in education. Ross was able to find her niche through her experiences at UCF and while teaching and tutoring. "It was a great program UCF provided," she said.

Suicides high in college

Women followed Ford Explorer

Performance anxiety, family operation, stress, pressure, give students the idea that to harbor intense feelings of ill health starts to come out between the ages of 17 and 26 on campus, but it does. The population of college students is getting an education, which is an improvement into their future. Most of the time, they know where they are going, he said. But it's important for people who are not in college are much less support. Family, friends, roommates and faculty to talk to, whereas family, friends, roommates or teachers trained in crisis intervention and helping courses, such as RAs are trained and available to help people in this state of mind. Go to the Counseling Center because, "for some people, it's the only way out."

When the Police Department receives a phone call from friends, family or teachers about a student who is contemplating suicide, officers are prepared to assess the situation, decide on the best course of action, UCF Police Officer Earl Cowan said.

The UCF PD currently has 10 to 12 officers who have been trained and available to help people in this state of mind. Go to the Counseling Center or Health Center or talk to a physician. Let your friend know that there is someone you can talk to, someone who is trained in crisis intervention and helping courses, such as RAs. When the Police Department receives a phone call from friends, family or teachers about a student who is contemplating suicide, officers are prepared to assess the situation, decide on the best course of action, UCF Police Officer Earl Cowan said.

Knights fall 4-4 to loss in SEC

By BRIAN MURPHY

It was another gutty effort by the Knights against a quality big conference team, but when it came time to seal the deal, the Knights were left holding the bag — again.

The Knights (4-4) fought back from a 12-point deficit with nine minutes to play, but never gained the lead in their 76-67 loss to Ole Miss (8-0).

"It's real frustrating, because I thought we worked real hard in practice this week preparing for this game," UCF guard Jermaine Taylor said. "I just didn't go out and play.

This loss resembled those that the Knights suffered against ranked teams Villanova and Kansas State during Thanksgiving weekend.

VERSUS VILLANOVA, the Knights trailed by three points with less than two minutes to play. They then pushed Kansas State to overtime on the next night. And against Ole Miss, the Knights trailed by one with less than three minutes to play. But in the end, UCF lost all three games.

"It's a tremendously challenging schedule," UCF head coach Kirk Speraw said. "We're fighting our tails off and coming up short on some of the ball games. The margin for error is small, and we understand that.

The Knights didn't help themselves in the first half, as they came out slow and sluggish. The Rebels dictated the pace of the game's first five minutes and opened up a 5-0 lead. The Knights were able to cut that to four with about 12 minutes remaining in the first half.

But the Rebels' inability to hit from outside helped the Rebels enter halftime with a 43-32 lead. UCF was just 1-11 from the field in the range in the first half.

"We didn't protect this house," UCF coach Sylvester Croom. They have been one of the nation's winningest teams over the past five seasons, the Knights are now 0-5 against teams from the powerful Southeastern Conference.

The Conference USA senior coach is thinking one of the most fearful things a head coach can think about: Not getting in the AutoZone Liberty Bowl.

Sixth Place, Coach Andy Kennedy, who was recruited by UCF, but he said that he didn't carry any extra incentives going into Saturday's game.

"Coach (Andy) Kennedy said 'when you go open shot, take them,'" Warren said. "And I felt comfortable when I was.

Knights face a tale of two conferences

By MELISSA HEYBORN

The UCF Football team accomplished a lot of feats this season. The Knights accomplished their intrasystem, revenue sharing title and their conference championship.

They accomplished building one of the most fearul running backs in the country and one of the most potent defenses in its division. So what could the Knights possibly want? How about UCF's first bowl game victory.

On Dec. 29, the Knights will travel to Memphis, Tenn., to take part in the AutoZone Liberty Bowl against the Mississippi State Bulldogs. It will be just the second that the Knights have been to a bowl game. The Knights lost in the Hawaii Shriners Bowl against Nevada two years ago.

UCF and Mississippi State have faced off one other time before.

In history. It was on Oct. 25, 1997, when the Knights beat the Bulldogs 36-21.

The Bulldogs enter the game with a 5-7 overall record, and although the Knights 10-2 season and conference title guarantee a victory in every statistical category may look better, there is still one aspect that separates the two teams — their respective conferences.

UCF and Mississippi State have faced off one other time before.

UCF guard Mike Thomas was part of this last. Chris Warren threw a toss ball during the Knight's 76-67 loss to the Rebels on Saturday night at the New UCF Arena. Thomas finished with 11 points, but he said just two of them were from the field.
Taylor scored a game-high 19 points, but knew they had to worry about arc on his first field goal attempt of the second half. Warren led the Knights to a 21-20 lead, and have it intercepted and run for a ferocious two-handed slam. Taylor said "We're underdogs in all those games. We're not expected to win against the Louisiana-Lafayette Ragin' Cajuns or the Mississippi State Bulldogs. But if we play our game, we could beat Penn State."
Men's soccer season tied to many one-goal losses

After a decent showing in 2006, in which the UCF Men's Soccer team went 6-9-2 overall and 3-3-2 in Conference USA, the Knights had a disappointing 2007 campaign.

Before the season, the Knights' leading scorer, Zak Boggs, transferred to South Florida and perhaps their best goalkeeper, Brian Pope, was injured.

All of that combined to cause the Knights to struggle to a 4-12-2 record, going 0-6-2 in C-USA.

The story of the year for UCF was one-goal differentials. The Knights had 12 of their 18 contests decided by one goal. Unfortunately, UCF went just 4-8 in those matches.

Time and again, the Knights looked as though they would be able to net the equalizer or pull away from an opponent, but it just never materialized.

UCF had a tendency to start slow, scoring just eight goals in the first half of matches all year. Opponents scored 16 times in the first half, and the Knights were often battling from behind as they tried to keep the match close.

Senior goalkeeper Brian Pope missed almost the entire season due to an injury, but that didn't mean he wasn't contributing. Pope helped coach freshman Sean Johnson, who won the starting job in the offseason.

Pope helped coach freshman Sean Johnson, who won the starting job in the offseason.

UCF reached the high point of its season a little early, when it moved to 4-3-1 on the season with a 2-1 win over Wofford on Sept. 23. After that win, the Knights went winless for the last month-and-a-half of their season, finishing last in C-USA and being left out of the Conference USA Championship.

UCF scored in the closing minutes to fall to No. 11 SMU 3-1 on Oct. 6, and the Knights gave No. 20 Tulsa all it could handle in a 2-1 loss on Oct. 21.

Leading the Knights on offense was midfielder/forward Ryan Roushandel, who finished with eight goals and one assists. His 17 points were tied for fourth and his eight goals were tied for second in C-USA.

UCF has a wealth of young talent. Another year of experience under the belts of freshmen Johnson, Nathanial Jocelyn and Dustin McCarty, and sophomores Cam Jordan, Akin Akinrinade and Jamal Robinson bodes well for the Knights to come back in 2008 and not just get back to a winning record, but also compete in the Conference USA Championship.
The Knights — a member of Conference USA — are far cry away from facing the type of talent that Mississippi State faces in the Southeastern Conference.

Not to discredit anything the Knights have accomplished all season, but while the Bulldogs enter the final two games of the season against Auburn and Arkansas, no matter the talent in the conference the Bulldogs are still arguably one of the country's best teams.

Smith finished the regular season with 2,448 rushing yards and 29 touchdowns and in just 11 years away from breaking the all-time rushing record in a single season set by Ohio State's Barry Sanders. The 20-year-old Sanders finished his career with 2,679 yards in 1990.

Aside from that, Smith, however, has only faced a defense like Mississippi State's two other times this season, and they were both non-conference teams — Texas and South Florida.

The Bulldogs entered this season ranked 25th in the nation in rushing defense and 69th in the country in rushing yards per game. Smith has played a defense like that, if good USF and was held to 144 total yards. Still, Smith finished 10 of 100 of those turnovers gained than the Bulldogs.

For the Knights, those numbers are more staggering than they appear when you consider that they began the season with just three interceptions through their first six games.

Although both teams pose solid defensive threats, the Bulldogs may have the offensive marks. That is, if quarterback Kyle Love can be effective in the pocket.

Jr. finished the regular season with 2,050 passing yards and a 269 percent completion rate. Compared to Mississippi State quarterback Weather Carroll, those numbers are impressive.

Carroll finished the season with 1,153 yards and a 53 percent completion rate. Mississippi State and the Knights finished the bottom of the conference in passing offense, with both finishing 126 out of 126 teams.

Those numbers are for the UC head coach George O'Leary, however, who said in a press conference earlier this season that a quarterback is judged on his efficiency, whether or not they can move the chain.

After the 64-52 loss to USF midway through the season, Love said he made the call to go back to Love, and has proven to be an efficient quarterback and an effective leader since then.

On paper, the Knights and the Bulldogs look like a much

Theags UCF Football team,
The tuition hike could help—but it won’t.

There’s a 5 percent tuition hike that does not sit well with many around campus. It would certainly be better if the money was actually being used for good, such as assisting financial aid.

An expected $9 million will be raised by the tuition increase for use in colleges in Florida. It is assumed that the increase is even, among all of the universities, to raise money as the supply of its very expensive textbooks almost never goes down.

Assuming that the increase stays, there is no doubt it will be slammed by almost everyone who has to pay for it. Not a single person would willingly waste in dime out any more money each semester than absolutely necessary.

We are already the highest state for college costs in the state. Florida’s public colleges already see a tuition increase of 5%.

The rising tuition we are going to help those in need around the Florida capital. We must remember our for the benefit of the students.

If you keep your apartment unavailable to others trying to find a little peace... Do you keep your windows closed? Do you lock your doors and windows. They leave things.

Do you keep your blinds closed? Do you replace, and I certainly wouldn’t keep your apartment unavailable to others trying to find a little peace... Do you keep your windows closed? Do you lock your doors and windows. They leave things.
