AT&T DONATES $50K TO RESEARCH

Funds go toward military training projects

Caitlin Smith

U.S. Army announced on Thursday a $50,000 donation from AT&T's philanthropic arm, which funds the school's continued simulation and technology graduate work. The institute for Simulation and Training (IST) at UCF is an internationally recognized research, teaching, modeling and simulation technology and increasing the community's understanding of simulations in training and education. At a ceremony held at the IST headquarters, located on Technology Park Drive, the company presented UCF representatives with a check marking its commitment to continued simulation research for its graduate students.

This is the fourth consecutive year AT&T has donated to UCF and brings the company's overall donation to a total of $85,000. The AT&T Modelling and Simulation Award, the largest donation to the program, is used to augment financial aid from the university with the hope of attracting the best possible graduate student candidates. Modeling and simulation is the study of computer-driven on-recreations of reality that can be used to train people to react during complex tasks, such as the warfighter.

Congressman Tom Rooney, a strong supporter of AT&T and its programs, was in attendance at the ceremony and delivered a short speech saying, "Every year I

BRIGHT FUTURES BENEFIT REDUCED

Decrease a result of state budget cut

Natalie Costa

This year, students under the Bright Futures Scholarship will have their educations supported by $3, in response to the changing economic environment in the university system.

The decrease in financial aid is a direct result of the 2 percent reduction in the state student financial aid budget for the 2007-2008 academic year due to state revenue defciency.

The First Generation Modeling Grant program will also be affected by this reduction, and according to the Bright Futures Web site, graduates in this program will be forced to bear the brunt of revenue shortfalls.

Director of Student Financial Assistance Lisa Pecoraro said the decrease in Bright Futures will continue only if the 4,000 students who receive the allowance, thus, will not be affected by it. Missakian said.

The Student Government Association's Director of Environmental Affairs Maria Pecoraro said that if one student is adversely affected, it’s still significant.

“This is not good news and it is still bad because they’re not getting the full education in the state of Florida," she said.

Confusion resolved, meal plan frustrations relieved

Amanda Welch

After a week wrought with confusion, Business Services and Dining Services are publishing the norms of Towers residents frustrated with the new meal plan.

The agreement between UCF and the company - which purchased the plans for Towers residents and put a bistro cafe into the towers - was signed in 2006 and UCF would have spent in the new UCF Arena building by spring.

"The reason why I bought a meal plan was because I thought, 'I want to spend $500 on food. I want to buy the cheapest plan I can find,'" said Genuine Suck, a student in Towers.

Swart also said that people in Towers live without any plumbing, sewage or garbage removal. In order to remedy the situation, faculty and students from the social work department have helped the youth group in Kibera establish a clean water system.

Swart was involved with the homeless Kenyan teens who were visiting her friend, who was doing research in Kenya. Swart went to Kibera to organize environmental cleanups. The cleanups have helped to remedy the situation.

"It is a very contentious, intelligent, creative and committed social work student who is really motivated to help make vulnerable children in the developing world," Brietoul said.

Grad student helps homeless teens

Raia Camargo

For some students, spending breaks in one of the most prominentsl in African is not a favorable option, but it was an opportunity for change for UCF graduates.

When you look at people in Africa who are so much, Swart said, “It’s very inspiring.”

In December 2007, Swart organized a two-week stay in Kenya to help homeless teens in the city of Kibera establish a clean water system.

"In the slums, people don’t have water for free, Swart said.

Until recently, the only access to water in Kibera was a well,” Swart said. According to the World Bank for Kibera in Kenya – Gap Year Company, an organization that sends volunteers to Kenya, the dam’s water was so polluted that it caused health problems.

A day in the life of a Kibera resident is difficult because families live without electricity and water was a problem for the residents.

Swart said. Every day, the residents would walk for miles to buy clean water, which they stayed careful to use the same water.

The urgency for fresh water was a problem for many homeless children, but Swart and the youth group in Kibera were finally able to

install a water tank that fills with water that is drinkable.

Swart said some students in Kibera live without any plumbing, sewage or garbage removal. In order to remedy the situation, faculty and students from the social

work department have helped the youth group in Kibera to establish a clean water system.

Swart said. The grants are well-suited for the program.

An associate director of student financial aid.

"We’ll work well with you for the work she did in Kibera. Brietoul said. This year, students under the Bright Futures Scholarship will have their educations supported by $3, in response to the changing economic environment in the university system.

The decrease in financial aid is a direct result of the 2 percent reduction in the state student financial aid budget for the 2007-2008 academic year due to state revenue defciency.

The First Generation Modeling Grant program will also be affected by this reduction, and according to the Bright Futures Web site, graduates in this program will be forced to bear the brunt of revenue shortfalls.

NOURISHMENT AND FUTURE

UCF’s Rock for Hunger feeds children’s minds and appetites

WHITNEY HAMRICK
Staff Writer

Kids from low-income families were given a bite to eat and a little knowledge, courtesy of a UCF student group.

Rock for Hunger, a student organization, started an after-school program last fall. More than 40 children from the Parramore district of downtown Orlando are provided snacks and meals every day. The group hopes to expand its operations around the state.

"We ask questions to see if they comprehended the story," Merone said. "For reading skills, Clara Merone, a communications graduate student who works with Rock for Hunger, "Sometimes they aren’t at their grade level. They need to be taught, so we’re helping them get there and above.""

In November during its annual Rock for Hunger Food Bank and the organization’s annual Rock for Hunger Fest concert series.

Anna Grisel, lead singer of the band Louis that performed at Rock for Hunger Fest 2 and has been one for five years, outlines the lessen plan and also leads the students in singing with her guitar. The lessons taught in English and Spanish, with different languages.

"Our goal is to help kids who are performing low because of lack of resources," Grisel said. "We want the students to make three to four goals.

The students at the Beaumont Magnet School in Dundie, Texas, were graded and candy was passed out to everyone. The most well behaved students were given a free T-shirt and a bigger need," Grisel said. "When I drove around, I saw a lot of kids lumping together that needs to be a better way to get them off the streets." Merone said she believes the younger the student who can be reached, the better the chance that student has to succeed. "I always like to help kids with empowering them," Merone said. "This was a great opportunity to get involved with the kids programs. To tutor them, mentor them and help them realize their goals and aspirations that they have, so they can come back to the community that helped make them who they are and give back. It’s all about giving back."
Partnership benefits troops

FROM Al Herring

Al Herring is honored to participate in the generous donation from AT&T to the University of Central Florida's Institute for Simulation and Training.

"This donation is the key component that helps support a public-private partnership that benefits education and develops real-world advanced technology to better train our military members before they are ever deployed on the battlefield. The AT&T grant allows the University of Central Florida's Institute for Simulation and Training to develop cutting-edge programs that have placed the UCF and the Central Florida high-tech corridor at the forefront of modeling and simulation research."

Over the past four years, the U.S. Army's Program Executive Office for Simulation, Training and Instrumentation has relied on AT&T for its expertise in communications and network technologies. These technologies allow for better training that simulates true-to-life battlefield scenarios.

"Modeling and simulation has grown in recognition by industry as a field worthy of advanced study," said IST Director Randall Shumaker. "This grant by AT&T is a prime example of that recognition and will help attract highly qualified students to the program." Several years ago, UCF developed multidisciplinary master's and Ph.D. degree programs in modeling and simulation. More than 500 graduates with a master's degree or Ph.D. have played a role in modeling and simulation research.

"AT&T's consistent and valuable support of UCF's simulation and training research has helped the U.S. military leverage advanced technology to ensure that its troops are fully prepared for combat," said UCF President John Hitt in a release on the AT&T Web site. "The program has also ushered in a new generation of scientists whose research has been critical to the program's success.

Herring said that the partnership between UCF and AT&T has been successful in benefiting U.S. soldiers.

"AT&T is honored once again to commit our support to the program and is very proud of the significant achievements this partnership has accomplished," Herring said. "This is a great example of how industry, academic and government can work together to support the troops."

GETS THE ADRENALINE GOING.
YOUR'S AND WHOEVER READS ABOUT IT ON YOUR RESUME.

The UCF Alumni Association awards more than $50,000 in scholarships each year to full-time UCF students demonstrating strong academic ability and significant extracurricular and community involvement.

Stop by the FAIRWINDS Alumni Center (located across the street from the UCF Arena at 126 N. Gemini Blvd.) to pick up an application or download information and the form at www.ucfalumni.com/scholarships.

All applications must be received by 5 p.m. on Friday, March 28, 2008.

Questions? Call (407) UCF-ALUM or e-mail knights@ucfalumni.com.

exemption for families with at least one child at home, and by 2010, 23 percent of renters who lived in homes with children were living in poverty.

However, the report also noted that the progress in reducing poverty among children has been uneven, with significant disparities among different racial and ethnic groups. The report highlighted the need for continued efforts to address the underlying causes of poverty and to ensure that all children have access to the resources and support they need to thrive.
ATF trains dogs at UCF

Wednesday and Thursday of last week found K-9 police units from all over the state converged on UCF for a Bureau of Alcohol, Tobacco, Firearms and Explosives Training Event at Bright House Networks Stadium.

Almost 50 different agencies registered for the event, and every unit took part in a training program to teach their already-certified police dogs the scent of peroxide, which can be used in explosives.

The training consisted of the dogs being run through a series of cans to check each one for the distinctive odor of peroxide. In addition to the circle tests, the cans were also occasionally used in a straight line.

Whenever the dog discovered a can containing the peroxide substance, they were to sit beside it to inform the handler that they had found something of interest. After a correct find, the dogs were then rewarded by play with a ball or toy to encourage the behavior and keep the task enjoyable for the dog.

The UCF Police Department did not have either their handlers or dogs at the event because of injuries and scheduling conflicts.

Cut affects 4,054 students

"There is no compromising education," Pecoraro said.

Minnick said the change was solely the decision of the Legislature, not UCF. Yet the knowledge of this change made in the news media to the students was virtually undisclosed to the public:

"This is an excellent example of how students do not have an adequate voice," Pecoraro said. "This is something that is directly affecting us, and yet we need to be involved in that negotiation...in order to enhance our education."

UCF psychology major Whitney Kornegay said that students should have been more involved in the decision. "These kinds of decisions should be voted on by the Legislature and the student," Kornegay said. "Making changes to a university or adding buildings or stadiums is fine, but the students' financial aid, which determines if a lot of them can even afford to go there, should come first."

Pecoraro said that cuts in education can go against the Legislature's aim to make higher education enticing in Florida. This year, early admission students will not be able to apply for Bright Futures before their senior year.

The cuts, while not extensive, are still an annoyance to students—those just starting out or those like Pecoraro who are in their last semester at UCF.

"I have already spent $200 in books, so I now have to magically find $75," Pecoraro said. "When the state's funding gets cut to the university, it affects everybody. It's unfortunate that the vehicle of change is under the tax knife."

Cracks delay Knightro's opening.

FROM AMY PHILLIPS

Cracks delay Knightro's opening. Knightro's, the new UCF eatery, will consist of nine stations: Southern, Deli, Produce Market, Pizza, Vegetarian, Bakery, Dessert, Soup and Grill. The opening of the eatery has been delayed due to deep cracks in the structure's cement flooring.

Brian Compton, the assistant marketing director for Business Services, said that they will meet the requests made by Mason, Phillips and the others by implementing the two-week cancellation window for the spring. Affected Towers residents have until Jan. 18 to take advantage of the extension. Sawyer said the delay has been difficult for all involved, not just the students.

"From a university standpoint, it's been a surprise to us as to how long this thing has been delayed," he said. "It's cost the university quite a bit as far as revenue and bad publicity. From all perspectives, it's just not been a good thing."

However, Curt Sawyer, director of Business Services, said Thursday that Towers residents have always had the choice to cancel. He and the other contributors to the plan considered cancellation an implied fourth option. He said that the muddled situation resulted from miscommunication.

"In between Monday and Thursday, there was some confusion as things continued to escalate," Sawyer said. "The full information did not get communicated to the Dining Services staff and [Phillips] got caught in the gray area."
Bright House is System of the Year

MOLLY HAYS

Bright House Networks Central Florida branch was one of eight recipients of the CableWorld Magazine "System of the Year" for 2007 by CableWorld Magazine in Denver.

"My two former industry colleagues, I think, have a lot of interest in the company and a lot of pride in doing what we do," said Grant Brady, vice president of Public Affairs for the Central Florida operation.

In addition to being the service provider for UCF, Bright House made a $15 million purchase of the naming rights to the UCF football stadium that won't expire until 2022.

"We're very pleased with Bright House," said Grant Heston, assistant vice president of UCF Sports and Information. "They've been a tremendous partner with us, and we think it's a well-deserved honor.

Heston said that the university carefully considered the kind of company it wanted to partner with and hadn't regretted choosing Bright House Networks.

"When we looked at owning the stadium, there were some very clear things," Heston said. "We wanted somebody who was committed to the university, and somebody we'd be comfortable with. We think Bright House has been the perfect fit, and we had a very successful first season at Bright House Networks Stadium." 

Outside of providing services for more than 800,000 customers in Orange, Osceola, Polk, Lake, Marion, Volusia, Seminole, Sumter and Volusia counties and existing naming rights to the OUA stadium, Bright House Networks also serves as a corporate patron to local programs.

"Investment in the community is important for us to go beyond just providing telecommunications services," Brady said. "We get so much from our customers. We think it's important to be so active participants in the community and to participate in a way that has some meaning and has some positive impact." 

With a focus on arts and education, Bright House assists the Orlando Ballet in offering after-school dance classes to inner-city children who wouldn't normally have that opportunity. They also support the Orlando Shakespeare Theater, Boys & Girls Clubs and A Gift For Teaching.

With all to 300 employees in the Central Florida division being military veterans and many having served in the Vietnam War, the Persian Gulf War and ongoing Afghanistan and Iraq conflicts, Bright House is also becoming more involved in supporting military veterans.

"This community to corporate community involvement is what drove CableWorld Magazine to recognize Bright House Networks Central Florida branch over any other systems provider," Brady said.

"That stadium, I think, is as much off a pivotal moment for the university as it is for us," Brady said.

"It tells our customers and everybody that's interested in football, or really Central Florida at all, that we are embedded in this community, and we're willing to invest in this community.

"We're kind of a hometown business. Our customers are here, our employees are here, our call center is here ... UCF is really our hometown college."
Social work members lend a hand

Karen Guin, the Director of Community Relations for the College of Health and Public Affairs, said Swart is empowering the kids in Kenya through education.

"She has a passion," Guin said. "So she says she feels she has a calling to help these kids.

Swart said she remembers meetings with friends in particular.

"In my meetings with those kids, they had a lot of hope, but they also had a lot of fear. I've had a lot of enjoyment with them over the time I've been here, but also a lot of sadness because of the violence we've seen here in Kenya," Swart said.

Swart also said that the community as well as the kids have benefited from the work.

"Now people are not going very far to get the water on the second floor of the Student Union," Swart said.

The Grand Review Committee

Attention UCF Community:

The GRC is a standing committee at the University of Central Florida charged with making recommendations for updating the Golden Rule student handbook. Membership to the committee consists of seven students. Four are appointed by the Student Body President and three are selected by the Vice President for Student Development and Enrollment Services. Meetings are open to faculty, students, staff, and university administration.

All proposals made by faculty, staff, administration, or members of the committee shall be submitted to the Golden Rule Review Committee at grrc@ucf.edu. The proposal shall then be sent to all members of the Committee via email within 48 hours of receiving the proposal.

Spring 2008 Meetings Dates/Time/Locations are:

Wednesday, January 23, 2008, 1:30-3:00 PM
641 UFCA
Wednesday, January 30, 2008, 1:30-3:00 PM

All meetings will be held in the Lead Scholars Conference Room located on the 2nd floor of the Student Union.
NATIONAL SPORTS WRAP

BASEBALL

HEAT READY TO PLAY FINAL MINUTE OF DEC. 19 GAME AGAINST ATL.

The Heat and the Mets have five games left. The loss means the Heat will likely finish in last place in the National League East.

The Mets lead 2-1 in the seventh inning. The Heat scored their first run of the season when Derek Jeter hit a bases-loaded single in the second inning.

The Mets have won four of their last five games against the Heat.

OLYMPICS

• Oemson beat the second overtime to help No. 18 State to 91-85 Saturday night.

Comeback Player of the Year.
Taylor's clutch shots save Knights

UTA Golden Hurricane at Tulsa was one of the most intense games in recent UCF history and its first since 1977. Saturday's game was the third three-overtime game in UCF history and its first since 1992.

"It was punch-counter-punch, bucket for bucket," Spears said. "What a tremendous game for the fans. It's just exciting. People making big shots, people taking tough shots, people getting big rebounds."

Other than Taylor, UCF got much needed production from their post players, such as Billings. He had 15 points and 11 rebounds.

Tulsa's defense limited him to six with about 60 seconds left. The Golden Hurricane put up a 2-0 lead and forced Taylor to shovel down the stretch, but their players went unanswered.

"I think it was a little complicated in the second half," UCF center Stanley Billings said. "I think we got a little comfortable. We were in a groove and we seemed to relax and take our eyes off the ball."

The Knights held the lead for the first half, but then the Golden Hurricane stormed back in the second half to force overtime.

The Golden Hurricane put up a 2-0 lead and forced Taylor to shovel down the stretch, but their players went unanswered.

**Keep military research in check**

A TFC’s latest monetary contribution to UCF’s Institute for Defense and Training, which will aid in military research, has many second-guessing its worth. Without questioning any benefits that military research can provide, we must ask ourselves if we can afford not to look at what we are spending our money on.

The money invested will be going toward the development of simulation training, but is it necessary? Without a doubt, military research and development has the potential to become an evil if we don’t concern ourselves with the expenses.

On the pro side of the research, there is the obvious benefit of saving lives and helping protect our country. Many argue that the research is necessary because anything that is produced is used to bolster our national security. And of course, what could be more important than the safety of our men and women?

However, further progress into the fields of weaponry and destruction could produce more problems than what is currently solved. The question we must ask ourselves is whether the research is being used to our benefit or for the benefit of the military.

On the one side of the research, we must ask ourselves whether the research could put our country and its citizens at risk. This is especially true with the current economic climate.

If we were to see a reduction in military funding, then there would be a lowering of this risk. However, with the large budget that is currently allocated, we cannot expect a large reduction. This is why we must ask ourselves if the research is worth the money.

The money spent on research is a small price to pay for the advancement of military technology. It is important to remember that the research is not just for the benefit of the military, but also for the benefit of the general public.

In conclusion, we must keep in mind the potential consequences of military research and ensure that it is being used for the betterment of our country and its citizens.
