Magic invite UCF to games Cheaper tickets will be offered LEAH GREK Lantos

The Orlando Magic are selling all UCF students, staff and faculty to join the fans for a night in the Amway Arena with a special discount on tickets. Tickets are available at all Magic community ticket locations and will be sold at a discount through Feb. 26. With a valid UCF e-mailed student, staff and faculty ID, fans can purchase tickets for $30, with one lower bowl ticket for $45 and two premium bowl options for $60 or $85. The Magic is excited to continue forming more partnerships with the Orlando community. " Kelly Sparks from the Office of Student Involvement said. "They are looking to bring people out to the games." Sparks worked with the Magic's Special Events Coordinator, Audrey Rodriguez, to establish student discounts and develop the idea. "It didn't cost anything in the marketplace that allowed students to come out to games," Rodriguez said. As an alums, she said she wanted to create an alternative for students to go out and do something different. Rodriguez said she believed it was essential for students to have unique options outside of going to games. Sparks also said the community can expect a special group of students who would take advantage of the special offer. "The partnership can create a lot by students who want to..."

Material military funding research controversy

MOLLY HAYES contributing writer

AT&T's donation to UCF's Institute for Simulation and Training funds not only technology used by the military but an ongoing debate among experts as to whether the military should use military research on campus. IST received a $50,000 grant from AT&T Modeling and Simulation Award to be used for the military's fighter train troops. The research that was involved in the Institute for Simulation and Training is basically to help learn ways for soldiers or war fighters to train better. To train more effectively said Ronald Williams, assistant director for IST Information and Public Services. "We don't really deal with any specific type of training, but the effects of training and ways to make training more effective."

UFC program ranks 9th for scholarly productivity

The Faculty Scholarly Productivity Index (FSP Index) is a method for evaluating doctoral programs at Research Universities. The index is based on statistical algorithms developed by Lawrence Logan and Anthony D'Oppizio. The FSP Index measures the actual productivity of faculty on several factors including:

- Publications (books and journal articles)
- Ongoing/Current (funding)
- Federal Research Funding
- Awards and honors

Shawn Gage

A recent study ranked the University of Central Florida Torn by a $50,000 grant in the top 10 in the nation for faculty scholarly productivity. A. Academic Analytics, a privately owned company that provides online faculty productivity and other institutional faculty productivity, but UCF is the ninth year in the General Humanities category, making it the only Florida university in the top 10.
Colleagues praise 20 years of service

JAKE BRIDGES

For office manager Marty A. Fioramanti, the cartoon of the Air Force ROTC program she created last year as a yard sign to promote the school’s ROTC program in the Student Union is a symbol of her work. The sign, which read “During the 2004-05 academic year, we are proud to say we are a part of the UCF ROTC program,” has become a symbol of her work. The sign was created to promote the program and to encourage more students to join. The sign also includes a picture of two cadets, one holding a UCF flag and the other holding a ROTC flag. The sign is mounted on a pole and is visible from the nearby campus.”

Keep calm and have some faith...

By TRISHA IRWIN

The best way to deal with the stress of finals is to stay calm and have some faith in yourself. This can include taking deep breaths, meditating, or even just taking a walk in nature. By doing this, you can clear your mind and focus on the task at hand.

GOP Presidential candidate
Michele Bachmann
touts costs

By PHILIP A. PAPPY

Republican presidential candidate Michele Bachmann, who is running to stay competitive after her weak performance at South Carolina primary, is taking new steps to save her campaign. In a letter Thursday, she said she is taking steps to save her campaign by including no ads in Florida, one of the southern states she has missed.

Blood drive held on UCF campus

By JESSICA LOY

A blood drive was held on the UCF campus this week. According to the Red Cross, there have been 20 percent showers in the area.

**FUTUR E**

The ROTC program, or Reserve Officers' Training Corps, is a college-level, officer commissioning curriculum that trains cadets in areas such as leadership, development, and professional subjects.

**PUBLISHED BY KNIGHT NEWSPAPERS**

**ROTC detachment, Col. William G. Palmby.**

She was then placed into a position of leadership. She said she should be the welcoming face you see right out of the door. Even though she has missed a few years of tours, Fioramanti is doing her best to make it up to her office, and she said she likes it that way.

**FUTUR E**

Fioramanti is a 20-year veteran of the Air Force and has been involved in the ROTC program for more than 20 years. She has been the office manager for the ROTC program at UCF since 2004.

**FUTUR E**

She has a way of mentoring cadets and pointing out things they might not be doing, but she has a much more important role in the program. For example, she explained the program very well to the cadets, as they are doing it for the first time in 10 years. She is a great worker and a wonderful person to talk to, and she always knows what to do.

**FUTUR E**

She is the face of the detachment when cadets come through the door. Even though Fioramanti serves in the office manager position, she feels the year atmosphere engineering major is her true calling, and she enjoys the “pace” of the detachment. In this role, Fioramanti is always on her toes, and she is always ready to help when they get to know Marty.

Parking Services

Permit Regulations:
A permit is required for all motor vehicles parked on campus.

Permits MUST be ordered online, and can be picked up at the South Garage or mailed to your home.

Daily permits are available.

Vehicle assistance offered by Parking Services:
• Jumpstart your car
• Call a tow truck
• Inflate tires
• Give directions

Parking Services Hours:
Mon-Thurs: 7:30 a.m. - 6 p.m.
Friday: 7:30 a.m. - 5 p.m.

How to get your parking permit
1. Order your parking permit online at www.parking.ucf.edu (complete instructions are online)
2. Pay for your permit:
   • Avoid the lines. Pay online with Credit Card and have your permit mailed to you.
   • Pay online and opt to pick up your permit.
   • Pay with personal check, cash, or Credit Card at Parking Services Office.

Your permit must be ordered online!

the others are 16 and 17. Prosecutors say each faces a charge of sexual battery on a physically incapacitated person. If convicted, they could be sentenced to as many as 30 years in prison. They are being held at the Palm Beach County jail on bonds ranging from $40,000 to $70,000.

A defense attorney for one of the 14-year-olds calls the charge "Shocking." The four boys, another 15-year-old and an 18-year-old are accused of getting the two girls drunk on New Year's Day, then assaulting them. The girls, 13 and 14, the 18-year-old girl faces adult felony battery charges, have been posting at a $300,000 bond.

Man charged with kidnap, slaying of Charlotte County woman

NORTH PORT — A man suspected of abducting a Charlotte County woman last Monday, is being accused of abducting 23-year-old Danielle Amber Lee from her home last week, killing her with a single gunshot and burning her body in a shallow grave.

Police captured King shortly after Leo made a 911 call from his cell phone. He offered to lead them to the call, the mother of two of his children, he said, called her to say she was free.

Her body was found the next day after a massive search.

North Port is south of Sarasota.

6 foreign ministries expected to debate UN resolution on Iran in Paris

— The U.S. Security Council's five permanent members and Germany are expected to agree Tuesday on a new resolution to pressure Iran over its nuclear program, a French diplomat said. But a U.S. official said differences over the final text remained.

The senior French diplomat, who briefed reporters Monday on condition that his name not be used, said an agreement was very close and should be finalized by the six foreign minister's foreign affairs meeting in Berlin Tuesday.

However, others were more cautious about what the talks could produce.

A Western diplomat said a compromise for a third resolution has slowed since a U.S. intelligence assessment last week that Iran had stepped active work on a nuclear weapons program in 2002.

A senior U.S. official said on Sunday that negotiations had made some progress in negotiating a new draft or a flurry of weekend conferences in Baghdad last week left differences still exist.

In its last condition of appropriateness, the talks' ongoing talks' table, but a Western diplomat said it was not clear if agreement could be reached by Tuesday morning.
Seminar brings nation's brains

KEITH SPENCER

Scientists and brain experts from around the world will gather Jan. 28 through 30 to discuss the latest research and medical advancements.

The Second International Brain Conference at the Rosen College of Hospitality Management is being organized by UCF School of Biomedical Sciences professor Dr. Kiminobu Sugaya. The conference will focus on research and treatment techniques for brain injury and genetic disorders.

"This conference's main focus is Alzheimer's, and not just Alzheimer's but brain research," Sugaya said. "The main thing is, in many areas, and that way the differential diagnosis in this area can be exposed to state-of-the-art research."

Sugaya has been part of the UCF School of Biomedical Sciences for four years. His main focus of study and their relation to neurodegenerative diseases such as Alzheimer's and Parkinson's.

Ultimately, participants at the conference will have the opportunity to experience a unique exposure to the entire spectrum of brain research.

The various lectures will cover topics such as autism, traumatic brain injury, brain tumors and the aging brain. In addition to the focus on Alzheimer's, other lectures will also include treatment of neurodegenerative diseases such as autism.

Although the main focus will remain on Alzheimer's disease research, this year the conference will be extended to cover developmental disorders, such as autism.

According to the Autism Research Institute, more American children than ever are now infatuated with autism.

Since the early 1990s, the rate of autism has increased exponentially around the world with figures as high as 1 in 60 in every 10,000 children. Boys outnumber girls 4 to 1. In 2007, the Centers for Disease Control and Prevention reported that 1 in 159 children are diagnosed with autism.

There is an urgent need for investigation of the brain's role in this and other developing disorders. An increased understanding of development is key to understanding the regeneration of the brain in these conditions.

This conference will also explore the relationship between the aging brain and proliferation.

"Regeneration Through Generations" is the theme of this year's conference. As in name implies, the three-day event will provide participants with the opportunity to learn more about regenerative therapy for neurological diseases over the course of a lifetime.

Experts in attendance will be traveling from nations around the world, including Australia, Japan, Germany, France and Sweden.

Physicians, scientists, medical device manufacturers, nurses and students will all benefit from this highly anticipated gathering of knowledgeable medical researchers and scientists by learning about the absolute latest in brain research and practices as well as future applications.

"This is a great event to get researchers together and research ideas and results," Manny Vrotsos, a biomedical science Ph.D. student, "I think it's good that we are bringing (researchers) to Orlando for a main conference on a smaller scale and a more informal setting."

Sugaya said that every year, they bring in a guest and this year's guest researcher will be Dr. Melvin Field. "The Karolinska Institute in Sweden is one of Europe's largest medical universities. Founded in 1821 and located in Stockholm, it is one of Sweden's largest centers for training and research, accounting for 30 percent of the medical training and 40 percent of the medical academic research conducted nationwide," Sugaya said. "This year's international brain conference will be slightly different from last year's conference. Last year's gathering featured a showcase of deep brain stimulation of a Parkinson's disease patient. Sugaya explained that this year, researchers will be discussing more about regeneration of a brain affected by degeneration."

"Last year, we reported that we can fix the brain using the patient's own stem cells," Sugaya said. "So our technology is not only embryonic stem cell-like cells from the bone marrow and stem cells. That is what we established."

"When we transplant these cells into the brain, we will try to get the neurons in these cells to be good memory and behavior animals, not the human yet."

"Our conference will also welcome representatives from the Regional Health Care, the Alzheimer's Resource Center and the Alzheimer's Association of Central Florida on the map as a center for medical advancements and research."

"It will be a very exciting meeting for anyone interested in neuroscience or future medicine to attend."
Congress crafting economic stimulus package

WASHINGTON — Congressional Democratic leaders said Tuesday that they feel urgency to enact an economic stimulus plan and are confident they can work with President Bush to craft it.

Pelosi said that the Democrats have their hands on those who will do it. "Does it put money into the economy? Does it stimulate the economy?" Pelosi asked. "So whatever it is, let's get something done quickly," Reid said.

The president has broadly outlined a stimulus plan that would include tax cuts for individuals and businesses, unemployment benefits and food stamps. He said any plan, be it effective, would need to represent roughly 1 percent of the gross domestic product, or about $60 billion.

"I'm also optimistic that we can hopefully get something done quickly," the president said as the session began. "I just wonder how many people, when they get sub­prime mortgage, know what they were getting into," Bush said. Despite the economy's woes, he said he was confi­dent in the long-term strength of the U.S. economy.

"I think the prime thing is that both parties want to find a solution, said Majority Leader John Boehner of Ohio, Republican Minority Leader Harry Reid of Nevada. The congressional leaders feel an urgency to enact a stimulus plan for the economy and are confident they can craft it quickly, before lawmakers leave for the Presidents' Day recess.

"I was very encouraged by the way that both parties have come together," Bush said. "I'm also optimistic that we are getting something done quickly." Pelosi said.

"I've got reasonable confidence," the president said. "I'm also optimistic that we can hopefully get something done quickly." Pelosi said.

"I'm optimistic that we have an opportunity to do something together," Reid said.

Last year, both parties in Congress failed to agree on an economic stimulus bill, discussed details with top lawmakers in both parties in advance of the meeting between Bush and leading lawmakers.

"We've been very encour­aged by the way that both parties have come together," Bush said. "I'm also optimistic that we will make sure it gets done right," the president said. "I'm also optimistic that we have an opportunity to do something together." Pelosi said.

The Senate Majority Leader Harry Reid said the goal is to get a deal through Congress and on Bush's desk within three to four weeks before lawmakers break for the Presidents' Day recess.

"I really feel that we have an opportunity to do something together," Reid said.

Earlier, Bush said he was confident that Congress and the administration will be able to approve a stimulus package that adds to the strength of the U.S. economy and calms fears of a recession that have shaken financial markets worldwide.

"I'm optimistic that we can hopefully get something done quickly," the president said. "I just wonder how many people, when they get sub­prime mortgage, know what they were getting into," Bush said. Despite the economy's woes, he said he was confi­dent in the long-term strength of the U.S. economy.

"I think the prime thing is that both parties want to find a solution," Bush said. "I was very encouraged by the way that both parties have come together," Bush said. "I'm also optimistic that we are getting something done quickly." Pelosi said.

UCF prides partnerships

value of research debated

square feet devoted to the Army Research Institute.

However, UCF students have varying opinions about the university’s ties with the military.

"The fact that the university has a particular government agency

involved in the program is something that students need to be aware of.

Students for a Democratic Society is an example of one group of students

that doesn’t support the university’s partnerships with the military.

"They use our educational resources to train the military, but they don’t do anything to support the students who are involved in those programs."

Another reason some students oppose UCF’s partnerships with the military is because they believe the university is being used as a tool for the military’s propaganda.

"The university is allowing the military to use its resources and facilities to promote their own agenda. This is a form of co-optation, where the university is being co-opted by the military for its own purposes."

UCF students argue that these partnerships are exploitative and that the university should be focused on promoting education and research, rather than serving as a tool for the military.

"The university should be investment in research and scholarship that addresses real-world problems, rather than partnering with the military to further their own goals."

Faculty rankings and student experiences

UCF is consistently ranked among the top universities in the nation, and it offers a wide range of academic programs.

"UCF is a great university, and it has a lot to offer students. The faculty are knowledgeable and passionate, and the campus is a great place to learn."

However, some students argue that the university could do more to support student research and innovation.

"UCF needs to do more to support student research and to provide opportunities for students to pursue their own interests. The current system is too focused on producing graduates who meet the demands of the job market, and not enough on fostering a culture of inquiry and discovery."

UCF is home to a variety of research centers and institutes, and it offers a range of programs in fields like digital media, engineering, and health sciences.

"UCF is a great place to be if you are interested in research and scholarship. The university has a strong record of producing top-quality research, and it offers many opportunities for students to get involved."

Overall, UCF is a dynamic and innovative institution that offers a lot to its students and the community.
Rodriguez said. "They have the flexibility to choose which seats they want."

"We were trying to offer more things with easier access for students," Rodriguez said. "Online access to the tickets is a major benefit to those who purchase tickets.

"The students are not disadvantaged to one set price," Rodriguez said. "They have the flexibility to choose which seats they want.

At another element to bring students and faculty members to the games, the UCF pep band, dance team, and cheerleaders will perform at some games. They all have been working with the Orlando Magic organization for about three seasons.

The pop band, when featured at the games, sits in the Orion section and provides live entertainment for Magic fans during the pre-game period, timeouts and halftime. The cheerleaders and dancers, on the other hand, are provided a six-minute showcase during halftime to perform for fans.

"The Magic games allow students and their families to showcase their talent," said Shelly Driggers, assistant director of basketball operations for the Magic. "It gives them the opportunity to perform and run through their routines to get all the bugs out and be ready for their competitions where they are actually going to be judged."

Along with entertaining the fans, the performers are also enjoying their night, Driggers said.

"They are getting to be a part of the Orlando Magic and our culture," she said. "Performing during the games allows them to practice and hone their craft, along with being able to enjoy their time at the games."

Driggers and Rodriguez said they are both hoping for a strong turnout of students and faculty for the upcoming games.

Rodriguez said that the games "are just fun activities that a lot of students haven't taken advantage of."

"To have an NBA team in Central Florida is a great opportunity, and we want to get UCF out there in the community so people are aware that UCF is a wonderful university," she added.

To purchase tickets, visit ucfticketsmaster.com. For group ticketing, contact Audrey Rodríguez at 407-905-2905.
C-U.S.A GAME: UCF 71, ECU 66

Taylor leads for dear team
spent the first five minutes of the game against the Pirates, but held on for a 71-66 win. The Pirates had missed their first 14 shots from the floor.

The Pirates didn't get their first point until for their first 14 shots from the floor.

UCF guard Terrance Mann takes a shot over Tulsa's Jerome Jordan during the Knights' 97-91 win on Jan. 12. Noel scored 14 points against the East Carolina Pirates on Saturday.

After letting a 22-point lead slip away, Knights pull out a win against Pirates

BRIAN MURPHY

The Knights let a 22-point lead slip away against the Pirates, but held on for a 71-66 win. The Pirates had missed their first 14 shots from the floor.

Taylor scored the first point to give the Knights a 2-0 lead, but then the Pirates took advantage of the Knights' six turnovers. The Pirates didn't get their first point until for their first 14 shots from the floor.

Taylor scored UCF's next 11 points to give the Knights a 22-point lead. The Knights kept going with a 14-2 run, paced by three 3-pointers from guard James Tindall. After letting a 22-point lead slip away, Knights pull out a win against Pirates

And the Knights kept going. After center Stanley Billings scored a couple of baskets, Taylor scored UCF's next 11 points to give the Knights a 22-point lead. The Knights kept going with a 14-2 run, paced by three 3-pointers from guard James Tindall. After letting a 22-point lead slip away, Knights pull out a win against Pirates

Taylor scored the first point to give the Knights a 2-0 lead, but then the Pirates took advantage of the Knights' six turnovers. The Pirates didn't get their first point until for their first 14 shots from the floor.

Taylor scored UCF's next 11 points to give the Knights a 22-point lead. The Knights kept going with a 14-2 run, paced by three 3-pointers from guard James Tindall.
Knights earn first Conference USA victory

Lewis adds to her rebound total with 11-board effort against the Rice Owls

PAM BASB

It took a combined effort from guard Jelisa Caldwell, forward Stephanie Nickitas and freshman center Jenny McNicol to help the Knights pull away against Rice, but the UCF Women's basketball team didn't need anyone else on its side to win its first Conference USA game, defeating Rice Owls 65-59 on Senior Day.

"We got stops, and we convert­ed," Williams said. "We had good offensive possessions and didn't turn the ball over. I think in the second half we had only six turnovers, which was fantastic. Again, that was the difference in the run, and we talked to our team about that if you want to win games you have to play defense." That same defense that caused 17 turnovers, plus 9.2 on the season,

The Knights' offense, which shot 32.4 percent for the game, seemed to struggle from inside and outside the arc. They made just 2 of 11 shots from 3-point range and 13-22 from the free-throw line.

The Knights, who turned it over 20 times against Tulsa and had 16 second-half turnovers, coupled the ball up only six times under the rim during that stretch.

"We talked about defense and the fact that things aren't going to change if we don't improve," Williams said. "It's like looking at a game and then another thing breaks down, and I think when we can get it all together and have everything fixed and solid, we will be a very good basketball team." The Knights seemed to have figured out one of the keys to having their longest losing streak of the game at 20-16 with 706 remaining. Led by guard Twiggie McNicol, who had a game-high 23 points, the Owls went on a 20-9 run to close the half and hold a 9-6 lead at the break.

The Owls came back to extend the lead at the break.

The Knights also had a span of 12 unanswered points. "There was a stretch that we scored on six straight possessions and that was the biggest reason..." Williams said. "I don't think that's the bottom line...it wasn't that we didn't get offensive stops. We got defensive stops as well. It was all about how we got to defensive stops when the game was tight like that..." But we didn't get stops, it moves more and more pressure on our offense."

The Knights offense, which shot 32.4 percent for the game, seemed to struggle from inside and outside the arc. They made just 2 of 11 shots from 3-point range and 13-22 from the free-throw line.

The Owls committed 14 turnovers during that stretch. "It was defensive stops..." Caldwell said. "We had to do a lot of things..." However, the Knights' defense was just too much for the Owls to overcome. "I thought we did a great job of contesting shots, and..." Williams said. "We have to learn the way we came out and played..." The Owls will hit the road to face Southern Miss on Friday at 7 p.m., before they start a four-game home stand when they welcome Marshall to the New UCF Arena on Jan. 31.

Women's tennis gets performances in perfect conditions

Pam Brown

If the UCF Women's Ten­nis team's only run to play perfect tennis this season was its transition from No. 1, it was certainly possible at the Florida Golf Coast ME John Kriek Classi­cals over the weekend. In the clinch-format format — wherein the results did not affect UCF's team record — did count toward individual selections — the Knights went 15-7 in singles matches and 10-4 in doubles matches in a tournament that featured No. 1, No. 3 and No. 4 Florida Interna­tional, No. 2, No. 3 and No. 4 Michigan State, No. 10 Ohio State, Stetson, FGCU and Delaware.

"I'm really happy with the way we came out and...we lost," Brown said. "It was our first time really having a chance to go to a tournament and..." However, the Knights did today, then really good things will happen to this team, and we need to do a better job of getting the ball to the correct spots, and we have to work on..." The Knights' offense, which shot 32.4 percent for the game, seemed to struggle from inside and outside the arc. They made just 2 of 11 shots from 3-point range and 13-22 from the free-throw line.

The Owls came back to extend the lead at the break.

"This was a great win for..." coaches Nickitas and McNicol, who actually were perfect throughout the tournament.

McNicol was 3-0 in her singles matches, and the freshman joined teammate Jenny McNicol for a doubles team of 3-0. McNicol said he never set a last in the tournament, and in his one set in which the opponent had less than four points, he had an upset win in his first match of the tournament, a 7-5, 6-4 victory over Wichita State's Anna Egorova.

McNicol said he shut down Florida's Egorova, 6-3, 6-1 and Florida International's Maria Martinez behind 6-4, 6-4 for her other singles win. The freshman then defeated the senior partner, Jenny McNicol for a doubles team of 3-0. McNicol said he never set a last in the tournament, and in his one set in which the opponent had less than four points, he had an upset win in his first match of the tournament, a 7-5, 6-4 victory over Wichita State's Anna Egorova.

The Owls came back to extend the lead at the break.

IU head coach Bill Hair, second from left, has earned his 15th win of the season with his benchmark 6-3, 1-0 victory over Wichita State's Florentina Sinque. The Owls are 13-1 overall and lost their first two Conference USA games, but things are turning the tide for the Owls, who are tied for 1st in the season. Williams and her Knights will get another win today in Coastal Bend.

Free throw shooting secures UCF win

FROM AlO

Taylor put the Knights back up by two, but Legan hit another 3 on the Pirates' next possession to give them their first lead of the game. Guard Brock Young's jumper the next time down the court put the Pirates ahead 54-51 with five minutes to play.

The teams battled back and forth for the next few minutes, but consecutive 3-pointers from guards Dave Noel and Mike O'Donnell gave the Knights a 63-58 lead with one minute left.

"If we didn't make those free throws, the game could have went any way," Taylor said. "We could have maybe lost. We've been working on our free throws during the break. We came in and shot 100 free throws a piece, so we've been working on that.

Taylor led the Knights in scoring for the 14th time this season. He is averaging 24.3 points per C-USA game, and the Knights are now 3-0 in conference play since the 2003-2004 season.

Legan led the Pirates with 20 points in a reserve role. He was 6-of-13 from beyond the arc.

Sunday Fundays!!

"I am proud of how our guys showed their maturity by staying calm after losing the lead," UCF head coach Kirk Speraw said in a press release. "East Carolina is much improved and this was a good win in a tough place to play. We retained our poise and came up with some big shots and big plays down the stretch."

The Knights and Miners will meet tonight in the New UCF Arena. Tip-off is scheduled for 7 pm.
Opinions

Central Florida Future

The Democratic National Convention and all those presidential frontrunners have made Florida a battleground state of Florida. We as voters should realize that if we don’t vote, we may not have a say this November.

Our problems

something as seemingly harmless as requiring the Florida Department of Health to notify the presidential candidate of an outbreak of meningitis. In September, the Florida Democratic Party held its presidential caucus on Jan. 29. Eight out of 30 Democratic delegates went to DNC, who imposed harsh sanctions. Seventh and first-year students that traditionally support the DNC and the candidates of the party have campaigned in Florida.

In this case, the Florida Department of Health is not the primary focus; the candidates are. It is their decision on how to handle these epidemics of meningitis.

So, what can we do? We can vote. We can vote把自己広げて。でも, 言葉が無くなると, はかれるほどに, 傾けを, 言葉が, 傾けを, はかれるほどに, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを, 言葉が, 傾けを,
