Student treated for meningitis bacteria

Alert released to anyone in close contact

According to the Health Services report, Kelly and her family have been in close contact with one possible source and are being monitored by coordinating their schedules to better inform the UCF community.

UCF spokesman, Grant Harris, said the Orange County Public Health Department informed the following:

"There is a risk of having meningococcal meningitis when someone is in close contact with an infected individual, and this can occur even if this person is asymptomatic.

"UCF recommends that students and faculty who have been in close contact with Kelly between 10-10:30 a.m. Thursday to visit the Wellness Center Classroom of the Recreation and Wellness Center to be tested for meningococcal meningitis.

"The test is a simple oral swab that takes about 10 minutes to process.

"If the test is positive, students and faculty will be provided with antibiotics to take immediately to prevent the spread of the disease.

"If the test is negative, students and faculty will be provided with information on how to prevent the spread of meningococcal meningitis.

"If you have been in close contact with Kelly, you should visit the Wellness Center Classroom of the Recreation and Wellness Center to be tested for meningococcal meningitis.

"The test is a simple oral swab that takes about 10 minutes to process.

"If the test is positive, students and faculty will be provided with antibiotics to take immediately to prevent the spread of the disease.

"If the test is negative, students and faculty will be provided with information on how to prevent the spread of meningococcal meningitis.

"If you have been in close contact with Kelly, you should visit the Wellness Center Classroom of the Recreation and Wellness Center to be tested for meningococcal meningitis.

**DIANA FORKS (School of Journalism)**

A blue, 6-foot-tall yo-yo weighing 820 pounds sits at the entrance to the Orange County Regional History Center. Fully functional, it holds the Guinness World Record for the largest yo-yo ever created.

On Saturday afternoon, entertainment enthusiasts gathered in the History Center to break their own record; the most people using one yo-yo in one place at one time.

The giant yo-yo inspired the desire to break the previous record of 626 people yo-yoing at once. Event coordinating at the History Center decided to raise money and-related the help of the UCF Campus Activities Board to do so.

Along with other businesses, CAB and the UCF Student Government Association cosponsored the event. The goal was to raise funds for UCF students to attend, they propose.

Scholarships offered by SGA

NATALIE COSTA

The Student Government Association is offering several scholarships for students who meet the criteria.

Sara Johnson, a senior in the College of Liberal Arts and Sciences, was awarded the Presidential Scholarship. This scholarship is available to full-time students who have a minimum GPA of 3.5 and have completed at least 60 credit hours.

The John and Mary Smith Scholarship is available to students who are enrolled in the College of Business Administration and have a minimum GPA of 3.2. This scholarship covers tuition and fees for one semester.

The Vincent Carr Scholarship is available to students who are enrolled in the College of Health and Human Sciences and have a minimum GPA of 3.0. This scholarship covers one year of tuition and fees.

The SGA Alumni Scholarship is available to students who are enrolled in any college and have a minimum GPA of 3.0. This scholarship covers one year of tuition and fees.

In addition to these scholarships, the SGA also offers several other opportunities for students to earn money through various programs.

LYNX meets for a greener future

JESSICA TUGGLE

The future of public transportation is being discussed at the LYNX seminar, where attendees were able to learn about the various options available for transportation in the Central Florida region.

Steve Berkowitz, Assistant Vice President for Transportation and Planning, was concerned about the lack of a bus route in Avalon Park. He suggested that there may be a need for additional routes in the area.

Tessah Ivey, a junior in the College of Arts and Sciences, presented a plan for a new bus route to be added to the Central Florida region.

The LYNX budget is $10 million, with $2 million being allocated for operations. This money is used to pay for services such as maintenance and advertising.

The LYNX system includes 17 routes that serve over 300,000 riders each year. The system is expected to have a budget of $30 million by the year 2020.

The LYNX system has a number of benefits for the community, including reducing traffic congestion and improving air quality.

The LYNX system is also an important component of the Central Florida region's transportation network.

In conclusion, the future of public transportation is an important issue that needs to be addressed. The LYNX system is an important component of the Central Florida region's transportation network, and it is important to ensure that it remains a viable option for residents.

PREVENTION

Meningococcal meningitis typically results from contact with infected individuals. Common bacterial or viral agents that can cause meningitis are spread through inhaling, coughing, sneezing, or sharing eating utensils, handshakes or a cigarette. Those at increased risk may be those who live or work with someone who has the disease.

Cardinal hand washing is important to avoid exposing others to infected agents. Teach your children to wash their hands often, especially before they eat and after playing with a pet, spending time in a crowded public place or getting on or off a bus. Remind them to wash their hands by-poundinig both the front and back of each hand with soap and rinsing thoroughly under running water in addition to maintaining your own hygiene by getting enough rest, exercising regularly, and eating a healthy diet with plenty of fresh fruits, vegetables and whole grains.

3. Prevent meningococcal meningitis by persevering the following recommendations:

Hospital infections type b (HIB) vaccine. Children in the United States routinely receive this vaccine as part of the recommended schedule of vaccines starting at about 2 months of age. The vaccine is also recommended to serve adults, including those who have sickle cell disease or AIDS, and those who don't have a spleen.

Pneumococcal conjugate vaccine (PCV7). This vaccine is the part of the regular immunization schedule for children younger than 2 years in the United States. In addition, it is recommended for children between the ages of 2 and 18 years at an elevated risk of pneumococcal disease, including children who have chronic heart or lung disease or cancer.

Pneumococcal polysaccharide vaccine (PPV). Older children and adults who did not protect from pneumococcal bacteria may receive this vaccine. The Centers for Disease Control and Prevention recommends the PPV vaccine for all adults who live or work with someone who has the disease.

Meningococcal conjugate vaccine (MCV4). The Centers for Disease Control and Prevention recommends that a single dose of MCV4 be given to people aged 11 to 18 years who haven't yet been vaccinated.
Local blood used locally

By R.I.

"It's the last right thing to do; it's no skin off my back," Graham said. "I have no idea effects to giving blood. It's just a thing I do every now and then, and it helps out a lot of people.

After all collecting, the blood is transported to the Florida Blood Centers laboratory, where it is broken down and divided into plasmal and blood cells.

Plasmal and blood cells are most frequently used in emergency rooms with trauma patients and surgeons. However, transfusions are often offered by cancer patients. For instance, platelet counts are lowered by treatments such as chemotherapy and radiation.

Plasmal can be used in several ways, most commonly in pharmaceuticals that can help treat diseases and disorders like rheumatoid arthritis and Alzheimer's disease.

"The first time I gave blood I didn't know what to expect with the needle and everything." Graham said, "But as soon as I laid down and put my arm up and put the needle in, it was fine. It was almost better than expected first of all, but it all faded away once I regimented. Oh, that wasn't bad at all."

Every drop of blood donated locally is used locally and in Central Florida's Blood Centers serves all of the Blood Centers in Central Florida, including those in Volusia and Brevard counties, along the coast and up to Orlando.

"Basically we need everybody to come in and don't forget," McDonough said. "If you've never tried it before and you've always thought about it, it's a good way to give back to your community because it is going to the local hospitals. So, it is something you can feel good about, giving your liver and your heart being.

The process takes anywhere from 45 minutes to an hour. Actual donation time is anywhere from 3 to 12 minutes; however, before any blood is drawn, potential donors must

Student volunteers work the poll

According to Civic Learning and Engagement, the youth vote, ages 18 to 21, seems to be on the rise toward Barack Obama.

"Our generation is focused on higher education," said Kami, the New UCF SGA elections coordinator. "Youth people seem very interested in health and medical history, and people with low iron levels cannot donate blood.

"The most common reason people are deferred from donating is low iron levels in their blood.

"If as many people as I can to get," Graham said. "I've gotten a few people in my building and my mother, she's scared to death of needle. She goes when she can, though every now and then, and she, he said it pressure's too high, and they won't let her do it.

"You should come donate blood before the election, she said.

"If you can, you should," he said. "I can't, but I have family who can donate should."

"Even if you're a little scared," he said.

Knights' streak ends versus SMU

BY BRAND WASS

The UCF Men's Basketball team appeared to have everything going for them in its second game against SMU. The Knights were on a five-game winning streak and up 39 points in their previous game. A win could mean an NCAA at-large berth.

But the Mustangs were too much for UCF. SMU came back to win, 69-67, snapping the Knights' streak and putting their season in perspective.

UCF guard Dave Noel tallied 12 points and four rebounds in the Knights' 84-62 loss to SMU on Saturday.

UCF forward Chip Cartwright and forward Robert Vaden are among the team's top players. Both have been consistent contributors throughout the season.

UCF will begin its five-game home stretch against Southern Miss on Wednesday. The team needs to win several games to have a chance at an NCAA at-large berth.

UCF falls to Southern Miss

BY BRAND WASS

The last time the UCF Men's Basketball team faced Southern Miss, they were on a five-game winning streak. Now, the Knights are struggling to find their rhythm.

UCF guard Pauline Love led the Knights with 12 points in their 84-62 loss to SMU on Saturday.

UCF forward Dave Noel tallied 12 points and four rebounds in the Knights' 84-62 loss to SMU on Saturday.

UCF Men's Basketball team needs to win several games to have a chance at an NCAA at-large berth.

men stopped by storm

Women's tennis

The UCF Women's Tennis team visited the Florida Gators on Thursday and the result wasn't any different from the last three times the two squads faced off. It was the second losing song for the Knights, as they were just 7-02 in matches played against Gators for their first loss of the season.

The doubles action started off Florida's Julia Collins and Anas Salem to take the tie with Tichivo Bledsoe and Anna Tapekakoski. 6-3.

Stony Trehed and Kyla McNicol lost 6-4 to Megan Alexander and Marlot Boon,

At singles, Mountain's match against McNicol set the tone for the Gators. Boonstrom beat McNicol 6-0, 6-0, ending McNicol's four-match win streak.

Valdemanovsky's match against Bledsoe was evenly similar, as Boonstrom also won in straight sets 6-0, 6-0.

Is Olazagutz, who had won five of her past six matches, was doused 6-4, 6-4 by Fringsheim.

Petrie, who along with McNicol was the other half of the win streak, lost her singles match to Florida Gulf Coast Classic, as she was the first Knight to go down, 6-2, 6-1.

The second half of the match, which Bledsoe and Walch gave Alexander a match her money but fell 3-6, 6-0.

Men's tennis

The UCF Men's Tennis match Saturday against No. 11 Rice was supposed to be a chance for the Knights to boost their early-season success.

"The Rollins counseling program exceeded all my expectations."

Evening graduate classes are taught by nationally recognized professionals. Comprehensive in mental health counseling including psychology and psychotherapy, cognitive-behavioral techniques, and a variety of other special clinical experience. College—graduates in any major can apply. Scholarships are available for qualified individuals.

They did against Rice. Southern Miss was able to convert six UCF turnovers into points and eventually open up the score to 23-3. "We just did not come out very aggressive in the first half," Williams said. "We talked about it at the break. We missed shots defensively and limiting them in transition. The last time they went on a run, they got a lot of easy baskets and we didn't answer that."

Led by D'Nay Daniels, who had 11 points and two steals in the game, the Knights were able to claw back into the lead with a 6-0 run of their own to pull to within 25-9 with 8:06 remaining in the half. Southern Miss tied the game at 42-22 on a 3-pointer by Brittany Johnson with 1:19 left until the break. The Golden Eagles hit another one from beyond the arc before UCF's Mandrey White made a basket to make it 45-24 heading into halftime.

Despite the deficit, UCF was able to hold Love to only 12 points in the half. "We just have to contest every shot the block and crowd that left shoulder, because that is her favorite thing," Daniels said. "We just had to box her out on offense and defense because she is very active around the boards and very quick and athletic." Love was able to score five of her team's first seven points of the second half as Southern Miss went on a 7-2 run to extend the lead to 52-26. An Andrea Barber jumper with 10:38 remaining on the clock put the Knights out of reach.

Williams knew that no one on the Knights in the interior. In the Knights' absence, Southern Miss ran off a 15-4 run, giving the Knights their fifth loss in the last six games. "We kind of went back and had a couple of turnovers and didn't get stops, and then they opened the lead back up to 15. The thing that this team is learning is that when we get the lead, we have to defend, and we have to play with a sense of urgency," Williams said. "We didn't make the shot, we didn't get the boards, and we were just hitting shots. That is what we did in the second half."

Then the Knights went cold, scoring only four more points the rest of the way, as Southern Miss ran off a 15-4 run to close out the game and hand the Knights their fifth loss in the last six games. "We did not block out on some occasions, and they had second-chance opportunities, and we scored. We know that defensive transition and rebounding was a big key for us, and second-chance opportunities, and we didn't get that done tonight."

For the second consecutive game, the Knights fall into an 0-0 hole to begin a game, but this time they couldn't recover. "We just needed to get back, reeling off an 18-point run over the last 40 minutes. We had a couple of stops, we get back-to-back stops, we are in the game. That's what we came out and did in the second half," Daniels said. "We were just clicking, and we were making shots, getting baskets and pushing the ball (up the court). When we play our game, that is how we get runs, and that is what we did in the second half."

Knights stopped by the name of Love in blowout

EXECUTIVE BRANCH

We are currently looking for a graphic designer to help advertise and promote SGA to the student body:

ARE YOU A GRAPHIC DESIGNER?

IF YOU'RE INTERESTED STOP BY THE SGA OFFICE (STUDENT UNION ROOM 214)
Paul is fresh start for Republicans

Brach Obama is a condidate who fully supports the Republican Party on every issue and is a candidate who is a fresh face and a fresh breath of fresh air. He's a fresh face and a fresh breath of fresh air. He's a fresh face and a fresh breath of fresh air.

Obama stands for Democratic policy

Framework Convention on climate change

The proposed caps are not designed to reduce emissions, but rather to create a market for carbon credits. In fact, the proposed system would allow companies to create fictitious credits to offset their own emissions.

Drunk or high?

The modern hypocrisy

I have a problem. I am a criminal who, if caught, could spend at most 12 years in jail as a result of a violent crime. I will make it known that I will strike it again.

What effect has working pressure had on you? For example, you are beyond any shadow of doubt, the god of poetry. Hasn't really got blues singers.

Drunk or high? The modern hypocrisy

In the early 1990s heroin was legal, and the official viewpoint was that it was a healthy tonic. Cocaine was legal until the late 1990s.

We feel that Obama's record of campaign finance reform is a good thing for the nation's future.

We think that these are progressive and long-overdue plans that will reap benefits for the nation for many years to come.

We have been non-supportive of Obama's program as a whole, yet he has been a fresh face and a fresh breath of fresh air for the nation's future.
CAMP COUNSELORS WANTED!

TRIPP LAKE CAMP
